

Massey Transfers to UoA.

Massey Mechatronics Students:

For Students completing P1 at Massey – limited places at UoA into P2

Mechatronics is a very popular specialisation for UoA students and will have priority for UoA Part 1 students.

- Will require ELECTENG 101 at UoA (summer semester) – other courses can be credited.

If students completing Part 1 wish to change their specialisation to another UoA specialisation this would likely be able to be accommodated.

- If switching to Mechanical, Computer Systems (or Electrical & Electronics) – will require ELECTENG 101 at UoA (summer semester)
- Civil, Structural – would credit P1
- Chemical & Materials - requires CHEMMAT 121 – Materials Science.

For Students completing P2 (or above) at Massey – *can only accommodate 2-3 students.* (programme full). Will require an individual assessment to assess credit.

GPA for Mechatronics will need to be above the typical entry to Mechatronics at UoA – above 6.5.

Other specialisation would be lower GPA.

Note: There will be no capacity for transfers to Software Engineering.

Massey Electronics and Computer Engineering:

For Students completing P1 at Massey can consider for Electrical & Electronic or Computer Systems (or can consider other UoA specialisations as above).

GPA For Computer Systems will need to be above the typical entry to Computer Systems at UoA – above 4.

Will be places for Electrical and Electronic specialisation.

Students entering into Computer Systems and Electrical & Electronics specialisations will require ELECTENG 101 to be completed at UoA (summer semester).

For Students P2 or higher, will require further assessment – will credit as much as is in common with UoA.

Massey Chemical and Bioprocess Engineering

For Students completing P1 at Massey can accommodate into Chemical and Materials

Student will be required to complete CHEMMAT 121 – Materials Science and can credit other P1 Massey courses. (CHEMMAT 121 not required at Summer semester but is a pre-requisite for a P2 course.)

As above, completing P1 at Massey can consider other UoA specialisations.

For Student completing P2 or above – can be accommodated, but will need individual assessment for credit. (Will require the Materials courses at UoA).

Further Notes:

- All applicants will require **Semester 2 grades and transcripts to complete application processing and credit confirmation.**
- Students at P4 level – if required, can consider completing UoA courses to complete the Massey degree.
