2025 MASSEY UNIVERSITY CALENDAR | MARAMATAKA

THE ARMS AND COLOURS OF THE UNIVERSITY TE TOHU ME NGĀ TAE O TE WHARE WĀNANGA

By the authority of the Duke of Norfolk, Earl Marshal and Hereditary Marshal of England, the Kings of Arms assigned arms to Massey University on the 10th day of May 1967. The arms are defined as:

Gyronny of 10 argent and azure a mullet gules fimbriated argent and irradiated or and for the crest on a wreath of the colours issuant from flames proper a ram's head argent horned and ensigned by the horns of the African long-legged ram.

On a scroll appear the words 'floreat scientia', which means, translated from Latin, 'Let knowledge flourish'.

The symbolism of the design is interpreted as follows:

The star is from the Arms of New Zealand. Here it also represents knowledge and learning and so has been irradiated. It is in the centre of the shield, being the central theme of the University. The background, a gyronny of 10 pieces in blue and white, represents the 10 degrees first offered by the University. The crest is the ram's head that was used in former years by the students' association. This, with its four horns, is unusual and memorable and provides a link with agriculture and the former college. There are many ram's head crests used in heraldry, so this one is made distinctive by proceeding from flames of learning. The flames also suggest, phoenix-like, the idea of a new body being born out of an old.

The University colours and their British Colour Council reference numbers are:

	BCC Name	BCC Number
University blue	midnight	90
Light blue	forget-me-not	84
White

University Council

Massey University's governing body is the University Council. Council members include lay, academic and student members and are responsible for overseeing the management and control of the affairs, concerns and property of the University. Its Chair and ceremonial head of the University is the Chancellor, elected by Council from within its ranks. The University Council is established consistent with Sections 271 to 283 of the Education and Training Act 2020.

The Council

Appointed by the Minister of Education

Ross Buckley BBS, FCA, FCPA

Pro Chancellor of the University, Angela Hauk-Willis MA *Freiburg im Breisgau*

Jo Davidson BHortSci

Mark Ratcliffe, BSc Accounting, *University of Huddersfield*, CMinsD

Vice-Chancellor of the University

Professor Jan Thomas, BSc *Murd.*, BVMS *Murd.*, MVS *Melb.*, PhD *Murd.*, MACVS, FAICD, FAIM

Elected by Permanent Members of the Academic Staff

Distinguished Professor Gaven Martin, MSc, PhD *Michigan*, FRSNZ, FAMS, FNZMS, FASL

Elected by Permanent Members of the Professional Staff

Rebecca Argyle, BSc *VUW*, LLB *VUW*

Elected by Massey University students and appointed by Council

Minnie-Kalo Voi

Appointed by the Massey University Council on the Nomination of the Vice-Chancellor

Chancellor of the University, Alistair Davis, LLB, BCA *VUW* ONZM

Paul Brock BBS

Caren Rangi BBS, CAANZ, IoD

Right Honourable Sir Jerry Mateparae GNZM QSO, KStJ, MA (Hons) (First class) *Waik.*, HonDLit

Council Committees

Finance and Assurance Committee

Chairperson

Ross Buckley BBS, FCA, FCPA

People and Culture Committee

Chairperson

Paul Brock BBS

Academic Board

Chairperson

Professor Fiona Te Momo, BA *Waik.*, MMPD(Hons) *Waik.*, PhD *Waik.*

Academic Board

The Academic Board is established pursuant to Sections 283 (4) and 285 and Schedule 11 (18) of the Education and Training Act 2020. The membership of the Board shall be comprised as follows:

- Vice-Chancellor
- Provost
- Deputy Vice-Chancellor (Māori)
- Chairs of Subcommittees
- Dean Pasific
- University Registrar
- Pukenga Tiriti
- Three Māori Academic staff representatives
- Three elected Academic staff from each College (15)
- Five student representatives

Academic Board Committees

There are seven permanent sub-committees of Academic Board:

Academic Committee

Chairperson

Professor Giselle Byrnes, BA *Waik.*, MA *Waik.*, PhD *Auck.*

University Research Committee

Chairperson

Professor Giselle Byrnes, BA *Waik.*, MA *Waik.*, PhD *Auck.*

College of Business College Board

Chairperson

Associate Professor Jo Cullinane, BMS(Hons) *Waik.*, MMS *Waik.*, MSc *Glam.*, PhD *Waik.*

College of Creative Arts College Board

Chairperson

Professor Margaret Petty, BA *OR*, MA *NY*, PhD *Well.*

College of Health College Board

Chairperson

Professor Jill McCutcheon, BSc, DVM *Guelph*, PhD, *WSU*

College of Humanities and Social Sciences College Board

Chairperson

Professor Cynthia White, BA (Hons) *Well.* DipTESL *Well.*, PhD

College of Sciences College Board

Chairperson

Professor Raymond Geor, BVSc, PhD, Dipl. ACVIM

Officers of the University

Chancellor

Alistair Davis, LLB, BCA *VUW*

Pro Chancellor

Angela Hauk-Willis MA *Freiburg im Breisgau*

Vice-Chancellor

Professor Jan Thomas, BSc *Murd.*, BVMS *Murd.*, MVS *Melb.*, PhD *Murd.*, MACVS, FAICD, FAIM

Deputy Vice-Chancellor, Students and Global Engagement (University Registrar)

Dr Tere McGonagle-Daly, DProf *Lond.*, OAMLP *Oxford.*, BLibs *Waik.*, PGDipMgtSys *Waik.*

Legislative and Regulatory Framework

A Tiriti- Led University

Ū ai a Te Kunenga ki Pūrehuroa kia aratakina e ngā mātāpono o Te Tiriti o Waitangi ki roto ki ngā kaupapa here me ngā mahi a te Whare wānanga, ā, ka ngākau kotahi te aro ki ngā painga ka puta. Ka whakatairanga ake i te whanaketanga o te Māori, ā, te tino whai wāhi puta noa me te tiaki i te reo Māori hei reo whai mana o te Whare wānanga, ka poipoi ngātahitia ngā tūmanako me te maramatanga ki te mātauranga ake me ngā kōrero tuku iho, ka aro ki te mana whenua o ia whenua kei a Te Kunenga, ka rapu kaupapa kia whaihua tahi ai me te Māori, ā, ka tautoko i ngā hōtaka whakaako, hōtaka rangahau e hāngai ana ki ō te Māori wawata me ōna tikanga.

Massey University is committed to being guided by the principles of Te Tiriti o Waitangi within the policies and practices of the University and to recognising the mutual benefits that follow. It will promote Māori development and full Māori participation across the University, maintain the Māori language as an official language of the University, foster mutual regard and understanding for academic knowledge and customary Māori knowledge, recognise and acknowledge the special status of tangata whenua in the mana whenua of each campus, seek opportunities for mutually beneficial partnerships with Māori, and facilitate teaching and research programmes consistent with Māori aspirations and processes.

Ngā Ture o te Whare Pāremata – Acts of Parliament

Me ū Te Kunenga ki Pūrehuroa, pērā i ngā Kura Mātauranga Tuatoru o Aotearoa, ki ngā kōrero o te Ture Mātauranga Ture Whakangungu 2020 (tae atu ki ngā whakatika). Ka tautuhi tēnei Ture i te kaupapa ture me ngā mahi a te Kaunihera me ētahi atu kaupapa e pā ana ki ngā kura tuatoru. Kua whakatūria Te Kunenga ki Pūrehuroa ki raro ki te Ture Massey University 1963 me te Wāhanga 162(1)(a) o te Ture Mātauranga Ture Whakangungu 2020.

Massey University, like all tertiary education institutions in New Zealand, is subject to the provisions of the Education and Training Act 2020 (including amendments). This Act specifies the constitution, functions and duties of the Council and other matters relating to tertiary institutions.

Massey University is constituted by the Massey University Act 1963 and the Education and Training Act 2020.

Policy Guide

The Massey University Policy Guide is the authorised and definitive catalogue of approved policies within Massey University. Policies articulate the principles, values, and statements of intent and compliance requirements of the University. All members of the University community are expected to comply with relevant policies, including Academic, Campus Facilities, Contract Management, Finance, Health, Safety and Wellbeing, Information Technology Services, International, People and Culture, Research, Risk

Management, and University Management. The policies of the University are available from www.massey.ac.nz/policies/.

Privacy at Massey University

Privacy of Personal Information

Massey University cares about privacy and we are committed to the protection of personal information. The University takes all reasonable steps to ensure that personal information we hold is protected against loss, and unauthorised access, release, use or modification.

Our Privacy Notice describes how we collect, use and share personal information and explains an individual's rights in relation to those activities.

The Privacy Notice can be found at: www.massey.ac.nz/privacy

If you wish to seek access to or request correction of your personal information, or inquire about the handling of personal information, you can email us at privacy.officer@massey.ac.nz or call **0800 MASSEY** (0800 627 739).

Academic Dress Regulations

1. Graduates shall appear at all public ceremonies of the University in the academic dress proper to their degree. Graduates of other Universities may wear the academic dress of their own university.
2. The form of the principal officers' robes and hats shall be as follows:

Chancellor

Regalia made in Merino wool, in a Poutama design weave using rich blues. Pleats in the gown are suspended from a plain blue Merino wool yoke. Sleeve cape across the shoulders references the Korowai and is embellished with Massey University's Coat of Arms. Gold satin front neck bands (70mm) are embroidered with an interpretation of the Whakarare pattern in metallic threads of gold and blue. Gold satin sleeve cape border is ornamented with three embroideries. Gold satin sleeve border is embroidered in a repeat pattern. Gown body is lined in light blue satin and sleeves are lined in navy satin. Gown front is edged with plain blue Merino wool. A wide-brimmed round plain blue Merino wool Tudor bonnet with gold tassels hanging from a cord encircling the puggaree of the hat.

Pro-Chancellor

Regalia made in Merino wool, in a Poutama design weave using rich blues. Pleats in the gown are suspended from a plain blue Merino wool yoke. Sleeve cape across the shoulders references the Korowai and is embellished with Massey University's Coat of Arms. Gold satin front neck bands (45mm) are embroidered with an interpretation of the Whakarare pattern in metallic threads of gold and blue. Gold satin sleeve cape border is ornamented with one embroidery motif. Gold satin sleeve border is embroidered in a repeat pattern. Gown body is lined in light blue satin and sleeves are lined in navy satin. Gown front is edged with plain blue Merino wool.

A wide-brimmed round plain blue Merino wool Tudor bonnet with gold tassels hanging from a cord encircling the puggaree of the hat.

Vice-Chancellor

Regalia made in Merino wool, in a Poutama design weave using rich blues. Pleats in the gown are suspended from a plain blue Merino wool yoke. Sleeve cape across the shoulders references the Korowai and is embellished with Massey University’s Coat of Arms. Silver satin front neck bands (70mm) are embroidered with an interpretation of the Whakarare pattern in metallic threads of silver and blue. Silver satin sleeve cape border is ornamented with one embroidery motif. Silver satin sleeve border is embroidered in a repeat pattern. Gown body is lined in light blue satin and sleeves are lined in navy satin. Gown front is edged with plain blue Merino wool.

A wide-brimmed round plain blue Merino wool Tudor bonnet with silver tassels hanging from a cord encircling the puggaree of the hat.

Deputy Vice Chancellor Students and Global Engagement/University Registrar

Regalia made in Merino wool, in a Poutama design weave using rich blues. Pleats in the gown are suspended from a plain blue Merino wool yoke. Sleeve cape across the shoulders references the Korowai and is embellished with Massey University’s Coat of Arms. Silver satin front neck bands (45mm) are embroidered with an interpretation of the Whakarare pattern in metallic threads of silver and blue. Sleeve cape is without satin border. Silver satin sleeve border is without embroidered ornamentation. Gown body is lined in light blue satin and sleeves are lined in navy satin. Gown front is edged with plain blue Merino wool.

A wide-brimmed round plain blue Merino wool Tudor bonnet with silver tassels hanging from a cord encircling the puggaree of the hat. The hat shall be a trencher of the materials as used for the robe.

University Council Members

The academic dress is as for the Cambridge Bachelor of Arts but with a facing of light blue satin (50mm wide, BCC 84 forget-me-not) edged with an additional dark blue satin (25mm wide, BCC 90 midnight), the full length of the front. Graduates may wear the hat and hood of their own degree. Council members may wear academic regalia of their qualification if preferred.

Marshal

The academic dress shall be the academic regalia of their own university, including the hat and hood of their own degree, and shall bear the University’s Coat of Arms on each shoulder.

3. (a) The gown for an undergraduate or for a Bachelor’s Degree is as for the Cambridge Bachelor of Arts.
- (b) The gown for a Master’s Degree is as for the Cambridge Master of Arts.
- (c) The gown for the degrees of Doctors of Business and Administration, Clinical Psychology, Education, Philosophy and Social Work is as for the Cambridge Master of Arts, but with a facing of cloth ‘post office red’ (BCC No. 209) ten centimetres wide the full length of the front.
- (d) The gown for all other Doctors Degrees is as for the Cambridge Master of Arts, but the colour is ‘post office red’ (BCC No. 209).
4. (a) The hood for every degree is of the same size and shape as the Cambridge Master of Arts.
- (b) The hood for Masters Degrees shall be made of material of the colour ‘university blue’ (BCC No. 90) and shall be lined with material of the colour appropriate to the degree, except for Master of Philosophy, which shall be lined with material of the colour ‘post office red’ (BCC No. 209).
- (c) The hood for a Bachelor’s Degree or a Bachelor’s Degree with Honours shall be as for the Master’s hood, but bordered with a 40mm white fur.
- (d) The hood for a Bachelor Honours Degree shall be as for the Master’s hood, but bordered with a 40mm white silk.
- (e) The hood for a PhD Degree shall be made of material of the colour ‘post office red’ (BCC No. 209) and shall be lined with ‘university blue’ (BCC No. 90).
- (f) The hood of other Doctors Degrees shall be the Master’s hood appropriate to the discipline in which the degree was taken.
5. The colours of the linings of the hoods for the Bachelors, Masters and Doctors Degrees other than PhD are as follows:

Programmes of Study

University programmes exist inside a regulatory framework with all degrees, diplomas and certificates having a set structure. Some programmes are tightly circumscribed in terms of the courses that must be included, while others offer a great deal of flexibility.

The University has a detailed set of regulations for each qualification that specify the number of credits assigned to courses that must be selected. Typically, there is a core area of specialisation (a major, minor, subject, or endorsement) as well as several associated courses that may be taken from other areas. When enrolling in a programme of study, students must keep in mind not only the number of credits but also the combination of credits and courses necessary to complete the requirements for their particular qualification.

There may also be requirements to be observed at a course level:

prerequisites (courses that must be completed to a defined standard before enrolment in another course is confirmed); corequisites (courses that must be attempted in the same semester as another course unless the corequisite course has previously been passed); and, restrictions (where courses are similar in content and therefore students may not include both courses in a qualification). Professional programmes may also have required practical components that must be completed.

The University Calendar remains the definitive document for all Qualification Regulations.

Students are encouraged to seek advice to ensure they plan their programme of study well to meet all requirements.

Semesters

The Massey University academic year is divided into distinct enrolment periods, which are Semester One, Semester Two and Summer School. Semesters One and Two consist of twelve teaching weeks and conclude with their own examination periods. In addition, a longer enrolment period, the Double Semester, runs concurrently with Semesters One and Two with an examination period at the end of Semester Two. Summer School comprises a condensed study period – November to February, including an examination period – with a limited number of offerings available. Planning for enrolment in Summer School courses should take into account workload considerations where students intend to enrol in more than one course.

A winter break of three weeks is normally scheduled between the Semester One examination period and the start of Semester Two. Within Semester One, a two-week mid-semester study period is linked to the Easter holiday break. Within Semester Two, there is a two-week mid-semester study period. Some programmes and courses do not conform to these standard semester periods and therefore have different start and end dates. Professional programmes, in particular, may have a longer instructional year to accommodate practical requirements. Some courses are available with compressed offerings – offering periods which are shorter than normal semester dates.

The Credits System

Every course has a credit value that indicates its contribution to the qualification enrolled for (or for any other qualification to which that course can contribute). These values reflect the expected workload based on an equivalent full-time year, being 120 credits.

The credit value also gives an indication of the total amount of time that a student might reasonably expect to have to spend on each course to satisfactorily complete the assessment requirements (including lecturer and tutor contact hours, workshops and tutorials, tests and assignments, supervised practical placements, study time). Converted into hours per week, this is referred to as the effective weekly hours for the course.

The total hours required for the course can be calculated at 10 hours per credit, or 150 effective hours for a 15-credit course. The weekly hours for a course will depend on the number of weeks over which it is intended to spread the study programme during the year. For example, over 15 weeks (the number per semester) an average total commitment of 10 effective hours per week is required for a 15-credit course. The Course Guide provided for each course should indicate the effective weekly hours and how these might typically be spent.

All undergraduate and taught postgraduate courses (with the exception of a small number of courses) have a value of 15 credits or a multiple thereof.

Financial Support

Student Allowances and Loans are administered and paid by StudyLink. Student Allowances and Loans can be applied for online:
www.studylink.govt.nz

Scholarships

Details on the scholarships available from Massey University are published on the Internet: scholarships.massey.ac.nz.

Further information is available from each Campus Information Service or phone within NZ 0800 627 739, outside NZ +64 6 350 5701.

KEY DATES 2025 – STUDENT AND ADMINISTRATIVE CALENDAR

NGĀ TINO RĀ – MARAMATAKA MĀ NGĀ TAUIRA ME TE WHAKAHAERE

For start and end dates of semesters and mid-semester breaks, students should check course and programme details on the Massey website as some programmes of study do not follow the dates given here. Selected individual programme dates are provided following the Diary of Key Dates.

2024

October 2024

- 1 Course enrolment opens for 2025 academic year (unless otherwise stated for programmes requiring selected entry).
- 1 Applications for University Halls of Residence and Apartments submitted by this date will be included in the first round of offers for 2025. Offers will then be sent weekly on a Monday until all rooms are full.
- 1 Final date for international student applications for the Bachelor of Aviation (Air Transport Pilot) programme selection for Semester One 2025.
- 28 Labour Day
- 31 Due date for all new international students to apply for admission in Semester One or Double Semester 2025 conditional upon availability of remaining places.*

November

- 1 Final date for domestic student applications for the Bachelor of Aviation (Air Transport Pilot) programme selection for Semester One 2025.
- 18 Summer School commences.
- 22 Final date for applications to Teaching programme selection.
- 28-29 Graduation ceremonies Palmerston North.

December

- 6 Semester Two and Double Semester examination results notified about this date.
- 20 All University closes at 4:30pm.

2025

January 2025

- 6 University re-opens and reporting in person for Summer School January-February classes if required.
- 20 Wellington Anniversary Day Holiday, Manawatū and Wellington campuses.
- 27 Auckland Anniversary Day Holiday, Auckland campus

February

- 1 Final date for applications to graduate at the Wellington ceremony.
- 4 Final day of Summer School lectures.
- 6 Waitangi Day.
- 5-7 Summer School Study Break.
- 7 Due date for domestic and returning international students to apply for admission for study commencing in Semester One or Double Semester 2025, conditional on availability of remaining places.*
- 7 Due date for all Transfer of Academic Credit/Cross Credit applications related to commencing study in Semester One 2025**
- 10 Course Guides normally available on Stream for Semester One and Double Semester 2025 courses.
- 10-14 Summer School examinations.
- 14 Due date for students to apply for course enrolment in Semester One or Double Semester 2025, conditional on availability of remaining places.*
- 14 Summer School concludes.
- 16 University Halls Arrival Day
- 17-21 Campus and College pre-semester activities, including reporting in person and welcome sessions.
- 24 Semester One and Double Semester commences.
- 27 Summer School results notified about this date.
- 28 Final date for students to add a Semester One or Double Semester 2025 course online conditional on availability of remaining places.***

March

- 1 Final date for applications to graduate at Palmerston North and Auckland ceremonies.
- 15 Final date for applications for Veterinary programme selection.
- 16 Census Date for standard Semester One courses.****

April

- 1 Final date for international student applications for the Bachelor of Aviation (Air Transport Pilot) programme selection for Semester Two 2025.
- 1 University Halls Semester Two Applications Open. Offers will then be sent weekly from 1 May on a Monday until all rooms are full.
- 10 Census Date for standard Double Semester courses.****
- 18 Good Friday
- 21 Easter Monday
- 14-25 April Mid-Semester One study period (study and field trips, internal; distance learning contact workshops).
- 28 Semester One resumes
- 15-16 Graduation ceremonies, Wellington.
- 25 ANZAC Day

May

- 1 Final date for domestic student applications for the Bachelor of Aviation (Air Transport Pilot) programme selection for Semester Two 2025.
- 1 Due date for all new international students to apply for admission in Semester Two 2025 conditional upon availability of remaining places.*
- 1 University Halls Semester Two Offers commence
- 5-8 Graduation ceremonies, Palmerston North.
- 19-22 Graduation ceremonies, Auckland.
- 30 Final day of Semester One lectures.

June

- 2 King's Birthday observance.
- 3-6 Study break
- 9-19 Semester One examinations.
- 20 Matariki Public Holiday
- 20 Due date for domestic and returning international students to apply for admission for study commencing in Semester Two 2025, conditional on availability of remaining places.*
- 20 Due date for all Transfer of Academic Credit/Cross Credit applications related to commencing study in Semester Two 2025.**
- 19 Semester One concludes.
- 23 June–11 July Mid-year break (Distance learning campus courses).
- 30 Course Guides normally available on Stream for Semester Two 2025 courses.

July

- 5 Semester One examination results notified about this date.
- 6 University Halls Semester Two arrival day
- 9 Due date for returning students to apply for course enrolment in Semester Two 2025, conditional on availability of remaining places.*
- 11 Reporting in person all campuses if required.
- 14 Semester Two commences.
- 18 Final date for students to add a Semester Two 2025 course online conditional on availability of remaining places.***

August

- 1 Applications for University Halls of Residence and Apartments open for 2026.
- 4 Census Date for standard Semester Two courses.****
- 25 August–5 September Mid-Semester Two study period (study and field trips, internal; distance learning, contact workshops).

September

- 1 Final date for applications to graduate at the Palmerston North November ceremony.
- 8 Semester Two resumes.

October

- 1 Course enrolment opens for 2026 academic year (unless otherwise stated for programmes requiring selected entry).
- 1 Applications for University Halls of Residence and Apartments submitted by this date will be included in the first round of offers for 2026.
- 17 Final day of Semester Two lectures.
- 20-24 Study break
- 27 Labour Day

- 31 Due date for all new International students to apply for admission in Semester One and Double Semester 2026 conditional upon availability of remaining places.*
- 28 October–10 November
Examinations for Semester Two and Double Semester 2025 courses.
- 31 Due date for all Transfer of Academic Credit/Cross Credit for all applications for new students who intend to commence study in Summer School 2025.**
- 31 Due date for all new students to apply for admission for study commencing in Summer School 2025 conditional on availability of remaining places.*

November

- 3 Course Guides normally available on Stream for Summer School courses.
- 12 Due date for students to apply for course enrolment in Summer School 2025, conditional on availability of remaining places.***
- 10 Semester Two and Double Semester ends.
- 17 Summer School commences.
- 21 Final date for applications to Teaching programme selection.
- 21 Final date for students to add a Summer School 2025 course online, conditional on availability of remaining places.***
- 26-27 Graduation Palmerston North.

December

- 2 Census Date for standard Summer School courses.****

- 5 Semester Two and Double Semester 2025 examination results notified about this date.
- 23 Last day of Summer School lectures for 2025.
- 23 All University closes at 4:30pm.

2026**January 2026**

- 5 Summer School resumes.
- 5 All University opens

February

- 3 Final day of Summer School lectures.
- 4-6 Study Break
- 9-13 Summer School Examinations.
- 13 Summer School concludes.
- 26 Summer School results notified about this date.

* Applications will be accepted after the due date; however, that may mean students cannot be accepted into their preferred courses in the next Semester.

** Applications will be accepted after the due date; however, they may not be processed in time for Semester start.

*** Applications can be made after this date but will require Academic approval.

**** This will be different for courses with non-standard start and/or finish dates.

2025 Semester Dates for Specified Programmes**University-wide**

Orientation/pre-semester activities:	20-24 Feb
Semester One Begins:	24 Feb
Mid Semester One Break (incl Easter):	14-25 Apr
Semester One Ends:	19 Jun
Mid-Year Break:	23 Jun–11 Jul
Semester Two Begins:	14 Jul
Mid Semester Two Break:	25 Aug-5 Sep
Semester Two Ends:	10 Nov
Summer School Starts:	17 Nov
Summer School Ends:	13 Feb 2026

Institute of Education**Postgraduate Diploma in Educational and Developmental Psychology**

Semester One Begins:	20 Jan
Orientation/pre-semester activities:	21-24 Jan
Mid Semester One Break:	No break
Block courses:	6-9 May
Semester One Ends:	20 Jun
Mid-Year Break:	No break
Semester Two Begins:	14 Jul
Block courses:	5-8 Aug.
Mid Semester Two Break:	No break
Semester Two Ends:	23 Nov

Postgraduate Certificate in Specialist Teaching and**Postgraduate Diploma in Specialist Teaching and****Master of Specialist Teaching**

Orientation/pre-semester activities:	
PGDip/PGCert Specialist Teaching	11-14 Feb
Master of Specialist Teaching	18 Feb
Semester One Begins:	
PGDip/PGCert Specialist Teaching	10 Feb
Master of Specialist Teaching	17 Feb
Mid Semester One Break (incl Easter):	14-27 Apr
Semester One Ends:	13 Jun
Mid-Year Break:	23 Jun-5 Jul
Orientation/pre-semester activities:	
PGDip/PGCert Specialist Teaching	8-11 Jul
Master of Specialist Teaching	15 Jul
Semester Two Begins:	
PGDip/PGCert Specialist Teaching only	7 Jul
Master of Specialist Teaching	14 Jul
Mid Semester Two Break:	25 Aug-7 Sep
Semester Two Ends:	10 Nov
Graduate Diploma of Learning and Teaching	
Online Orientation/pre-semester activities:	20-24 Jan

Semester One Begins:	20 Jan
Study Week:	14-18 Apr
Mid Semester One Break (incl Easter):	21-25 Apr
Semester One Ends:	27 Jun
Study week:	30 Jun-4 Jul
Mid-Year Break:	7-11 Jul
Semester Two Begins:	14 Jul
Study week:	22-26 Sep
Mid Semester Two Break:	29 Sep-3 Oct
Semester Two Ends:	22 Nov

Master of Counselling Studies and**Postgraduate Diploma in Education (Counselling and Guidance)**

Master of Counselling Studies Online Orientation:	30 Jan
Master of Counselling Studies Wānanga 1 Block Course:	14-21 Feb,
Postgraduate Diploma in Education (C&G) Online Orientation:	24 Feb
Semester One Begins:	
Master of Counselling Studies 253800:	20 Jan
Master of Counselling Studies 253761, 253740, & 253762:	27 Jan
Postgraduate Diploma in Education (C&G):	14 Feb
Mid Semester One Break (incl Easter):	14-25 Apr
Semester One Ends:	23 Jun
Mid-Year Break:	
Master of Counselling Studies:	23 Jun-12 Jul
Postgraduate Diploma in Education (C&G):	23 Jun-11 Jul
Semester Two Begins:	14 Jul
Master of Counselling Studies Wānanga 2 Block Course:	25 Jul-1 Aug
Mid Semester Two Break:	25 Aug-5 Sep
Semester Two Ends:	
Postgraduate Diploma in Education (C&G):	10 Nov
Master of Counselling Studies 253761, 253740, & 253762:	10 Nov
Master of Counselling Studies 253800:	18 Jan 2026

School of Māori Knowledge**Te Aho Tātaiarangi, Te Aho Paerewa**

New intake – Pohiri	26 Jan
Semester One Begins:	27 Jan
Mid Semester One Break (incl Easter):	
Te Aho Tātaiarangi:	14-24 Apr
Te Aho Paerewa:	14-18 Apr
Te Aho Paerewa contact workshop:	21-24 Apr
Semester One Ends:	20 Jun
Mid-Year Break:	7-11 Jul
Semester Two Begins:	14 Jul
Mid Semester Two Break:	25 Aug-5 Sep
Semester Two Ends:	14 Nov

School of Aviation**Bachelor of Aviation (Air Transport Pilot)**

New Intake Orientation (Massey 84 cohort) compulsory:	22 Jan
Semester One Begins:	
Returning students:	13 Jan
New students (orientation as above):	22 Jan
Mid Semester One Break (incl Easter):	18-22 Apr
Semester One Ends:	27 Jun
Mid-Year Break:	To be confirmed
New Intake Orientation (Massey 85 cohort) compulsory:	7 Jul
Semester Two Begins:	
New Students (orientation as above):	7 Jul
Returning students:	14 Jul
Mid Semester Two Break:	To be confirmed
Semester Two Ends:	19 Dec

Massey Business School**Executive Master of Business Administration (EMBA) and****Master of Business Administration (MBA)**

Semester One Begins:	
Executive Master of Business Administration:	27 Jan
Master of Business Administration:	3 Mar
Semester One Ends:	
Executive Master of Business Administration:	15 Jun
Master of Business Administration:	16 Jun
Semester Two Begins:	
Executive Master of Business Administration:	2 Jun
Master of Business Administration:	30 Jun
Semester Two Ends:	
Master of Business Administration:	13 Oct
Executive Master of Business Administration:	26 Oct
Summer School Starts:	20 Oct
Summer School Ends:	
Executive Mater of Business Administration:	7 Dec
Master of Business Administration:	16 Feb 2026

ADMISSION, ENROLMENT AND GRADUATION | MANA URU, WHAKAURUNGA, WHAKAPŌTAETANGA

Admission Regulations	11	Special Admission Regulations.....	13
Matriculation Regulations.....	11	Enrolment Regulations.....	13
English Language Competency	11	Certificate of Proficiency Regulations	15
Admission with Equivalent Status Regulations.....	12	University Fee Regulations.....	16
Discretionary Entrance Regulations	12	Conferment and Graduation Regulations.....	17

Admission Regulations

- Every applicant must complete enrolment requirements which include submission of an Admission Application, written acceptance of an Offer of Place in a qualification [unless waived in writing by the University], submission of an Enrolment Application and acceptance of an Offer of Enrolment. Applicants returning to enrol in the same qualification submit an Enrolment Application and accept an Offer of Enrolment each academic year.
- Admission Applications normally proceed directly to an Offer of Place in a qualification unless withdrawn by the applicant in writing or unless the approvals required from the University are not obtained.
- Admission may be granted conditionally in the case of students who have not yet met the requirements for entry to University or to a specific qualification. At the appropriate time prior to the commencement of an enrolment period the University initiates offers of places in programmes in response to Admission Applications.
- Applicants who intend to enrol for tuition in an imminent enrolment period in a qualification they have not enrolled in before should submit an Admission Application and accept an Offer of Place in the qualification if granted.
- The final dates by which Applications must be made are specified in the Enrolment Regulations.
- Admission to Massey University does not constitute entitlement to be enrolled for tuition in any particular qualification or enrolment period.
- Massey University may operate a preferential score admission scheme for admission to undergraduate qualifications. Applicants to undergraduate qualifications will be assessed and eligible applicants will be offered a place in a qualification.

Matriculation Regulations

Matriculation

- Every candidate for an undergraduate degree, undergraduate diploma, undergraduate certificate, or for a certificate of proficiency in a course of any undergraduate degree, diploma or certificate shall have matriculated or been admitted with equivalent status. Candidates for sub-degree certificates and sub-degree diplomas must meet the published admission requirements of the selected programme.

Matriculation Requirements

- Every person shall be academically qualified to matriculate at the University who:
 - is academically qualified for entrance to a university on the basis of the National Certificate of Educational Achievement (NCEA) as promulgated by the New Zealand Qualifications Authority at www.nzqa.govt.nz or equivalent; or
 - has matriculated at any university in New Zealand; or
 - is granted Special Admission; or
 - is granted Discretionary Entrance under the Discretionary Entrance regulations or Provisional Entrance under the regulations applying in 2003; or

- is a New Zealand Citizen or Permanent Resident and has attained the age of 20 years by the final date for acceptance of late Enrolment Applications for the enrolment period in which study is commenced.

Minimum Age

- Applicants shall not be eligible to matriculate unless they have attained the age of 16 years by the start of their study.

Responsibilities

- At the time of accepting an offer, every student shall promise to obey the statutes, regulations, policies, codes and rules of the University. Prior to enrolment being finalised, every student shall provide evidence of date of birth and citizenship and of meeting programme admission requirements.
- Persons who are eligible to matriculate under these Regulations may matriculate by having their names enrolled on the books of the University as matriculated students. The University Council (or its delegate) may decline (under statutory authority) to matriculate a person in special cases.

English Language Competency

- English is the most commonly spoken language in New Zealand, while Te Reo Māori and New Zealand Sign Language are recognised as official languages in New Zealand. Tuition, examination and assessment at Massey University is normally in the English language, although students may be required to write or speak Te Reo Māori or foreign languages in some courses. Procedures exist for those students who wish to submit written work, assignments or examinations in Te Reo Māori or New Zealand Sign Language.
- It is expected that on entry to Massey University all students will be able to:
 - write grammatically correct English. Students must be able to develop ideas and to express themselves in well-structured, accurate and extended written English. Typically essays or reports of about 1,000 words are expected of first-year undergraduate students. Even in courses where mathematical and scientific symbols are the main means of expression, the ability to write clear, accurate English is still needed. Most assignments and examinations use essays and reports as the main type of written work. Equivalent criteria apply for students who choose to submit their work in Te Reo Māori.
 - read English actively and with understanding. Students must be able to find relevant information, without special guidance, to follow the structure of a narrative, and to comprehend and analyse a line of argument.
 - listen to and discern key points in English. Students must be able to follow complex and technical discussion in both formal lectures and informal groups.
 - speak freely and clearly in English. Students will be expected to contribute actively to discussion and to present ideas in classes.
- The University does not accept responsibility for academic failure that is attributable to a student's lack of competence in English. Students who submit their work in Te Reo Māori are expected to meet equivalent standards in Te Reo Māori.
- International students – all international students whose first language is not English will be required to provide satisfactory evidence of their

proficiency in English, in the form of an Academic IELTS score, an equivalent recognised English language test, or other such evidence that is acceptable to Academic Board. Satisfactory evidence from IELTS is as follows:

- (a) Academic IELTS (International English Language Testing System) score of 6.0 for undergraduate programmes with no band less than 5.5, and 6.5 for postgraduate programmes with no band less than 6.0. Massey University via Te Temu Whakatipu is a registered IELTS testing Centre.

Satisfactory evidence of proficiency in English includes

- (b) Satisfactory completion of the Massey University English for Academic Purposes 2 course for undergraduate programme entry.
- (c) Some programmes have different English language entry requirements, which are detailed in relevant qualification regulations.

- 17. New Zealand school leavers – New Zealand students (including permanent residents) and international students must gain a university entrance qualification in either English or Te Reo Māori, which includes literacy and numeracy requirements, as set out by the NZQA.
- 18. Other students whose first language is not English, and who have not gained a New Zealand university entrance qualification, or an overseas entrance qualification in a country where the main language is English, will also be required to provide satisfactory evidence of their proficiency in English in the form of an academic IELTS score or other such evidence that is acceptable to the Academic Board.
- 19. English language competency requirements for foundation studies and pre-degree level programmes are available from Student Registry.

Admission with Equivalent Status Regulations

- 20. Subject to the provisions of the Education and Training Act 2020 and to the provisions of these Regulations, the Deputy Vice Chancellor Students and Global Engagement (or delegate) may admit any person with equivalent status to candidature in any degree or other academic qualification or part thereof. Admission with equivalent status (AES) means ‘admission granted to applicants with the status equivalent to that of the holder of the required qualification’. AES admission is usually programme-specific and may have conditions attached.
- 21. An applicant for Admission with Equivalent Status shall lodge an Application by the published due dates in order for the applications to be fully considered and processed.

Admission at Sub-Degree Level

- 22. The Deputy Vice-Chancellor Students and Global Engagement (or delegate) may grant admission to a sub-degree diploma or sub-degree certificate based on the published admission requirements. In the case of holders of overseas diplomas or certificates, applications shall be considered on the basis of academic work completed and not on qualifications obtained.

Admission at Entrance Level

- 23. The Deputy Vice-Chancellor Students and Global Engagement (or delegate) may grant admission to an undergraduate degree, diploma or certificate, or for a certificate of proficiency in a course of any undergraduate degree, diploma or certificate with status equivalent to that of a person academically qualified for entrance to a university in New Zealand on the basis of study at a secondary or tertiary institution in New Zealand or overseas. In the case of holders of overseas diplomas or certificates, applications shall be considered on the basis of academic work completed and not on qualifications obtained.

Admission for International Students

- 24. Admission for international students to study at Massey University at the first-year undergraduate degree level is by:
 - (a) completing an overseas qualification recognised in New Zealand as equivalent to the New Zealand University entrance standard; OR
 - (b) completing work overseas, recognised in New Zealand as equivalent to the New Zealand University entrance standard; OR

- (c) attending secondary school in New Zealand and achieving the University entrance standard; OR
 - (d) completing a foundation programme at a University in New Zealand; OR
 - (e) completing a foundation programme offered by a non-University provider in New Zealand where that programme is recognised by Universities in New Zealand,
- AND where applicable having the minimum English language requirements specified for entrance to the University and qualification, AND by meeting the requirements to study a specific qualification.

Admission with Graduate Status

25. Admission with Graduate Status for Postgraduate Degrees

The Deputy Vice-Chancellor Students and Global Engagement (or delegate) may grant a candidate admission to the status of the holder of a degree with the right to proceed to a specific higher degree with or without Honours or a Certificate of Proficiency, provided that the applicant complies with any prerequisite prescribed or required by Academic Board for such degree. The University will normally consider applications for admission with equivalent status to postgraduate degrees on the basis of completed academic work that is equivalent, or substantially corresponds to coursework in this University. Where appropriate, the University may consider applications based on extensive practical or professional experience of an appropriate kind.

26. Admission with Graduate Status for Graduate Qualifications, Postgraduate Diplomas and Postgraduate Certificates

The Deputy Vice-Chancellor Students and Global Engagement (or delegate) may grant a candidate admission to the status of the holder of a degree with the right to proceed to a specific graduate diploma or certificate, or postgraduate diploma or postgraduate certificate or a Certificate of Proficiency to an applicant who demonstrates practical, professional or scholarly experience of an appropriate kind and equivalent to that of a graduate. The applicant may be required to comply with any prerequisite prescribed for such diploma or certificate, or for any specific course.

Discretionary Entrance Regulations

- 27. A person under the age of 20 years who does not meet the University Entrance standard may apply for discretionary entrance if they:
 - (a) are a citizen or permanent resident of New Zealand or Australia*;
 - (b) are at least 16 years of age and under 20 on the first day of the semester in which they wish to study, and
 - (c) have not otherwise qualified for admission

*Australian applicants’ most recent year of schooling must have been in New Zealand.
- 28. Discretionary Entrance applicants are expected to have a very good academic record. The normal criteria for consideration for Discretionary Entrance are:
 - (a) has received secondary schooling to at least New Zealand Year 12 level (or its equivalent overseas); and
 - (b) has achieved a minimum of 72 credits at NCEA Level 2 including 14 credits in each of four subjects (three of which must be approved subjects as listed on the New Zealand Qualifications Framework website: <https://www.nzqa.govt.nz/qualifications-standards/awards/university-entrance/approved-subjects/>) with a majority of credits at Merit or Excellence; and

- (c) has met the literacy and numeracy standards required for University Entrance, or their equivalents.
- 29. Discretionary Entrance is granted to a nominated undergraduate qualification.
- 30. Persons who attempt to qualify for University Entrance in Year 13, but who fail to do so, may be considered for mid-year admission in the year following their NCEA assessment. Admission will be at the discretion of the university.

By decision of the Committee of University Academic Programme (CUAP) Sub-committee on University Entrance this proviso is waived for year 13 students at a New Zealand secondary school in 2020, due to the impact of COVID-19.
- 31. A person studying at a New Zealand secondary school, who is attempting to qualify for entrance to university, may apply for Discretionary Entrance in the same year for the purpose of enrolling in courses offered in Summer School by the University. Any person admitted under this Regulation who does not, in the following January, meet the University Entrance standard will be required to withdraw from the University and may re-apply for admission at mid-year. Students required to withdraw may complete their Summer School programme before doing so, but any

courses passed will not be credited to a qualification until a University Entrance qualification is gained.

Special Admission Regulations

32. In exceptional cases, a New Zealand Citizen or Permanent Resident who does not hold a university entrance qualification and who does not qualify under Matriculation Regulation 9(e) may apply for special permission to enter the university. In assessing whether to grant Special Admission in a particular case, the Provost will consider:
- whether the applicant has met a standard equivalent to that required under the Matriculation regulations; and
 - evidence of the applicant's preparedness for university study.

Enrolment Regulations

33. Enrolment at Massey University requires completion of admission to the University, admission to a specific qualification, and enrolment in a programme.
34. Every applicant must complete enrolment requirements which include submission of an Admission Application, written acceptance of any Offer of Place in a qualification (unless waived in writing by the University), submission of an Enrolment Application and acceptance of any Offer of Enrolment. Applicants returning to enrol in the same qualification are required to submit an Enrolment Application and accept an Offer of Enrolment each academic year.
35. Applicants who wish to study full-time should apply to enrol for 105 or 120 credits of study in an academic year.
36. Massey University has an on-line system for admission and enrolment. A paper-based enrolment system will be used which comprises the same steps as the on-line system when the on-line system is inoperative for any reason or in other special circumstances as permitted by the Deputy Vice-Chancellor, Students and Global Engagement (University Registrar).

Due Date for Admission and Enrolment Applications

37. Generally, all applicants are expected to submit their applications so that they are received by the University on or before the due date. For most students the due dates for 2025 are as listed below:

Due dates for admission applications

For qualifications starting in	New and Returning Applicants applying for a new qualification
Semester One/ Double Semester	31 October 2024 (New International students) 7 February 2025 (Domestic and returning International students)
Semester Two	1 May 2025 (New International Students) 20 June 2025 (International and Domestic students)
Summer School	31 October 2025 (International and Domestic students)

Due date for enrolment into courses

For Courses in	All Applicants
Semester One/ Double Semester	14 February 2025 (Domestic and International students)
Semester Two	9 July 2025 (Domestic and International students)
Summer School	12 November 2025

38. Some qualifications require applicants to apply in advance of the standard due dates for selection and some courses do not follow standard semester dates. The relevant enrolment dates for these qualifications and/or courses are available from enrolment material on the University website under Key Dates, or by contacting the University.
39. Doctoral candidates need to submit Admission Applications to study a doctoral programme, accept any Offer of Place in a doctoral programme, submit their Enrolment Applications and accept any Offer of Enrolment, within three weeks of the commencement date specified by the Doctoral Research Committee. Candidates will need to enrol for each successive year by submitting their Enrolment Applications, accepting any Offer of Enrolment and receive a Confirmation of Enrolment. Details of fees will be available each year before enrolment is completed.

Final Dates

40. Addition or Substitution of Course(s):
- Enrolled students may, at the University's discretion, be permitted to add or substitute courses. If students also wish to apply for admission to a graduate or postgraduate level qualification they must apply by the dates given in Enrolment Regulation 37 or, for Doctoral students, by the dates outlined on the programme webpage;
 - Except where stated otherwise in course or programme material, any applications for adding or substituting courses must be received by the University no later than the dates below, which is the first Friday of the semester ;

- For information about withdrawal from courses see Enrolment Regulations 60-68. Dates for applying to add or substitute courses in 2025 are:

For Courses in Final Date for Adding or Substituting a Course

Semester One / Double Semester	28 February 2025
Semester Two	18 July 2025
Summer School	21 November 2025

Note: Some courses do not follow standard semester dates and students seeking to add courses should refer to programme material, the University website or contact the University for due dates.

Limitation of Student Numbers

41. The Pro Vice-Chancellor (or delegate) may limit the number of students enrolled in any programme each year because of insufficiency of staff, accommodation or equipment, or other reasons that may arise. Accordingly, where the number of applicants for the programme exceeds the number of places available, then the Pro Vice-Chancellor (or delegate) will select from the applicants those students who may be enrolled in the programme each year.

Late Enrolment

42. Applications for enrolment received after the final date are deemed to be Late Enrolments. Students may only apply via Special Permission with supporting documentation. The University may, at its discretion, consider approving a late enrolment.
43. Late Enrolment applications will usually be considered when they are received no later than two weeks after the final date of course enrolment, but may not be approved.

Completion of Enrolment

44. After acceptance of the admission Offer of Place in a qualification, students are required to select courses for their programme(s) by submitting an Enrolment Application. Even when that selection is made the University may require the student to select a different course or courses in place of a course or courses for which they have not met the pre-requisites and/or other requirements. If such a course(s) is compulsory for their programme they will still be required to enrol at a later date, once they have met the pre-requisites and/or other requirements.
45. The University assesses the Enrolment Application in relation to its regulations, capacity to provide tuition and its other requirements. The University may approve only those parts of the application that can be assessed as complying with course regulations and otherwise meeting its requirements.
46. Each applicant will be informed of the outcome of his or her Enrolment Application by either a written Offer of Enrolment or, when the applicant's selected courses do not meet University requirements, a response in writing. The Offer of Enrolment will advise applicants of the programme(s), qualification(s) and course(s) (if any) that they may study, the terms of their agreement with Massey University and provide instructions on how to respond. Applicants are required to submit to the University, acceptance of the Offer of Enrolment, and the University must receive it, by the due dates specified in the Offer of Enrolment in the manner required, unless this requirement is waived or varied by written notice by the University. On accepting the Offer of Enrolment, students agree to pay the tuition fees and non-tuition fees and agree to the terms of their enrolment.
47. The Offer of Enrolment may be subject to conditions which are inserted for the sole benefit of the University and may be waived by the University by written notice. When the University receives the acceptance of the Offer of Enrolment, the University and the student have a contractual relationship. When the Offer of Enrolment is subject to conditions those

conditions must be satisfied or waived by the Deputy Vice-Chancellor Students and Global Engagement (or delegate), by written notice, or the contract is at an end.

48. A Confirmation of Enrolment is issued by the University to the student when the Offer of Enrolment is accepted and is unconditional or when there are no conditions to be satisfied. Within a defined period following the acceptance of the Offer of Enrolment by the student, and the issue of a Confirmation of Enrolment by the University, the student may propose changes to the programme (e.g. by adding or substituting courses) by submitting a further Enrolment Application. If the University agrees to the changes proposed by the student, any such changes are recorded and a new Offer of Enrolment is generated, which offer of enrolment must be accepted and a new Confirmation of Enrolment is issued.
49. The dates for Students to add or substitute courses are given in Enrolment Regulation 37. The dates and manner for students to withdraw from courses are given in Enrolment Regulations 60-68. When a student has received a Confirmation of Enrolment but then does not pay tuition fees or non-tuition fees, or does not meet the requisites for one or more courses, the University may, in writing, cancel that student's enrolment in a course or programme at the University. The Deputy Vice-Chancellor Students and Global Engagement (or delegate) can cancel enrolment. Cancellation of enrolment means the student is still liable to pay the University tuition fees and non-tuition fees unless cancellation is during the period students are eligible for a tuition fees refund, or the student is eligible for a refund under the Assessment and Examination Regulations. If the University cancels a person's enrolment in all courses in an academic year, during the period students are eligible for a tuition fees refund, a withdrawal fee is payable.

Mixed Delivery Modes

50. Applicants may apply to be enrolled simultaneously in courses offered in different delivery modes. Such applications are subject to the usual provisions of the General Regulations governing Admission, Enrolment and Examinations.
51. In exceptional circumstances applicants may apply to be enrolled in the internal mode while not attending regularly scheduled classes on campus. All such applications are subject to approval of Academic Board (or delegate). In giving approval, Academic Board (or delegate) shall ascertain that appropriate arrangements have been made for tuition or supervision and for the provision of services required to enable the applicant to undertake the study with a reasonable likelihood of success. Except as set out in this Regulation, students must abide by the conditions applying to the particular mode in which each course is offered.

Concurrent Programmes

52. Students normally enrol for a single programme of study. With the approval of Academic Board (or delegate), it is possible to enrol concurrently in courses for credit to a second programme of study.

Concurrent Enrolment

53. Students who wish to be concurrently enrolled at Massey University and another New Zealand University must obtain prior approval of both institutions. Applications must be made in writing to the Pro Vice-Chancellor's office of the relevant College as well as the other institution.
54. Normally enrolment is for credit to a Massey University qualification. Students intending to complete a qualification from another New Zealand tertiary institution may apply to be enrolled in courses taught by distance at Massey University for credit to the other institution's qualification.
55. Permission to credit specific courses to the qualification must be obtained from the institution offering the qualification. This permission can be sought at any time prior to enrolment. Enrolment by Massey University does not mean that courses will be credited by another institution to its qualifications.

Approval

56. The personal programme of every applicant shall require the approval of the Council of the University or its delegate. This is exercised as part of the administrative procedures at enrolment. Approval will normally be granted for study in accordance with the programme regulations. Students' progress to completion will be assessed under the current year of regulations unless a transition pathway for the student is defined. For general provisions affecting their programme, students are referred to the General Regulations governing Matriculation, Enrolment and Examinations.
57. Students who propose to change from one programme to another ought to contact the University to determine which of the courses they have passed may be credited or transferred to the new programme before they submit Admission Applications or Enrolment Applications. Students applying for loans and/or allowances should contact StudyLink to check their eligibility for assistance. International students should check that

whatever changes they make still comply with the conditions of their visa.

58. Enrolment in a programme at Massey University requires:
- approval of admission to the University and to the qualification by the Council of the University (or its delegate) (this includes applicants being of good character, which includes, amongst other judgements, an applicant's previous conduct and discipline and the applicant's sufficient study progress at another institution in line with Massey's Academic Progress Monitoring thresholds);
 - assurance from the relevant academic unit that the financial, human and physical resources relevant to the proposed programme are available; and
 - enrolment in courses that meet the academic requirements of the qualification.
59. In accepting an offer of place, completing enrolment, and signing the Student Contract, the applicant or student is confirming that they genuinely believe that they are able to undertake the study offered. The confirmation includes, but is not limited to, personal evaluation of their:
- Availability in terms of time required and location of study
 - Capacity to manage the workload associated with the credit-load of courses planned
 - Willingness to engage in the designated types of assessment and learning activities
 - Access to the required personal resources to study
 - Expected wellness or fitness to study, or in the case of long-term health or disability issues, willingness to disclose these to appropriate officers of the University and willingness to engage with the University support mechanisms.

Withdrawal and Cancellation

60. Withdrawals may only be notified by students using the online enrolment facility accessible from the University website or, as an exception, by written notification of withdrawal received by the University. Doctoral students must advise the Graduate Research School of their intention to withdraw on the appropriate form through the Portal. The date of withdrawal is deemed to be the date on which the notice of withdrawal is received by the University. All distance students are required to return their study materials to the University.
61. When the University receives written/online notification of withdrawal from course(s), comprising part but not all of a student's programme(s) for the year, before 17 percent of the study period has elapsed for the courses concerned (as defined by the course start and end date, termed the census date), the student will be eligible to receive a refund of tuition fees paid for the courses concerned and no academic penalty shall apply. Students will not receive a refund of non-tuition fees paid, and are still required to pay non-tuition fees, but non-tuition fees may be reduced subject to the number of credits remaining in the student's programme.
62. When the University receives written/online notification of withdrawal from course(s), comprising all of a student's course(s) for the year, before the census date the student will be eligible to receive a refund of tuition fees and non-tuition fees paid and no academic penalty shall apply. International students may incur an International Administration fee. Should the student be eligible for a refund, where possible the International Administration fee will be deducted.
63. When the University receives written/online notification of withdrawal from a course(s) after the census date but before 75 percent of the study period has elapsed for the course(s) concerned (as defined by the course start and end dates) the student shall be withdrawn but will remain liable to pay all University prescribed fees and will not be entitled to a refund. PhD students will receive a refund based on EFTS not consumed for the academic year.
64. When the University receives written /online notification of withdrawal from a course(s) after 75 percent of the study period has elapsed for the course(s) concerned (as defined by the course start and end dates) the student shall be withdrawn with academic penalty and remain liable to pay all University prescribed fees and will not be entitled to a refund.
65. Students who do not attend a course, where they have accepted an Offer of Enrolment and where they have received a Confirmation of Enrolment, will be liable to pay all fees prescribed by the University and are not entitled to any tuition fee refund for that course unless the correct withdrawal procedures are followed and unless the University receives notice of withdrawal before 17 percent of the study period has elapsed (as defined by the course start and end dates).
66. Withdrawal after 75 percent of the study period is termed 'withdrawal with academic failure'. The academic record will show DC (Did Not Complete) for all students except doctoral students and WD for doctoral students. Repeated DC or academic failure in the same course may result in the University refusing to enrol that person in the course again in line

with clause 58 (b) of the Academic Progress Regulations. Refusal is notified to the student concerned in writing after first giving the Applicant an opportunity to be heard. Students remain eligible to apply to re-enrol in the future.

67. In line with clause 58 (b) of the Academic Progress Regulations, in order to respect the expectation that students will make genuine efforts in their studies, the University may initiate the cancellation of the enrolment of a person where an evaluation determines that a student has not, or cannot, or will not, participate in the course(s) they have enrolled in, and it is not feasible that the student's position will be recoverable prior to the end of the course. In these cases, the University's intention will be notified to students in writing and any submission they make in reply will be managed by the Academic Progress Committee prior to a cancellation being finalised.
68. In accordance with section 255(5)(a) of the Education and Training Act 2020 and the Student Contract, the University may cancel or refuse the enrolment of a person on the grounds that it is determined, after careful consideration, that the person is likely to not be of good character and is likely to represent a significant risk to members of the University community or public. In these cases the University's potential action will be advised to the person in advance, they shall have the right to seek advice and make representations, for those representations to be considered impartially and for any cancellation decision to be appealed to the Provost or nominee.

Specific Circumstances, Including Fee Return

See Assessment and Examination Regulations

Postgraduate Research Courses, Including Carry Forward

69. Postgraduate students enrolled in designated research courses including theses, dissertations, research reports, or project courses (other than for Doctoral degrees), may apply for consideration of their situations as a case of Specific Circumstances and/or they may apply to carry forward their enrolment.
70. Postgraduate carry forward arrangements permit the student, on one occasion, to continue into a new enrolment period. The new enrolment period follows the enrolment period where the student paid tuition fees and this carry forward arrangement is permitted in order to complete the requirements of a thesis (part two), dissertation, research report, or project course, where one of the following conditions applies:
- exceptional personal circumstances arise that prevent a student from completing the requirements of a thesis, dissertation, research report, or project course within the relevant enrolment period;
 - a thesis, dissertation, research report, or project course is being undertaken on a part-time basis and completion within the relevant enrolment period is not possible; The part-time classification must be established at enrolment.
 - the start date of the thesis, dissertation, research report, or project course has been approved to be different from the start date of the first or only such course. This does not apply to 90 or 120 credit thesis courses; or
 - unanticipated problems arose with the conduct of research or with supervision or support which are beyond the control of the student.
71. Applications for Carry Forward of Postgraduate Enrolment with exceptional personal circumstances are subject to approval by Academic Board (or its delegate). Students must have a current enrolment for the period in which they will submit but no further tuition fees are due for the enrolment period in which Postgraduate Enrolment is carried forward. An application fee is payable at the time that the application is made. An application will only be approved where Academic Board (or its delegate) is satisfied the student has been making satisfactory progress.

Enrolment of School Students

72. Students who are enrolled for full-time instruction in a secondary school may in conjunction with their school be permitted to study concurrently at the University. All such enrolments must be approved by the secondary school involved. Students admitted under this regulation will be enrolled in the Certificate of Proficiency. When they have matriculated they may apply to credit to a qualification those courses passed under this regulation.

Enrolment of International Students

73. Massey University has agreed to observe and be bound by The Education (Pastoral Care of Tertiary and International Learners) Code of Practice

2021 (the Code) published by the New Zealand Qualifications Authority. Copies of the Code are available on request or from the New Zealand Qualifications Authority website at www.nzqa.govt.nz/providers-partners/caring-for-international-students/

74. International students must have compliant insurance cover whilst studying in New Zealand in accordance with the Code.
75. Prior to, and throughout, enrolment in New Zealand-based course deliveries, international students must hold a valid visa which entitles them to study at Massey University.

Persons Resident Outside New Zealand Enrolling for Distance Study

76. New Zealand citizens and holders of New Zealand resident class visas residing outside New Zealand are entitled to pay domestic fees provided they are enrolled:
- in a course(s) leading to the award of a recognised qualification offered by a New Zealand Tertiary Education Organisation (TEO); and
 - at a New Zealand campus of a New Zealand TEO*
- Additional non-tuition fees may apply
- *Note: Distance is recognised as a New Zealand campus
77. Australian citizens living outside New Zealand who are enrolled for tuition must pay fees at the rate for international students.
78. Distance enrolment may be permitted for applicants living outside New Zealand who are not New Zealand citizens. The process for setting tuition fees due for such enrolments are the same as for other international full fee-paying students studying at Massey University. Enrolment in international off-shore distance programmes may be subject to special terms and conditions as determined and approved by Academic Board (or its delegate). Particular programmes of study and courses may have an attendance or contact workshop requirement which has a face-to-face dimension. Approval of offshore distance education initiatives are subject to the requirements of the University's Policy relating to the International Delivery of Qualifications.
- Note:** Enrolment by distance education will not normally be approved for citizens of the People's Republic of China in order to ensure degree recognition. Any exception requires approval by the Pro Vice-Chancellor of the College (or their delegate) responsible for the student's programme of study.

International Students Resident in New Zealand Enrolling for Distance Study

79. International students who are in New Zealand must generally study internally at a campus and hold the appropriate visa; some distance courses may be permissible as long as the student is adequately enrolled to meet visa conditions. People who hold a work visa or other such visas that allow distance study while in New Zealand may undertake distance study, with appropriate variation of conditions to their visa.
- Note:** Enrolment by distance education for citizens of the People's Republic of China requires additional completion of a declaration by students to confirm they are fully informed of issues related to degree recognition. Approval is granted by the Pro Vice-Chancellor (or delegate) of the College responsible for the programme.

Maximum Student Workload

80. Subject to the student's Academic Progress Status:
- The maximum credits students may take in total over Semester One, Semester Two and the Double Semester shall not exceed 150 credits. Students shall not enrol in more than 75 credits per semester. Students shall not enrol in more than 60 credits for Summer School. Students shall not enrol in more than 180 credits in an academic year;
 - Students will not be permitted to enrol in more than 120 credits in total over Semester One, Semester Two and the Double Semester, more than 60 credits per semester, more than 30 credits for Summer School or more than 150 credits in an academic year unless they have passed 100% of credits in their most recent enrolment period having achieved at least a B grade average across the courses in which they were enrolled.
 - Credits for double semester courses are assigned in equal parts per semester;
 - Applicants shall not enrol in the same year for more than two distinct programmes of study for degrees and diplomas;
 - The Maximum Student Workload Regulations apply to undergraduate and postgraduate students.

Certificate of Proficiency Regulations

81. An applicant who intends to register for tuition without fulfilling the requirements of a full programme leading to a Massey University qualification must first meet the Admission Regulations, after which

they may be permitted to enrol for no more than 60 credits per year on a Certificate of Proficiency, unless applicants are International students

- attending the University under a Study Abroad or Student Exchange agreement in which case a higher workload may be required.
82. The programmes of study under a Certificate of Proficiency must not be substantially similar to an existing qualification on the New Zealand Qualifications Framework, or have outcomes which are more suited to being listed as an existing qualification on the New Zealand Qualifications Framework.
 83. Except as permitted by the Enrolment of School Students regulation, applicants are required to satisfy Regulation 8 of the Matriculation Regulations.
 84. Applicants for a Certificate of Proficiency shall pay fees, complete compulsory requirements and give notice of their intention to enter for examinations, where appropriate, as if they were proceeding to a degree, diploma or certificate. The Enrolment and Examination Regulations shall apply to such candidates.
 85. Where required under the COVID-19 Public Health Response (Vaccinations) Order 2021, or by any additional Government orders or Massey University Council requirements, admission to specified programmes of study within Massey University, and continued enrolment and progression in those programmes, requires evidence of full and current COVID-19 vaccination status. This requirement will be applied to any and all programmes in accordance with Government orders or Massey University mandates.

Approval of Course

86. The personal course of study of every applicant for a Certificate of Proficiency shall require the approval of the Academic Board or delegate. Normally approval is exercised as part of the enrolment process.

Status of Certificate of Proficiency Pass

87. A student who has passed a course for a Certificate of Proficiency may at a later date have the course credited towards a degree, diploma or certificate provided that the necessary conditions for the course as a part of the degree, diploma or certificate were fulfilled at the time when the course was passed for a Certificate of Proficiency.

Aligned Resource Management

88. In keeping with principles of sound management, Massey University wishes to ensure that it can adequately resource the programmes of study it offers. Accordingly, the University reserves the right under Section 255 (4) (a) of the Education and Training Act 2020 to control the number of enrolments it will accept in any programme.
89. The number of places to be funded in any programme and the criteria for student selection will be available on application from Student Administration prior to each enrolment period. Every endeavour will be made to meet the academic needs of students where this does not prejudice the proper presentation or the academic standing of a programme.

University Fee Regulations

Fees Payment Regulations

90. Tuition fees and non-tuition fees are subject to annual adjustment by the University Council and the student agrees to pay the tuition fees and non-tuition fees as set each year. Tuition and non-tuition fees are calculated on an academic year basis not by enrolment period. Where a student's study spans two academic years, e.g. student enrolls for Semester Two and later enrolls for Semester One of the following academic year, the student will be liable for the tuition and non-tuition fees as set for each academic year.
91. All University fees are payable upon the University issuing a Confirmation of Enrolment and before the start of study, or earlier if required by the University and specified in an Offer of Place and/ or Enrolment. Each student's fee account will remain in credit for any amount tendered in payment for University fees until their programme has received academic approval.
92. Unless otherwise advised in writing by the University, students must pay all University fees to the University directly and not to any recruitment agent or other party. For international transactions there may be a bank fee charged which is payable by the student.
93. Students who enrol at the same time for courses in more than one enrolment period (for example, Semester One and Semester Two) may, at the time of their Enrolment Application in the first period, elect to defer payment of tuition fees for the later period (for example Semester Two).
94. For students who are paying all or part of their fees through the StudyLink Student Loans Scheme, some University fees, inclusive of tuition fees and some non-tuition fees, will be requested on approval of their loan application. When student loans are declined in full or in part students are still responsible for any outstanding fees.
95. For students who are paying all or part of their fees through TEC Fees Free Scheme, payment of some University fees, inclusive of tuition fees and some non-tuition fees, for the full year will be requested from the TEC on approval of their fees free eligibility. If a student is ineligible for Fees Free or has consumed their entitlement, they are responsible for any outstanding fees.
96. Enrolment may proceed in advance of receipt of fee payment in circumstances that:
 - (a) the fees due are to be paid from a student loan but if a student loan is not approved in full or in part the student remains responsible for any outstanding fees;
 - (b) the fees due are to be paid from the TEC Fees Free scheme but if the student is ineligible or has consumed their entitlement, the student remains responsible for any outstanding fees
 - (c) the fees due are to be paid on behalf of the student by a sponsor. A sponsor is normally an employer or a training body, a government agency or a trust or Iwi authority. When the University fees are not paid by the specified due date on behalf of the student, the student remains responsible for any outstanding fees; or
97. Application to add courses after the original Enrolment Application has been lodged must be accompanied by the additional tuition fees estimated or determined to be due. If the student has accepted an Offer of Enrolment and then wants to add courses or substitute courses, if the

University agrees then a new Offer of Enrolment is generated and must be accepted and a Confirmation of Enrolment issued.

98. Students who withdraw from a particular course or all or part of their programme after census date or 17 percent shall remain liable for the fees associated with the withdrawn course(s).
99. Delivery of any services or teaching material does not, in itself, constitute an undertaking by the University that a student's enrolment for tuition will be continued if fee payment is not completed. The University may, at the University's option, cancel the student's enrolment if any of the University fees are not received. If cancellation occurs after the final withdrawal date for a credit then all University fees are payable.
100. Invoices will be issued to all students on confirmation of enrolment and when changes are made to enrolment. A Statement of Account will be available to all students which will present the current status of an account. When any fees are 60 days or more overdue the University may, at the University's option cancel or suspend the enrolment of the student. Suspension means that students:
 - (a) no longer have access to certain University facilities;
 - (b) will not receive grades for courses;
 - (c) will not have access to their academic records; and
 - (d) may not re-enrol at Massey University until the fees due have been paid in full.

Cancellation means the person concerned is no longer a student at Massey University and has no right to engage in any courses and no privileges afforded to students. Even when enrolment is cancelled or suspended, all fees owing to the University must be paid.

101. A credit of tuition fees shall be made to students who withdraw in the manner required from their course(s) before 17 percent of the study period has elapsed as defined by the course start and end dates (see Enrolment Regulations). Commission paid by Massey University to agents for international students will also be deducted from any refund in respect of the courses withdrawn from. Note that Doctoral students are subject to different fee refund provisions. International students who withdraw from all of their study at Massey University within the time and in the manner required to obtain a tuition fee credit may be required to pay an International Administration Fee. International students studying in New Zealand must have attained permanent residence in New Zealand or Australia before the course has started to be eligible for domestic tuition fees. Students must present evidence prior to the end of the relevant enrolment period for Semester One and Two enrolments, or prior to the close of business in December for those students enrolled in Summer School. Refunds due for overpayment of fees or in the event of withdrawal with a credit of tuition fees are made as soon as possible once enrolments and financial support provisions have been established for a particular study period. In any case, where a specific request is made for a refund that has been approved, such refund will be made within 28 days. If the refund cannot be made a written statement shall be provided to the student as to

why the refund cannot be made, together with a date by which the refund shall be made.

Withdrawal by the University: if the University withdraws a student from a course after 17 percent of the study period, the student is eligible for a credit. If they have paid fees, they will be refunded.

102. Massey University accepts no liability to pay interest or other consideration in respect of monies held in full or part payment of University fees and is not liable to the student or anyone else for exchange rate movement, conversion charges, bank fees, or fees paid to recruitment or immigration agents. This also includes charges incurred by students through StudyLink.
103. Partial refunds are normally made directly to the student who is enrolled. Any sponsored student to whom a partial refund is made shall be responsible for reimbursing any other party (such as a sponsor or government agency) who has paid fees on their behalf. However, where practicable, partial refunds will be made direct to the government agency responsible for any fees paid where the University is party to such an agreement.
- When international students withdraw from their programme of study at Massey University, in the manner required, before 17 percent of the study period has elapsed, and cannot provide evidence of a long-term visa to remain in New Zealand, partial refunds will be made to a bank account in the student's home country, as nominated by the student. Where students withdraw from Massey University and enrol at another institution in New Zealand, partial refunds will be made directly to the relevant institution. In the case of students who are deceased, partial refunds, where applicable, are made to the estate of the person concerned, care of the next of kin as notified to the University.
104. Where students are enrolled principally because of an agreement between Massey University and another entity the payment and refund of fees will be governed by that other agreement.

PhD Doctoral Students

105. (a) Fees for PhD candidates are due on initial enrolment pro-rated to the end of the academic year in which they are commencing (i.e. based on EFTS consumption), with fees invoiced at the beginning of each academic year for subsequent years. Fees for any period of suspension will be adjusted at the time of application for suspension and a credit will be provided in the year of the suspension period. Fees for periods of extension will be calculated at the time of application for extension.

- (b) Candidates will be charged in line with their EFTS consumption pro-rated for the calendar year. Full-time candidates will be charged for one EFT per full year. Part-time candidates will be charged at the applicable rate (currently 0.6666 EFTS) each academic year.
- (c) Candidates undertaking Named Doctorate programmes are required to pay their course work, practicum, internship, tuition and thesis fees as required by each programme.
- (d) Candidates who have had their oral examination and are required to complete further work on their thesis and be re-examined, will be re-enrolled, and must pay the full tuition fee for the duration of the re-examination period until re-submission of the thesis. This provision will apply from the date the candidate is notified of the required further work.

Postgraduate Students

106. (a) Masters students pay tuition fees for the actual credits/courses for which they are enrolled each year. Fees do not maximise at 1.0 EFTS (120 credits).
- (b) When theses, dissertations, research reports, or project courses are not submitted by the end date of the course, the student must re-enrol for a further enrolment period of one semester or one year (as appropriate) and pay tuition fees.
- (c) A one-month extension may be granted without penalty or cost.
- (d) If a student qualifies for Carry Forward of Postgraduate Enrolment, they will be re-enrolled but are not required to pay fees.
- (e) These regulations do not apply to Doctoral students.

Students' Association Fee Regulations

107. Students may elect to join a Student Association. Annual subscriptions, if any, can be paid directly to the Student Association at any time during the academic year (unless otherwise advised).

Halls of Residence Fees Regulations

108. Accommodation fees for each semester shall be paid as scheduled.
109. Any resident whose accommodation fees are not paid by the due date may be debarred from residence unless special arrangements have been made with the Accommodation Team.
110. Any resident intending to withdraw from study will be required to withdraw from University accommodation. Application forms for release from University student accommodation are available from the Accommodation Team.

Conferment and Graduation Regulations

111. Any person wishing to have a degree conferred or a diploma presented at the annual graduation ceremonies must make application in the year of the ceremony not later than 1 February for Wellington ceremonies, 1 March for the May ceremonies at Manawatū and Auckland, and 1 September for the November ceremony in Manawatū. Applications should be submitted to the University on time; late applications will only be considered in exceptional circumstances.
112. Any person who has completed the qualifications for a degree, diploma or certificate, who does not wish to attend a graduation ceremony in person, may at any time apply to have the degree, diploma or certificate conferred 'in Council' at the next appropriate meeting of Academic Board.
113. The University may initiate the award of a qualification on behalf of a student who has been excluded, or has abandoned their study, or in other reasonable circumstances is unlikely to continue their studies, by issuing a notification to the student of the intent to award a qualification. The notification will be considered delivered if it is sent to the last known email address or physical contact address/es of the student. Students will then be recommended for an award 'in Council' at the next opportunity.
114. Students may be awarded qualifications which they did not enrol in, either where they request to be transferred to another qualification or where the student is exiting or being exited from their enrolled qualification with a lower qualification. In both instances the student will normally have to meet all the requirements for the qualification for which the award would be made. The available transfer and exit qualifications are limited to those approved for teaching in the year in which the award would be made.
115. The University shall consider the awarding of posthumous undergraduate and postgraduate qualifications to a student who has died prior to their programme of study being completed and/or prior to any final compulsory elements of their qualification being completed.
- (a) The potential for an award to be made shall be determined by the Pro Vice-Chancellor of the College (or delegate) which hosted the qualification in which the student was enrolled at the time of their death.
- (b) The Pro Vice-Chancellor's (or delegate) decision will be guided by the following considerations:
- (i) The underpinning presumption is that the student at the minimum, should be awarded the highest qualification for which they have fully met the qualification's credit requirements regardless of whether they have applied to graduate for the qualification, and regardless of whether they were fully enrolled in the qualification at the time of their death. The student must, however, meet the entry requirements for the qualification being awarded.
- (ii) Consideration may be given to posthumously awarding a qualification that is incomplete but where at least 75% of the required credits for the qualification have been passed and which normally includes at least one course passed in the highest level
- (iii) Recognition of prior learning credits completed outside of Massey and already on the student's record will be included in the awarding credits considered as part of this process.
- (iv) If the highest qualification possible is an exit qualification (e.g. a diploma) but that award would result in there being residual credits that might result in a second exit qualification (e.g. a certificate), the second qualification should also be awarded subject to clause b) ii.
- (v) Courses in which the student was currently enrolled at the time of their death may be reopened if appropriate and necessary and verified marks imputed into the student's record and/or an aegrotat application be made for the deceased student if these actions will enable a higher qualification to be awarded. This will be judged on a case-by-case basis depending on how much of the course/s the student had completed and whether a WS and credit of fees is more appropriate.
116. The University shall consider the awarding of a posthumous doctoral qualification to a student who has died prior to their programme of study

being completed and/or prior to any final compulsory elements of the qualification being completed.

- (a) The potential for an award to be made shall be determined based on recommendations by an appointed panel.
- (b) The panel shall be established by the Dean Research or nominee. The panel shall consist of a neutral Doctoral Research Committee (DRC) representative (normally this would be the College representative on the DRC), not associated with the student's work (this person shall Chair), the main supervisor, and another academic from Massey who has significant doctoral examination experience. This panel may also include a suitably qualified academic from another University, if appropriate, to assist the decision making.
- (c) In the case of doctoral degrees that have been examined, the panel shall consider if the requirements have been met or substantially met and shall normally make a recommendation to award if an oral examination has been completed in the following circumstances:
 - (i) The student passed but the formal final submission had not been made by the student.
 - (ii) The student passed but emendations were requested and made, but the formal final submission had not been made by the student.
 - (iii) The student passed and minor emendations were requested and not yet made, but the examiners' reports were favourable towards the thesis.
- (d) In the case of doctoral degrees that have not yet been examined or were pending re-examination, the panel shall consider if the body of work is sufficiently complete such that an examination or re-examination of the body of work without an oral examination may be undertaken. Such an approach would normally be taken where:
 - (i) The student was examined, and revisions were requested and not yet submitted for re-examination.
 - (ii) The thesis was submitted for examination and was pending an oral examination.
 - (iii) Where a main supervisor believes a final or penultimate draft of the thesis was completed but was not yet submitted for examination, and this is available to be sent to examiners.
- (e) Where the panel believes the student's body of work is not sufficiently complete to permit a doctoral examination process, an award of an alternative postgraduate qualification may be recommended by the Doctoral Research Committee to the College in which the student was enrolled.

ACADEMIC REGULATIONS | WHAKARITENGA TOHU MĀTAURANGA

General Regulations: Undergraduate and Graduate Qualifications 19	Recognition of Formal and Informal Prior Learning 21
General Regulations: Postgraduate Qualifications..... 20	Academic Progress Regulations 22
Cases of Hardship – Vice-Chancellor’s Power 21	Exclusion Regulations 23

General Regulations: Undergraduate and Graduate Qualifications

These General Regulations are to be read in conjunction with all other Statutes and Regulations of the University and the Qualification Regulations specific to each Undergraduate Degree, Diploma and Certificate, Graduate Diploma and Graduate Certificate offered by the University.

Admission

1. Students must satisfy the admission requirements of the University and the programme in which they wish to enrol.

Academic Requirements

2. An undergraduate or graduate qualification will consist of a number of credits accumulated from courses, as specified in the Qualification Regulations.
3. Every programme of study will comply with any specified prerequisites, co-requisites and restrictions requirements. This applies to courses specific to that qualification or, where allowed within the relevant regulations, to approved courses able to be selected from other qualifications or subjects.

Specialisations

4. Qualifications for which specialisations, such as majors, minors, subjects or endorsements, are listed may have these specified at the time of programme approval by the Academic Board. With the exception of minors, the degree, diploma, or certificate completed by the student will state the specialisation.

Student progression

5. Students may not enrol for any 200-level course unless they have passed at least 45 credits at 100-level, nor enrol for any 300-level course unless they have passed at least 45 credits at 200-level. Students admitted to a graduate diploma or graduate certificate under Admission with Equivalent Status Regulation 26 are deemed to have met these requirements.
6. Students who wish to take a course for which they do not have the prerequisite(s) may make a case for admission to the relevant Head of School or Programme Director concerned.
7. Students who have not been enrolled for a period of three consecutive years will be deemed to have abandoned their qualification. Abandonment releases the University from its obligation to ensure a qualification can be completed. Students may be permitted to be admitted to a current qualification should they meet the entry requirements at the time of admission; credits previously achieved will be assessed and applied in accordance with current regulations.
8. The Academic Board (or delegate) may, under such conditions as it may determine and taking into account the recommendations of the Chief Examiner(s), admit any candidate to a supplementary assessment in a course in which the candidate failed to gain a pass.

Academic Progress

9. All students are expected to achieve at least Satisfactory Academic Progress in each enrolment period. Unsatisfactory Academic Progress is governed by the Academic Progress Regulations and the Academic Progress Policy which sets out the minimum (satisfactory) thresholds.

Variations and Personal Programme Approvals

10. The Head of School or Programme Director may, in such cases as they think fit, approve a personal programme of study which does not conform with the General Regulations or the Qualification Regulations for that degree, diploma or certificate while still conforming to the academic standards of the qualification.
 - (a) The following rules will apply:
 - (i) There must be a compelling academic case to merit the variation; or
 - (ii) There must be evidence of exceptional circumstances and/or hardship to the student.
 - (iii) Variations will receive appropriate academic authorisation under delegation from Academic Board and be formally documented.
 - (iv) The variation will be recorded on the student’s academic record.

(v) Personal programme approvals will not permit a reduction in the total amount of credit required to complete a qualification.

(vi) The extent of variation cannot jeopardise the integrity of the qualification. To this end there will normally be a limit on the extent to which a qualification can be varied. The maximum amount of credit varied will relate to the size of the qualification as follows:

120 credit qualification: 15 credits

240 credit qualification: 30 credits

360 credit qualification: 45 credits

480 credit qualification: 60 credits

(vii) Variations will not normally be permitted in 60-credit qualifications.

(viii) Except where the special circumstances apply to a cohort of students (for example when transitioning students as a result of programme closure or course unavailability) variations will only be considered on a case-by-case basis and will not set a precedent.

- (b) Notwithstanding Regulations 10 (a) (vi), (vii) and (viii), and at the discretion of the relevant Pro vice-Chancellor, students exiting a programme may have a personal course variation approved in excess of stated limits to meet the requirements of the proposed exit qualification through the substitution of courses from the schedule for the qualification being exited.

11. Subject to any Maximum Time to Completion and Abandonment of Studies provisions specified in the Part II qualification regulations, where a student has completed a course towards a qualification or specialisation and that course has subsequently been removed from the schedule, unless otherwise specified in the regulations, the student will be permitted to substitute the completed course for a non-compulsory, elective/subject course(s) at the same or lower level and of the same total credit value, included in the schedule.

Transitional Provisions

12. The University reserves the right to introduce such changes as it may judge to be necessary or desirable, including the addition, restructuring or withdrawal of qualifications, specialisations, regulations and/or courses. Reasonable provisions will be made to enable students to complete any qualification which is discontinued or has its structure substantially altered. Such provisions will provide students with a reasonable time for completion.
13. Candidates who have been awarded with Restricted Passes prior to the commencement of the 2017 academic year may continue to credit these to their programme of study in accordance with the following regulations:
 - (a) A student with a restricted pass in any course may subsequently enrol in the same course in order to attempt to improve the grade of pass. However, the course can be credited only once.
 - (b) The maximum credits able to be credited from restricted passes are 60 for a 480 credit degree; 45 for a 360 credit degree; 30 for a 240 credit diploma and 15 for a 120 credit certificate or diploma; No R passes are permitted in a 60 credit certificate.
 - (c) A restricted pass will not qualify as a pass for prerequisite purposes.
 - (d) This regulation will expire at the end of the 2025 academic year.

Limitation of Entry

14. For any programmes of study offered by the University, the University Council (by its delegate) may limit the number of students enrolled in one or more programmes of study or training each year because of insufficiency of staff, accommodation, or equipment, or for other reasons that may arise. Accordingly, where the number of applications for the particular programme(s) exceeds the number of places available, then Massey University will select from the applicants the students to be enrolled in the programme of study.

Public Health Considerations

15. Where required under the COVID-19 Public Health Response (Vaccinations) Order 2021, or by any additional Government orders

or Massey University Council requirements, admission to specified programmes of study within Massey University, and continued enrolment and progression in those programmes, requires evidence of full and

current COVID-19 vaccination status. This requirement will be applied to any and all programmes in accordance with Government orders or Massey University mandates.

General Regulations: Postgraduate Qualifications

These General Regulations are to be read in conjunction with all other Statutes and Regulations of the University and the Qualification Regulations specific to each Postgraduate Degree, Diploma and Certificate offered by the University.

Admission

16. Admission to a Postgraduate certificate, Postgraduate diploma, 120-credit Bachelor (Honours) degree or a Master's degree requires that the student will:
- have made formal application for admission to postgraduate study for the specified programme; and
 - (i) have qualified for the award of a relevant Bachelor's degree with a grade average that demonstrates an adequate level of preparation for the postgraduate programme; or
(ii) have an approved academic qualification of similar standing to the relevant Bachelor's degree; or
(iii) have been granted admission with equivalent status as entitled to proceed to the specified Postgraduate degree, diploma or certificate; and
where appropriate to a specific qualification:
 - (i) provide evidence of practical/professional experience of an acceptable standard in an area(s) relevant to the qualification; or
(ii) on the request of the Head of School or Programme Director, carry out such work and satisfy such assessments as the Board may determine to be necessary for admission.

Academic Requirements

17. (a) A postgraduate qualification will consist of a number of credits accumulated from taught courses and/or research courses, at 700-level or above, as specified in the Qualification Regulations.
(b) For the award of the degree, diploma or certificate a pass is required in each course in the qualification. A student may re-enrol and be re-examined only once in a failed course.

Research Reports and Theses

18. (a) A research report will consist of a minimum of 30 credits; a thesis will consist of a minimum of 90 credits.
(b) The research component of postgraduate programmes will be 0, 30, 45, 60, 90 or 120 credits with the proviso that the Bachelor (Honours) degree will have a minimum research component of 30 credits and those Master's degrees that require a research component will have a minimum of 45 credits of research.
(c) Postgraduate diplomas and certificates may have a research component of zero credits and consist entirely of taught courses.
(d) For thesis courses that are offered for enrolment as Part One and Part Two, candidates are required to precede their enrolment in Part Two with enrolment in Part One.

Student Progression

19. (a) Students will have completed their 700-level course requirements prior to enrolling in the 800-level course/s.
(b) (i) 120-credit Bachelor (Honours) degrees will be awarded as First Class Honours, Second Class Honours Division I, Second Class Honours Division II or Third Class Honours. Bachelor (Honours) degrees must be completed within one year of first enrolling in full-time study or within three years of first enrolling in part-time study.
(ii) Postgraduate diplomas and 120-credit Master's degrees will carry the award of Distinction if completed at a superior standard (equivalent to First Class Honours), or Merit (equivalent to Second Class Honours, Division One) within one year of first enrolling in full-time study or within three years of first enrolling in part-time study.
(iii) 180-credit Master's degrees will carry the award of Distinction if completed at a superior standard (equivalent to First Class Honours), or Merit (equivalent to Second Class Honours, Division One) within eighteen months of first enrolling in full-time study or within four years of first enrolling in part-time study.
(iv) 240-credit Master's degrees will be awarded with First Class Honours, Second Class Honours Division I, Second Class Honours Division II or a pass. To qualify for the award of honours, 240-credit Master's degrees must be completed within two years of first enrolling for full-time study or within five years of first enrolling for part-time study.

- (v) These periods may, in special circumstances, be amended/extended by the Pro Vice-Chancellor (or delegate). The Pro Vice-Chancellor (or delegate) may also in special circumstances permit students to suspend their programme of studies for an approved period. The duration of the suspension of study will be excluded from the time used for the calculation of honours or distinction.
20. The Academic Board (or delegate) may, under such conditions as it may determine and taking into account the recommendations of the Chief Examiner(s), admit any candidate to a supplementary assessment in a course in which the candidate failed to gain a pass.
21. Students who wish to take a course for which they do not have the prerequisite(s) may make a case for admission to the relevant Head of School or Programme Director concerned.

Academic Progress

22. All students are expected to achieve at least Satisfactory Academic Progress in each enrolment period. Unsatisfactory Academic Progress is governed by the Academic Progress Regulations and the Academic Progress Policy which sets out the minimum (satisfactory) thresholds.

Specialisations

23. Qualifications for which specialisations, such as endorsements or subjects, are listed may have these specified as specialisations at the time of programme approval. The degree, diploma, or certificate completed by the student will state the specialisation.

Maximum Time to Completion

24. Unless otherwise specified in the Qualification Regulations there will be time limits for completion as follows:
- 60-credit Postgraduate Certificates must be completed within a maximum of two years.
 - 120-credit Postgraduate Diplomas must be completed within a maximum of four years.
 - 120-credit Masterates must be completed within a maximum of four years.
 - 180-credit Masterates must be completed within a maximum of five years.
 - 240-credit Masterates must be completed within a maximum of six years.
 - 120-credit Bachelor (Honours) must be completed within a maximum of three years.
- Where credit has been transferred in accordance with the Recognition of Prior Learning Regulations, the above time limits may be pro-rated when calculating maximum time limits for completion. Time limits may be waived, at the discretion of the Pro Vice-Chancellor (or delegate), where a student exits with a qualification of lesser credit.
25. Students who have been inactive for a period of three consecutive years will be deemed to have abandoned their qualification. Abandonment releases the University from its obligation to ensure a qualification can be completed. Students may be permitted to be admitted to a current qualification should they meet the entry requirements at the time of admission; credits previously achieved will be assessed and applied in accordance with current regulations.

Variations and Personal Programme Approvals

26. The Pro Vice-Chancellor (or delegate) may, in such cases as they think fit, approve a personal programme of study which does not conform with the General Regulations or the Regulations for that degree, diploma or certificate while still conforming to the academic standards of the qualification (subject to specific rules).
- The following rules will apply:
 - There must be a compelling academic case to merit the variation, or;
 - There must be evidence of exceptional circumstances and/or hardship to the student.
 - Variations will receive appropriate academic authorisation under delegation from Academic Board and be formally documented.
 - The variation will be recorded on the student's academic record.
 - Personal programme approvals will not permit a reduction in the total amount of credit required to complete a qualification.
 - The extent of variation cannot jeopardise the integrity of the qualification. To this end there will be a limit on the extent to which a qualification can be varied. The maximum amount of credit variation

normally permitted for qualifications which have a total credit value higher than 60 credits is 30 credits.

(vii) Variations will not normally be permitted in qualifications which have a total credit value of 60 credits or lower.

(viii) Except where the special circumstances apply to a cohort of students (for example when transitioning students as a result of programme closure or course unavailability) variations will only be considered on a case-by-case basis and will not set a precedent.

- (b) Notwithstanding Regulations 26 (a) (vi) (vii) and (viii), and at the discretion of the relevant Pro vice-Chancellor, students exiting a programme may have a personal course variation approved in excess of the stated limits to meet the requirements of the proposed exit qualification through the substitution of courses from the schedule for the qualification being exited.

27. Subject to any Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I qualification regulations, where a student has completed a course towards a qualification or specialisation and that course has subsequently been removed from the schedule, unless otherwise specified in the regulations, the student will be permitted to substitute the completed course for a non-compulsory, elective/subject course(s) at the same or lower level and of the same total credit value, included in the schedule.

Transitional Provisions

28. The University reserves the right to introduce such changes as it may judge to be necessary or desirable, including the addition, restructuring or

withdrawal of qualifications, specialisations, regulations and/or courses. Reasonable provisions will be made to enable students to complete any qualification which is discontinued or has its structure substantially altered, but such provision will not extend beyond the permitted time for completion.

Limitation of Entry

29. For any programmes of study offered by the University, the Pro Vice-Chancellor (or delegate) may limit the number of students enrolled in one or more programmes of study or training each year because of insufficiency of staff, accommodation, or equipment, or for other reasons that may arise. Accordingly, where the number of applications for the particular programme(s) exceeds the number of places available, then Massey University will select from the applicants the students to be enrolled in the programme of study.

Public Health Considerations

30. Where required under the COVID-19 Public Health Response (Vaccinations) Order 2021, or by any additional Government orders or Massey University Council requirements, admission to specified programmes of study within Massey University, and continued enrolment and progression in those programmes, requires evidence of full and current COVID-19 vaccination status. This requirement will be applied to any and all programmes in accordance with Government orders or Massey University mandates.

Cases of Hardship – Vice-Chancellor’s Power

31. In any case where it is shown to the satisfaction of the Vice-Chancellor that any alteration or amendment of a University statute or Regulation involving a change in a programme or in examination requirements has caused hardship to a student, the Vice-Chancellor may make such

provisions as is thought fit for the relief of such hardship. The student may appeal the decision of the Vice-Chancellor to the Council, which may make such provisions as it thinks fit.

Recognition of Formal and Informal Prior Learning

Types of Massey University Credit That May Be Awarded

32. Recognition of prior formal and informal learning may be awarded as credit to a programme of study or awarded as credit to or from a micro-credential.
33. Recognition of prior formal and informal learning may also be used to grant entry into a programme of study at either pre-degree, undergraduate or postgraduate level, see Admission Regulations and the regulations for the qualification involved.

Formal Prior Learning

34. Any credit awarded under these regulations will be calculated based on the prior learning as a proportion of the fulltime workload of study at the institution from which prior learning was achieved.
35. Any credit awarded under these regulations is to be at the same or lower level as was undertaken by the student at the institution from which prior learning was achieved.
36. Formal prior learning includes completed courses that are standalone, or part of a finalised or incomplete qualification at Massey University or elsewhere.
37. Where a student is completing programmes of study for two qualifications at the same time whether at Massey or with a partner institution, they may be permitted to credit one or more courses to both qualifications.
38. Students shall not credit multiple courses, either completed at Massey University or elsewhere, with substantially the same content to the same qualification.

Informal Prior Learning

39. Informal learning acknowledges relevant knowledge, skills and other attributes obtained through any and all training, work experience and life experiences.

Awarding Credit

40. A key consideration in determining whether learning outcomes or the graduate profile have been met, is confidence that the prior learning provides an adequate foundation for the continued success of the student in their chosen course of study at Massey.
41. Students shall be awarded at an appropriate level for qualifying formal or informal prior learning. Credit may be:
- For a specified Massey University course, identified by course number – no credit is to be awarded for a portion of a Massey University course.
 - In a specified subject at a specified level, but not specifying a course number.

- Specified by level, but not by subject (elective credits).

- All credit will be awarded with an Ungraded Pass, P

42. For formal prior learning:

- credit can be awarded from a completed qualification (formerly referred to as Cross-Credit) or an incomplete qualification (formerly referred to as Transfer of Credit) and the regulations apply equally to each form of credit.

- credit that has been awarded to a student toward a particular qualification may be transferred to a new qualification on the request of the student, providing the credit fits the regulations of the new qualification and taking account of the minimum requirements outlined in Regulation 48.

43. Credit will be awarded upon consideration of the prior learning meeting:

- the learning outcomes of a particular course or courses, or
- the qualification graduate profile, or
- both as will maximise the opportunity for the student to receive credit or entry.

44. An award of credit for formal prior learning does not require the surrender of any prior qualification.

45. Conferred qualifications may not be exchanged for qualifications introduced subsequently unless further credits are completed toward the new qualification in line with the minimum credits to be completed requirements.

46. Applications for credit for informal learning will be assessed using an appropriate method or methods; examples may include, but are not limited to:

- assessment of a portfolio; or
- use of a challenge examination; or
- quality assured micro-credential assessments; or
- quality assured short course assessments; or
- a combination of methods.

47. The process for awarding recognition of prior learning credits is an evaluative process based on academic judgement. Evaluations will consider both the relevance of the prior learning and the suitability of the potential matches into the ‘receiving’ course and qualifications. Credit may not always be awarded including, but not limited to, the following circumstances:

- core knowledge or skills will be omitted from the qualification,
- related professional body accreditations will be undermined,

- (c) course material is timebound and the proposed match is too out-dated,
- (d) evidence provided is insufficient or incomplete,
- (e) the proposed arrangement will result in the student not having contributed substantial unique academic effort to the new qualification

Minimum Credits to be Completed Through Massey University

48. Unless otherwise stated in the Regulations for a particular qualification or an approved dual award arrangement, and subject to Regulations 40 to 47, a student will usually be required to complete as a proportion of new credits at least the following through Massey University to be awarded a Massey University qualification:

- (a) For a 360-credit undergraduate degree, at least 120 credits, including:
 - (i) At least 60 300-level credits in the degree, including all the 300-level credits required for a major subject(s).
 - (ii) Where a minor subject(s) is required or permitted within the degree, at least 30 credits in the minor subject including at least 15 300-level credits, unless otherwise specified in the degree regulations.
- (b) For a 480-credit undergraduate degree, 120 credits, including all of the compulsory highest-level courses.
- (c) For master's degrees, half of the credits required, including all the highest level credits and all the research credits, where applicable. For all other postgraduate qualifications, half the credits required including all the research credits, where applicable.
- (d) For a graduate qualification, all the highest level credits.

(i) Students who have completed a 120-credit postgraduate diploma or a 120-credit bachelor honours degree at Massey University may be permitted to credit the full 120 credits toward a 180-credit masters. In this case, students must complete all the research or professional practice credits required for the Masters.

- (e) For a sub-degree or degree-level diploma or certificate, half of the credits required.
49. A student who earned transfer credit to an undergraduate degree while on an official approved Massey University Student Exchange programme shall be required to complete at least the following through Massey University to be awarded a Massey University qualification.
- (a) For a 360-credit undergraduate degree, normally 120 credits including:
 - (i) 30 300-level credits, which must be part of the majoring requirements unless a major is not required by the degree Regulations.
 - (ii) Where a minor subject(s) is required or permitted within the degree, at least 30 credits in the minor subject including at least 15 300-level credits, unless otherwise specified in the degree regulations.
 - (b) For a 480-credit or 600-credit undergraduate degree, normally 120 credits including all of the compulsory highest level courses.

Transitional Provisions

50. Any credit previously awarded and applied under previous regulations, will continue to be recognised.

Academic Progress Regulations

- 51. Massey University Te Kunenga ki Pūrehuroa is committed to providing a learning environment which facilitates students achieving to their fullest potential.
- 52. All students at Massey are expected to make a genuine effort in their studies and all students are expected to achieve at least satisfactory academic progress in each study period in which they are enrolled in order to continue studying at Massey.
- 53. Students' published course results at the end of each study period will be evaluated by the Academic Progress Committee (APC) and/or its sub-committees (which consider specific programme regulations).

Evaluating Student Academic Progress

- 54. The process of general evaluation of Academic Performance is called the 'Evaluating Student Academic Progress' (ESAP) process.
- 55. The ESAP process will involve the regular evaluation of results based on general thresholds of expectations outlined in the Academic Progress Policy. These evaluations will result in APC determining if a student is:
 - (a) Excelling i.e. performing above expectations; or
 - (b) Achieving Satisfactory Performance; or
 - (c) Performing at levels Below Expectations.
- 56. Where results received by APC or one of its subcommittees indicate that a student's course results may be below expectations, or contrary to specific programme regulations, the evaluation processes shall involve inviting a student to make a written submission explaining their situation.
- 57. Where APC evaluates a student's performance for the period of study under review is:

- (a) Excelling relative to the thresholds: APC will initiate acknowledgment of excellence procedures to signify the accomplishment, and initiate any rights and entitlements that ensue from this status. This will result in an 'Excelling Status' being added to the student's record in the Student Management System, visible in the Student Portal, and noted on the student's Academic Record (transcript).
- (b) Satisfactory relative to the thresholds: APC will initiate acknowledgement of the accomplishment. It is likely this status will also be noted on the student's record in the Student Management System, visible in the Student Portal, but not noted on the student's Academic Record (transcript).
- (c) Below expectations relative to the thresholds: APC will initiate procedures to signify a concern, and initiate formal student support processes where appropriate. This will be indicated by a 'Status of Concern' being added to the student's record in the Student Management System, visible in the Student Portal, but there will be nothing recorded on the student's Academic Record (transcript).

58. Whenever APC determines a Status of Concern should be added to a student's record, those statuses will accumulate over time if a student's performance continues to fall below expectations in concomitant

situations. Concomitant situations are defined in the Academic Progress Policy Section 5.3.

- (a) The oldest Status of Concern will de-activate and only be seen in a student's background history when a student achieves three successive periods of enrolment with Satisfactory Status. In this case meaning sequentially one after each other with no intervening Status of Concern, but also with no negative impact if a student takes a break and does not study in consecutive enrolment periods.
 - (b) Once three consecutive Statuses of Concern have been placed on a student's record, the APC will apply restrictions and exclusions as specified by the Academic Progress Policy.
59. Whenever a student is recorded as having a Status of Concern, APC will refer that student into a Case Management process. This process will result in formal and personalised 'Provision of Support Offers' (PSOs) for the student. The intent of this process is to support students while they seek to improve their performance, or where students have had a restriction or exclusion applied to them.

Performance on Professional and Accredited Qualifications

- 60. A small number of qualifications offered by the University have specific performance and competence requirements in their Programme Regulations. For these qualifications, a process known as 'Performance on Professional and Accredited Qualifications' (P-PAQ) will evaluate the relevant aspects of student performance. APC will work with expert programme sub-committees which will make evaluations of students' performance in compliance with those specific performance and competence requirements listed in the Programme Regulations.
- 61. P-PAQ processes will determine whether a student's performance in relation to the specific performance and competence requirements is:
 - (a) Satisfactory relative to the specific programme regulations.
 - (b) Below expectations relative to the specific programme regulations. Following a hearing process in cases where a P-PAQ outcome is below expectations APC shall initiate procedures to signify this by recording a Status of Concern and initiating Case Management and PSOs or, if so indicated in the relevant programme regulations, will institute restrictions or exclusions.

Course Performance:

- 62. Apart from looking at the general performance of the student relative to ESAP and P-PAQ performance expectations, APC may consider if any student has enrolled in:
 - And on repeated occasions, has not passed a specific course (including by being awarded a failing grade and/or by withdrawing late) OR
 - Has missed sufficient assessment that they cannot pass the course; And in either of these circumstances APC may cancel the enrolment of the student in that course and/or restrict the student's ability to re-enrol in that course for a period of one year starting from the following semester.

63. In line with clause 59 of the Enrolment Regulations, in order to respect the principle that students will make genuine efforts in their studies, course enrolment cancellations may be initiated by the University where an evaluation determines that a student has not, or cannot, or will not, participate in the course(s) they have enrolled in, and it is not feasible that the student's position will be recoverable prior to the end of the course. To determine if these situations apply APC shall consider proposals made by Colleges related to specific courses and specific students. The evaluations shall particularly weight the student's:
- history of enrolment in the course,
 - participation in the course learning activities and
 - engagement in assessment and
 - engagement with Provision of Support Officers
- APC will issue notice in writing to relevant students of the intention to cancel their enrolment in a course or courses and invite a submission in reply prior to any decision being finalised.

Right to Appeal

64. Students will have the right to appeal the determinations of APC, including those of the P-PAQ subcommittees, to the Provost or Nominee. Appeals must be made in writing within the timeframe designated by the Provost or Nominee. Appeals will only be valid where the student can show they have suffered actual disadvantage, and that
- the student can demonstrate that the determination was incorrect, and/or
 - new evidence that was not known or available at the time of the original Academic Progress Committee determination is now available and could have affected the determination.
65. The Provost or Nominee will have the power to determine whether an appeal meets these validity rules and may decline any appeal that does not meet the validity criteria without substantive consideration.
66. If an appeal is successful, remediations outlined in the Academic Progress Policy will be applied.

Exclusion Regulations

Exclusion

67. "Exclusion" means either: (a) the cancellation of a student's enrolment at Massey University in a course, programme, or the University, when during that person's enrolment it becomes evident that any of these Regulations apply; or (b) where a student seeks enrolment and any of the clauses in these Regulations apply, then exclusion means the refusal to enrol the person concerned in the course(s) or programme(s) or at this University as the case may be.
68. Exclusions can be applied as designated in these regulations and related policies and procedures in categories as follows:
- Exclusion: a student is not permitted to study either a course(s) or a qualification at the University for a designated period (normally 12 months to 3 years).
 - Permanent qualification exclusion: a student may not study on a designated qualification but they may seek admission to another qualification.
 - Permanent Exclusion: the person may not re-enrol to study at Massey University.

Re-Entry from Exclusion

69. Where a student has been given a non-permanent qualification exclusion (as outlined in clause 68 (a):
- The student may apply for re-entry at the end of the designated exclusion period.
 - Re-entry applications should be made no earlier than 4 months prior to the end of the designated exclusion period and no later than 1 month prior to the first enrolment period in which they are eligible, and in which they seek to re-enrol.
 - Applications will not normally be accepted for re-entry timed to return into Summer School courses.
 - Re-entry determinations will be managed by the Chair of the Academic Progress Committee.
 - Re-entry applications will involve a submission by the student which may require evidence and an evaluation process.
 - Re-entry determinations may result in re-entry being permitted, or re-entry being permitted with conditions, or re-entry being permitted with a requirement to change qualification, or of re-entry being refused.
70. Where a student has been given a determination of permanent course or qualification exclusion arising from the University Regulations, at the conclusion of any appeal process for that specific determination, the student shall have no right to seek re-entry to that specific course/qualification or programme. The student may seek admission to other courses/ qualifications or programmes for which they have eligibility.
71. Where a student has been excluded on a non-permanent basis from a qualification they are expected to seek to re-enter within one academic year of the end of their exclusion period. If the student does not seek re-entry, the University may initiate a qualification withdrawal and in line with Conferment and Graduation Regulations (clause 114) and will issue any exit qualifications the student was eligible for (if any). The student may then later apply for new admission to the University after being given an exit qualification but that application shall be treated as a re-entry application (in line with clause 69).
72. Where a student has been excluded on a non-permanent basis from a qualification and they initiate a qualification withdrawal during the period of their exclusion, this shall not cancel the requirement for them to seek re-entry prior to return (in line with clause 69).

Refusal of Re-Entry

73. Where a student asks to re-enter, a refusal to permit re-entry to a specific course/ qualification may be exercised:
- in line with the University's general rights, at law, to refuse to enrol any person;
 - where a student cannot, or will not, meet reasonable conditions for re-entry;
 - where other University prescribed requirements apply (including (re)selection criteria in programmes with a limited number of places available);
 - where there is an unresolved financial or disciplinary matter;
 - if the student's intended course or programme of study is no longer available;
 - where the student's intended course or programme of study has a specified professional body or accreditation requirement that the student will be unable to fulfil;
 - where there is a reasonable basis for concern that the student's or other persons' health and safety will be impacted by their re-entry
74. Re-entry refusal is not intended to be a permanent outcome. Routes to change courses or programmes, or the criteria required to enable re-entry, shall be outlined.

Right of Appeal

75. Students will have the right to appeal the determinations of the Academic Progress Committee in relation to either:
- the refusal to permit re-entry from non-permanent exclusion at course, programme or qualification level;
 - the imposition of specific conditions required to permit re-entry from non-permanent exclusion at course, programme or qualification levels.
76. Appeals outlined in clause 75 will only be considered valid where the student can show they have suffered, or will suffer, actual disadvantage, and where the student can demonstrate that:
- the determination was incorrect in relation to Massey regulations, policy or procedure
 - new evidence that was not known or available at the time of the determination is now available and could affect the determination.
77. Appeals will be considered by the Provost or Nominee. Appeals must be made in writing within the timeframe and following the process designated by the Provost or Nominee. The Provost or Nominee will have the power to determine whether an appeal meets these validity rules and may decline any appeal that does not meet the validity criteria.

- Kei ngā kōrero katoa mō Ngā Ture Whakawhiu Taurira, Te Kaupapa Here Mātauranga Pono me te Tukanga hei Whakahaere i ngā Whatinga Mātauranga Pono www.massey.ac.nz/policies/
 - The purpose of the Code is to encourage:
 - ethical conduct in undertaking academic studies and research;
 - integrity and respect in the teaching and learning process;
 - courtesy, safety and respect amongst students and between students and the University;
 and to specify:
 - certain required standards of student conduct in respect of academic studies, research and other behaviour connected with a student's course of studies or status as a member of the University;
 - the University Disciplinary Procedures by which complaints of misconduct by students shall be resolved.

Required standards of student conduct

- Students shall:
 - comply with this Code, and all other relevant University policies, codes, regulations and procedures, including ethical and professional standards and specific protocols for particular research projects;
 - comply with all relevant laws, including laws relating to the privacy and confidentiality of information;
 - treat other students, the University staff, other members of the University community and the public with courtesy and respect;
 - treat the property of other students, University staff, other members of the University community and the public with respect;
 - act with honesty and integrity when accessing and using the University systems;
 - act with honesty and integrity in submitting material or imparting information to the University.
- A full copy of the Student Disciplinary Regulations, the Academic Integrity Policy and the Procedure for Managing Breaches of Academic Integrity can be found at : www.massey.ac.nz/policies/

Tā te Taura Kirimana | Student Contract

www.massey.ac.nz/about/university-calendar-and-regulations/student-contract/

- The University and the Student form a contractual relationship when the Student accepts an Offer of Enrolment. That Contract is subject to the University issuing a Confirmation of Enrolment once all requirements have been satisfied. If no Confirmation of Enrolment is issued then the Contract is at an end. If the University issues a Confirmation of Enrolment, the following are the terms of that Contract which the University and the Student accept are to govern their relationship, along with statute, and with the Regulations and Rules of the University.

The University will:

- Use best endeavours to provide the Student with tuition and supervision of a professional standard in the course(s) in which the Student is enrolled.
- Act reasonably and fairly in exercising its powers under the regulatory framework and this Contract.
- Advise the Student of any changes in the course(s) required because of changes in funding, staffing or other reasonable cause.

The Student will:

- Use best endeavours to fulfil the requirements prescribed by the University for the course(s).

- Observe the Regulations and Rules of the University and accept the jurisdiction of the University in all matters connected with academic progress and with discipline.
- Pay the fees prescribed by the University for the course(s).

The University and the Student also agree:

- The Contract is formed when the Student accepts the Offer of Enrolment. That Contract is subject to the University issuing a Confirmation of Enrolment. If a Confirmation of Enrolment is issued these are the terms of the Contract that apply.
- The Contract will continue for the period for which the Student is enrolled by the University and will then end. However, clause 16 will continue to apply after the Contract ends.
- The University and the Student may enter into further contracts, in subsequent periods, by repeating the process in clause 11.
- The relevant Admission Application, Enrolment Application, Offer of Place in a qualification, Offer of Enrolment, Confirmation of Enrolment, regulations, codes, policies, rules of the University and material published in the Calendar also form part of this Contract but nothing else shall be incorporated into the contractual relationship between the Student and the University.
- Liability for failure to perform this Contract is excluded where that failure has been caused by circumstances beyond the control of the University or the Student.

16. Any dispute arising out of or in connection with this Contract, or otherwise relating to the performance by the University or its staff of their responsibilities to the Student, shall be resolved through the Grievance

Procedures prescribed by the University Calendar, calendar.massey.ac.nz/ which shall be the exclusive procedures for resolution of such a dispute.

Student Disciplinary Regulations

The University has Student Disciplinary Regulations available in English at: www.massey.ac.nz/policies/

Academic Integrity

17. All students are required to comply with the principles of Academic Integrity as published from time to time.
18. Failure to comply with the principles of Academic Integrity may be considered to be a disciplinary matter.
19. Examples of breaches of the principles of Academic Integrity include but are not limited to:
- Plagiarism. This is defined by the University as:
 - Copying of sentences, paragraphs, computer files, research data, and/or creative products that are the works of other persons or sources, without appropriate acknowledgement.
 - Closely paraphrasing sentences, paragraphs or themes without appropriate acknowledgement.
 - Submitting one's own previously assessed or published work for assessment or publication elsewhere, without appropriate acknowledgement and approval.
 - Submitting material obtained from internet-based essay depositories, 'homework' and file-sharing websites or other similar sources when not permitted.
 - Submission of work overly reliant on model answers or sample solutions provided in the course materials.
 - Cheating in any examination or test. For example, unauthorised use of crib cards, electronic devices, cell phones, or study notes, or uploading or otherwise sharing questions to online and/or social media communities, seeking unauthorised assistance with answering, using translation software/devices when not permitted.
 - Submitting work as one's own for assessment, which work has been done in whole or in part by someone other than the student or which has been created artificially, for example by a machine or through generative artificial intelligence. This includes work completed for a student by a peer, family member or friend or which has been produced, commercially or otherwise, by a third party (e.g. Contract Cheating or ghost writing). It also includes submitting all or part of an assessment item which has been produced using generative artificial intelligence, and claiming it as the student's own work.
 - Citing references that have not been read or reviewed, or that have been falsified, to give credibility to the assignment or show evidence of research.
 - Presenting data with respect to laboratory work, clinical placements, practica, field trips or other work, that has been copied or falsified.
 - In the case of collaborative projects, falsely representing the individual contributions of the collaborative partners.

- Presenting data obtained improperly (e.g. data collected without prior approval of the relevant ethics committee or ethical considerations).
 - Any misrepresentation in relation to authorship, academic achievement or records.
 - Any inappropriate assistance given to a current student to be dishonest or fraudulent with academic assessment, including selling or providing previously completed assignments to a current student.
 - Sharing or assigning student works or scholarly works in which the University owns Intellectual Property in a way that does not comply with the University's Intellectual Property Policy (e.g. inappropriately sharing assessments or course material).
 - Any breach of the Code of Responsible Research Conduct.
20. Breaches of Academic Integrity will be managed in accordance with the Procedures for Managing Student Breaches of Academic Integrity and the Student Disciplinary Regulations. Where such a breach, including Academic Misconduct, by a student is found to have occurred, educative and/or disciplinary outcomes may be imposed.
21. Those outcomes include but are not limited to:
- (a) a warning;
 - (b) remedial/educative advice;
 - (c) recommendation to undertake an appropriate learning support activity;
 - (d) repeat assessment, or part thereof, and present for marking with or without a capped mark;
 - (e) reduced mark (up to zero) for affected section of the assessment task;
 - (f) zero marks for the whole assessment in which the breach occurred;
 - (g) fail grade for the course in which the breach occurred;
 - (h) period of suspension from the University;
 - (i) exclusion from the University.
22. The University may rescind a qualification already awarded to a student or former student, where Academic Misconduct of a serious nature is revealed post-graduation.
23. Failure of a student to participate in a remedial activity required by the University under these regulations may result in an escalation of outcome.
24. A record of a finding of Academic Misconduct may be maintained on the University's Misconduct Register.
25. Notwithstanding Regulations 17 to 24, Academic Misconduct may also be addressed through the Student Disciplinary Regulations or other relevant disciplinary processes, including recourse to the civil and/or criminal justice systems.
26. Appeals may be made by students in accordance with the process described in the Student Disciplinary Regulations or the Procedures for managing Student Breaches of Academic Integrity.

Use of Information

Library Regulations

27. The University Library is provided for the purpose of study and research by the University's students and staff and is a shared resource for the Massey community. Every authorised user of the Library has both a right to use the Library without undue disturbance or distraction and a concomitant duty to respect the rights of others. Not all services are available to all categories of users. The Library subscribes to electronic resources whose licences stipulate how and by whom they may be used. If a licence is violated by anyone inside or outside the University, there may be serious consequences for the University, including suspension of all University access to the resource by the Publisher.
- Note:** 'University Librarian' or delegate means the person performing the duties of the University Librarian. 'Library' means any room used primarily for the purposes of the University Library. 'Library material' means any item, whether print, electronic or other format, provided by the Library for information, study or research.

Authorised Users – the Library's Physical Collections

28. The following persons shall be entitled to use the Library and the Library's print resources:
- (a) academic, adjunct, and professional staff of the University;
 - (b) honorary and approved visiting academic staff

- (c) currently enrolled students at the University;
- (d) members of University Council and University Ethics Committees;
- (e) prospective Masters and PhD students (for a limited period)
- (f) members of institutions that have a reciprocal agreement with Massey University Library, including Palmerston North-based scientific and technical staff of the Fonterra Research Centre, the local divisions of the Crown Research Institutes, and the Leather and Shoe Research Association; staff and students of ULANZ (University Libraries of Australia and New Zealand);
- (g) retired members of staff;
- (h) external members, including Alumni, (fees apply)
- (i) other persons at the discretion of the University Librarian.

Authorised Users – the Library's Licenced Electronic Resources

29. The following persons shall be entitled to use the Library's electronic resources, for the purpose of Massey University related study and research only:
- (a) academic, adjunct, and professional staff of the University (as named in the University Calendar);
 - (b) honorary and approved visiting academic staff
 - (c) currently enrolled students at the University
 - (d) approved prospective Masters and PhD students (for a limited period)

- (e) community members of the University Council and University Ethics Committees;
- (f) Alumni (only for specified resources; fees apply)

Hours of Opening

30. Hours of opening shall be posted at each Library and on the Library website. The hours may be varied at the discretion of the University Librarian.

Library Cards

31. All authorised users shall carry a current library card and produce it upon request. For most staff and students the library card is the University ID card.

Borrowing

32. No library material shall be removed from the Library without the loan first being properly recorded. Library material shall be returned by the due date. The person in whose name material is borrowed is responsible for its safekeeping for the duration of the loan and for its return.

Loan Periods

33. Notices advising loan periods are displayed on the Library website. Library material on loan may be subject to recall at any time, including study breaks and summer vacation. Recalled material must be returned by the notified date. Failure to do so will incur a fine.
34. Loans may be renewed up to four times, provided that the items are not required by another user. After four renewals they must be returned for re-issue.

Lost or Damaged Material

35. Loss of, or damage to, library material shall be reported immediately to the Library. Borrowers shall be required to pay such costs as may be determined by the University Librarian for lost or damaged material, together with the prescribed administration fee. These costs shall not exceed the reasonable cost of restoring an equivalent item to the collection. Such material remains the property of the University, notwithstanding payment of the bill for its replacement, and must, if found, be returned. A refund in whole or part will be made (depending upon the condition of the items), but the associated administration fee may be retained. No refunds will be made if more than a year has elapsed since the original payment.

Fines and Sanctions

36. Borrowers who fail to return or renew any borrowed material may be liable to a fine unless they satisfy the University Librarian that circumstances have prevented them from returning the material at the appropriate time. The University Librarian is under no obligation to notify borrowers when material is overdue and fines may still be imposed when material is returned after the due date, even though no notice has been received by the borrower.
37. Fines shall be payable for each day or period (or part thereof) that the material is overdue until it has been returned to the Library. Notices advising fines charges are displayed on the Library website.
38. Where library material is not returned or a charge levied remains unpaid, borrowing privileges may be withheld.

Conduct of Persons Using the Library

39. No person shall create any unnecessary noise or disturbance or behave in a disruptive, disorderly or improper manner in the Library.
40. No person shall deliberately or carelessly mutilate, deface or misplace any library material or equipment.
41. Consumption of food and drink is permitted provided drinks are in spill-proof containers, and food does not interfere with the cleanliness of the building or the study environment of Library users. Mobile phones, laptops and other devices should not be used in the Library in a manner which may disturb others.
42. No person shall distribute or post any notices except on public noticeboards in the Library, except with the prior authorisation of the University Librarian.
43. All persons shall, when so requested by the Library staff, present their bags and personal belongings for inspection.
44. All persons who use the Library shall identify themselves on request to a member of the Library staff.
45. No person shall reserve a place by leaving books or other articles on desks or seats for longer than 30 minutes. Material so left may be removed.
46. In the case of any person using the Library who behaves in a disorderly or improper manner or otherwise in breach of these Regulations, the University Librarian may require that person to withdraw from the Library.

Use of Subscribed Electronic Resources (e-journals, e-books and article databases)

47. Access to Library-licenced electronic resources is limited to currently-enrolled students and current members of Massey University staff or as otherwise stated in clause 29 or in the resource-specific permissions and restrictions available to view via the Library Catalogue.
48. Publishers, Massey University Library, and ITS staff can monitor the use of all Massey staff and students. If licences are breached by anyone inside or outside the University, publishers can suspend all University access to the resource in question. Licence violations traced back to specific users may result in the suspension of individual accounts or other disciplinary measures.
49. When accessing subscribed electronic resources the following must be observed:
- (a) No person shall share their Massey University username and password with another person;
 - (b) No person shall systematically download, print, or copy substantial portions of electronic resources (e.g. entire journal issues or books);
 - (c) No person shall post content from electronic resources to any website or application.
 - (d) No person shall use content from electronic resources for commercial purposes (as resources are accessed under an educational-use licence).
 - (e) No person shall share content from electronic resources with people who are not Massey University staff or students.
 - (f) No person shall modify content or create derivative works except where licences allow.
 - (g) All users should seek advice from the Library before making multiple paper copies of an article from an electronic resource, or including a copy of an article in a course pack, study guide or online course.

Copyright

50. All persons who use a copying device in the Library shall observe the limits described in the Copyright Act 1994.

Theses and Research Papers

Research Papers and Dissertations

51. Research papers and dissertations may be deposited in the Library. A digital copy may be loaded on the University's institutional repository, Massey Research Online, and may be made openly available with appropriate document security.

Master's and Doctoral Theses

52. Aligned with clause 82(c) of the Assessment and Examinations Regulations and unless otherwise approved by the Librarian, one digital copy of a thesis which has been accepted for the award of Doctoral or Master's degree must be deposited in the Library. Such submissions must be in accordance with the Guide to the Presentation of Theses (available from the Library website), and should be in an approved format. Each copy must contain the name of the author and the title, and contain a short abstract.
53. Where theses are provided in a digital format that relies on non-standard technology, the Library provides no guarantee that formats will be shifted to ensure access in the future.
54. Copies of Master's and Doctoral theses will be catalogued with metadata tags added and lodged permanently in the University's digital research repository. Unless the Provost has approved an embargo, theses will be publicly accessible.
55. Theses may be embargoed for a period of time only if approved by the Provost. It is possible with digital theses to embargo part of the thesis (e.g. an appendix) while allowing the general text to be made available to the public. A thesis that is embargoed will have the author, title, abstract and metadata publicly available through the University's institutional repository. If the full abstract contains information that needs to be covered by the embargo, students should supply a short, bland abstract for this purpose (e.g. a doctoral citation).

University Archives

56. The University Archives is a preservation and information unit. It serves as the official repository of all archival records of the University and as a collecting archive by collecting and preserving selected material for research purposes.
57. The resources of the Archives shall be available to the University community and the general public for the purposes of genuine research. Access to archival material may be restricted for preservation purposes, for reasons agreed to with donors of archival material, or in accordance with New Zealand legislation. The regulations governing access to and the use of archival sources of information are available on the Archives website and in the Archives reading room.
58. Physical archival material must be consulted in the Archives reading room; no items may be removed from the University Archives.

59. Hours of opening of the reading room are posted at the Archives and on the Archives website.
60. Entry to the University Archives and access in person to holdings is free of charge. Enquiries from people who cannot visit the Archives in person are free for the first hour
61. The following clauses of the Library Regulations also apply to the Archives: 39, 40, 43, 44, 46 and 50.

Intellectual Property

Staff and students are subject to the University's Intellectual Property Policy.

A copy of this Policy is available at: www.massey.ac.nz/policies/

The general provisions of this Policy are:

The University claims legal and beneficial ownership of all Intellectual Property Rights in relation to Intellectual Property generated under the auspices of the University. This includes, without limitation, Intellectual Property created by any of the University's staff during the course of their employment or arising out of performance of a duty relating to their employment, and Intellectual Property created by any of the University's students in the course of their study at the University.

Staff and Students generally retain ownership of copyright and other rights in certain works. The University does not claim ownership of copyright to Scholarly Work, creative work or instructional materials created by its staff in the course of their employment, or Student Work created by its students in the course of their study at the University, unless those works or materials have been explicitly commissioned by the University, or created with the material use of University (or University sourced) funding or allocation of significant University resources specifically related to the creation of such Scholarly Work of Student Work. Unless otherwise agreed, copyright in non-commissioned works belongs to the creators.

Notwithstanding this, the University shall have a permanent, nonexclusive, royalty-free, world-wide licence to use scholarly works (including instructional material) created by its staff in the course of their employment, or its students in the course of their study, provided that such use is confined to research or teaching of courses offered by the University.

Where a legal impediment to the granting of such licence exists (for example, the potential infringement of IP rights held by a third party), then such licence

is granted to the extent permissible at law (i.e., to the extent such licence does not infringe on the IP rights held by a third party).

The Provost will take all reasonable steps to fairly and transparently allocate the benefits of the Intellectual Property Rights to all parties with an interest. All students are reminded of their responsibility to abide by the Intellectual Property Policy of the University, which they accept by enrolling at the University. In particular, staff and students are bound by obligations of confidentiality in relation to Intellectual Property Rights or other commercially-sensitive information they become aware of during their work or study at the University. In addition, staff and students may be bound by contractual obligations with third parties relating to their research or study.

Law of Copyright

The law of copyright allows the University under certain conditions to supply material to students in which copyright works or parts of copyright works are reproduced. Students are reminded of the obligations they must accept on enrolment that materials supplied to them are to be used only for research or private study and for no other purpose.

Massey University takes out a licence with Copyright Licensing New Zealand, Australasian Performing Right Association (APRA), Australasian Mechanical Copyright Owners Society (AMCO) Recorded Music New Zealand, Screenrights, and various electronic resources annually. These licences stipulate requirements for reproduction of copyright print works, music, broadcast sound and television works, and electronic resources for educational purposes only, and indemnifies the University and staff against any prosecution for any alleged breach of copyright while acting under the conditions of the licences. The licences do not lessen the obligation of students mentioned above.

Policy on Electronic Information Access Control

The purpose of this policy is to establish and operate effective access control methods across IT Systems, to reflect and mitigate the associated information security risks. The objective being to limit and manage access to data and information processing facilities based on business information security needs. It is intended that this policy be read in conjunction with the Data Management Policy. Both policies are available at: www.massey.ac.nz/policies/

Assessment and Examination Regulations

Assessment in Taught Courses

Eligibility for Assessment

62. Students who enrol for a course, pay their fees and do not withdraw or have their enrolment otherwise cancelled by the University must be awarded a grade in that course.
63. Some courses require compulsory attendance at classes, including laboratories, field trips, practical exercises, contact workshops or block courses. In such courses, course co-ordinators shall advise students in writing at the commencement of tuition that non-attendance, without exemption having been granted, constitutes failure in the course, regardless of the rest of the assessment procedure. In such a case, students shall receive a DC for the course.
64. Course coordinators shall advise students at the commencement of tuition which elements of the assessed course work will contribute towards the final grade for the course, and which elements, if any, are compulsory. Unless otherwise stated all final exams are compulsory. Without exemption having been granted, failure to:
- attend a compulsory exam; or
 - submit a compulsory assessment element; or
 - complete assessment components totalling 51 percent or more of the total assessment; or
 - submit a Specific Circumstances Application;
- constitutes failure in the course, regardless of the rest of the assessment procedure, and will result in a DC for the course.

Key to Grading System

Pass Grades	Marks*
A+	90–100
A	85–89.99
A-	80–84.99
B+	75–79.99
B	70–74.99
B-	65–69.99

C+		60–64.99
C	Pass	55–59.99
C-		50–54.99
AG	Aegrotat Pass	
P	Ungraded Pass	
Fail Grades		
D	Fail	40–49.99
E	Low Fail	0–39.99
F	Ungraded Fail	
DC	Did Not Complete	
Other Entries		
WD	Withdraw	
WS	Withdraw Specific Circumstances	
NF	Not finalised	
CT	Continuing enrolment	

*The University applies the Swedish Rounding system to final grades.

Re-marking of Assessed Course work

65. Students who seek to have an assessed course work component re-marked should consult with the course coordinator to clarify the feedback and/or the mark awarded. Re-marking of course work is offered in exceptional circumstances only; the onus is on the student to justify the request. Cases based on calculation errors within the original marking of the course work should be forwarded to the course coordinator.
- For coursework to be eligible for re-marking it must:
- be the original work submitted for assessment together with the marker's comments;
 - normally contribute at least 15 percent towards the final grade for the course;
 - must have been formally assessed only once previously;
 - be submitted within one week from the date of release of the original assessment result.

As a result of a re-mark, the grade for the course work could remain unchanged, or be amended upwards or downwards. Students in named

Doctoral degrees must refer to the specific doctoral degree regulations for separate details of remarking provisions as the above regulations do not apply to named Doctoral students.

Examinations in Taught Courses

Time and Venue

66. (a) The examinations conducted by the University shall be held at the places and times specified in the examination timetables authorised by the Provost (or delegate). Exams may be delivered either online or in physical locations.
- (b) College-administered examinations will be held in accordance with each College's timetable and process and authorised by the Pro-Vice Chancellor.

Written Entry

67. Students enrolled in an internal offering of a course are not required to give notice in writing of intention to present themselves for examination.

Examination Procedure

68. The examinations shall consist of such written, oral, practical, and online examinations as the examiners may determine.
69. Candidates may answer questions in the presence of a supervisor, who shall be appointed or approved by the Provost (or delegate) and in accordance with such detailed instructions as may be furnished by the Council.
70. Candidates must comply with the Examination Rules, copies of which are available from the University website.
71. No candidate shall communicate with an examiner in regard to an examination until after grades are published, except through Assessment Services.
72. Any candidate who has a disability which could be considered to adversely affect performance under ordinary examination conditions must inform Assessment Services at least six weeks prior to the commencement of the examination period or as soon as the candidate becomes aware of the disability (whichever is the latter) and supply such documentary evidence as is required.
73. The examination scripts shall be transmitted to the examiners, who shall report the results for the course according to published dates.
74. Assessments (including major tests) and examination scripts not routinely returned to students are retained by academic departments for a period of 12 months.

Re-marking of Examination Scripts

75. Any student may have their examination script re-marked by the examiners, followed by a recalculation of the final grade where appropriate. Application must be made via the student homepage; the following conditions must be met:
- (a) The examination must have been formally assessed only once previously.
- (b) No additional information from the student shall be placed before the examiners.
- (c) Application must be made within seven days from the release of the official results of examinations.
- (d) Payment of the prescribed fee must accompany the application. As a result of a re-mark, the final grade could remain unchanged, or be amended upwards or downwards. The application fee will be refunded if there is a change of final grade.

Withholding of Grades

76. If the completion of marking and assessment falls outside the normal time period, provision of final grades for awards or consideration of Academic Progression may be deferred.
77. In exceptional circumstances, the University may withhold the award of a grade in accordance with the Procedures for Withholding of Grades (located in the Massey University Assessment Handbook) to allow the student to complete an outstanding component of the course regulations.

Specific Circumstances Framework

78. The University recognises that Exceptional Personal Circumstances may arise that make it difficult or impossible for a student to continue with their study. Where such circumstances arise after the census date for On-time Withdrawal, the University may, at its sole discretion, consider alternative arrangements. Students may apply for Specific Circumstances including Aegrotat/Impaired Performance and Fee Return consideration and in certain circumstances such applications may result in Research Students carrying forward their enrolment or students being given the opportunity to undertake supplementary assessments.

Specific Circumstances Applications

- (a) May be made on the grounds of long-term or pre-existing illness, injury, or disability or learning impairment where:
- the student has a Provision of Support from the University related to their situation, and/or

- where successful completion of one or more learning experiences, assessments or examination activities is compromised by a temporary acute episode of impairment, or at the onset of a long-term condition where diagnosis or injury occurred after the date for On-time withdrawal in the course which is the subject of the application.

- (b) Applications for specific circumstances may not normally be made under these Regulations by Doctoral candidates. Doctoral candidates are referred to the Doctoral Journey Stream website. Students enrolled in non-doctoral postgraduate theses, dissertations, research reports, or project courses may apply for Specific Circumstances, including the Carry Forward of Postgraduate Enrolment regulation.
- (c) Applications for Specific Circumstances must normally be supported by an application form and evidence or an attestation by a Designated Student Support Officer of the University and normally be made no later than fourteen days after the date of the first assessment or activity for which the Specific Circumstances consideration is sought, and no later than one week after the course end date if consideration is sought in relation to a whole course.
- (d) A valid application will be submitted in the manner required, meet the conditions specified, and upon grounds that are acceptable to the University. The University shall assess the application and if it is accepted, the University will determine an outcome to the student according to their circumstances and the achievement in learning of the course(s).

Aegrotat and Impaired Performance Remedies Within Specific Circumstances Framework

- (e) May only be made for summative assessment or examination activity or compulsory activities outlined in the Course Guide.
- (f) Will not normally be approved for an assessment or examination activity that constitutes less than 10% of the weighted assessment for a course.
- (g) For the avoidance of doubt, any Specific Circumstances Remedy will not result in a passing grade for a course where Academic Board or its delegate cannot be satisfied on reasonable grounds that the student would have passed the course if they had not experienced the Exceptional Personal Circumstances.
- (h) The outcome of a Specific Circumstances Framework remedy may only be appealed once in writing to the Academic Board or its delegate (normally the Chief Examiner of the relevant College) within 2 weeks of the release of the final grade for the course or of the finalisation of the Specific Circumstances application (whichever is the latter).
- (i) The Academic Board or its delegate will have regard to the proportion and quality of the student's course work as completed, whether the learning outcomes have been attained, and any other concessions granted.

Aegrotat Consideration Remedies

- (j) Students who have been prevented by Exceptional Personal Circumstances from being able to complete any assessment or examination activity or compulsory learning experience, defined in the Course Guide, may apply for Specific Circumstances and remedies may include Aegrotat consideration.
- (k) When a request for Specific Circumstances is approved the Academic Board or its delegate may decide to award a grade(s), or afford the student further opportunity to complete the assessment(s) or activities, or afford an opportunity for a deferred assessment. Activities required to be undertaken in accordance with this regulation must be completed prior to the end of the enrolment period as specified by the end date for the course that is the subject of the application, unless the conditions of Regulation 78(m) are met.

Deferred Assessment Remedies.

- (l) Grades that may be awarded following an Aegrotat consideration on a course are: a letter grade including pass grades A+ to C-, fail grades of D, E or F, AG pass, or DC.
- (i) A passing letter grade (i.e. A+ to C-) may only be considered for award where at least 60% of the weighted assessment for the course has been completed and all the compulsory elements required in the course outline have been passed (except the element(s) which are the subject of the application).
- (ii) An AG pass may only be considered for award where at least 40% of the weighted assessment for the course has been completed, and all the compulsory elements required in the course outline have been passed (except the element(s) which are the subject of the application).
- (m) Under limited circumstances, an exceptional opportunity to meet the course requirements may be afforded to a student through the recording of a temporary NF (Not Finalised) grade. The NF will

be in place until such time as an equivalent learning experience or deferred assessment activity takes place, which shall be no later than the beginning of the next available offering of the course. This option will most commonly apply where the request for Specific Circumstances is approved but the Aegrotat outcome(s) would otherwise still result in a fail outcome for the course(s). If a student does not complete the additional assessment or activity the NF grade will then be changed to a fail grade or DC.

Impaired Performance Remedies

- (n) Students who consider that their performance in, or preparation for, any assessment or examination activity has been impaired due to Exceptional Personal Circumstances may apply for Specific Circumstances and remedies may include Impaired Performance consideration.
- (o) Academic Board or its delegate, at its discretion, may evaluate the student's Exceptional Personal Circumstances and overall performance and decide whether a mark awarded should be altered, or whether to afford the student with a supplementary assessment. In this evaluation process, the Academic Board or its delegate will have regard to the student's course work as completed, whether performance in the assessment is atypical compared to other assessments completed, and in relation to the overall class performance for the assessment completed, and any other concessions granted.

Fee Return Remedies

- (p) The remedy arising from Specific Circumstances Framework considerations submitted by some students may include a Fee Return Remedy. Fee Return Remedies may be applied when a student has Exceptional Personal Circumstances and other Specific Circumstances Remedies have been considered and the Academic Board or its delegate believe those other remedies will not result in a student having a reasonable likelihood of completing a course. Whether a credit or refund is granted is determined by the University following the Specific Circumstances (Fee Return) process.
- (q) There is no strict requirement for a student making a Specific Circumstances application which may result in a Fee Return to have withdrawn from the course/s first, in order for this remedy to be applied by Academic Board or its delegate and once this remedy is applied a withdrawal will then be applied.

Assignments and Examinations in Te Reo Māori

79. The Māori language is an official language (he reo whai mana) of Aotearoa. The University endeavours to recognise this and support the revitalisation and retention of Te Reo Māori with respect to Te Tiriti o Waitangi. Students who are proficient in Te Reo Māori and have the necessary level of competency are encouraged to write assignments, tests, examinations, and text accompanying creative works, in Te Reo Māori, subject to approval and where the subject is considered to be appropriate. Students wishing to pursue this option should make application to Assessment Services by 31 January for Semester One and Double Semester courses and by 16 June for Semester Two and Summer School courses. Students are also requested to advise their course team in advance.

Doctoral theses may be submitted in Te Reo Māori, English, or a combination of both languages. The oral examination may also be conducted in Te Reo Māori. Candidates intending to submit their doctoral thesis in Te Reo Māori, or in a substantial combination of English and Te Reo Māori, must indicate this intention within two months of provisional registration. They should supply a letter from the DVC Māori or a staff member fluent in Te Reo Māori, affirming that they have the required level of competency in Te Reo Māori, will be working in an area where the language is considered to be appropriate, and that supervisory expertise is available in the Māori language.

Assignments and Examinations in New Zealand Sign Language

80. NZ Sign Language is an official language of Aotearoa. The University recognises this and endeavours to support students who communicate primarily through sign language. In order to allow the University to arrange for the marking process for oral assessments and examinations students wishing to pursue this option are required to make an application to Assessment Services by 31 January for Semester One and Double Semester courses and by 16 June for Semester Two and Summer School

courses. Students are also requested to advise their course team in advance.

Examination – Research Reports, Dissertations, Master's and Doctoral Theses

Research Reports and Dissertations

- 81. (a) All research reports and dissertations (up to 60 credits) shall be graded by two examiners, at least one of whom shall be independent of the research work, with external moderation undertaken in accordance with university policies.
- (b) At the discretion of the Chief Examiner for the course, a candidate may be examined orally on the subject of the research report or dissertation.
- (c) At the discretion of the Chief Examiner, a failed research report or dissertation may be revised and resubmitted once and may be subject to re-examination. Following successful re-examination the candidate will not be eligible for Honours or Distinction unless the initial submission was subject to Exceptional Personal Circumstances recognised through an approved Specific Circumstances application.

Master's and Doctoral Theses

- 82. General
 - (a) The use of Te Reo in a thesis will follow the guidelines set out in Massey University's Māori Language Policy: Matua Reo Kaupapa.
 - (b) Theses shall, unless the Librarian otherwise approves, conform with the format requirements as detailed in the Library's Guide to the Presentation of Theses (available on the Library website)
 - (c) Master's and Doctoral Theses shall be submitted in digital form.
 - (d) University records of the examiner's assessment of the thesis shall be retained and disposed of in accordance with the University General Disposal Authority as required under the Public Records Act 2005. The student academic transcript shall be archived in accordance with the University General Disposal Authority as required under the Public Records Act 2005.
- 83. Master's Theses
 - (a) A candidate whose examination includes the presentation of a thesis (≥ 90 credits) shall have an approved supervisor(s) before commencing work on the research. A thesis may comprise a creative work and exegesis.
 - (b) Before the thesis is forwarded to the examiners, the candidate, Supervisor and Head of Academic Unit shall certify that the thesis embodies original work carried out by the candidate under direct supervision.
 - (c) All Master's theses shall be graded by two examiners who are independent of the research work and one of whom is external to the University.
 - (d) At the discretion of the examiner(s), a candidate may be examined orally on the subject of the Master's thesis.
 - (e) At the discretion of the Chief Examiner, a failed Master's thesis may be revised and re-submitted once and may be subject to re-examination. Following successful re-examination the candidate will not be eligible for Honours or Distinction unless the initial submission was subject to Exceptional Personal Circumstances recognised through an approved Specific Circumstances application.
 - (f) For the purposes of the assessment of a Master's degree thesis a candidate shall be required to submit their thesis online or as otherwise agreed by the Chief Examiner.
 - (g) For Master's theses, if the thesis has been accepted with no emendations or amendments, the student has finished. If emendations or amendments are required the supervisor shall approve the final version. The student shall be responsible for presenting a final digital copy of the thesis.
- 84. Doctoral Theses
 - (a) For the purposes of the assessment of the Doctoral degree thesis a candidate shall be required to submit a PDF digital copy of their thesis via the student portal. For theses with a creative art component, the format will be as agreed by the Doctoral Research Committee.
 - (b) As soon as the assessment has been completed, and the final version approved, in the case of successful candidates, the candidate or the candidate's supervisor shall be responsible for submission of one digital copy of the final approved thesis, as accepted under clause 82 (c), and a citation, via the Library portal.

Student Academic Complaints and Grievance Procedures

Support with making a complaint about service delivery, behaviour of a student or staff member, or an outcome of a decision:

massey.ac.nz/student-life/services-and-support-for-students/support-with-making-a-complaint/

Purpose

85. Massey University's Student Academic Complaints and Grievance Procedures are for all domestic and international students and cover all programmes including not-for-credit, undergraduate and postgraduate programmes and related services. They are designed to ensure students receive a quality education and that relations between staff and students are equitable. The Procedures can be accessed from the University's Policy Guide at www.massey.ac.nz/policies/

Objective

86. To foster the fair, speedy, and informal resolution of disputes at Massey University, and an academic culture which will prevent such grievances.

Definition

87. A Grievance means any grievance, which a student (whether or not that person has any other role within the university) has against the University and/or a staff member because of a claim that he/she has sustained academic disadvantage. This includes claims which are sometimes referred to as Student Complaints.

Such grievances may include but are not confined to:

- (i) The unfair assessment of course work not otherwise governed by University assessment and examination regulations.
- (ii) An unfair refusal or failure of the staff member to make him/herself available to assist a student with difficulties regarding his/her course work.
- (iii) Unreasonable delays in the assessment of course work.
- (iv) Inadequate course materials.
- (v) Inadequate teaching.
- (vi) Deficient performance of associated administrative services.

International Students

88. International students must follow these procedures if they have a Grievance with the University. However, should International Students find that their Grievance is not resolved by the University, students can elect to use the Student Complaints Scheme set up by the Government to resolve contractual and financial disputes. Further information is available at <http://www.istudent.org.nz/>

Jurisdiction

89. The Student Academic Complaints and Grievance Procedures are distinct from, and may not be used with respect to, any questions relating to the following rules, regulations, statutes or procedures of the University including:

- (a) Cases of hardship – Vice-Chancellor's Powers.
- (b) Disciplinary procedures.
- (c) Harassment procedures.
- (d) Examination regulations.
- (e) Registration regulations.
- (f) Student fees.

Principles of Application

90. At all times the procedures will be carried out according to the following principles:

- (a) Protection of Persons
When a Grievance is taken to the University Grievance Committee all persons who may be affected shall have their rights protected. Persons who may need protection are:
 - (i) The Complainant(s).
 - (ii) The Subject(s) of Complaint (Respondents).
 - (iii) Heads of Departments, Institutes and Schools.
 - (iv) Pro Vice-Chancellors (or their nominees) of Colleges.
 - (v) Provost, Deputy Vice-Chancellors (or their nominees).
 - (vi) The University.
 - (vii) Student representatives.
 - (viii) Staff representatives.
 - (ix) The Chairperson of the University Grievance Committee.
- (b) Statutory Protection: The affected persons are entitled to the protection provided by:
 - (i) The Official Information Act 1982
 - (ii) The Local Government Official Information and Meetings Act 1987
 - (iii) The Employment Relations Act 2000
 - (iv) The Human Rights Act 1993
 - (v) The Privacy Act 2020
 - (vi) Consumer Guarantees Act 1993
 - (vii) The Protected Disclosures Act 2000
 - (viii) The Education (Pastoral Care of Tertiary Learners) Code of Practice 2021
 - (ix) Any other relevant statutes.
- (c) Due Dispatch: The rights of all affected persons are enhanced by a prompt investigation and resolution of the Grievance.

- (d) Due Process: The procedures will follow the principles of natural justice, namely:
 - (i) Notice of any Grievance shall be given to the party/parties as soon as reasonably practicable (subject to consistency with "Time Limits" below).
 - (ii) Any persons directly adversely affected by a Grievance shall be adequately informed of the Grievance arising and be given an opportunity to respond.
 - (iii) The process for resolving the Grievance will be conducted fairly.
 - (iv) The avoidance of bias or conflict of interest.
- (e) Time Limits
 - (i) A grievance should be brought to the attention of the University within one year of the occurrence or circumstances to which the grievance refers (Note that assessments (including major tests) and examination scripts not routinely returned to students should be retained by academic departments for a period of 12 months).
 - (ii) Thereafter a grievance may be considered only with the consent of the Provost.
 - (iii) In deciding whether a grievance will be considered, the Provost will consider:
 - The seriousness of the alleged grievance;
 - The availability of relevant information including witnesses and documents;
 - The prejudice to any other parties; and
 - Any reasons for the delay in bringing the grievance to the attention of the University.

Procedures

The student(s) and/or their representative approaches the staff member concerned. If the approach is in writing the staff member should acknowledge the receipt of the complaint within 7 days. (Mediation preferred forum for resolution.) Students may approach their Students Association representative for support, advice and advocacy.

Step 1

↔ University Disputes Advisor for referral to a Mediator agreed upon by the Parties.

Step 2

If no resolution, or Step 1 is inappropriate, complainant approaches Head of Department/School/Institute/Section or, where the Head is the respondent or there is no settlement of the Grievance, the Pro Vice-Chancellor of the College. (Mediation preferred forum for resolution.)

↔ University Disputes Advisor

Step 3

If no resolution, complainant approaches Provost or their nominee who may either determine an outcome, or may, after consultation with the University Disputes Advisor, initiate the convening of the University Grievance Committee.

↓

Step 4

University Grievance Committee decision, which is final and binding.

91. Students, whenever practicable, should in the first instance approach the University staff member concerned about any Grievance.
92. If the Grievance is unresolved with the staff member concerned, the student may approach the relevant Head of Department/School/Institute/Section, or where this is inappropriate, the relevant Pro Vice-Chancellor. It is anticipated that the vast majority of Grievances will be resolved at this stage. The preferred forum for grievance resolution is mediation.
93. In the absence of extraordinary circumstances, the presence of which will be determined (if necessary) by the Provost, a complaint relating solely to the grade of a piece of course work will not proceed beyond the relevant Pro Vice-Chancellor.
94. The following may at any time request through the University Disputes Advisor the assistance of a University Mediator:
 - (a) complainant(s);
 - (b) staff member affected; or
 - (c) Head of Department/School/Institute/Section; or
 - (d) relevant Pro Vice-Chancellor (or their nominee).
95. If a Grievance is unresolved at the Pro Vice-Chancellor level, it may be referred to the Provost. The Provost or their nominee will review the case, determine that all reasonable steps for resolution have been addressed, and may then either determine an outcome, or convene the University Grievance Committee. That step will not be taken unless and until the

University Disputes Advisor has established that all reasonable steps to resolve the problem consensually have been attempted and exhausted.

96. The University Grievance Committee will have the responsibility of enquiring into the subject matter of the grievance and determining the outcome of the complaint.
It may:
- conduct that inquiry (including the hearing of the respective cases of the student complainant and the staff member affected) in such manner as, consistent with the principles of natural justice, it thinks fit.
 - receive such material relevant to the subject of the inquiry as it thinks fit;
 - meet with the parties and any other persons considered able to assist the inquiry.
97. The University Grievance Committee may meet with the parties separately or together. However, any material relevant to the complaint received from one party in the absence of the other must be either:
- disclosed to the other party and an opportunity to comment given; or
 - excluded from consideration.
98. Each party will have the right to have a support person present at any meeting with the University Grievance Committee.
99. The University Grievance Committee may delegate to and authorise its chairperson to carry out such aspects of its investigatory functions as it thinks fit.
100. The University Grievance Committee will, following the inquiry, prepare a report which will be issued to the parties and contain its decision on the complaint.
101. The decision of the University Grievance Committee will be final and binding. There will be no right of further appeal or review.
102. The proceedings of the University Grievance Committee shall be private, confidential and privileged.
103. Any student with a Grievance should try and keep notes of details, including times, dates, places and keep copies of any documentation related to the Grievance.

Notes to Procedures

- Students may in the first instance approach their Student Association representative for support, advice and advocacy. Students may either act alone or be accompanied by a representative through all steps of these Grievance procedures.
- The complainant should also specify the remedies sought to resolve the submitted Grievance.
 - Outcomes arising from the procedures prior to the convening of the University Grievance Committee will be such as the parties may agree consensually.
These may include but are not confined to:
 - a written or verbal apology;
 - opportunity to receive a second opinion on assessed work;
 - substitution of a higher mark;
 - opportunity to resubmit an assignment;
 - initiation of a student feedback mechanism;
 - extensions of deadlines for assignment;
 - opportunity to re-sit an examination (subject to University regulations).
 - If the Grievance comes for resolution to the University Grievance Committee it may make such decisions and give such directions as it thinks fit.
- If not resolved at a lower level, the Grievance must be presented in writing to the Provost. The documentation provided to the University Grievance Committee should contain the following information:
 - the complainant's full home address, contact phone number and student ID number;
 - where appropriate the title and number of the course, the name of the department or the name of the College in which the Grievance concerns;
 - the nature of the Grievance including the specific academic disadvantage claimed;
 - as many details regarding examples and instances of the Grievance as possible (e.g. dates, times);
 - any other relevant information.
- On receipt of the written complaint, the University Grievance Committee shall within 14 days:
 - acknowledge the receipt of the complaint;
 - inform the parties of their right to access a representative or other support person if they have not already done so;

- provide all relevant written documentation to the staff member(s) concerned for written response.

University Grievance Committee

Membership

5. The University Grievance Committee is a committee of Academic Board and consists of:
- an independent chairperson appointed by the Vice-Chancellor in accordance with Note (i), who shall have both a deliberative and casting vote;
 - one staff member nominated by the Provost;
 - one member nominated by the appropriate student organisation.

Note:

- The independent chairperson shall in any specific case be selected from a panel of not less than three persons (who shall not be current students or staff members) of appropriate standing, qualifications and experience, appointed by the Vice-Chancellor.
- Members of this panel shall be appointed annually by the Vice-Chancellor, upon the recommendation of the Chair of Academic Board following consultation. Members shall be eligible for reappointment. The independent chairpersons shall sit in rotation.
- Members of the University Grievance Committee shall operate independently and impartially and not as representatives of those responsible for appointing, nominating or electing them.

Powers

6. The Committee, subject to compliance with the principles of natural justice, shall:
- (i) determine the conduct of its own procedures; and
(ii) receive such information, as it considers relevant to the Grievance.
 - receive and investigate Grievances at all Massey University campuses and through all modes of delivery of academic programmes;
 - make decisions relating to Grievances;
 - report annually to the Vice-Chancellor through Academic Board on the nature of Grievances and policy issues that have risen during the year.

The Degree of Doctor of Business and Administration DBA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Doctor of Business and Administration requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor Honours Degree, or Master's Degree, or an equivalent, with the award of First Class or Second Class Division I Honours; and
 - have sufficient background and good standing in senior management to satisfy the Doctoral Research Committee they have the capacity to successfully undertake the programme.

Qualification Requirements

- Candidates for the Degree of Doctor of Business and Administration shall follow a parts-based programme of study, which shall consist of courses and a thesis, totalling 360 credits, comprising:
 - Part One: Provisional registration; and
 - Part Two: Full registration.
 and including:
 - the courses listed in the Schedule for the Qualification;
 - a thesis;
 - participation in required activities including presentation of a proposal at a confirmation event and defending a thesis in an oral examination.

Specialisations

- The Degree of Doctor of Business and Administration is awarded without specialisation.

Thesis Requirements

- The thesis must demonstrate the candidate's ability to carry out independent research, which must make a significant contribution to knowledge and understanding in business and administration. The thesis shall be a cohesive and integrated report of the candidate's supervised work and may consist of several studies or cases, and will include the candidate's published or unpublished material or a combination of both.
- There shall be one main supervisor, who shall be a member of the academic staff of the University, and at least one co-supervisor who shall also be a member of the academic staff of the University.
- The thesis must comply with the following requirements:
 - the work on which the thesis is based has not been accepted either in whole or in part for any other degree or diploma; and
 - must clearly define the nature and extent of any assistance the candidate has received in pursuing the research on which the thesis is based;
 - reference to work other than that of the candidate must be appropriately acknowledged;
 - all relevant policies underpinning research practice have been complied with;
 - the thesis must not exceed 65,000 words (excluding appendices and bibliography);
 - the thesis must be submitted for examination in the manner specified by the Doctoral Research Committee in accordance with the published guidelines.

- The thesis will be independently examined by an Examination Committee experienced in the subject area, appointed by the Doctoral Research Committee in accordance with published guidelines, and will include an oral examination of the candidate on the thesis and the subject area. The oral examination will not proceed if the examiners agree that the thesis is of an inadequate standard.
- The Thesis Examination Committee shall make a recommendation to the Doctoral Research Committee on the whole examination and will advise the result of the examination by using one of the following categories:
 - Pass without emendation;
 - Minor emendations required;
 - Major emendations required;
 - Further research and re-examination required;
 - Fail. The candidate shall not be awarded the degree and shall not be permitted to apply for re-examination.
- If minor emendations are required the candidate will have a maximum of three months full time, or five months part time, to complete the emendations. The candidate must complete the emendations to the satisfaction of the examination panel within the specified time period or the candidate will be failed.
- If major emendations are required the candidate will have a maximum of six months full time, or nine months part time, to complete the emendations. The candidate must complete the emendations to the satisfaction of the examination panel within the specified time period or the candidate will be failed.
- If further research and re-examination is required, the candidate will have a maximum of one-year full time and eighteen months part time to conduct the required additional research and/or revisions. The candidate must re-enrol and pay tuition fees on a pro-rata basis. A candidate may only revise and resubmit a thesis for re-examination once. If the candidate does not complete the revisions to the satisfaction of all the examiners, within the specified time frame the candidate will be failed.
- No appeals are allowed except on completion of the examination process on the grounds of procedural irregularities in the examination process. For an appeal to be considered, applications must be received by the Doctoral Research Committee within three months of formal notification of the examination result by the Graduate Research School.

Student Progression

- For progression from Provisional Registration to Full Registration candidates must have:
 - achieved a grade average of B+ or higher across the courses specified for the Provisional Registration;
 - participated in a confirmation event, during which they have presented their proposal to, and had it accepted by, a confirmation committee;
 - their proposed main supervisor and co-supervisor(s) approved by the Doctoral Research Committee.
- Any candidate who fails to achieve a B+ grade in just one course will be permitted to re-enrol and repeat that course on only one occasion. Should the candidate fail to achieve a B+ grade in more than one course, fail to achieve a B+ grade in the repeated course on the second attempt, or subsequently fail to achieve a B+ grade for any other course, the candidate's registration will be terminated.
- Candidates are required to make successful progress in the thesis as determined by six-monthly progress reports in accordance with the guidelines published by the Doctoral Research Committee and assessed by the Supervisors, Head of Academic Unit, and the Doctoral Research Committee.

Completion Requirements

16. A candidate's period of registration (including provisional registration) shall be a minimum period of three years (36 months) and a maximum of four years (48 months) if full time, and a minimum period of four years (48 months) and a maximum of six years (72 months) if part-time, unless a specified time of suspension or extension has been approved by the Doctoral Research Committee. Suspensions or extensions granted will appear on the academic transcript.

17. The maximum period of registration shall include:

- completion of courses as listed in the Schedule to the Qualification;
- submission of a thesis in the manner required under the published Doctoral Research Committee guidelines;
- application to be examined;
- examination (including, completion of any emendations or re-examination);
- submission of two bound copies and one PDF copy of the final thesis, as approved by the Examination Committee.

18. Candidates may be graduated when they meet the Admission, Qualification and Thesis requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Business should they meet the relevant Qualification requirements.

Academic Progress

19. For candidates enrolled in the Degree of Doctor of Business and Administration, the following will lead to termination of registration:

- failure to achieve a B+ or higher grade on the first attempt in more than one of the courses specified for the Provisional Registration in Part One;
- failure to achieve a B+ or higher grade in the one permitted repeated course after the second attempt;
- failure to make adequate progress as required by the six-monthly progress reports in accordance with the guidelines published by the Doctoral Research Committee as assessed by the Supervisors, Head of Academic Unit, and the Doctoral Research Committee.

Schedule for the Doctor of Business and Administration**Part One: Provisional Registration**

115901 Introduction to Applied Doctoral Research	30 credits
115902 Understanding Applied Research Design and Research Methodologies	30 credits
115903 Writing a Literature Review	30 credits
115910 The Research Proposal	30 credits

Part Two: Full Registration (At least 240 credits from)

115999 Thesis	120 credits
P 115901, 115902, 115903, 115910	

The Degree of Doctor of Clinical Psychology

DClinPsych

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Doctor of Clinical Psychology requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor Honours degree or Master's degree in Psychology with the award of First Class or Second Class Division I Honours, or equivalent; and
 - have passed the following courses or their equivalent, in their qualifying degree: 175738, 175,781, 175782, and 175783; and
 - have sufficient personal qualities, ethical standards, and professional potential to satisfy the Doctoral Research Committee they have the capacity to successfully undertake the programme, and to satisfy the requirements for eligibility to practice as a Registered Psychologist in accordance with the Health Practitioners Competence Assurance Act of 2003, or as amended.

Qualification Requirements

- Candidates for the Degree of Doctor of Clinical Psychology shall follow a parts-based programme of study, which shall consist of courses and a thesis, totalling 360 credits, comprising:
 - Part One: Provisional Registration, and
 - Part Two: Full Registration
 and including:
 - the courses listed in the Schedule for the Qualification;
 - a thesis;
 - participation in required activities including presentation of a research report at a confirmation event, defending a thesis in an oral examination, and demonstrating the competencies required of a Professional Clinical Psychologist at a practical oral examination.

Specialisations

- The Degree of Doctor of Clinical Psychology is awarded without specialisation.

Thesis Requirements

- The thesis must demonstrate the candidate's ability to carry out independent research, which must make a significant contribution to knowledge and understanding in clinical psychology. The thesis shall be a cohesive and integrated report of the candidate's supervised work, and

- may consist of several studies or cases, and will include the candidate's published or unpublished material or a combination of both.
- There shall be one main supervisor, who shall be a member of the academic staff of the University, and at least one co-supervisor who shall also be a member of the academic staff of the University. At least one supervisor must be a registered senior clinical psychologist. All supervisors, including any additional co-supervisors, must be approved by the Doctoral Research Committee.
- The thesis must comply with the following requirements:
 - the work on which the thesis is based has not been accepted either in whole or in part for any other degree or diploma; and
 - must clearly define the nature and extent of any assistance the candidate has received in pursuing the research on which the thesis is based;
 - reference to work other than that of the candidate must be appropriately acknowledged;
 - all relevant policies underpinning research practice have been complied with;
 - the thesis must not exceed 65,000 words (excluding appendices and bibliography);
 - the thesis must be submitted for examination in the manner specified by the Doctoral Research Committee in accordance with the published guidelines.
- The thesis will be independently examined by an Examination Committee experienced in the subject area, appointed by the Doctoral Research Committee in accordance with published guidelines, and will include an oral examination of the candidate on the thesis and the subject area. The oral examination will not proceed if the examiners agree that the thesis is of an inadequate standard.
- The Thesis Examination Committee shall make a recommendation to the Doctoral Research Committee on the whole examination and will advise the result of the examination by using one of the following categories:
 - Pass without emendation.
 - Minor emendations required.
 - Major emendations required.
 - Further research and re-examination required.
 - Fail. The candidate shall not be awarded the degree and shall not be permitted to apply for re-examination.
- If minor emendations are required the candidate will have a maximum of three months full time to complete the emendations. The candidate must complete the emendations to the satisfaction of the examination panel within the specified time period or the candidate will be failed.
- If major emendations are required the candidate will have a maximum of six months full time to complete the emendations. The candidate must

- complete the emendations to the satisfaction of the examination panel within the specified time period or the candidate will be failed.
11. If further research and re-examination is required, the candidate will have a maximum of one year full time to conduct the required additional research and/or revisions. The candidate must re-enrol and pay tuition fees on a pro-rata basis. A candidate may only revise and resubmit a thesis for re-examination once. If the candidate does not complete the revisions to the satisfaction of all the examiners within the specified time period, the candidate will be failed.
 12. No appeals are allowed except on completion of the examination process on the grounds of procedural irregularities in the examination process. For an appeal to be considered, applications must be received by the Doctoral Research Committee within three months of formal notification of the examination result by the Graduate Research School.
- Student Progression**
13. For progression from Provisional Registration to Full Registration, candidates must have:
 - (a) achieved pass grades in courses 175935 and 175920;
 - (b) participated in a confirmation event, during which they have presented their research report to, and had it accepted by, a confirmation committee;
 - (c) their proposed main supervisor and co-supervisor(s) approved by the Doctoral Research Committee.
 14. Candidates are required to make successful progress in the thesis as determined by six-monthly progress reports in accordance with the guidelines published by the Doctoral Research Committee and assessed by the Supervisors, Head of Academic Unit, and the Doctoral Research Committee.
 15. Candidates are required to successfully complete courses 175935 (taught) and 175920 (practicum) before progressing to 175936 (taught) and 175921 (practicum). Candidates are required to successfully complete courses 175936 (taught) and 175921 (practicum) prior to enrolling in 175922 (internship) and undertaking clinical case study research. Any candidate who fails one taught or practicum course will be permitted to repeat that course once. If the second attempt is unsuccessful, the candidate's registration will be terminated.
 16. Eligibility to present for the final examination of 175922 (internship) is dependent on the candidate having reached a satisfactory standard of achievement in the internship, to the satisfaction of the Director of Clinical Training.
 17. A candidate who fails the internship will be permitted to re-enrol for the internship once. Should the candidate fail to successfully complete the internship following the second attempt, the candidate's registration will be terminated.
 18. Candidates must continue to satisfy the requirements for eligibility to practice as a Registered Psychologist in accordance with the Health Practitioners Competency Assurance Act of 2003, or as amended, throughout the duration of their studies.

Completion Requirements

19. A candidate's period of registration (including provisional registration) shall be a minimum period of three years (36 months) and a maximum of four years (48 months) full time, unless a specified time of suspension or extension has been approved by the Doctoral Research Committee.

20. The maximum period of registration shall include:
 - (a) passing courses as listed in the Schedule to the Qualification;
 - (b) submission of a thesis in the manner required under the published Doctoral Research Committee guidelines;
 - (c) application for the thesis to be examined;
 - (d) thesis examination (including, completion of any emendations or re-examination);
 - (e) submission of one PDF copy of the final thesis, as approved by the Examinations Committee;
 - (f) practical oral examination of professional clinical competencies by an examination committee of qualified clinical psychologists including at least one external academic clinical psychologist from another University training programme and at least one external senior consultant clinical psychologist with prior experience of intern field supervision.
 21. Candidates may be graduated when they meet the Admission, Qualification and Thesis requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be eligible to be awarded an alternative qualification should they meet the relevant Qualification requirements.
- Academic Progress**
22. For candidates enrolled in the Degree of Doctor of Clinical Psychology, the following will lead to termination of registration by the Doctoral Research Committee:
 - (a) failure to pass any of the taught courses in the Schedule for the Qualification in two successive attempts;
 - (b) failure to pass any of the practicum courses or the internship course in the Schedule for the Qualification in two successive attempts.
 23. In the following circumstances, a candidate enrolled in the Degree of Doctor of Clinical Psychology will either be permitted to withdraw without prejudicing future doctoral applications, or have their registration terminated by the Doctoral Research Committee:
 - (a) failure to make adequate progress in the research thesis as required by the six-monthly progress reports in accordance with the guidelines published by the Doctoral Research Committee as assessed by the Supervisors, Head of Academic Unit, and the Doctoral Research Committee.

The Degree of Doctor of Literature

DLit

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

1. Admission for consideration for the Degree of Doctor of Literature requires that the candidate will:
 - (a) meet the University admission requirements as specified; and will;
 - (b) be a graduate of a Massey University degree; or
 - (c) be a graduate of another University and have a substantial, demonstrable, formal association with Massey University; and will:

- (d) not present themselves for consideration until at least 10 years after graduation in a qualifying degree; and
- (e) not previously have applied for examination within the preceding five years, and only then will application be considered on the basis of significant new work.

Qualification Requirements

2. The Degree of Doctor of Literature shall be awarded for original contribution(s) of special excellence to knowledge in the fields of Humanities, Arts or Social Sciences. This will have been published in the form of scholarly papers and/or books or creative works or performances. Additional unpublished work may be submitted in support of the application.

Specialisations

3. The Degree of Doctor of Literature is awarded without specialisation.

Examination Requirements

4. The submitted work(s) must comply with the following requirements:

- (a) the work(s) has not been accepted either in whole or in part for any other degree or diploma; and
 - (b) must clearly define the nature and extent of any assistance the candidate has received in pursuing the research on which the work(s) is based;
 - (c) reference to work other than that of the candidate must be appropriately acknowledged;
 - (d) all relevant policies underpinning research practice have been complied with;
 - (e) must be submitted for examination in the manner specified by the Doctoral Research Committee in accordance with the published guidelines.
5. The work(s) will be independently examined by an Examination Committee experienced in the subject area, appointed by the Doctoral Research Committee in accordance with published guidelines.
 6. The Examination Committee shall make a recommendation to the Doctoral Research Committee on the whole examination and will advise the result of the examination by using one of the following categories:
 - (a) Pass.
 - (b) Fail.
 7. No appeals are allowed except on completion of the examination process on the grounds of procedural irregularities in the examination process. For an appeal to be considered, applications must be received by the Doctoral Research Committee within three months of formal notification of the examination result by the Graduate Research School.

Student Progression

8. Applications will only proceed to Examination at the discretion of the Doctoral Research Committee on the recommendation of an Assessor appointed by this Committee to judge the suitability of the application, the key elements of the work(s), and the contribution to knowledge.

The Degree of Doctor of Philosophy PhD

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

1. Admission to the Degree of Doctor of Philosophy requires that the candidate will:
 - (a) meet the University admission requirements as specified; and
 - (b) have been awarded or qualified for a Master's degree or Bachelor Honours degree with First or Second Class Honours Division One, or an equivalent qualification; and
 - (c) have sufficient independent research experience to satisfy the Doctoral Research Committee that they have the capacity to successfully undertake the programme.

Qualification Requirements

2. Candidates for the Doctor of Philosophy shall follow a parts based programme of study which shall consist of a thesis totalling 360 credits, comprising:
 - (a) Part One: Provisional Registration;
 - (b) Part Two: Full Registration;
 and including:
 - (c) a thesis;
 - (d) participation in required activities including presentation of a research report at a confirmation event and defending a thesis in an oral examination.

Specialisations

3. The Degree of Doctor of Philosophy is awarded without specialisation.

Thesis Requirements

4. The thesis must demonstrate the candidate's ability to carry out independent research, which must make a significant contribution to knowledge and understanding of a field of study. The thesis shall be a cohesive and integrated report of the candidate's supervised work and may consist of several studies or cases, and will include the candidate's published or unpublished material or a combination of both.
5. Theses with publications must have an appropriate introduction, including research objectives, and a comprehensive conclusion which clearly identifies the original contribution to knowledge of the subject with which it deals. The thesis must work as an integrated whole, and linking sections may also be used to this end.
6. Candidates submitting a thesis in the creative and performing arts shall prepare a presentation which consists of creative component and exegesis. The creative works and/or performance should take a form appropriate to the discipline.
7. There shall be one main supervisor, who shall be a member of the academic staff of the University, and at least one co-supervisor who shall also be a member of the academic staff of the University; all supervisors, including any additional co-supervisors, must be approved by the Doctoral Research Committee.
8. The thesis must comply with the following requirements:
 - (a) the work on which the thesis is based has not been accepted either in whole or in part for any other degree or diploma; and

- (b) must clearly define the nature and extent of any assistance the candidate has received in pursuing the research on which the thesis is based;
 - (c) reference to work other than that of the candidate must be appropriately acknowledged;
 - (d) all relevant policies underpinning research practice have been complied with;
 - (e) the thesis must not exceed 100,000 words (excluding appendices and bibliography);
 - (f) the thesis must be submitted for examination in the manner specified by the Doctoral Research Committee in accordance with the published guidelines;
 - (g) for candidates submitting a thesis in creative and performing arts, the thesis must include a permanent record of the performance/exhibition.
9. The thesis will be independently examined by an Examination Panel experienced in the subject area, appointed by the Doctoral Research Committee in accordance with published guidelines, and will include an oral examination of the candidate on the thesis and the subject area. Any aspect of the thesis for which public performance is an integral part will be examined in that context.
 10. The oral examination will not proceed if the examiners agree that the thesis is of an inadequate standard.
 11. The Thesis Examination Panel shall make a recommendation to the Doctoral Research Committee on the whole examination and will advise the result of the examination by using one of the following categories:
 - (a) Pass without emendation.
 - (b) Minor emendations required.
 - (c) Major emendations required.
 - (d) Further research and re-examination required.
 - (e) Fail. The candidate shall not be awarded the degree and shall not be permitted to apply for re-examination.
 12. If minor emendations are required the candidate will have a maximum of three months full time, or five months part time, to complete the emendations. The candidate must complete the emendations to the satisfaction of the examination panel within the specified time period or the candidate will be failed.
 13. If major emendations are required the candidate will have a maximum of six months full time, or nine months part time, to complete the emendations. The candidate must complete the emendations to the satisfaction of the examination panel within the specified time period or the candidate will be failed.
 14. If further research and re-examination is required, the candidate will have a maximum of one year full-time and eighteen months part time to conduct the required additional research and emendations. The candidate must re-enrol and pay tuition fees on a pro-rata basis. A candidate may only revise and resubmit a thesis for re-examination once. If the candidate does not complete the emendations to the satisfaction of all the examiners within the specified time period, the candidate will be failed.
 15. No appeals are allowed except on completion of the examination process on the grounds of procedural irregularities in the examination process. For an appeal to be considered, applications must be received by the Doctoral Research Committee within three months of formal notification of the examination result by the Graduate Research School.

Student Progression

16. Candidates are required to make successful progress in the thesis as determined by six-monthly progress reports in accordance with the guidelines published by the Doctoral Research Committee and assessed by the Supervisors, Head of Academic Unit, and the Doctoral Research Committee.
17. For progression from Provisional Registration to Full Registration candidates must have participated in a confirmation event, during which they have presented their research report to, and had it accepted by, a confirmation committee; the confirmation event must be held within 12 months from commencement of provisional registration if candidacy is full time and within 18 months if part time, unless the Doctoral Research Committee has approved a period in which the candidate's provisional registration is deferred.

Completion Requirements

18. A candidate's period of registration (including provisional registration) shall normally be a minimum period of three years (36 months) and a maximum of four years (48 months) if full time, and a minimum period of 55 months and a maximum period of six years (72 months) if part-time, unless a specified time of suspension or extension has been approved by the Doctoral Research Committee.
19. The maximum period of registration shall include:
- submission of a thesis in the manner required under the published Doctoral Research Committee guidelines;

- application to be examined, including submission of the thesis for examination;
- examination (including, completion of any emendations or re-examination);
- submission of one PDF copy of the final thesis as approved by the Examination Committee.

20. Candidates may be graduated when they meet the Admission, Qualification and Thesis requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an exit qualification should they meet the relevant Qualification requirements.

Academic Progress

21. In the following circumstances a candidate enrolled in the Degree of Doctor of Philosophy will either be permitted to withdraw without prejudicing future doctoral applications, or have their provisional or full registration terminated by the Doctoral Research Committee:
- failure to make adequate progress as required by the six-monthly progress reports in accordance with the guidelines published by the Doctoral Research Committee as assessed by the Supervisors, Head of Academic Unit, and the Doctoral Research Committee;
 - failure to successfully complete the confirmation event within the stated timeframes.

The Degree of Doctor of Science

DSc

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

1. Admission for consideration for the Degree of Doctor of Science requires that the candidate will:
- meet the University admission requirements as specified; and will;
 - be a graduate of a Massey University degree; or
 - be a graduate of a degree of another University and have a substantial, demonstrable, formal association with Massey University;
- and will:
- not present themselves for consideration until at least 10 years after graduation in a qualifying degree; and
 - not previously have applied for examination within the preceding five years, and only then will application be considered on the basis of significant new work.

Qualification Requirements

2. The Degree of Doctor of Science shall be awarded for original contribution(s) of special excellence to knowledge in science. This will have been published in the form of scholarly papers and/or books. Additional unpublished work may be submitted in support of the application.

Specialisations

3. The Degree of Doctor of Science is awarded without specialisation.

Examination Requirements

4. The submitted work(s) must comply with the following requirements:
- the work(s) has not been accepted either in whole or in part for any other degree or diploma; and
 - must clearly define the nature and extent of any assistance the candidate has received in pursuing the research on which the work(s) is based;
 - reference to work other than that of the candidate must be appropriately acknowledged;
 - all relevant policies underpinning research practice have been complied with;
 - must be submitted for examination in the manner specified by the Doctoral Research Committee in accordance with the published guidelines.

- The work(s) will be independently examined by an Examination Committee experienced in the subject area, appointed by the Doctoral Research Committee in accordance with published guidelines.
- The Examination Committee shall make a recommendation to the Doctoral Research Committee on the whole examination and will advise the result of the examination by using one of the following categories:
 - Pass;
 - Fail.
- No appeals are allowed except on completion of the examination process on the grounds of procedural irregularities in the examination process. For an appeal to be considered, applications must be received by the Doctoral Research Committee within three months of formal notification of the examination result by the Graduate Research School.

Student Progression

8. Applications will only proceed to Examination at the discretion of the Doctoral Research Committee on the recommendation of an Assessor appointed by this Committee to judge the suitability of the application, the key elements of the work(s), and the contribution to knowledge.

The Degree of Doctor of Social Work

DSW

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Doctor of Social Work requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Master of Applied Social Work or Master of Social Work, or an equivalent Social Work qualification which includes a research component, with the award of First Class or Second Class Division I honours; and
 - have sufficient background and good standing in professional social work to satisfy the Doctoral Research Committee they have the capacity to successfully undertake the programme.

Qualification Requirements

- Candidates for the Degree of Doctor of Social Work shall follow a parts-based programme of study, which shall consist of courses and a thesis totalling 360 credits, comprising:
 - Part One: Provisional Registration; and
 - Part Two: Full Registration; and including:
 - the courses listed in the Schedule for the Qualification;
 - a thesis;
 - participation in required activities including presentation of a research report at a confirmation event and defending a thesis in an oral examination.

Specialisations

- The Degree of Doctor of Social Work is awarded without specialisation.

Thesis Requirements

- The thesis must demonstrate the candidate's ability to carry out independent research, which must make a significant contribution to knowledge and understanding in professional social work. The thesis shall be a cohesive and integrated report of the candidate's supervised work and may consist of several studies or cases, and will include the candidate's published or unpublished material or a combination of both.
- There shall be one main supervisor, who shall be a member of the academic staff of the University, and at least one co-supervisor who shall also be a member of the academic staff of the University. All supervisors, including any additional co-supervisors, must be approved by the Doctoral Research Committee.
- The thesis must comply with the following requirements:
 - the work on which the thesis is based has not been accepted either in whole or in part for any other degree or diploma; and
 - must clearly define the nature and extent of any assistance the candidate has received in pursuing the research on which the thesis is based;
 - reference to work other than that of the candidate must be appropriately acknowledged;
 - all relevant policies underpinning research practice have been complied with as appropriate; and
 - the thesis must not exceed 65,000 words (excluding appendices and bibliography);
 - the thesis must be submitted for examination in the manner specified by the Doctoral Research Committee in accordance with the published guidelines.
- The thesis will be independently examined by an Examination Committee experienced in the subject area, appointed by the Doctoral Research Committee in accordance with published guidelines, and will include an oral examination of the candidate on the thesis and the subject area. The oral examination will not proceed if the examiners agree that the thesis is of an inadequate standard.
- The Thesis Examination Committee shall make a recommendation to the Doctoral Research Committee on the whole examination and will advise the result of the examination by using one of the following categories:
 - Pass without emendation.
 - Minor emendations required.
 - Major emendations required.
 - Further research and re-examination required.
 - Fail. The candidate shall not be awarded the degree and shall not be permitted to apply for re-examination.

- If minor emendations are required the candidate will have a maximum of three months full time, or five months part time, to complete the emendations. The candidate must complete the emendations to the satisfaction of the examination panel within the specified time period or the candidate will be failed.
- If major emendations are required the candidate will have a maximum of six months full time, or nine months part time, to complete the emendations. The candidate must complete the emendations to the satisfaction of the examination panel within the specified time period or the candidate will be failed.
- If further research and re-examination is required, the candidate will have a maximum of one year full-time or eighteen months part time to conduct the required additional research and/or revisions. The candidate must re-enrol and pay tuition fees on a pro-rata basis. A candidate may only revise and resubmit a thesis for re-examination once. If the candidate does not complete the revisions to the satisfaction of all the examiners within the specified period, the candidate will be failed.
- No appeals are allowed except on completion of the examination process on the grounds of procedural irregularities in the examination process. For an appeal to be considered, applications must be received by the Doctoral Research Committee within three months of formal notification of the examination result by the Graduate Research School.

Student Progression

- For progression from Provisional Registration to Full Registration candidates must have:
 - achieved a B+ or higher for each of the courses specified for the Provisional Registration;
 - participated in a confirmation event, during which they have presented their research report to, and had it accepted by, a confirmation committee;
 - their main proposed supervisor and co-supervisor(s) approved by the Doctoral Research Committee.
- Any candidate who fails to achieve a B+ grade in just one course will be permitted to re-enrol and repeat that course on only one occasion. Should the candidate fail to achieve a B+ grade in more than one course, fail to achieve a B+ grade in the repeated course on the second attempt, or subsequently fail to achieve a B+ grade for any other course, the candidate's registration will be terminated.
- Candidates are required to make successful progress in the thesis as determined by six-monthly progress reports in accordance with the guidelines published by the Doctoral Research Committee and assessed by the Supervisors, Head of Academic Unit, and the Doctoral Research Committee.

Completion Requirements

- A candidate's period of registration (including provisional registration) shall be a minimum period of three years (36 months) and a maximum of four years (48 months) if full time, and a minimum period of four years (48 months) and a maximum of six years (72 months) if part-time, unless a specified time of suspension or extension has been approved by the Doctoral Research Committee.
- The maximum period of registration shall include:
 - completion of courses as listed in the Schedule to the Qualification;
 - submission of a thesis in the manner required under the published Doctoral Research Committee guidelines;
 - application to be examined;
 - examination (including, completion of any emendations or re-examination);
 - submission of one PDF copy of the final thesis, as approved by the Examination Committee.
- Candidates may be graduated when they meet the Admission, Qualification and Thesis requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Social Work or Postgraduate Certificate in Social Work should they meet the relevant Qualification requirements.

Academic Progress

19. For candidates enrolled in the Degree of Doctor of Social Work, the following will lead to termination of registration by the Doctoral Research Committee:
- (a) failure to achieve a B+ or higher on the first attempt in more than one of the courses specified for the Provisional Registration in Part One;
 - (b) failure to achieve a B+ grade in the one permitted repeated course after the second attempt.
20. In the following circumstances a candidate enrolled in the Degree of Doctor of Social Work will either be permitted to withdraw without prejudicing future doctoral applications, or have their registration terminated by the Doctoral Research Committee:
- (a) failure to make adequate progress in their research thesis with the objectives established in the six-monthly progress reports in accordance with the guidelines published by the Doctoral Research Committee as assessed by the Supervisors, Head of Academic Unit and the Doctoral Research Committee.

Transitional Provisions

21. Candidates who commenced their provisional registration in the Doctor of Social Work prior to 01 January 2021 may be exempt from the Regulation 19 requirement to achieve the specified grade average on the first attempt, or after repeating one course as permitted. Such candidates are required to achieve a B+ or higher grade for each of the courses specified for the Provisional Registration in Part One.

The Degree of Executive Master of Business Administration

EMBA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the degree of Executive Master of Business Administration requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a relevant Bachelor's degree, or equivalent;
 - have completed at least seven years business experience, at least three of which must be at management level; and
 - have been selected into the programme on the basis of a selection process which may include a written application, interview and practical exercises.

Qualification Requirements

- Candidates for the degree of Executive Master of Business Administration shall follow a flexible programme of study, totalling at least 240 credits comprising:
 - the courses listed in the Schedule to the Degree; and including:
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- The Executive Master of Business Administration is awarded without a subject specialisation.

Student Progression

- In cases of sufficient merit, the degree of Executive Master of Business Administration may be awarded with a class of honours on the basis of the grade average achieved across all courses listed in the Schedule of Courses except for 295703 and 295704, and provided that the requirements for the award of the Executive Master of Business Administration are completed within 2 years and 6 months.

Completion Requirements

- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the

Postgraduate Diploma in Business or the Postgraduate Certificate in Business should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Executive Master of Business Administration prior to 1 January 2023 may count one or more of the following courses, if successfully completed, towards the requirements of the degree: 115710, 115723, 115724, 115736, 115739, 115740, 115745.
- These transition arrangements expire 31 December 2026.
- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Executive Master of Business Administration prior to 1 January 2025 may Substitute 115709, if successfully completed, for 295705.
- These transition arrangements expire 31 December 2028.

The Degree of Master of Agriculture

MAgr

No new enrolments**Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Master of Agriculture requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for the Bachelor of Agricultural Science with a major in the intended postgraduate subject, or equivalent; and
 - have achieved a B grade average over the 300-level majoring courses of the qualification(s) considered for admission, or equivalent.

Qualification Requirements

- Candidates for the Master of Agriculture shall follow a parts-based programme of study, which shall consist of 700- and 800-level courses totalling at least 180 credits, comprising:
 - Parts One and Two as specified in the schedule to the degree;
 - at least 60 credits at 800 level; including:
 - one of the compulsory courses listed in Schedule A to the Qualification;
 - at least 150 credits from the Schedule for the Qualification;
 - no more than 45 credits of Special Topic courses;
 - no more than 30 credits of professional development (5 credit) courses;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The degree of Master of Agriculture may be awarded with or without a subject.
- Candidates may complete a subject by passing at least 105 credits in a subject, including a research report of 60 credits in that subject. The requirements for each subject are set out in the Schedule for the Qualification.
- Subjects available in the Master of Agriculture are: Agriculture, Equine, Horticulture and Life Cycle Management.

Student Progression

- For progression from Part One to Part Two, candidates must have achieved a Grade Average of B over the first 90 credits undertaken for Part One, which must include the compulsory course, either 119720 or 119728.
- In cases of sufficient merit, the Degree of Master of Agriculture may be awarded with Distinction or Merit.

Completion Requirements

- The timeframes for completion as outlined in General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Analytics

MAAnalyt

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Analytics requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have sufficient background in statistical analysis tools to satisfy the Academic Board that they have the capacity to undertake the programme; and
 - have been awarded or qualified for a Bachelor's degree in a relevant subject, with a B- grade average across the higher level courses, or equivalent; or
 - have been awarded or qualified for a Bachelor's degree, and have completed at least two years' experience in a relevant field of work or professional activity, or equivalent.

Qualification Requirements

- Candidates for the Degree of Master of Analytics shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - Part One and Part Two as defined by the Schedule to the Qualification; and including:
 - any compulsory courses listed in the Schedule for the Qualification;
 - at least one subject;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- Candidates may complete a subject by passing at least 120 credits in a specialisation including the Applied Analytics Project from Part Two. The requirements for each subject are set out in the Schedule for the Qualification.
Approved subjects are: Business, Health

Academic Requirements

- Every candidate for the Degree of Master of Analytics shall complete to the satisfaction of the Academic Board, a minimum of 600 hours in approved practica and associated reports in accordance with the following courses:
 - 115801 Applied Analytics Project
 - 115802 Applied Analytics Project Part 1
 - 115803 Applied Analytics Project Part 2

Student Progression

- In cases of sufficient merit, the Degree of Master of Analytics may be awarded with Distinction or Merit.
- For progression from Part One to Part Two, candidates must have maintained a B- grade average over the Core compulsory courses undertaken in Part One.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded a relevant postgraduate diploma should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Health subject within the Master of Analytics prior to 1 January 2022 who have successfully completed 250702 or 250704 may substitute either of these for 250706 in order to fulfil the subject requirements until 31 December 2025.
- Subject to Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Health subject within the Master of Analytics prior to 1 January 2025 who have successfully completed at least 30 credits towards the subject requirements, will be able to complete the qualification under the 2024 Calendar regulations. In addition, candidates may substitute course(s) 250701, 250703 and 250706 with 250705 and 250711. These transitional arrangements expire 31 December 2026.

Schedule for the Master of Analytics**Part One****Core compulsory courses**

The Degree of Master of Applied Linguistics

MAppLing

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Applied Linguistics requires that the candidate:
 - meet the University admission requirements as specified; and shall have:
 - been awarded or qualified for a relevant Bachelor's degree with at least a B grade average across the 200-300 level courses, or equivalent; or
 - been awarded or qualified for a Postgraduate Diploma in Second Language Teaching or a Postgraduate Diploma in Applied Linguistics, with at least a B+ grade average for entry to the Master of Applied Linguistics Research Pathway or at least a B grade average for entry to the Coursework Pathway.
- In addition to regulation 1, admission to the Degree of Master of Applied Linguistics (Teaching English to Speakers of Other Languages) requires that the candidate will have completed relevant teaching and related experience approved by the Academic Board or their delegate as appropriate for entry.

Qualification Requirements

- Candidates for the Master of Applied Linguistics shall follow a parts-based programme of study totalling at least 180 credits, comprising completion of Part One and Part Two as detailed in the Schedule for the Qualification.
- Notwithstanding Regulation 3, candidates admitted under Regulation 1(c) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

- The Master of Applied Linguistics is awarded with or without a subject.
- Candidates for the Degree of Master of Applied Linguistics may complete a subject by passing at least 180 credits in the subject.
- The requirements for each subject are set out in the Schedule for the Degree.
- The subject available for the Master of Applied Linguistics is: Teaching English to Speakers of Other Languages.

Student Progression

- For progression to Part Two in the Master of Applied Linguistics (Coursework Pathway), candidates must have achieved a B grade average in the Part One courses.
- For progression to Part Two in the Master of Applied Linguistics (Research Pathway), candidates must have achieved a B+ grade average in the first 60 credits of courses completed in Part One.
- In cases of sufficient merit, the Degree of Master of Applied Linguistics may be awarded with Distinction or Merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.

- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Applied Linguistics should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Applied Social Work

MAppSW

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Applied Social Work requires that the candidate will:
 - meet the University admission requirements as specified;
 - have been awarded or qualified for an undergraduate degree, either in the social sciences (such as social and cultural studies, psychology, human development) or an alternative degree with substantial relevant experience in a social or community setting;

- (c) hold a driver's licence that is valid in New Zealand unless otherwise exempted;
- (d) provide satisfactory evidence of their proficiency in English, if English is not the applicant's first language, in the form of:
 - (i) an overall academic score of at least 6.5 in an IELTS assessment with no band score less than 6.5 within the preceding two years; or
 - (ii) A TOEFL internet-based test (iBT) score of 85 or higher with a writing score of 22; or
 - (iii) at least two years of successful study in a New Zealand secondary school, with at least ten Level 2 NCEA credits in Literacy (five reading and five writing) or equivalent; and
- (e) be selected into the programme.

Qualification Requirements

2. Candidates for the Degree of Master of Applied Social Work shall follow a programme of study comprising of courses totalling at least 240 credits including:
 - (a) any compulsory courses identified in the Schedule for the Qualification;
 - (b) attending contact or block courses, field trips, workshops, tutorials, and practice laboratories as required.

Specialisations

3. The Degree of Master of Applied Social Work is awarded without specialisation.

Academic Requirements

4. Every candidate for the Master of Applied Social Work shall perform at least 120 days of approved supervised field education and associated reports, in accordance with the requirements of the following courses:
 - (a) 179789 Field Work Practice I
 - (b) 179890 Field Work Practice II.

Student Progression

5. Candidates must continue to meet the requirements for registration as set down by the New Zealand Social Workers Registration Board in terms of candidates being 'fit and proper persons to practice social work'. Candidates must advise the Programme Coordinator of any change to their circumstances in this regard within seven days, including any conviction or criminal charges pending. Annual confirmation of eligibility is required.
6. The Degree of Master of Applied Social Work may be awarded with or without a class of Honours.

Completion Requirements

7. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
8. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Arts should they meet the relevant Qualification requirements.

Academic Progress

9. For candidates enrolled in the Degree of Master of Applied Social Work, the following will lead to exclusion from the qualification:
 - (a) Failure to meet the requirements for registration as set down by the New Zealand Social Workers Registration Board in terms of candidates being 'fit and proper persons to practice social work';
 - (b) Failure to obtain a pass in a compulsory course for which they have been enrolled for on two occasions;
 - (c) Persons excluded under clause 9(b) will only be re-admitted to the Degree of Master of Applied Social Work with approval of the Academic Board, which may be declined, or granted under such conditions as it may determine.

The Degree of Master of Aviation

MAv

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Aviation requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor of Aviation, Bachelor of Aviation Management or equivalent degree or qualification, having achieved a grade average of at least a B- in the highest level courses.

Qualification Requirements

- Candidates for the Master of Aviation shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits comprising:
 - Part One and Part Two as defined by the Schedule to the Degree; and including:
 - at least 60 credits at 800 level in accordance with either the Research pathway or the Professional pathway;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 2, candidates who have been awarded the Degree of Bachelor of Aviation Management with Honours, or the equivalent degree of another recognised university, may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

- The Degree of Master of Aviation is awarded without specialisation.

Student Progression

- For progression from Part One to Part Two in the Master of Aviation (Research Pathway), candidates must have achieved a Grade Average of at least B over the first 60 credits of courses completed in Part One, including the compulsory course.
- For progression from Part One to Part Two in the Master of Aviation (Professional Pathway), candidates must have achieved a Grade Average of at least B- over the courses completed in Part One, including the compulsory courses.
- In cases of sufficient merit, the Degree of Master of Aviation may be awarded with Distinction or Merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Business or the Postgraduate Certificate in Business should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Business Administration

MBA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the degree of Master of Business Administration requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a relevant Bachelor's degree, having achieved at least a B- grade average in the highest level courses, or equivalent; and
 - have completed at least three years of relevant postgraduate practical experience; and
 - have been selected into the programme on the basis of selection process which may include a written application, referee reports and practical exercises.

Qualification Requirements

- Candidates for the degree of Master of Business Administration shall follow a parts based course of study, totalling at least 180 credits; comprising:
 - Parts One and Two as specified in the schedule to the Degree; and including:
 - the compulsory courses specified in the Schedule to the Degree;
 - attending contact courses, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Degree of Master of Business Administration may be awarded with or without a subject.
- The requirements for each subject are set out in the Master of Business Administration Schedule.
- Subjects available are: Business Sustainability, Digital Transformation, Global Business.

Student Progression

- For progression to Part Two candidates must have achieved a B- grade average across the courses completed in Part One.
- In cases of sufficient merit, the degree of Master of Business Administration may be awarded with Distinction or Merit, in accordance with the provisions of the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Business or the Postgraduate Certificate in Business should they meet the relevant Qualification requirements.

Academic Progress

10. The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Business Studies

MBS

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Master of Business Studies requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a relevant Bachelor's degree or equivalent qualification, having achieved a grade average of at least a B- in the highest level courses.

Qualification Requirements

- Candidates for the Master of Business Studies shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits comprising:
 - Part One and Part Two as defined by the Schedule to the Degree
 - completion of a subject.
- Notwithstanding Regulation 2, candidates who have been awarded the Degree of Bachelor of Business Studies with Honours, or the equivalent degree of another recognised university, may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

- Candidates for the Degree of Master of Business Studies may complete a subject by passing at least 180 credits in a subject including:
 - Thesis or Research Report of at least 60 credits;
 - any compulsory courses identified in the Schedule to the Degree. The requirements for each subject are set out in the Schedule for the Qualification.
- Notwithstanding Regulation 4, candidates admitted under Regulation 3 may complete a subject by passing at least 120 credits in a subject including a Thesis or Research Report of at least 60 credits.
- Subjects available in the Master of Business Studies are: Accountancy, Banking, Communication, Economics, Finance, Human Resource Management, Management, and Marketing.

Student Progression

- For progression from Part One to Part Two, candidates must have achieved a Grade Average of B- over 60 credits of the Part One courses, including the compulsory courses.
- In cases of sufficient merit, the Degree of Master of Business Studies may be awarded with Distinction or Merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Business or the Postgraduate Certificate in Business should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Clinical Practice (Nursing)

MCLinPrac

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Clinical Practice (Nursing) requires that the candidate will:
 - meet the University admission requirements as specified;
 - have been awarded or qualified for a Bachelor's degree or an equivalent qualification with a grade average of at least a B over the highest two levels of courses;
 - meet Health Clearance and Police Vetting requirements as specified by the Academic Board or their delegate;
 - meet the requirements for registration as a nurse in New Zealand as set down by the Nursing Council of New Zealand in terms of good character and fitness to be a nurse;
 - have achieved an IELTS of 7 with no band less than 7 within the preceding three months, if English is not the applicant's first language and the language of instruction in previous schooling is not English; and

- be selected into the programme on the basis of a selection process which includes a written application, and may include an interview and practical exercises as determined by the Academic Board or their delegate.

Qualification Requirements

- Candidates for the Degree of Master of Clinical Practice shall follow a parts-based programme of study, which shall consist of courses totalling at least 240 credits, comprising:
 - Part One and Part Two as defined by the Schedule for the Qualification; and including:
 - the compulsory courses listed in the Schedule for the Qualification;
 - attending Contact Workshops, block courses, field trips, workshops, tutorials, laboratories and clinical experiences as required.

Specialisations

- The Degree of Master of Clinical Practice (Nursing) is awarded without specialisation.

Academic Requirements

- Every candidate for the Degree of Master of Clinical Practice (Nursing) shall complete to the satisfaction of Academic Board a minimum of 1100 hours of approved clinical practice and associated reports in accordance with the following courses:
 - 168742 Fundamental Partnerships I
 - 168743 Fundamental Partnerships II
 - 168747 Complex Partnerships I

168748 Complex Partnerships II [Transition to Practice]

Student Progression

- Candidates must maintain their eligibility for registration with the Nursing Council of New Zealand in terms of good character and fitness to be a nurse, throughout the duration of their enrolment in the programme.
- In cases of sufficient merit, the Master of Clinical Practice may be awarded with a class of Honours.

Completion Requirements

- A candidate's course of study shall not exceed five calendar years unless a specified time of suspension or extension is approved by the Academic Board and the Nursing Council of New Zealand. Permission must be sought in advance of any suspension or extension by applying in writing to the Master of Clinical Practice (Nursing) Programme Director. Suspensions or extensions granted will appear on the academic transcript.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Health Science without endorsement should they meet the relevant Qualification requirements.

Academic Progress

- For candidates enrolled in the Degree of Master of Clinical Practice (Nursing), the following will lead to exclusion from the qualification:
 - failure to obtain a pass in any of the Master of Clinical Practice (Nursing) courses for which they have been enrolled on two occasions;
 - failure to pass courses totalling at least 75 academic credits or failure to pass at least 60% of an approved part-time programme of study in any academic year; or

- failure to complete the Degree within five years from the date of first enrolment.

Candidates excluded under (a), (b), or (c) above will only be re-admitted to the Master of Clinical Practice (Nursing) with the approval of the Academic Board.

The Degree of Master of Clinical Psychology MClinPsych

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the degree of Master of Clinical Psychology requires that the candidate will:
 - have met the University admission requirements as specified; and
 - have been awarded or qualified for a Master's degree with First Class or Second Class Division I Honours in Psychology with at least 90 credits of research or the equivalent or a PhD in Psychology; and
 - have been selected following a selection process which will include a written application, selection panel interview, and consideration of prior professional experience (if any), a personal statement of intent and career goals, and letters of recommendation from relevant professionals familiar with the candidate's academic and practical work; and
 - on the basis of 1(c), have satisfied the Academic Board, or their delegate, that they have sufficient personal qualities, ethical standards, and professional potential, and are suitable to undertake a professional programme of study which satisfies the eligibility requirements to practice as a Registered Psychologist in accordance with the Health Practitioners Competence Assurance Act of 2003, or as amended; and
 - have completed the following courses, or their equivalents, obtaining at least a B+ average within the previous three years: 175781 Understanding Mental Distress; 175782 Clinical Psychology Assessment and 175783 Clinical Psychology Interventions.

Qualification Requirements

- Candidates for the degree of Master of Clinical Psychology shall follow a parts-based course of study, which shall consist of courses totalling at least 240 credits, comprising:
 - completion of Part One and Part Two as detailed in the Schedule for the Qualification;
 - attending training activities as required.

Specialisations

- The Master of Clinical Psychology is awarded without a subject.

Academic Requirements

- Candidates must achieve specified performance standards in the academic courses, the clinical practicum courses, the internship, and research case studies.

Student Progression

- For progression from Part One to Part Two, candidates must pass all of the Part One courses.
- The Master of Clinical Psychology is awarded without a class of honours.

Completion Requirements

- The Academic Board or their delegate shall determine the minimum period of enrolment, normally two years (24 months), and conditions of studentship for each candidate.
- A candidate's course of study may not exceed three years (36 months) from date of first enrolment in a course to be credited to the Master of Clinical Psychology unless, under exceptional circumstances, a programme of up to four years (48 months) is approved by the Academic Board or their delegate.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- For candidates enrolled in the Master of Clinical Psychology the following will lead to exclusion from the qualification:
 - failure to complete any Part One course in two successive attempts;
 - failure to complete the Clinical Psychology Internship in two successive attempts.

Schedule for the Master of Clinical Psychology

Part One (120 credits from)

The Degree of Master of Commercial Music

MCommMus

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Commercial Music requires that the candidate will:
 - meet the University admission requirements as specified; and will:
 - have been awarded or qualified for a relevant Bachelor's degree or equivalent qualification with a minimum grade average of at least B; or
 - have been awarded or qualified for the Bachelor of Commercial Music (Honours) with a grade average of at least B across the 700-800 level courses, or equivalent; or
 - have been granted admission under the Admission with Equivalent Status regulations and demonstrate practical, professional and scholarly experience at an appropriate level; and will have:
 - been selected into the programme on the basis of an interview and assessment of a portfolio of relevant work prepared by the candidate.

Qualification Requirements

- Candidates for the Degree of Master of Commercial Music shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 approved credits and include completion of Part One and Part Two. The requirements for Part One and Part Two are prescribed in the Schedule for the Qualification.
- Notwithstanding Regulation 2, the programme of study for candidates who have been admitted under Regulations 1(c) shall consist of thesis courses totalling 120 credits, as prescribed in Part Two in the Schedule for the Qualification.

Specialisations

- The Master of Commercial Music is awarded without specialisation.

Student Progression

- The Degree of Master of Screen Arts may be awarded with Distinction or Merit. The class of award will be determined by the examiners on the performance of the candidate in the Part 2 courses within the schedule.
- For progression to Part Two of the Master of Commercial Music, candidates must have maintained a grade of at least B (GPA 5) over the 60 credits undertaken for Part One.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Qualification requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an appropriate exit qualification, should they meet its qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Communication

MC

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Communication requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a university Bachelor's degree or an equivalent qualification in a field relevant to the study of communication and have achieved a B grade average over the 300-level majoring courses; or
 - have been awarded or qualified for a Bachelor of Communication with Honours or equivalent, or a Postgraduate Diploma in Communication or equivalent, having achieved a B grade average.
- In addition, candidates will be required to have achieved an IELTS of 7 with no band less than 6.5 within the preceding five years if English is not the applicant's first language and the qualifying degree was not completed at a University where English was the medium of instruction.

Qualification Requirements

- Candidates for the Degree of Master of Communication shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - Part One and Part Two as specified by the Schedule to the Qualification;
 - at least 60 credits at 800 level; and including:
 - the core courses listed in Schedule A to the Qualification;
 - a maxima of 30 credits from Schedule C to the Qualification;
 - attending field trips, Contact Workshops, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 3, candidates admitted under Regulation 1(c) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

- The Degree of Master of Communication is awarded without specialisation.

Student Progression

- For progression to Part Two, candidates must have achieved a B grade average over Part One (120 credits) of the qualification. Students not meeting this criterion but who have completed 120 credits in accordance with the Part One regulations may be eligible to exit with a Postgraduate Diploma in Communication.
- In cases of sufficient merit, the Degree of Master of Communication may be awarded with Distinction or Merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Communication should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Construction

MConstr

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Construction requires that the candidate will:
 - meet the University admission requirements as specified; and For entry into the Thesis Pathway:
 - have been awarded or qualified for a construction related four year Bachelor with Honours degree or a Bachelor of Construction (Honours) or equivalent qualification with a minimum grade average of B over the contributing courses for the Honours year; or
 - have been awarded or qualified for a relevant Bachelor's degree followed by a relevant Postgraduate Certificate with a minimum grade average of B+ over the contributing courses for the Postgraduate Certificate, or equivalent.
 For entry into the Coursework Pathway:
 - have been awarded or qualified for the Bachelor of Construction or equivalent qualification with a minimum grade average of B across the highest level courses; or
 - have been awarded or qualified for the Bachelor of Construction or equivalent qualification and have completed at least two years of relevant professional experience; or
 - have been awarded or qualified for a construction related four year Bachelor with Honours degree or a Bachelor of Construction (Honours) or equivalent qualification; or
 - have been awarded or qualified for the Bachelor of Construction followed by the Postgraduate Diploma in Construction or equivalent

qualification with a minimum grade average of B over the contributing courses for the Postgraduate Diploma; or

- have been awarded or qualified for a relevant Bachelor's degree followed by a relevant Postgraduate Certificate with a minimum grade average of B over the contributing courses for the Postgraduate Certificate, or equivalent.

Qualification Requirements

- Candidates for the Degree of Master of Construction shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - courses selected from the Schedule for the Qualification;
 - at least 45 credits from Schedule C;
 and including:
 - attending workshops, block courses, tutorials, or laboratories as required.
- The programme of study for the Master of Construction without a subject must include 218717 for the Coursework Pathway, and both 218717 and 218718 for the Thesis Pathway.
- Notwithstanding Regulation 2, candidates admitted under Regulation 1(b), (c), (f), (g) or (h) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.
- Notwithstanding Regulation 2, the programme of study for candidates admitted under Regulation 1(e) or (f) may consist of 120 credits selected from the Schedule for the Qualification including at least 45 credits from Schedule C.

Specialisations

- The Degree of Master of Construction may be awarded with or without a subject.
- Candidates may complete a subject by passing at least 75 credits in a subject; the requirements for each subject are set out in Schedule A for the Qualification.

8. Subjects available are: Building Technology*, Construction Law, Construction Project Management, Digital Built Environment, Facilities Management*, Quantity Surveying, Sustainable Built Environment.

*No new enrolments

Student Progression

9. For progression from Part One to Part Two of the Master of Construction (Coursework Pathway) candidates must have achieved a minimum B grade average over the first 60 credits in Part One.
10. For progression from Part One to Part Two of the Master of Construction (Thesis Pathway) candidates must have achieved a minimum B+ grade average over the first 60 credits in Part One.
11. In cases of sufficient merit, the Degree of Master of Construction may be awarded with distinction or merit.

Completion Requirements

12. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
13. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Construction or Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

14. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

15. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Master of Construction prior to 1 January 2022 may fulfil the credit requirements of the qualification (and the subject in which they were enrolled, if applicable) and entry requirements prior to this time, and are exempt from taking 218717 and 218718 and from progression requirements. Such candidates may substitute a course or courses already completed for a course or courses at the same level and of the same value in the schedule and may take 218820 in order to fulfil Part Two requirements. This transition expires 31 December 2025.
16. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Construction (Sustainable Built Environment) prior to 1 January 2023 who have successfully completed 218730 may substitute this for 218769 until 31 December 2026.

The Degree of Master of Counselling

MCouns

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Master of Counselling requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for either:
 - the Postgraduate Diploma in Education (Counselling and Guidance); or
 - the Postgraduate Diploma in Rehabilitation (Rehabilitation Counselling); or
 - the Postgraduate Diploma in Counselling and Guidance Studies; or
 - an approved equivalent qualification; and
 - have achieved at least a B grade average across all courses in the qualifying programme of study;
 - have satisfied the Academic Board that they have sufficient background of professional experience to be likely to successfully engage in the programme; and
 - meet the requirements for registration as a counsellor as set down by the New Zealand Association of Counsellors in terms of good character and fitness to be a counsellor.
- Admission to the qualification will be granted or withheld on consideration of the admission requirements specified under Regulation 1, a police vetting report and a selection process that may include a written application, interview, and practical exercises as may be determined by the College Pro Vice-Chancellor or their delegate.

Qualification Requirements

- Candidates for the Master of Counselling shall follow a fixed programme of study, which shall consist of:
 - courses totalling at least 120 credits as specified in the Schedule to the degree.
 - attending workshops, tutorials, and laboratories as required;
 - completion of supervised practice as specified in the requirements for the Professional Development in Counselling I and Professional Development in Counselling II courses.

Specialisations

- There are no specialisations for this degree.

Academic Requirements

- The degree shall be awarded on the basis of the whole examination which shall include the evaluation of the separate courses and of the research project, with the proviso that all components shall be at least of pass standard.
- A candidate may be permitted to revise an unsatisfactory Research Project and to resubmit it for assessment on one occasion.

Student Progression

- The Master of Counselling is not awarded with honours, distinction or merit.
- Candidates must maintain their eligibility for registration with the New Zealand Association of Counsellors in terms of good character and fitness to be a counsellor, throughout the duration of their enrolment in the programme.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Counselling Studies prior to 1 January 2024 who have successfully completed 253761 may substitute this for 253740 and 267721, until 31 December 2026.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Counselling Studies prior to 1 January 2025 may graduate under this name, until 31 December 2027.

The Degree of Master of Creative Enterprise

MCE

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

1. Admission to the Degree of Master of Creative Enterprise requires that the candidate will:
 - (a) meet the University admission requirements as specified; and
 - (b) have been awarded or qualified for a relevant bachelor's degree, with a grade average of at least a B in the highest level courses, or equivalent.
 - (c) have been awarded or qualified for the Bachelor of Design with (Honours) or the Bachelor of Fine Arts (Honours), with a grade average of at least a B in the Part Four courses, or equivalent qualification(s) and grade average; or
 - (d) have been awarded or qualified for a relevant Postgraduate Diploma, with a grade average of at least a B, or equivalent;
 - (e) have been granted admission under the Admission with Equivalent Status regulations and demonstrate practical, professional and scholarly experience at an appropriate level.
2. In all cases candidates must be selected into the programme on the basis of an interview and, for candidates seeking entry under Regulations 1(c) or (d), submission of a satisfactory project proposal.

Qualification Requirements

3. Candidates for the Degree of Master of Creative Enterprise shall follow a parts-based course of study, which shall consist of courses totalling at least 180 credits, comprising:
 - (a) Part One and Part Two as specified in the Schedule for the Qualification;
 - (b) attending contact courses, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
4. Notwithstanding Regulation 3, the programme of study for a candidate admitted under Regulation 1 (c) or (d), shall consist of 120 credits from courses listed in the Master of Creative Enterprise schedule, including 293703, 293731, and completion of all of Part Two as specified.

Specialisations

5. The Degree of Master of Creative Enterprise is awarded without a specialisation.

Student Progression

6. For progression to Part Two, candidates must have achieved at least a B grade average in the first 60 credits completed in Part One (293701, 293702, 293730) and presented a satisfactory project proposal.
7. In cases of sufficient merit, the Degree of Master of Creative Enterprise may be awarded with distinction or merit on the basis of the grade average achieved across 293703, 293731 and the Part Two project, in accordance with the provisions of the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Completion Requirements

8. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
9. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Creative Arts, should they meet the relevant Qualification requirements.

Academic Progress

10. The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Creative Writing

MCW

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Master of Creative Writing requires that the candidate will:
 - meet the University admission requirements as specified; and will have:
 - been awarded or qualified for a Bachelor's degree with at least a B grade average across the 200- and 300-level specialisation courses, or equivalent; or
 - been awarded or qualified for a Bachelor's with Honours degree in Creative Writing, Expressive Arts or English, with at least a B grade average for the qualification, or equivalent; or
 - been awarded or qualified for a Postgraduate Diploma in Arts in Creative Writing, Expressive Arts or English, with at least a B grade average for the qualification, or equivalent;
 and will have:
 - been selected into the programme on the basis of an assessment of the substance and quality of a portfolio of creative writing prepared by the candidate.

Qualification Requirements

- Candidates of the Degree of Master of Creative Writing shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - completion of Part One and Part Two as detailed in the Schedule for the Qualification;
 - attendance of a compulsory workshop either on-line or in person.
- Notwithstanding Regulation 2, candidates admitted under Regulation 1(c) or (d) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

- The Master of Creative Writing is awarded without a specialisation.

Student Progression

- In cases of sufficient merit, the Degree of Master of Creative Writing may be awarded with distinction or merit.
- For progression to Part Two of the Master of Creative Writing candidates must have maintained a grade average of at least a B+ over the 60 credits undertaken for Part One.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate Arts, should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Design

MDes

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Design requires that the candidate will:
 - meet the University admission requirements as specified; and will:
 - have been awarded or qualified for a relevant Bachelor's degree or equivalent qualification with a grade average of at least B; or
 - have been awarded or qualified for the Bachelor of Design (Honours) with a grade average of at least B in Part 4 courses, or equivalent; or
 - have been awarded or qualified for the Postgraduate Diploma in Design with a grade average of at least B, or equivalent; or
 - have been granted admission under the Admission with Equivalent Status regulations and demonstrate practical, professional and scholarly experience at an appropriate level; and will have:
 - been selected into the programme on the basis of an interview and assessment of a portfolio of relevant work prepared by the candidate.

Qualification Requirements

- Candidates for the Degree of Master of Design shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 approved credits and include completion of Part One and Part Two. The requirements for Part One and Part Two are prescribed in the Schedule for the Qualification.
- Notwithstanding Regulation 2, the programme of study for candidates who have been admitted under Regulations 1(c) or 1(d) shall consist of thesis courses totalling 120 credits, as prescribed in Part Two in the Schedule for the Qualification.

Specialisations

- The Master of Design is awarded without specialisation.

Student Progression

- The Degree of Master of Design may be awarded with Distinction or Merit. The class of award will be determined by the examiners on the performance of the candidate in the Part 2 courses within the schedule.
- For progression to Part Two of the Master of Design, candidates must have maintained a grade of at least B (GPA 5) over the 60 credits undertaken for Part One.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Qualification requirements within the prescribed timeframes; candidates who do not

meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an appropriate exit qualification, should they meet its qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Education

MEd

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Education requires that the candidate will:
 - meet the University admission requirements as specified; and shall have
 - been awarded or qualified for the Bachelor of Education with a grade average in the highest level courses of at least a B, or equivalent; or

- (c) been awarded or qualified for any other Bachelor's degree with a grade average in the highest level courses of at least a B, or equivalent, and hold a professional qualification in teaching; or
- (d) been awarded or qualified for any other Bachelor's degree with a grade average in the highest level courses of at least a B, or equivalent, and have professional experience relevant to the intended postgraduate subject; or
- (e) been awarded a Postgraduate Diploma in Education, or equivalent, with a grade average across all courses of at least B (Coursework pathway) or at least B+ (Research pathway).

Qualification Requirements

2. Candidates for the Degree of Master of Education shall follow a parts-based programme of study totalling at least 180 credits from the Master of Education Schedule, comprising:
 - (a) completion of Part One and Part Two as specified in the Schedule for the Degree; and including
 - (b) 15 credits of research methods course(s) as listed in the Schedule for the Degree.
3. Notwithstanding Regulation 2, candidates admitted under Regulation 1(e) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

4. The Degree of Master of Education may be awarded with or without a subject.
5. A candidate may complete a subject by completing at least 120 credits (Coursework pathway) or at least 150 credits (Thesis pathway) in a subject including Part Two. The requirements for each subject are set out in the Schedule for the Degree.
6. Subjects available for the Master of Education are: Digital Education, Early Years, Educational Administration and Leadership, Inclusive Education, Literacy Education, Māori Education, and Mathematics Education.

Student Progression

7. For progression to Part Two in the Master of Education (Coursework pathway), candidates must have achieved a B grade average in the first 120 credits of courses completed in Part One.
8. For progression to Part Two in the Master of Education (Research pathway), candidates must have achieved a B+ grade average in the first 90 credits of courses completed in Part One.
9. In cases of sufficient merit, the Degree of Master of Education may be awarded with Distinction or Merit.

Completion Requirements

10. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
11. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Education or the Postgraduate Diploma in Education should they meet the relevant Qualification requirements.

Academic Progress

12. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

13. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Education prior to 1 January 2024 who have successfully completed at least 90 credits will complete the qualification under the 2023 regulations. Where necessary all candidates enrolled prior to 1 January 2023, regardless of how many credits they have completed, will be permitted course substitutions beyond the stated limits.
14. These transition arrangements expire 31 December 2027.

The Degree of Master of Educational and Developmental Psychology

MEdDevPsych

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the degree of Master of Educational and Developmental Psychology requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor's degree in Education, Psychology, Educational Psychology, Counselling, Social Work, Speech Language Therapy, or a related relevant discipline, having achieved a grade average of at least a B in the highest level courses, or equivalent; and
 - have completed at least 60 credits of Pro Vice-Chancellor or delegate approved psychology courses including at least 45 credits at 200 level or higher; and
 - have completed at least 45 credits of Pro Vice-Chancellor or delegate approved education courses including at least 30 credits at 200 level or higher; and
 - have completed at least one year of full-time or equivalent part-time professional, learning or community learning experience in a relevant field.

Qualification Requirements

- Candidates for the Master of Educational and Developmental Psychology shall follow a flexible programme of study, which shall consist of courses totalling at least 240 credits, comprising:
 - Part One and Part Two as specified in the schedule; and including:
 - any compulsory courses listed in the Schedule to the degree;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.
- Notwithstanding Regulation 2, candidates who have been awarded or qualified for the Postgraduate Diploma in Resource Teacher: Learning and Behaviour (RTL B) or the Postgraduate Diploma Resource Teacher: Literacy (RTLit), with a grade average of at least a B, or equivalent, shall follow a flexible programme of study which shall consist of courses totalling at least 180 credits, comprising courses from the schedule, including:
 - Part Two as specified in the Schedule to the Degree; and including:
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- The Master of Educational and Developmental Psychology is awarded without a subject.

Student Progression

- In cases of sufficient merit, the Master of Educational and Developmental Psychology may be awarded with a class of Honours.
- For progression from Part One to Part Two of the Master of Educational and Developmental Psychology candidates must have maintained a B+ grade average over the Part One courses.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of the Pro Vice-Chancellor or delegate, be awarded the Postgraduate Diploma in Education without an endorsement should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Candidates who have completed the Postgraduate Diploma in Education (Educational Psychology) and satisfy the entry requirements for the Master of Educational and Developmental Psychology may transfer and complete the following 120 credits: 30 credits of 2567xx courses, 256855, and 256847.
- Candidates who have not yet completed the Postgraduate Diploma in Education (Educational Psychology) may apply to transfer to the Master of Educational and Developmental Psychology providing they meet the entry requirements and can satisfy all requirements as specified in the regulations.
- In all cases candidates must complete the requirements within the timeframes for completion as specified in the Transitional Provisions or the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.
- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Educational and Developmental Psychology prior to 1 January 2025 may substitute 267740, if successfully completed, for 267721, until 31 December 2028.

Schedule for the Master of Educational and Developmental Psychology

Part One

Compulsory courses (60 credits from)

256701 Ako: Psychology of Learning and Teaching	15 credits
256702 Ahurei: The Psychology of Unique Differences	15 credits
267721 Research Methodologies in Education	15 credits
267741 Indigenous Research Methodologies	15 credits
R 267790	

Compulsory course selection (60 credits from)

256703 He Taiao Ako: Psychology of Educational Settings	15 credits
256704 Waiora: Psychology of Wellbeing and Ako	15 credits
256705 Whanaungatanga: Psychology of Relationships in Ako	15 credits
256706 Whakapiki: Psychology of Change and Development	15 credits
256707 Mānuka Tākoto - Behaviour Challenges	15 credits

Part Two

256847 Applied Research in Educational Psychology	60 credits
P 267740 and 267741 or equivalent	
256854 Educational and Developmental Psychology Assessment	30 credits

The Degree of Master of Emergency Management

MEmergMgt

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Emergency Management requires that the candidate will:
 - meet the University admission requirements as specified; and have been awarded or qualified for:

- (b) an undergraduate degree with a minimum grade average of B across 200-300-level major courses and have completed at least two years of relevant industry or professional experience, or equivalent; or
- (c) the Postgraduate Diploma in Emergency Management having achieved at least a B grade average, or equivalent.

Qualification Requirements

2. Candidates for the Master of Emergency Management shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits comprising:
 - (a) completion of Part One and Part Two as detailed in the Schedule for the Qualification; and including:
 - (b) any compulsory courses;
 - (c) attending field trips, studios, workshops, tutorials and laboratories as required.
3. Notwithstanding Regulation 2, candidates admitted under Regulation 1(c) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

4. The Master of Emergency Management is awarded without a specialisation.

Student Progression

5. For progression to Part Two in the Master of Emergency Management (Coursework Pathway) candidates must have achieved a B grade average across the first 60 credits of courses completed in Part One.
6. For progression to Part Two in the Master of Emergency Management (Research Pathway) candidates must have achieved a B+ grade average across the first 60 credits of courses completed in Part One.
7. In cases of sufficient merit, the Degree of Master of Emergency Management may be awarded with Distinction or Merit.

Completion Requirements

8. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
9. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed

timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Emergency Management or the Postgraduate Certificate in Emergency Management should they meet the relevant Qualification requirements.

Academic Progress

10. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Master of Emergency Management

Part One: Coursework Pathway (120 credits) or Research Pathway (90 credits)

Compulsory courses (60 credits from)

130705 Emergency Management.....	30 credits
230703 Techniques and Methods in Evaluation Research	30 credits

Elective courses

130701 Natural Hazards.....	30 credits
130702 Coping with Disasters	30 credits
130706 Emergency Management in Practice.....	30 credits
130707 Professional Inquiry in Emergency Management.....	30 credits
P 130705 and 230703	
132751 Natural Hazards and Resilient Communities	30 credits

Part Two: Coursework Pathway (60 credits from)

130800 Advanced Leadership in Emergency Management 1	30 credits
P 230703, 130705	
130802 Advanced Leadership in Emergency Management 2	30 credits
P 130800	

Part Two: Research Pathway (90 credits from)

130881 Thesis 90 Credit Part 1	45 credits

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

1. Admission to the Degree of Master of Engineering requires that the candidate will:
 - (a) meet the University admission requirements as specified; and have
 - (b) been awarded or qualified with the Bachelor of Engineering with Honours or equivalent with a minimum B grade average over the highest level majoring courses; or
 - (c) been awarded or qualified for the Postgraduate Diploma in Engineering or equivalent with a minimum B grade average; or
 - (d) been awarded or qualified with the Bachelor of Engineering with Honours or equivalent and have significant professional experience; or
 - (e) been awarded or qualified for the Postgraduate Diploma in Engineering or equivalent and have significant professional experience.

Qualification Requirements

2. Candidates for the Master of Engineering shall follow a fixed programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - (a) completion of a thesis as defined by the Schedule to the Qualification; and including:
 - (b) attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

3. The Master of Engineering will be awarded with a subject.

4. The subject will follow the name of a major in the Bachelor of Engineering with Honours degree.

Student Progression

5. In cases of sufficient merit, the Master of Engineering may be awarded with distinction or merit.

Completion Requirements

6. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
7. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

8. The general Unsatisfactory Academic Progress regulations will apply.

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Master of Engineering Studies requires that the candidate will:
 - meet the University admission requirements as specified; and shall have been awarded or qualified for a relevant:
 - four-year Bachelor's degree with Honours or equivalent; or
 - three-year Bachelor's degree plus an Honours Degree, or equivalent; or
 - Postgraduate Diploma or equivalent.

Qualification Requirements

- Candidates for the Master of Engineering Studies shall follow a parts-based programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - Part One consisting of 75 credits at 700 level from courses listed in the Schedule to the Degree;
 - Part Two consisting of 45 credits at 800 level as specified in the Schedule to the Degree; and including:
 - any compulsory courses listed in the Schedule for the Degree;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The degree of Master of Engineering Studies may be awarded with or without a subject.
- Candidates may complete a subject by passing at least 45 credits in a subject as specified in the Master of Engineering Studies schedule.
- The subjects available for the Master of Engineering Studies are: Electronics and Computer Engineering; Energy Management; Engineering and Innovation Management; Life Cycle Management; Mechatronics; Packaging Technology; Renewable Energy Systems.

Student Progression

- The candidate must complete within one year of first enrolling in full-time study or within three years of first enrolling in part-time study to be eligible for Distinction or Merit.
- For progression to Part Two, candidates must have passed the courses in the first 60 credits of study completed in Part One, and achieved at least a B- grade in 228797.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology or the Postgraduate Diploma in Engineering should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates who were enrolled in the Electronics and Computer Engineering subject prior to 1 January 2023 may substitute 281785 for 281780 and 281756 and/or 281786 for 281755 and/or 281776 until 31 December 2025.

The Degree of Master of Environmental Management

MEnvMgmt

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Environmental Management requires that the candidate will:
 - meet the University admission requirements as specified; and shall have been awarded or qualified for a:
 - Relevant Bachelor's degree or an equivalent qualification, having achieved a B grade average or higher, over the qualifying 300-level courses; or
 - Postgraduate Diploma in Environmental Management with a grade average of B or higher (Applied Pathway) or B+ or higher (Research Pathway), or equivalent; or
 - Bachelor of Environmental Management (Honours), having achieved Second Class Honours Division II or higher (Applied Pathway) or Second Class Honours Division I or higher (Research Pathway), or an equivalent qualification.

Qualification Requirements

- Candidates for the Degree of Master of Environmental Management shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - completion of Part One and Part Two as defined by the Schedule to the Degree;
 - courses selected from the Schedule to the Degree; and including:
 - any compulsory courses listed in the Schedule to the Degree;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 2, candidates admitted under Regulation 1(c) or (d) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.
- Notwithstanding Regulation 2, a candidate admitted to the Master of Environmental Management Research Pathway under Regulation 1(c) or (d) may be permitted to complete a programme comprising the 120 credit thesis course 188889 or 188897 and 188898 and 60 credits from Part One, which must include 188764 and 188765.
- Notwithstanding Regulations 2 and 3, and at the discretion of Academic Board, candidates may be required to complete one or more bridging courses, 188707 and/or 188708, should their entry qualification be deficient in important aspects of environmental science.

Specialisations

- The Degree of Master of Environmental Management is awarded without specialisations.

Student Progression

- For progression from Part One to Part Two (Research Pathway), candidates must have achieved a Grade Average of B+ or higher over the first 60 credits undertaken for Part One.
- For Progression from Part One to Part Two (Applied Pathway), candidates must have achieved a Grade Average of B or higher over the first 120 credits undertaken for Part One.
- In cases of sufficient merit, the Degree of Master of Environmental Management may be awarded with Distinction or Merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Environmental Management should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Master of Environmental Management prior to 1 January 2022 may substitute a course or courses already passed for a course or courses in Part One of the Schedule until 31 December 2025.

The Degree of Master of Finance

MFin

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Master of Finance requires that the candidate will:
 - meet the University admission requirements as specified;
 - have been awarded or qualified for a relevant Bachelor's degree or equivalent qualification, having achieved a grade average of at least a C+ in the highest level courses.

Qualification Requirements

- Candidates for the Master of Finance shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits comprising:
 - completion of Part One and Part Two as defined by the Schedule to the Degree;
 - courses selected from the Schedule to the Degree;
 - completion of a subject and including:
 - any compulsory courses listed in the Schedule to the Degree.
- Notwithstanding Regulation 2, candidates admitted who have been awarded or qualified for the Degree of Bachelor of Business Studies with Honours, or the equivalent degree of another recognised university, may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.
- Candidates who have completed 125330 (Advanced Business Finance) or an equivalent course as part of their undergraduate degree will be exempt from the course 125700 but will be required to take the course 125785 in their first semester of the programme.

Specialisations

- The Degree of Master of Finance is awarded with a specialisation.
- The requirements for each subject are set out in the Schedule for the Qualification
- Subjects available are: Financial Analytics and Research, and Risk Analytics

Student Progression

- For progression from Part One to Part Two for the Risk Analytics subject, candidates must have achieved a minimum C+ grade average in the first 60 credits of study in Part One.
- For progression from Part One to Part Two for the Financial Analytics and Research subject, candidates must achieve a minimum B grade average in the first 60 credits of study, including a B for the course 125785.
- Notwithstanding Regulation 9, candidates who were enrolled in the Master of Finance prior to 1 January 2021 and who are enrolled in Financial Analytics and Research (formerly the Research Pathway) may meet the progression criteria outlined in Regulation 15.
- In cases of sufficient merit, the Degree of Master of Finance may be awarded with Distinction or Merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Business or the Postgraduate Certificate in Business should they meet the relevant qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in Risk Analytics and Financial Analytics and Research who have successfully completed 125781 may substitute this for 125710 and (125718 or 178742).
- This transition arrangement expires 31 December 2028.

The Degree of Master of Fine Arts**MFA****Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Fine Arts requires that the candidate will:
 - have been awarded or qualified for the Bachelor of Fine Arts (Honours) or equivalent with a grade average of at least B in part 4 courses, or equivalent; or
 - have been awarded or qualified for the Postgraduate Diploma in Fine Arts or equivalent with a grade average of at least B; or
 - have been awarded or qualified for a relevant Bachelor's degree or equivalent qualification with a grade average of at least B; or
 - have been granted admission under the Admission with Equivalent Status regulations and demonstrate practical, professional, and scholarly experience at an appropriate level; and
 - be selected into the programme through an interview and the assessment of a portfolio of relevant work prepared by the applicant.

Qualification Requirements

- Candidates for the Master of Fine Arts shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 approved credits, and include completion of Part One and Part Two. The requirements for Part One and Part Two are prescribed in the Schedule to the Degree.
- Notwithstanding Regulation 2, the programme of study for candidates who has been admitted under Regulations 1(a) or 1(b) shall consist of thesis courses totalling 120 credits, as prescribed in Part Two in the Schedule for the Qualification.

Specialisations

- The Master of Fine Arts is awarded without specialisation.

Student Progression

- The Degree of Master of Fine Arts may be awarded with Distinction or Merit. The class of award will be determined by the examiners on the performance of the candidate in the Part 2 courses within the schedule.

- For progression to Part Two of the Master of Fine Arts, candidates must have maintained a grade of at least B (GPA 5) over the 60 credits undertaken for Part One.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Diplomas, and Certificates will apply.
- Candidates may be graduated when they meet the Qualification requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an appropriate exit qualification, should they meet its qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Fine Arts prior to 1 January 2025 will complete the Master of Fine Arts under the 2024 regulations.
- This transition expires 31 December 2027.

The Degree of Master of Food Safety and Quality**MFoodSafQual****Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Food Safety and Quality requires that the candidate will:
 - meet the University admission requirements as specified; and

- have been awarded or qualified for a Bachelors with Honours degree in food engineering, food science or food technology, or equivalent; or
- have been awarded a Bachelor's degree in engineering, science, technology, or equivalent and completed at least 36 months relevant professional experience in the food or biological products industry.

Qualification Requirements

- Candidates for the Degree of Master of Food Safety and Quality shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - completion of Part One and Part Two as defined by the Schedule of the Degree;
 - courses selected from the Schedule of the Degree; and including:

- (c) any compulsory courses listed in Part One of the Schedule for the Qualification;
- (d) attending field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

3. The Degree of Master of Food Safety and Quality is awarded without specialisation.

Student Progression

4. For progression to Part Two of the Degree of Master of Food Safety and Quality, candidates must have maintained a minimum of a B Grade Average over the Part One courses.
5. In cases of sufficient merit, the Degree of Master of Food Safety and Quality may be awarded with Distinction or Merit.

Completion Requirements

6. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
7. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

8. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

9. Subject to any Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I qualification regulations, candidates enrolled in the Master of Food Safety and Quality prior to January 2023 may be permitted to substitute a course or courses already successfully completed for a course or courses of the same value in order to fulfil the qualification requirements, until 31 December 2026.

The Degree of Master of Food Technology MFoodTech

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

1. Admission to the Degree of Master of Food Technology requires that the candidate will:
 - (a) meet the University admission requirements as specified;
 - (b) have been awarded or qualified for a Bachelor's degree in food engineering, food science or food technology having achieved a B grade average over the 200- and 300-level courses, or equivalent; or
 - (c) have been awarded or qualified for the Bachelor of Food Technology with Honours having achieved at least Second Class Honours, or equivalent.

Qualification Requirements

2. Candidates for the Degree of Master of Food Technology shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - (a) completion of Part One as defined by the Schedule of the Degree;
 - (b) completion of Part Two;
 - (c) courses selected from the Schedule to the Degree;
 - and including:
 - (d) any compulsory courses listed in Part One of the Schedule for the Qualification;
 - (e) attending field trips, studios, workshops, tutorials, and laboratories as required.
3. Notwithstanding Regulation 2, the programme of study for candidates admitted under Regulation 1(c) will consist of courses totalling 120 credits, comprising:
 - (a) Part Two as detailed in the Schedule for the Qualification; and including:
 - (b) attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

4. The Degree of Master of Food Technology is awarded without specialisation.

Student Progression

5. For progression to Part Two of the Degree of Master of Food Technology, candidates must have maintained a B Grade Average over the Part One courses.
6. In cases of sufficient merit, the Degree of Master of Food Technology may be awarded with Distinction or Merit.

Completion Requirements

7. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
8. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

9. The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Health Science

MHlthSc

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Health Science requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a relevant health related Bachelor's degree or equivalent with a minimum B- grade average over the 200 and 300 level courses; or
 - have been awarded or qualified for a relevant health related Bachelor's degree or equivalent and have extensive relevant professional experience; or
 - have been awarded or qualified for a Postgraduate Diploma in a relevant health related discipline; or
 - have been awarded or qualified for the Degree of Bachelor of Health Science with Honours.
- Notwithstanding Regulation 1, candidates for the Nursing subject will be a registered nurse with a current Annual Practising Certificate from the Nursing Council of New Zealand.
- Notwithstanding Regulation 1, candidates for the Medical Laboratory Research subject will hold a current Annual Practising Certificate (APC) for employment in the Scope of Practice of "Medical Laboratory Scientist" and have been practicing as a Medical Laboratory Scientist in an ISO15189 accredited NZ Diagnostic Medical Laboratory for at least one year.
- Notwithstanding regulation 1(b), (c), (d) and (e) in order to be admitted to the Psychology subject, candidates must have been awarded or qualified for:
 - a relevant health related Bachelor's degree with a major in Psychology having achieved at least a B grade average in the 300-level courses, or equivalent; or
 - a Bachelor's degree with a major in Psychology and have extensive relevant professional experience; or
 - a Postgraduate Diploma with an endorsement in Psychology or the Bachelor of Health Science with Honours in Psychology, having achieved at least a B+ grade average, or equivalent.
- Notwithstanding Regulation 1, in order to be admitted to the 'without specialisation', candidates must have approval from the Master of Health Science Programme Leader.

Qualification Requirements

- Candidates for the Degree of Master of Health Science shall follow a parts-based programme of study, which shall consist of 700- and 800-level courses totalling at least 180 credits, comprising:
 - Part One and Part Two as specified in the Schedule for the Qualification; and including
 - any compulsory courses listed in the Schedule for the Qualification; and
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 5, candidates admitted under Regulation 1(d), (e) or 4 (c) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

- The Degree of Master of Health Science may be awarded with or without a subject.
- The requirements for each subject are set out in the Schedule for the Degree.

- Subjects available are: Bioscience*, Māori Health, Medical Laboratory Research*, Nursing, Occupational Health and Safety, Psychology, and Sport and Exercise.

Student Progression

- For Professional pathway route, progression from Part One to Part Two, candidates must have achieved a minimum B- grade in the Part One Core course 168713.
- For Research pathway route progression from Part One to Part Two, candidates must have achieved a minimum B grade in the Part One Core course, one of 168711, 179702, 150714, 175738.
- Notwithstanding Regulation 10, for progression from Part One to Part Two of the Master of Health Science (Psychology – Professional pathway), candidates must have achieved a minimum B grade average over the Part One courses.
- Notwithstanding Regulation 11, for progression from Part One to Part Two of the Master of Health Science (Psychology – Thesis pathway), candidates must have achieved a minimum B+ grade average over the Part One courses.
- In cases of sufficient merit, the Degree of Master of Health Science will be awarded with distinction or merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of the Academic Board, be awarded the Postgraduate Diploma in Health Science or the Postgraduate Diploma in Nursing should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Māori Health subject prior to 1 January 2022, who are undertaking study in conjunction with the Professional Pathway may continue in the Professional Pathway by completing 168713 and 250816. For those students who have successfully completed 250817, this may be counted instead of 250816. These transitional arrangements expire 31 December 2025.
- Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree candidates enrolled in the Nursing subject prior to 1 January 2022 who have successfully completed 168890 may substitute this for 250816. These transitional arrangements expire 31 December 2025.
- Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree candidates enrolled in the Occupational Health and Safety subject prior to 1 January 2022 who are undertaking study in conjunction with the Professional Pathway and who have successfully completed 250817 may count this towards Professional Pathway requirements. These transitional arrangements expire 31 December 2025.
- Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree candidates enrolled in the Sport and Exercise subject prior to 1 January 2022 who have successfully completed either 234860 or 234870 may substitute either of these for 250816. These transitional arrangements expire 31 December 2025. Candidates who have successfully completed 234897 and 234898 may count these towards the requirements of Part Two. Candidates who are part way through 234898 may complete this and count both 234897 and 234898 towards the requirements of Part Two. These transitional arrangements expire 31 December 2025.

23. Subject to any Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree candidates enrolled in the Psychology subject prior to 1 January 2023 may satisfy the entry requirements as specified in regulation 4 (c) and the progression requirements as specified in regulation 10 (for professional pathway Psychology students) or regulation 11 (for Research/Thesis pathway Psychology students). These transition arrangements expire 31 December 2026.
24. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Occupational Health and Safety subject prior to 1 January 2023 who have successfully completed 251773 may substitute this for 252702. Candidates who are undertaking study in conjunction with the Professional Pathway may continue in the Professional Pathway by completing 168713, and 250816 or 250817. These transitional arrangements expire 31 December 2026.
25. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bioscience subject prior to 1 January 2023 who have successfully completed 231730 and 231731 may substitute this for 231727; and candidates who have successfully completed 151716 may substitute this for 151704. These transitional arrangements expire 31 December 2026.
26. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the **Medical Laboratory Research** subject prior to 1 January 2024 who have successfully completed at least 90 credits towards the subject requirements, will be able to complete the qualification under previous regulations, or will be transferred to without specialisation, or exited with a Postgraduate Diploma in Health Sciences without specialisation, by 31 December 2025.
27. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the **Bioscience** subject prior to 1 January 2025 who have successfully completed at least 30 credits towards the subject requirements, will be able to complete the qualification under the 2024 Calendar regulations, or will be transferred to without specialisation, or exited with a Postgraduate Diploma in Health Sciences without specialisation, by 31 December 2026.
28. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the **Sport and Exercise** subject prior to 1 January 2025 who have successfully completed at least 30 credits towards the subject requirements, will be able to complete under the 2024 Calendar regulations.
- Candidates who have successfully completed 234724 (15 credits) and at least 15 credits of subject courses, may substitute this for 234728.
 - Candidates who are undertaking study in conjunction with the Research Pathway and who have successfully completed 250817 may count this towards the Research Pathway requirements.
 - Candidates who are undertaking study in conjunction with the Professional Pathway may continue in the Professional Pathway by completing 250816 and may substitute a course or courses already completed towards the subject for a course or courses at the same level and credit value within the Schedule for the Master of Health Science degree.

These transitional arrangements expire 31 December 2026.

MHSM

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Master of Health Service Management requires that the candidate will:
 - meet the University admission requirements as specified; and will have

- been awarded or qualified for a relevant Bachelor's degree, having achieved a grade average of at least a B- in the highest level courses, or equivalent; or
- been awarded or qualified for a Postgraduate Diploma in Health Service Management with a B- grade average, or equivalent.

Qualification Requirements

- Candidates for the Master of Health Service Management shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits comprising:
 - Part One and Part Two as defined by the Schedule to the Degree;
 - at least 60 credits at 800 level; and including:
 - any compulsory courses listed in the Schedule to the degree;

- (d) attending field trips, contact workshops, studios, workshops, tutorials, and laboratories as required.
3. Notwithstanding Regulation 2, candidates admitted under Regulation 1(c) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.
4. Candidates who wish to meet the requirements for accreditation by the Royal Australasian College of Medical Administrators (RACMA) must complete all of the following courses in Part One of the programme: 152742, 157701, 178718, 152743.

Specialisations

5. The Master of Health Service Management is awarded without a specialisation.

Student Progression

6. For progression from Part One to Part Two, candidates must have achieved a grade average of at least a B- over the Part One courses.
7. In cases of sufficient merit, the Degree of Master of Health Service Management may be awarded with Distinction or Merit.

Completion Requirements

8. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
9. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Health Service Management should they meet the Qualification requirements.

Academic Progress

10. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Master of Health Service Management

Part One (120 credits from)

Compulsory courses (60 credits from)

152742 Health Systems Management.....	30 credits
R 250742	
157701 Health Information Management.....	30 credits
R 157711, 157733, 158759	

Subject courses (60 credits from)

The Degree of Master of Information Sciences MInfSc

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

1. Admission to the Degree of Master of Information Sciences requires that the candidate will:
- meet the University admission requirements as specified; and will either
 - have been awarded or qualified for the Bachelor of Information Sciences or an equivalent qualification, having achieved a B- grade average or higher over the qualifying 300-level majoring courses; or
 - have been awarded or qualified for a Bachelor's degree or an equivalent qualification, having achieved a B- grade average or higher over the 300-level majoring courses, and have at least two years' relevant professional experience demonstrated via a portfolio, and an interview at the discretion of the University; or
 - have been awarded or qualified for the Bachelor of Information Sciences with Honours or the Postgraduate Diploma in Information Sciences, or the equivalent qualifications, having achieved a B- grade average or higher over the qualifying 700-level courses.

Qualification Requirements

2. Candidates for the Degree of Master of Information Sciences shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
- Part One and Part Two as defined by the Schedule to the degree; and including:
 - at least 60 credits from Part Two;
 - any compulsory courses listed in the Schedule for the Qualification;
 - attending workshops, block courses, tutorials or laboratories as required.

Specialisations

3. The Degree of Master of Information Sciences is awarded without a subject.
4. Notwithstanding Regulation 3, the following subjects and joint subjects are available in accordance with transitional provisions outlined in

Regulation 11: Computer Science; Information Technology; and Software Engineering.

Student Progression

5. In cases of sufficient merit, the Degree of Master of Information Sciences may be awarded with Distinction or Merit.
6. For progression to Part Two, candidates must have maintained a B- grade average or higher in the Part One courses.

Completion Requirements

7. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
8. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Information Sciences should they meet the relevant Qualification requirements.

Academic Progress

9. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Master of Information Sciences

The Degree of Master of International Development**MIntDev****Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Master of International Development requires that the candidate will:
 - meet the University admission requirements as specified; and shall have

- (b) been awarded or qualified for a Bachelor of Arts with a major in Development Studies, with a B grade average or above across the 200 and 300 level specialisation courses; or
- (c) have been awarded or qualified for any Bachelor's degree, with a B grade average or above across the relevant 200 and 300 level courses, and have relevant field or industry experience of an appropriate kind and duration; or
- (d) been awarded or qualified for a Postgraduate Diploma in International Development, or equivalent, with a B grade average or above.

Qualification Requirements

2. Candidates for the Master of International Development shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits comprising:
 - (a) completion of Part One and Part Two as detailed in the Schedule for the Qualification; and including
 - (b) any compulsory courses.
3. Notwithstanding Regulation 2 (b) candidates may, with the permission of the Academic Board or their delegate, be exempt from the requirement to complete the 131707 Development Research Design if they have already completed a relevant research methods course at the same level, or have extensive research experience. Such candidates must complete an approved alternative 700-level course.
4. Notwithstanding Regulation 2, candidates admitted under Regulation 1 (d) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations

Specialisations

5. The Master of International Development is awarded without a specialisation.

Student Progression

6. For progression to Part Two in the Master of International Development (Coursework pathway) candidates must have achieved a B grade average across the first 120 credits of courses completed in Part One.
7. For progression to Part Two in the Master of International Development (Research Pathway), candidates must have achieved a B+ grade average across the first 120 credits of courses completed in Part One.
8. In cases of sufficient merit, the Degree of Master of International Development may be awarded with Distinction or Merit.

Completion Requirements

9. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
10. Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in International Development or the Postgraduate Diploma in International Development should they meet the relevant qualification requirements.

Academic Progress

11. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Master of International Development

The Degree of Master of International Security

MIntISy

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

1. Admission to the Master of International Security requires that the candidate shall meet the University admission requirements as specified, and shall have:
 - (a) completed a relevant Bachelor's degree with a grade average of at least B-; or
 - (b) been awarded or qualified for the Postgraduate Certificate in International Security, or an equivalent qualification, with at least a B- grade average; or
 - (c) been awarded or qualified for the Postgraduate Diploma in International Security, or an equivalent qualification, with at least a B- grade average; or
 - (d) demonstrated scholarly work in conjunction with extensive relevant professional experience and standing in leadership, managerial and planning positions in government or non-government security agencies appropriate for Admission with Equivalent Status.

Qualification Requirements

2. Candidates for the Master of International Security shall follow a parts-based course of study, which shall consist of courses totalling at least 180 credits from the Schedule to the Degree, comprising:
 - (a) Parts One and Two as specified in the Schedule to the Degree; and including:
 - (b) any compulsory core courses listed in Schedule to the Degree;

- (c) attending, as required, contact courses, block courses, field trips, studios, workshops, tutorials, and laboratories.

3. Notwithstanding Regulation 2, candidates admitted under Regulation 1 (b) or (c) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

4. The Degree of Master of International Security may be awarded with or without a subject.
5. Candidates may complete a subject by passing at least 120 credits in a subject including a research project of 60 credits in that subject. The requirements for each subject are set out in Part II of the Schedule for the Degree.
6. Subjects available in the Master of International Security are: Defence, Border and Biosecurity, Intelligence, Counter-Terrorism.

Student Progression

7. For progression to Part Two in the Master of International Security candidates must have achieved a grade average of B- in the first 90 credits of courses completed in Part One.
8. In cases of sufficient merit, the Degree of Master of International Security may be awarded with Distinction or Merit.

Completion Requirements

9. The timeframes for completion are as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.
10. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in International Security or the Postgraduate Diploma in International Security should they meet the relevant Qualification requirements.

Academic Progress

11. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

12. Subject to the Maximum Time to Completion and Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Terrorism subject prior to 01 January 2021 may elect to be awarded this specialisation title rather than the title 'Counter-Terrorism' on completion of the subject. These transition arrangements expire 31 December 2025.

13. Subject to the Maximum Time to Completion and Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Defence Studies subject prior to 01 January 2021 may elect to be awarded this specialisation title rather than the title 'Defence' on completion of the subject. These transition arrangements expire 31 December 2025.

14. Subject to the Maximum Time to Completion and Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Border and Biosecurity subject prior to 01 January 2022 may substitute 294770 (if already completed) for 294716. These transition arrangements expire 31 December 2026.

The Degree of Master of Management

MMgt

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Master of Management requires that the candidate will:
 - meet the University admission requirements as specified; and will have
 - been awarded or qualified for a relevant Bachelor's degree or equivalent qualification, having achieved a grade average of at least a B- in the highest level courses; or
 - been awarded or qualified for a Postgraduate Diploma in Business with a B- grade average, or equivalent.
- Admission to the Master of Management Journalism subject requires that the candidate will have:
 - met the requirements specified in Regulation 1; and
 - achieved an academic IELTS of at least 7.0 in all bands, or an equivalent TOEFL score, or other evidence that is acceptable to Academic Board or its delegate, if English is not the applicant's first language.

Qualification Requirements

- Candidates for the Master of Management shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits comprising:
 - Part One and Part Two as defined by the Schedule to the Degree;
 - at least 60 credits at 800 level; and including:
 - except as provided under Regulations 4, 5 and 7, the core course(s) as listed in Schedule A, including 295700 if completing the Journalism subject;
 - completion of a subject as specified in Schedule B;
 - attending field trips, contact workshops, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 3, candidates admitted under Regulation 1 (c) may apply for credit towards Part One of the qualification, in a single subject. Such credit may be awarded in accordance with the limits specified in the Recognition of Prior Learning regulations. For such candidates who are awarded credit the degree will be awarded without a subject.

- Notwithstanding Regulation 3 (c), candidates who have completed at least 60 credits of postgraduate study with a minimum Grade Average of C+ will be exempt from the requirement to complete the core courses in Schedule A. Such candidates must complete approved alternative courses totalling 30 credits comprising an additional subject course(s) for their subject or an alternative course from Schedule B, or equivalent.

Specialisations

- Candidates for the Degree of Master of Management may complete a subject by passing at least 150 credits in a subject including:
 - a Professional Practice course of 60 credits;
 - any compulsory courses identified in the Schedule to the Degree, or an approved alternative 700-level course.
 The requirements for each subject are set out in the Schedule for the Qualification.
- Notwithstanding Regulations 3(c) and 6, the course of study for candidates completing the Accountancy or Enterprise Development subject will consist of 180 credits in a subject including:
 - a Professional Practice course of 60 credits;
 - any compulsory courses identified in the Schedule for the subject.
 The requirements for each subject are set out in the Schedule for the Qualification.
- Subjects available in the Master of Management are: Agribusiness, Communication, Financial Economics, Human Resource Management, International Business, Journalism, Management, Marketing, Organisational Technology Management, Sustainability.

Student Progression

- Candidates must complete the qualification core courses and any compulsory courses for the relevant subject prior to enrolling in the Part One subject courses.
- For progression from Part One to Part Two, candidates must have achieved a Grade Average of B- over the Part One courses.
- In cases of sufficient merit, the Degree of Master of Management may be awarded with Distinction or Merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Business or the Postgraduate Diploma in

Health Service Management or the Postgraduate Certificate in Business should they meet the relevant Qualification requirements.

Academic Progress

14. The general Unsatisfactory Academic Progress regulations will apply.

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Master of Māori Visual Arts requires that the candidate will meet the University admission requirements as specified; and will
 - have been awarded or qualified for a Bachelor of Māori Visual Arts degree, or equivalent; or will
 - have been awarded or qualified for a Bachelor's degree, or equivalent, and provide evidence of professional experience of an appropriate kind and duration in an area relevant to the qualification; or
 - have been granted admission under the Admission with Equivalent Status regulations and demonstrate practical, professional, and scholarly experience at an appropriate level; and
 - have been awarded or qualified for the Postgraduate Diploma in Māori Visual Arts having achieved at least a B grade average.
- In considering applications for admission to the Degree of Master of Māori Visual Arts, the University shall pay due regard to indigenous systems for the acquisition of knowledge and shall apply a fair, large and liberal interpretation to the concepts of "scholarly experience" and "academic work".

Qualification Requirements

- Candidates for the Degree of Master of Māori Visual Arts shall follow a parts-based course of study, which shall consist of courses totalling at least 240 credits, comprising:
 - completion of Part One and Part Two as specified in the Schedule to the degree; and including
 - attending contact courses, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 3, the course of study for candidates entering the degree under Regulation 1(d) shall consist of courses from the schedule to the degree totalling at least 120 credits, including:
 - completion of Part Two as specified in the Schedule to the degree; and including
 - attending contact courses, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Master of Māori Visual Arts is awarded without a subject.

Student Progression

- For progression from Part One to Part Two, candidates must have achieved a grade average of at least a B over the first 120 credits completed in Part One.
- In cases of sufficient merit, the Master of Māori Visual Arts may be awarded with Merit, Distinction or Honours in accordance with the General Regulations for Postgraduate Qualification Degrees, Postgraduate Diplomas and Postgraduate Certificates.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Qualification Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.

- Candidates may be graduated when they meet the Admission, Qualification and Academic Requirements within the prescribed time frames; candidates who do not meet the requirements for graduation, may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Māori Visual Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Nursing

MN

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the degree of Master of Nursing requires that the candidate will meet the University admission requirements as specified and will have been awarded or have qualified for a:
 - Bachelor's degree with a minimum grade average of B over the 300-level courses, or equivalent;
 - or
 - Postgraduate Certificate in Nursing, with a minimum B grade average over all courses, or equivalent;
 - or

- (c) Postgraduate Diploma in Nursing, with a minimum B grade average over all courses, or equivalent.
2. In all cases the candidate shall:
- be a registered nurse with a practising certificate from the Nursing Council of New Zealand, or equivalent; and
 - have completed at least two years of professional experience in a relevant nursing speciality within the previous five years.

Qualification Requirements

3. Candidates for the Degree of Master of Nursing shall follow a parts-based programme of study, which shall consist of 700- and 800-level courses totalling at least 240 credits from the Schedule to the Degree, comprising:
- Parts One and Two as specified in the Schedule to the Degree; and including:
 - any compulsory courses listed in Schedule to the Degree;
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
4. Candidates who, in the opinion of the Academic Board or its delegate, have passed with sufficient merit courses as part of a completed Postgraduate Certificate or Postgraduate Diploma in Nursing, or equivalent, may be permitted to cross-credit courses not exceeding a total of 60 or 120 credits respectively. The programme of study for candidates credited 60 credits shall not exceed four calendar years and for candidates credited 120 credits shall not exceed three calendar years.

Specialisations

5. The Master of Nursing is awarded without a subject.

Student Progression

6. For progression from Part One to Part Two, candidates must have achieved a B grade average over the courses completed in Part One.
7. In cases of sufficient merit, the Degree of Master of Nursing may be awarded with a class of Honours.

Completion Requirements

8. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
9. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Nursing or the Postgraduate Certificate in Nursing should they meet the relevant Qualification requirements.

Academic Progress

10. The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Philosophy

MPhil

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

1. Candidates for the degree of Master of Philosophy shall, before enrolment, have:
- been admitted or qualified for admission in the College in which it is proposed to enrol to either a Bachelor's Degree or to an Honours Degree; or
 - been granted admission with equivalent status as entitled to pursue a programme of study for the degree in a College other than that in which they qualified for admission either to a Bachelor's Degree or to an Honours Degree; or
 - such other qualifications as the Academic Board may accept.

Qualification Requirements

2. Except as provided in Regulations 1, 3 and 4, candidates shall comply with the Course Regulations for a Master's Degree in the College in which they pursue the programme of study.
3. Candidates who have been enrolled on the basis of a Bachelor's Degree for which the required programme of study was of three years' duration shall be required to take the examinations in an approved set of advanced level courses in the proposed field of study equivalent in amount to one year of full-time study.
4. In special circumstances, and subject to Regulation 3, the Academic Board may at its discretion modify for candidates the requirements of the Course Regulations for a Master's Degree in the College in which they pursue their programme of study. Modifications that may be permitted under this Regulation are substitution, wholly or in part, of a thesis for required course work, and substitution of other requirements for a thesis.

Completion Requirements

5. The degree shall be awarded on the combined result of the courses (where applicable) and a pass in the thesis (where applicable). In Colleges where the College Masterate is awarded with classes of honours, the Master of Philosophy degree may be awarded with distinction for a result of the same standard as that required for first class honours in the College Masterate.

The Degree of Master of Professional Accountancy MPAcc

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Master of Professional Accountancy requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have completed a Bachelor's degree achieving minimum B grade average in the highest two levels of the majoring subject, or equivalent.

Qualification Requirements

- Candidates for the Master of Professional Accountancy shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising Part One and Part Two including all of the courses specified in the Schedule to the Qualification.

Specialisations

- The Degree of Master of Professional Accountancy is awarded without specialisation.

Student Progression

- In order to progress from Part One to Part Two, candidates must have achieved a minimum grade average of B- over the courses taken in Part One.
- In case of sufficient merit, the Master of Professional Accountancy may be awarded with distinction or merit.

Completion Requirements

- Any timeframes for completion as outlined in General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.

- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Business or the Postgraduate Certificate in Business should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Professional Accountancy (Chartered Accountant) MPAcc(CA)

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Master of Professional Accountancy (Chartered Accountant) requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have completed an Undergraduate degree achieving at least a B grade average in the highest two levels of the majoring subject.

Qualification Requirements

- Candidates for the Master of Professional Accountancy (Chartered Accountant) shall follow a flexible programme of study, which shall consist of courses totalling at least 240 credits, including all of the courses specified in the Schedule to the Qualification.
- If a candidate has already passed a course with substantially the same prescription and at the same level as one or more of those offered in the Master of Professional Accountancy (Chartered Accountant) then the candidate may be permitted to complete another approved course or courses that they have not already passed.

Specialisations

- There are no specialisations for this qualification.

Academic Requirements

- There are no additional academic requirements for this qualification.

Student Progression

- The Master of Professional Accountancy (Chartered Accountant) may be awarded with or without Honours.

Completion Requirements

- The timeframes for completion as outlined in General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Business or to the Postgraduate Certificate in Business should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Professional Accountancy and Finance prior to 1 January 2024, may graduate under this name and will complete under the 2023 regulations. This transition arrangement expires 31 December 2025.

The Degree of Master of Public Health

MPH

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

1. Admission to the Master of Public Health requires that the candidate will:
 - (a) meet the University admission requirements as specified; and
 - (b) have been awarded or qualified for a Bachelor's degree in the health sciences with a minimum grade average of B-, or equivalent; or
 - (c) have been awarded or qualified for a Bachelor's degree in the health sciences or other relevant discipline, and have relevant professional experience, or equivalent; or
 - (d) have been awarded or qualified for a Postgraduate Diploma in Public Health with a minimum Grade Average of B-, or equivalent.

Qualification Requirements

2. Candidates for the Master of Public Health shall follow a parts-based programme of study, which shall consist of 700 and 800 level courses totalling at least 240 credits, comprising:
 - (a) Parts One and Two as specified in the Schedule for the Qualification; and including:
 - (b) any compulsory courses listed in the Schedule for the Qualification; and
 - (c) attendance at contact workshops, block courses, field trips, studios, workshops, tutorials, laboratories and practical work as required.
3. Notwithstanding Regulation 2, the programme of study for a candidate admitted under Regulation 1(c) will consist of at least 180 credits, including:
 - (a) Parts One and Two as specified in the Schedule for the Qualification; and including:
 - (b) any compulsory courses not already completed or waived listed in the Schedule for the Qualification; and
 - (c) attendance at contact workshops, block courses, field trips, studios, workshops, tutorials, laboratories and practical work as required.
4. Notwithstanding Regulation 2, the programme of study for a candidate admitted under Regulation 1(d) will consist of at least 120 credits, including:
 - (a) at least 60 credits from Part Two; and including:
 - (b) any compulsory courses not already completed or waived listed in the Schedule for the Qualification; and
 - (c) attendance at contact workshops, block courses, field trips, studios, workshops, tutorials, laboratories and practical work as required.

Specialisations

5. The Master of Public Health is awarded without a specialisation.

Student Progression

6. For progression to Part Two of the degree, candidates must have achieved a minimum Grade Average of B- over the courses completed in Part One.
7. In cases of sufficient merit, the Master of Public Health may be awarded with a class of award in accordance with the general regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates.

Completion Requirements

8. The timeframes for completion as outlined in the General Regulations for Postgraduate Qualifications will apply.

9. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of the Academic Board, be awarded the Postgraduate Diploma in Public Health should they meet the relevant qualification requirements.

Academic Progress

10. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

11. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, all candidates enrolled in the Master of Public Health prior to 1 January 2022, may satisfy the admission requirements in place prior to this date.
 - (a) Candidates who have successfully completed 30 credits of elective courses may substitute these for 231704.
 - (b) Candidates who have successfully completed 15 credits of elective courses are permitted to take a further 15 credit elective course and substitute this, together with the elective course already taken, for 231704. The 15 credits must be at 700-level from either the 231, 250, 251 or 252 discipline area, excluding those courses from the 231 discipline already in Part One of the Schedule.
 - (c) Candidates who have successfully completed 231730 and 231731 may substitute these for 231727. Candidates who have only taken 231730 are permitted to take to 231731, and then substitute 231730 and 231731 for 231727.

These transition arrangements expire 31 December 2025.

12. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled prior to 1 January 2025 who are undertaking study in conjunction with the Part Two Option B (90 credits) may continue by completing 250817 Research Report, and 231818 and 30 credits of elective courses. These transitional arrangements expire 31 December 2025.
13. In all cases candidates must complete the qualification within the timeframes for completion as specified in the Completion Requirements.

Schedule for the Master of Public Health

Part One

Compulsory courses (120 credits from)

231704 Hauora Māori	30 credits
231725 Foundations of Public Health	15 credits
R 231701	
231726 Health Systems and Policy	15 credits
R 231701	
231727 Epidemiology and Biostatistics	30 credits
R 231730 and 231731	
231728 Public Health Practice	15 credits
231729 Qualitative and Participatory Research in Public Health	15 credits

Elective courses (No more than 60 credits from)

115764 Leadership and Teamwork	15 credits
130705 Emergency Management	30 credits
131704 Sustainable Development	30 credits
150701 Tino Rangatiratanga: Strategic Māori Development	30 credits
150702 Pae Ora: Māori Health Advancement	30 credits
231707 Environmental Health	30 credits
250703 Health Communication	15 credits
251731 Advanced Occupational Health and Safety	30 credits

Part Two**Professional Pathway (60 credits from)**

231818 Public Health Praxis 1	30 credits
231819 Public Health Praxis 2	30 credits

The Degree of Master of Quality Systems

MQS

No new enrolments**Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Quality Systems requires that the candidate will:
 - meet the University admission requirements as specified; and
 - shall have been awarded or qualified for a relevant Bachelor's degree or equivalent with a minimum B grade average over the 300-level majoring courses plus two years' relevant professional experience; or
 - shall have been awarded or qualified for a Bachelor's degree or equivalent with a minimum B grade average over the 300-level majoring courses plus five years' relevant professional experience; or
 - shall have been awarded or qualified for a relevant Postgraduate Diploma or equivalent with a minimum B grade average plus two years' relevant professional experience; or
 - shall have been awarded or qualified for a relevant Bachelor's degree or equivalent with a minimum A- grade average over the 300-level majoring courses plus two years' relevant professional experience; or
 - shall have been awarded or qualified for a Bachelor's degree or equivalent with a minimum A- grade average over the 300-level majoring courses plus five years' relevant professional experience.

Qualification Requirements

- Candidates for the Degree of Master of Quality Systems shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - Part One and Part Two as defined by the Schedule to the Degree, and including:
 - courses selected from the Schedule to the Degree;
 - any compulsory courses identified in the Schedule to the Degree;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 2, candidates admitted under Regulation 1 (d) or 1 (e) or 1(f) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations. The programme of study for such candidates must include 240758.

Specialisations

- The Master of Quality Systems is awarded without specialisation.

Student Progression

- For progression to Part Two, candidates must achieve at least a B- grade average over courses completed in Part One and at least a B grade for the methods course, 240758.
- In cases of sufficient merit, the Master of Quality Systems may be awarded with Merit or Distinction.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the

Postgraduate Diploma in Quality Systems should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Resource and Environmental Planning

MRP

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Master of Resource and Environmental Planning requires that the candidate will:
 - meet the University admission requirements as specified; and shall:
 - have been awarded or qualified for a Bachelor's degree with at least a B grade average across the highest level courses, or equivalent; or
 - have been awarded or qualified for the Bachelor of Resource and Environmental Planning, with at least a B+ grade average across the highest level courses, or equivalent; or
 - have been awarded or qualified for the Postgraduate Diploma in Planning with at least a B grade average (Professional Pathway) or a B+ grade average (Research Pathway), or equivalent.
- In all cases, if English is not the applicant's first language and the admission qualification was not completed at a University where English is the medium of instruction, the applicant shall have achieved an IELTS of at least 7 with no band less than 6 within the preceding five years.

Qualification Requirements

- Candidates for the Master of Resource and Environmental Planning shall follow a parts-based programme of study, which shall consist of courses totalling at least 240 credits, comprising:
 - completion of Part One and Part Two as defined in the Schedule to the Degree; and including:
 - the compulsory courses identified in the Schedule for the degree;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 3, candidates admitted under Regulation 1 (c) or 1 (d) may apply for credit towards Part One of the qualification in accordance with the limits specified in the Recognition of Prior Learning regulations.

Specialisations

- The degree of Master of Resource and Environmental Planning is awarded without specialisation.

Student Progression

- For progression to Part Two in the Master of Resource and Environmental Planning (Professional Pathway), candidates must have achieved at least a B grade average in the courses completed in Part One.
- For progression to Part Two in the Master of Resource and Environmental Planning (Research Pathway), candidates must have achieved at least a B+ grade average in the courses completed in Part One.

- In cases of sufficient merit, the Master of Resource and Environmental Planning may be awarded with a class of Honours.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Planning should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Science

MSc

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Science requires that the candidate will have:
 - been awarded or qualified for the Bachelor of Science with a major in the intended postgraduate subject, or equivalent; and
 - achieved at least a B grade average over the 300 level majoring courses of the qualification(s) considered for admission, or equivalent;

or will have:

- been awarded or qualified for either the Bachelor of Science with Honours or the Postgraduate Diploma in Science and Technology in the intended MSc subject, or equivalent, having achieved at least a B grade average over the contributing courses and at least a B grade in an approved research methods course or equivalent; or
 - been awarded or qualified for the Postgraduate Certificate in Science and Technology comprising courses in the intended MSc subject, or equivalent, having achieved at least a B grade average over the contributing courses and at least a B grade in an approved research methods course or equivalent.
- In all cases the candidate will be required to meet the University admission requirements as specified and to have an approved research supervision plan.
 - Admission to the Degree of Master of Science (Nutrition and Dietetics) requires that the candidate will:

- (a) meet the requirements of Regulation 1; and
 - (b) meet all the requirements as defined by the New Zealand Dietitians Board for registration as an Entry-level Dietitian, in terms of good character and fitness to be a dietitian; and
 - (c) be selected into the programme conditional upon the availability of approved clinical placements.
4. Notwithstanding Regulation 1 (c), admission to Part Two of the Degree of Master of Science (Psychology) requires that the candidate will have been awarded or qualified for the Bachelor of Science with Honours or the Postgraduate Diploma in Science and Technology with an endorsement in Psychology, or an equivalent qualification, having achieved at least a B+ grade average over the contributing courses.
5. Notwithstanding Regulation 1 (c), admission to the Degree of Master of Science (Psychology – Health Psychology) requires that the candidate will have been awarded or qualified for the Bachelor of Science with a major in Psychology, having achieved at least a B+ grade average over the 300 level majoring courses of the qualification(s) considered for admission, or equivalent; or will have been awarded or qualified for the Bachelor of Science with Honours or the Postgraduate Diploma in Science and Technology with an endorsement in Psychology, or an equivalent qualification, having achieved at least a B+ grade average over the contributing courses.
6. Notwithstanding regulation 1, admission to the Degree of Master of Science (Mathematics) requires that the candidate will have been awarded or qualified for the Bachelor of Science with Honours or the Postgraduate Diploma in Science and Technology with an endorsement in Mathematics, or equivalent, having achieved at least a B grade average over the contributing courses.
7. Notwithstanding regulation 1, admission to the Degree of Master of Science (Statistics) requires that the candidate will have been awarded or qualified for the Bachelor of Science with Honours or the Postgraduate Diploma in Science and Technology with an endorsement in Statistics, or equivalent, having achieved at least a B grade average over the contributing courses.

Qualification Requirements

8. Candidates for the Degree of Master of Science shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
- (a) Part One and Part Two as defined by the Schedule to the Degree;
 - (b) completion of a Subject.
9. Notwithstanding Regulation 8, the programme of study for candidates admitted to the Mathematics or Statistics subject will consist of a thesis totalling at least 120 credits as included in the Schedule to the degree.
10. Notwithstanding Regulations 1(c) and 1(d), and at the discretion of Academic Board, candidates may be required to complete a research methods course, should their entry qualification be deficient in research methods.
11. Notwithstanding Regulation 8, candidates admitted under Regulations 1(c), 1(d), 4 or 5 may apply for credit towards Part One of the qualification in accordance within the limits specified in the Recognition of Prior Learning regulations.

Specialisations

12. Except as provided under Regulation 9, candidates must complete a subject by passing at least 180 credits in a subject including:
- (a) a thesis of at least 90 credits (Thesis Pathway) or a research report of at least 60 credits (Coursework Pathway);
 - (b) at least 60 credits at 700 level, including, where identified in the Schedule to the Degree, a Research Methods course and any compulsory courses. The requirements for each subject are set out in the Schedule for the Qualification.
13. Notwithstanding Regulation 12, candidates may complete the subject Nutrition and Dietetics by passing 240 credits in that subject including:
- (a) a thesis of at least 90 credits;
 - (b) 150 credits at 700 level, including where identified in the Schedule to the Degree, any compulsory courses.
14. Notwithstanding Regulation 12, candidates may complete the subject Psychology by passing at least 240 credits in that subject including:
- (a) a thesis of at least 120 credits;
 - (b) 120 credits at 700 level, including where identified in the Schedule to the Degree, any compulsory courses.
15. Notwithstanding Regulation 12, candidates may complete the subject Mathematics or Statistics by passing a thesis of at least 120 credits in that subject as identified in the Schedule to the Degree.
16. Subjects available are: Agricultural Science, Animal Science, Biological Sciences, Chemistry, Conservation Biology, Earth Science, Ecology, Horticultural Science, Mathematics, Nutrition and Dietetics, Plant Breeding, Psychology, Statistics and Zoology.

17. Notwithstanding Regulation 16, the following subjects are available under Transitional Provisions: Biochemistry, Computer Science, Genetics, Geography, Microbiology, Nanoscience, Physics, Plant Biology, Soil Science.

Student Progression

18. In cases of sufficient merit, the Degree of Master of Science may be awarded with a class of Honours, or with Distinction or Merit, in accordance with the provisions specified in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.
19. For the Coursework Pathway, progression to Part Two of the Degree of Master of Science requires that candidates will have achieved at least a B grade average over the Part One courses including at least a B grade for the research methods course.
20. For the Thesis Pathway, progression to Part Two of the Degree of Master of Science requires that candidates will have achieved at least a B grade average over the first 60 credits of Part One courses including at least a B grade for the research methods course.
21. Notwithstanding Regulation 19, progression to Part Two of the Degree of Master of Science (Psychology) and the Degree of Master of Science (Health Psychology) requires that candidates will have achieved at least a B+ grade average over the Part One courses.

Completion Requirements

22. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
23. Candidates may be graduated when they meet the Admission, Qualification, and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Science and Technology or the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

24. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

25. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Master of Science prior to 1 January 2022 may satisfy admission and progression requirements in place in the 2021 Calendar. Such candidates may substitute a course or courses already completed towards the qualification for a course or courses at the same level and credit value within the Schedule for the degree.
26. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Master of Science prior to 1 January 2022 in either the Mathematics or the Statistics subject may satisfy the credit requirements in place in the 2021 regulations by either:
- completing 160870, or 160875 (or 160871 and 160872) or 160899 (or 160897 and 160898) and between 60 and 120 credits as defined by Part One of the Master of Science (Mathematics) schedule within the 2021 Calendar; or
 - completing 161893, or 161875 (or 161871 and 161872) or 161899 (or 161897 or 161898) and between 60 and 120 credits as defined by Part One of the Master of Science (Statistics) schedule within the 2021 Calendar.
27. These transitions arrangements expire 31 December 2025.
28. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Master of Science prior to 1 January 2023 who have successfully completed 283708 and/or 285742 may substitute one or both of these for 284703 and 284704 and/or 284741. Such candidates who have successfully completed 119729 may substitute this for 119728.
29. These transition arrangements expire 31 December 2026.

The Degree of Master of Screen Arts

MSA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Screen Arts requires that the candidate will:
 - meet the University admission requirements as specified; and will:
 - have been awarded or qualified for a relevant Bachelor's degree or equivalent qualification with a grade average of at least B; or
 - have been awarded or qualified for the Bachelor of Screen Arts (Honours) with a grade average of at least B across the 700-800 level courses, or equivalent; or
 - have been awarded or qualified for the Postgraduate Diploma in Screen Arts with a grade average of at least B, or equivalent; or
 - have been granted admission under the Admission with Equivalent Status regulations and demonstrate practical, professional and scholarly experience at an appropriate level;
 and will have:
 - been selected into the programme on the basis of an interview and assessment of a portfolio of relevant work prepared by the candidate.

Qualification Requirements

- Candidates for the Degree of Master of Screen Arts shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 approved credits and include completion of Part One and Part Two. The requirements for Part One and Part Two are prescribed in the Schedule for the Qualification.
- Notwithstanding Regulation 2, the programme of study for candidates who has been admitted under Regulations 1(c) or 1(d) shall consist of thesis courses totalling 120 credits, as prescribed in Part Two in the Schedule for the Qualification.

Specialisations

- The Master of Screen Arts is awarded without specialisation.

Student Progression

- The Degree of Master of Screen Arts may be awarded with Distinction or Merit. The class of award will be determined by the examiners on the performance of the candidate in the Part 2 courses within the schedule.
- For progression to Part Two of the Master of Screen Arts, candidates must have maintained a grade of at least B (GPA 5) over the 60 credits undertaken for Part One.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Qualification requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an appropriate exit qualification, should they meet its qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Social Work

MSW

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Social Work requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for the Bachelor of Social Work or Bachelor of Social Work with Honours or equivalent; or
 - have been awarded or qualified for the Postgraduate Diploma in Social Work with a B grade average across all courses, or equivalent.

Qualification Requirements

- Candidates for the Degree of Master of Social Work shall follow a parts-based programme of study, which shall consist of courses totalling at least 240 credits, comprising:
 - Part One and Part Two as prescribed in the Schedule to the qualification degree; and including:
 - courses selected from the Schedule to the Degree;
 - any compulsory courses listed in the Schedule to the Degree.

- Notwithstanding Regulation 2, candidates admitted under regulation 1(c) shall follow a programme of study which shall consist of courses totalling at least 120 credits, comprising:
 - Part Two as prescribed in the Schedule to the degree; and including:
 - the compulsory course 179702, unless this course has already been completed as part of the qualifying postgraduate diploma.

Specialisations

- The Degree of Master of Social Work is awarded without specialisation.

Student Progression

- For progression to Part Two of the degree, candidates must have achieved a minimum of a B grade average over the courses completed in Part One.
- The Degree of Master of Social Work may be awarded with or without a class of Honours.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Social Work or the Postgraduate Certificate in Social Work should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

10. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Social Work prior to 1 January 2024 may substitute a course which has already been successfully completed for one of 179730, 179731 or 179732. Candidates who have not completed any of 179761, 179763, 179771 or 179778 may substitute a course which has already been successfully completed for one of these, provided the course to be substituted has not already been substituted for another course.

11. These transition arrangements expire 31 December 2027.

The Degree of Master of Specialist Teaching

MSpecTchg

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Master of Specialist Teaching requires that the candidate will meet the University admission requirements as specified; and shall have:
 - been awarded or qualified for a Bachelor's degree with at least a B grade average across the highest level courses, or equivalent; and
 - been awarded or qualified for a relevant professional qualification; and
 - have completed at least two years of relevant professional experience; or will have:
 - been awarded or qualified for the Postgraduate Diploma in Specialist Teaching with at least a B grade average, or equivalent.
- For entry into the Adviser on Deaf Children subject candidates shall have:
 - been awarded or qualified for the Postgraduate Diploma in Specialist Teaching (Deaf and Hard of Hearing), with at least a B grade average, or equivalent; or
 - been awarded or qualified for a Bachelor of Speech and Language Therapy Honours degree with at least Second Class Honours, or equivalent; or
 - been awarded or qualified for a Master of Speech and Language degree having achieved at least a B grade average, or equivalent.
- For entry into the Te Korowai Mokopuna subject candidates shall have:
 - been awarded or qualified for the professional qualification Te Tohu Mātauranga Whakapakari Tino Rangatiratanga o Te Kōhanga Reo with at least a B grade average across the highest level courses, or equivalent; and
 - have completed at least two years of relevant professional experience in Kōhanga Reo; and
 - hold a current letter of endorsement from Te Kōhanga Reo National Trust.
- In all cases candidates will be required to:
 - be selected on the basis of a selection process which may include written application, interview, referee reports and practical exercises; and
 - meet requirements equivalent to those set down by the Teaching Council of Aotearoa New Zealand for registration as a teacher in terms of values, fitness and disposition to teach, and will:
 - hold current relevant New Zealand Professional Registration; or

- be required to undergo police vetting prior to gaining entry into the programme.

- All candidates whose first language is not English or Te Reo Māori, who have not gained a New Zealand university entrance qualification or an overseas entrance qualification in a country where the main language is English, will be required to provide evidence of their proficiency in English in the form of an academic IELTS (International English Language Testing System) score of 7.0 with no band less than 7.0 or other evidence that is acceptable to Academic Board.

Qualification Requirements

- Candidates for the Master of Specialist Teaching shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - completion of Part One and Part Two as detailed in the Schedule for the Qualification; and including completion of
 - a subject
 - any compulsory courses as listed in the Schedule for the Degree.
- Notwithstanding Regulation 6, the programme of study for candidates admitted under Regulation 1(d) will be at least 120 credits including:
 - 249770 or 249771; and
 - completion of a subject as specified in the schedule for the Degree; and
 - Part Two as detailed in the Schedule for the Degree.
- Notwithstanding Regulation 6, the programme of study for candidates admitted under Regulation 2(a), (b) or (c) will be at least 120 credits including:
 - 249770 or 249771; and
 - completion of the Adviser Deaf Children subject as specified in the Schedule for the Degree; and
 - Part Two as detailed in the Schedule for the Degree.

Specialisations

- The Master of Specialist Teaching is awarded with or without a subject.
- The requirements for each subject are set out in the Schedule for the Degree.
- Subject specialisations available for the Master of Specialist Teaching are: Adviser on Deaf Children, Autism Spectrum Disorder, Blind and Low Vision, Complex Educational Needs, Deaf and Hard of Hearing, Early Intervention, Te Korowai Mokopuna, Gifted Education, Learning and Behaviour.
- A candidate admitted under Regulation 1(d) will complete the Master of Specialist Teaching without a specialisation.

Student Progression

- In cases of sufficient merit, the Degree of Master of Specialist Teaching may be awarded with Distinction or Merit.
- For progression to Part Two of the Master of Specialist Teaching candidates must have maintained a grade average of at least a B over the first 120 credits undertaken for Part One.

Completion Requirements

15. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
16. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Specialist Teaching or the Postgraduate Diploma in Specialist Teaching, should they meet the relevant Qualification requirements.

Academic Progress

17. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

18. Subject to the Maximum Time to Completion and Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Gifted and Talented Education subject prior to 01 January 2022 may elect to be awarded this specialisation title rather than the title 'Gifted Education' on completion of the subject. These transition arrangements expire 31 December 2025.
19. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in Gifted Education prior to 01 January 2025 who have successfully completed 262751 may substitute this for 262760.
20. This transition arrangement expires 31 December 2027.

The Degree of Master of Sustainable Development Goals MSDG

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Master of Sustainable Development Goals requires that the candidate will:
 - meet the University admission requirements as specified; and will have
 - been awarded or qualified for a Bachelor's degree or equivalent, having achieved a grade average of at least a B in the highest level courses.

Qualification Requirements

- Candidates for the Master of Sustainable Development Goals shall follow a parts-based programme of study, which shall consist of courses totalling at least 180 credits comprising:
 - Part One and Part Two as defined by the Schedule to the Degree;
 - at least 60 credits at 800 level; and including:
 - the core courses listed in Schedule A;
 - completion of a subject as specified in Schedule B;
 - attending field trips, contact workshops, studios, workshops, tutorials, and laboratories as required.

Specialisations

- Candidates for the Degree of Master of Sustainable Development Goals may complete a subject by passing at least 120 credits in a subject including:
 - an 800 level Practicum inquiry course of 60 credits;
 - any compulsory courses identified in the subject schedule. The requirements for each subject are set out in the Schedule for the Degree.
- Subjects available in the Master of Sustainable Development Goals are: Business and Sustainability, Climate Action, Disaster Management, Economics for Sustainability, Environmental Sustainability, Global Development, and Peace and Security.

Student Progression

- For progression from Part One to Part Two, candidates must have achieved a Grade Average of at least a B over the Part One courses.
- In cases of sufficient merit, the Degree of Master of Sustainable Development Goals may be awarded with Distinction or Merit in accordance with the provisions of the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for progression from Part One to Part Two, or who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Arts, Postgraduate Diploma in Business, Postgraduate Diploma in Science and Technology, Postgraduate Certificate in Arts, Postgraduate Certificate in Business, or Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Master of Veterinary Medicine

MVM

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Master of Veterinary Medicine requires that the candidate will:
 - meet the University admission requirements as specified; and
 - shall have been awarded or qualified for the Bachelor of Veterinary Science or a veterinary degree considered by the Academic Board to be equivalent to the Massey University Bachelor of Veterinary Science.

Qualification Requirements

- Candidates for the Degree of Master of Veterinary Medicine shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - courses selected from the Schedule to the Qualification;
 - any compulsory courses identified in the Schedule to the Qualification.

Specialisations

- The Degree of Master of Veterinary Medicine is awarded without a subject.
- Notwithstanding Regulation 3, the following subjects, which are closed to new enrolments, are available in accordance with the transitional provisions outlined in Regulation 9: Companion Animal, Companion Animal Surgery, Production Animal, Equine, Veterinary Business Administration.

Student Progression

- In cases of sufficient merit, the Degree of Master of Veterinary Medicine may be awarded with distinction or merit.

Completion Requirements

- A candidate's programme of study may not exceed five years from the date of first enrolment in the Master of Veterinary Medicine, unless a specified time of suspension or extension has been approved by the Academic Board or their delegate.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation

may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Veterinary Medicine prior to 1 January 2025 who were enrolled in a subject, will be permitted to complete that subject.
- This transition arrangement expires 31 December 2027.

The Degree of Master of Veterinary Science

MVSc

No new enrolments**Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Candidates for the Degree of Master of Veterinary Science shall have completed a veterinary degree.

Qualification Requirements

- Candidates who have completed a Massey University BVSc, or a veterinary qualification that can be registered by the New Zealand

Veterinary Council and is considered by the Academic Board to be equivalent to the Massey University BVSc, or a Postgraduate Diploma in an area of Veterinary Science, shall complete an MVSc programme consisting of a Research Methods course of 15 credits and a thesis to the value of 120 credits in some branch of Veterinary Science.

- Veterinary graduates who do not meet the requirements in 1(a) shall complete an MVSc programme consisting of courses to the value of 120 credits and a thesis to the value of 120 credits.

Schedule for the Master of Veterinary Science

- Courses shall be selected from the 1187xx, 1188xx, series and any other courses deemed appropriate by the Graduate Subject Adviser.
- The selection of courses must be approved by the Academic Programme Director or equivalent.

The Degree of Master of Veterinary Studies

MVS

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Master of Veterinary Studies requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor of Veterinary Science with at least a B grade average, or equivalent.
- Admission into the Master of Veterinary Studies (Advanced Veterinary Practice) requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor of Veterinary Science with at least a B grade average, or equivalent; and
 - be selected into the programme on the basis of an interview.

Qualification Requirements

- Candidates for the Degree of Master of Veterinary Studies shall follow a flexible programme of study, which shall consist of courses totalling at least 180 credits, comprising:
 - completion of Part One and Part Two as defined by the Schedule to the Degree;
 - courses selected from the Schedule to the Degree; and including:
 - any compulsory courses listed in the Schedule to the Degree;
 - at least 60 credits at 800 level;
 - attending field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- The Degree of Master of Veterinary Studies is awarded with or without a subject.

- Candidates may complete a subject by passing at least 180 credits, including 60 credits at 800-level, in a subject. The requirements for each subject are set out in the Schedule to the Degree.

- The subjects available are: Advanced Veterinary Practice, Conservation Veterinary Medicine*, Epidemiology*, Veterinary Pathology*, and Veterinary Public Health*.

*No new enrolments

Student Progression

- In cases of sufficient merit, the Degree of Master of Veterinary Studies may be awarded with Distinction or Merit.
- For progression to Part Two of the Degree of Master of Veterinary Studies, candidates must have maintained at least a B grade average over the Part One courses.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Diploma in Veterinary Science or Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- In all cases candidates must complete the qualification within the timeframes for completion as specified in the Completion Requirements.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Master of Veterinary Studies prior to 1 January 2022 may proceed to Part Two on the basis of a minimum grade average of B over their first 60 credits of study, until 31 December 2025.

The Degree of Bachelor of Arts (Honours) BA(Hons)

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Arts with Honours requires that the candidate will:
 - meet the University admission requirements as specified; and
 - shall have been awarded or qualified for the Bachelor of Arts with a major in the intended postgraduate subject or close equivalent; or
 - shall have been awarded or qualified for the Bachelor of Arts with a minor in the intended postgraduate subject, followed by a Graduate Certificate in Arts with an endorsement in the intended postgraduate subject, or close equivalent; or
 - shall have been awarded or qualified for the Bachelor of Arts, followed by a Graduate Diploma in the Arts with an endorsement in the intended postgraduate subject, or close equivalent; and in all cases, will have:
 - achieved a B grade average over the 200- and 300-level specialisation courses of the qualification(s) considered for admission in Regulations 1(b) to (d);
 - achieved an IELTS of 7.0 with no band less than 6.5, if English is not the applicant's first language and the qualifying degree was not completed at a University where English is the medium of instruction.
- Notwithstanding Regulation 1(e), in order to be admitted to the Psychology subject, candidates must have been awarded or qualified for a Bachelor's degree with a major in Psychology having achieved at least a B+ grade average in the 300-level psychology specialisation courses, or equivalent.

Qualification Requirements

- Candidates for the Degree of Bachelor of Arts with Honours shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - a research report of at least 30 credits;
 - any compulsory courses identified in the Schedule for the Qualification.

Specialisations

- Candidates for the Degree of Bachelor of Arts with Honours must complete the requirements for one subject.

5. The requirements for each subject are set out in the Schedule for the Qualification.
6. Subjects available are: Defence and Security Studies, Economics, English, Geography, History, Māori Knowledge, Media Studies, Philosophy, Politics and International Relations, Psychology, Social Anthropology, Social Policy and Sociology.

Student Progression

7. The Degree of Bachelor of Arts with Honours will be awarded with a class of Honours.

Completion Requirements

8. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.
9. Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation, may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Arts should they meet the relevant Qualification requirements.

Academic Progress

10. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

11. Subject to the Maximum Time to Completion and Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Defence and Security Studies subject prior to 1 January 2024 who have successfully completed 294790 may substitute this for 176702 until 31 December 2026.

 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor of Commercial Music, having achieved at least a B grade average over the highest level courses, or equivalent.

Qualification Requirements

- Candidates for the Commercial Music Honours shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - at least 120 credits at 700 and 800 levels from the Schedule to the degree; and including:
 - the compulsory courses as listed in the Schedule; and
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials, and/or laboratories as required.

Specialisations

- The Bachelor of Commercial Music (Honours) is awarded without a subject.

Student Progression

- The Degree of Bachelor of Commercial Music (Honours) is awarded with a class of Honours.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation, may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Creative Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Bachelor of Commercial Music (Honours)**Compulsory Courses (90 credits from)**

133701 Prototyping and Development for Advanced Music Projects	30 credits
133803 Advanced Music Research Project P 133701	60 credits

Research Methods (15 credits from)

293732 Creative Practice Research Methods	15 credits
298730 Māori Research Methodologies for Creative Practice	15 credits

Any 400-level or 700-level elective course from the College of Creative Arts (Prefixes: 133, 197, 198, 212, 213, 221, 222, 223, 224, 237, 296, 289, 298) (15 credits from)

The Degree of Bachelor of Creative Media Production (Honours)

BCMP(Hons)

No new enrolments**Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Bachelor of Creative Media Production Honours requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor of Creative Media Production, having achieved at least a B grade average over the highest level courses, or equivalent.

Qualification Requirements

- Candidates for the Bachelor of Creative Media Production Honours shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - at least 120 credits at 700 and 800 levels from the Schedule to the degree; and including:
 - the compulsory courses as listed in the Schedule; and
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials, and/or laboratories as required.

Specialisations

- The Bachelor of Creative Media Production (Honours) is awarded without a subject.

Student Progression

- The Degree of Bachelor of Creative Media Production (Honours) is awarded with a class of Honours.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.
- Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes. Candidates who

do not meet the requirements for graduation, may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Creative Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Bachelor of Creative Media Production (Honours)**Compulsory Courses (105 credits from)**

289701	Production Planning and Development P 289333 OR 289309	30 credits
289702	Screen Arts Critical Frameworks C 289701	15 credits
289803	Advanced Production P 289701	60 credits

Compulsory Course Selection (15 credits from)

197705	Independent Study	15 credits
289703	Contemporary Creative Media Production Project P Permission Head of School	15 credits

The Degree of Bachelor of Information Sciences (Honours)

BlnfSc(Hons)

No new enrolments**Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Bachelor of Information Sciences (Honours) requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for the Bachelor of Information Sciences having achieved a B+ grade average over the 300-level majoring courses of the intended subject area; or
 - have passed 240 credits towards the Degree of Bachelor of Information Sciences having achieved an A- grade average, and including at least 195 credits above 100 level and having met the requirements for at least one major.

Qualification Requirements

- Candidates for the Degree of Bachelor of Information Sciences (Honours) shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - 120 credits at 700 level selected from the Schedule for the Qualification; and including:
 - any compulsory courses listed in the Schedule for the Qualification;
 - completion of a subject;
 - attending workshops, block courses, tutorials or laboratories as required.

Specialisations

- Candidates shall complete a subject by passing at least 120 credits in a subject including completion of a research or project course. The requirements for each subject are set out in the Schedule for the Qualification.
- Approved subjects are: Computer Science, Information Technology.
- Approved joint subject is Software Engineering.

Student Progression

- Candidates admitted to the Degree under Regulation 1(c) must maintain an A- grade average over the remaining Bachelor of Information Science requirements to remain in the programme.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed

timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology, or for candidates admitted under Regulation 1(c) the award of Bachelor of Information Sciences, should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Bachelor of Science (Honours)

BSc(Hons)

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Degree of Bachelor of Science with Honours requires that the candidate will:
 - meet the University admission requirements as specified, and;
 - have been awarded or qualified for the Bachelor of Science with a major in the intended postgraduate subject, or equivalent, having achieved a minimum B+ grade average over the 300-level majoring courses of the qualifying programme; or
 - have been awarded or qualified for a Bachelor's degree, followed by a Graduate Diploma in Science and Technology comprising approved 300-level courses in the intended postgraduate subject, or equivalent, with a minimum B+ grade average over the 300-level courses.

Qualification Requirements

- Candidates for the Degree of Bachelor of Science with Honours shall follow a flexible course of study, which shall consist of courses totalling at least 120 credits, comprising:
 - 120 credits at 700-level selected from the Schedule for the Qualification; and including:
 - completion of a subject;
 - a research report or project of at least 30 credits; and
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- Candidates must complete a subject by passing at least 120 credits in a subject, including any compulsory courses and a research report of at least 30 credits. The requirements for each subject are set out in the Schedule for the Qualification.
- Notwithstanding Regulations 2 and 3, and subject to academic merit, approval of the relevant Postgraduate Subject Leader, availability of a suitable project, and availability of appropriate supervision, candidates may be invited to complete the Degree by completing 30 credits of 700-level taught courses in a subject and a 90-credit research course selected from Schedule B.
- Subjects available are: Agricultural Science, Animal Science, Biochemistry, Biological Sciences, Chemistry, Computer Science, Earth Science, Ecology, Genetics, Geography, Horticultural Science, Mathematics, Microbiology, Nanoscience, Physics, Plant Biology, Psychology, Soil Science, Statistics, Zoology.

Student Progression

- The Degree of Bachelor of Science with Honours will be awarded with a class of Honours.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate

in Science and Technology or Postgraduate Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Bachelor of Science (Honours)**Schedule A****Agricultural Science (120 credits)****No new enrolments****Compulsory course****At least 15 credits from**

	P One of 120303, 120306, 122301, 122303, 122322, 122327, 123326, 162301, 162304, 194342, 194346, 196318, 203300, 203307, 203310, 203311, 203340, 203341, 203342, 203343	

Psychology (120 credits)

Compulsory courses (45 credits from)

175738	Psychological Research: Principles of Design	15 credits
175799	Research Report (30)	30 credits

Subject courses

175718	Postmodernism and Psychology	15 credits
175719	Applied Criminal Psychology	15 credits
175720	Advanced Psychology of Women	15 credits
175721	Child and Family Therapy	15 credits
175722	Principles of Clinical Neuropsychology	15 credits
175724	Advanced Experimental Psychology	30 credits
	P 175203 and either 175205 or 175206	
175725	Applied Social Psychology	30 credits
175729	Psychology and Culture	15 credits
175730	Professional Practice in Psychology	15 credits
175732	Psychological Well-being in Organisations	15 credits

175733	Sustainable Livelihood	15 credits
175734	Child Clinical Neuropsychology	15 credits
175737	Occupational Psychology	15 credits
175739	Health Psychology: Understanding Health and Illness	15 credits
175740	Occupational Health Psychology	15 credits
175741	Psychological Assessment in Organisations	15 credits
175743	Health Psychology: The Social Context	15 credits
175744	Health Psychology: Promoting Health	15 credits
175746	Psychological Research: Quantitative Data Analysis	15 credits
175747	The Psychology of Sport and Exercise	15 credits
175748	The Psychology of Organisational Change	15 credits
175750	Qualitative Methods in Psychology	15 credits
175751	Neuropsychological Rehabilitation	15 credits
175761	Theory and Practice of Cognitive Behaviour Therapy	15 credits
175781	Understanding Mental Distress	15 credits
175782	Clinical Psychology Assessment	15 credits
175783	Clinical Psychology Interventions	15 credits

Soil Science (120 credits)

No new enrolments

Compulsory course

Subject courses

119710	Nutrient Management in Grazed Pasture Systems	30 credits
119711	Nutrient Management in Arable Systems	15 credits

Statistics (120 credits)

No new enrolments

Compulsory courses (45 credits from)

161705	Advanced Statistical Inference	15 credits
--------	--------------------------------------	------------

Subject courses

161704	Bayesian Statistics	15 credits
161709	Topic in Statistical Theory	15 credits
161725	Statistical Quality Control	15 credits
161743	Statistical Reliability and Survival Analysis	15 credits
161744	Statistical Genetics	15 credits
161770	Statistical Consulting	15 credits

Subject courses (No more than 15 credits from)

161762	Multivariate Analysis for Big Data	15 credits
	R 161323, 161772	
161777	Practical Data Mining	15 credits
	R 161223 and 161324	

Zoology (120 credits)

No new enrolments

Compulsory course

At least 45 credits from

199714	Animal Behaviour	30 credits
	P 199312	
199717	Entomology	30 credits
	P 199310 or 285301	

Subject courses

No more than 30 credits from

196712	Aquatic Ecology	30 credits
	P 196313 or 121313	
196713	Ecology	30 credits
	P 1963xx or 1993xx	
232701	Conservation Biology	30 credits
	R 196719	

BACHELOR'S DEGREES WITH HONOURS

The Degree of Bachelor of Design with Honours	109	The Degree of Bachelor of Food Technology with Honours.....	120
The Degree of Bachelor of Engineering with Honours*	115	The Degree of Bachelor of Screen Arts with Honours	122
The Degree of Bachelor of Fine Arts with Honours.....	118	The Degree of Bachelor of Speech and Language Therapy with Honours	124

* No new enrolments

The Degree of Bachelor of Design with Honours BDes(Hons)

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Design (Hons) requires that the candidate will:
 - meet the University admission requirements as specified; and
 - be selected into the Qualification based partially on the assessment of a portfolio of work submitted by the applicant.
- An applicant who holds the degree of Bachelor of Design shall not be admitted to the Bachelor of Design with Honours.

Qualification Requirements

- Candidates for the Degree of Bachelor of Design with Honours shall follow a parts-based programme of study, which shall consist of courses totalling at least 480 credits, comprising:
 - Part One, Part Two, Part Three and Part Four as specified in Schedules A and B;
 - Elective courses from Schedule C or other courses from Massey University; and including
 - not more than 180 credits at 100 level;
 - at least 195 credits must be at 300 level or above, with at least 120 credits at 400 level or above.
 - completion of at least one major.
- Notwithstanding Regulation 3 holders of a Massey University Diploma in Fashion Design and Technology may be permitted to credit up to 120 credits at 100 level and include up to 195 credits at 100 level in a Bachelor of Design, fashion design major.
- Notwithstanding Regulation 3 holders of a Massey University Diploma in Photography may be permitted to credit up to 120 credits at 100 level and up to 120 credits at 200 level to the Bachelor of Design, Photography major.
- The Academic Board may grant exemptions to the requirements of Regulation 3 based on the subjects studied and prior performance of the student.

Specialisations

- Candidates may complete a single major by passing Parts One, Two, Three, and Four specified for a major selected from: Concept Design, Integrated Design, Fashion Design, Industrial Design, Photography, Spatial Design, Textile Design and Visual Communication Design. The requirements for each major are set out in Schedule B to the Qualification.
- Candidates may complete a double major in Mātauranga Toi Māori and one other specialisation from Regulation 7 by fulfilling the requirements of the specialisations as set out in Schedule B. Individual courses cannot be counted towards both majors. Such candidates may, however, count up to 120 credits towards both the Mātauranga Toi Māori major and the Core.
- Candidates may include a minor from any undergraduate degree within the University for which recognised minors are specified, in accordance with the following requirements:
 - the overall balance of credits as specified in Regulation 3 are maintained;
 - the minor must be in a different subject area from the major(s);
 - where the minor is from another undergraduate degree the regulations of that programme for the minor will apply;

- no course may be credited to both a major and a minor.

Student Progression

- In order to progress to Part Two the candidate shall have passed a total of 75 credits at 100 level with at least 60 credits from the Part I courses including at least 15 credits from one Schedule B course relevant to the major to be taken.
- For progression to Part Four of the Bachelor of Design with Honours, the candidate must have achieved a weighted grade average of at least a B- across the Part Three Professional Cultures course and the Design Studio 358 course relevant to the major being taken.
- The Academic Board may grant exemptions to the requirements in Regulation 9 and 10 based on the subjects studied and prior performance of the student.
- The Degree of Bachelor of Design with Honours may be awarded with First Class Honours or with Second Class Honours Division I or Second Class Honours Division II or with Third Class Honours. The class of Honours awarded shall be determined by the examiners on the performance of the candidate in Part 4 of the programme.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, and Undergraduate Certificates, and Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an alternative creative arts qualification should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any maximum time to completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Design with Honours prior to 1 January 2025 who have completed more than 300 credits will complete the Bachelor of Design with Honours under the 2024 regulations. Candidates enrolled in the Bachelor of Design with Honours prior to 1 January 2025 who have completed up to 300 credits will complete the Bachelor of Design with Honours in accordance with the 2025 regulations and may substitute a course or courses already completed for a course or courses of the same value and at the same or lower level within the Schedule.
- This transition expires 31 December 2030.

Schedule for the Bachelor of Design with Honours

Schedule A: Core courses

Part One

Professional Cultures (15 credits from)

133180 Professional Cultures in Commercial Music 1	15 credits
R 298160 289150 197190 213170	
197190 Professional Cultures in Design 1	15 credits
R 298160 289150 133180 213170	
213170 Professional Cultures in Art 1	15 credits
R 298160 289150 197190 133180	
289150 Professional Cultures in Screen Arts 1	15 credits
R ringfencing required -- open to any students enrolled in any Creative Arts qualification	
298160 Mātauranga Toi Māori 1: Māori Practices as a Māori Creative Practitioner	
R 133180 213170 197190 289150	15 credits

Critical Studies (At least 15 credits from)

133154	Music, People, Places	15 credits
	R 133255	
150106	Nga Hanga Whakairo: Traditional Māori Visual Art	15 credits
197139	Design, Purpose, People and Place	15 credits
	R 237130	
237131	Art, Culture and Contexts	15 credits
	R 237102	
289100	Screen Arts, Creativity and Critical Thinking	15 credits

Core Studios: 30 credits from (At least 15 credits from)

198157	Product and Industrial Design 1.1: An Introduction	15 credits
	R 197132	
198158	Product and Industrial Design 1.2: Furniture Design	15 credits
212157	Fashion Design 1.1: Fashioning the Body	15 credits
	R 197135	
212158	Fashion Design 1.2: Introduction to Making Clothes	15 credits
221157	Photography Studio 1.1: What is Photography?	15 credits
	R 221101	
221158	Photography Studio 1.2: Introduction to the Darkroom	15 credits
222157	Visual Communication Design 1.1: Introduction to Graphic Design	15 credits
	R 197131	
222158	Visual Communication Design 1.2: Introduction to Typography	15 credits
	R 197131, 222100	
222159	Visual Communication Design 1.3: Introduction to User Experience Design and Interactivity	15 credits
223157	Textile Design 1.1: Interwoven Structures	15 credits
	R 197133	
223158	Textile Design 1.2: Surface Design, Colour and Screen Print	15 credits
224157	Spatial Design 1.1: An Introduction 15	R 197131 credits
224158	Spatial Design 1.2: Immersive Experiences	15 credits
296157	Concept Design 1.1: Imagine	15 credits
296158	Concept Design 1.2: Worldbuilding	15 credits
298157	Toi Atea 1	15 credits

Explorations: 30 credits from (At least 30 credits from)

197123	Explorations in Visualisation	15 credits
197124	Explorations in Materials and Making	15 credits
197191	Explorations in Creative Coding and Media	15 credits
198124	Explorations in Digital Asset Creation	15 credits
213155	Explorations in Drawing	15 credits
293125	Explorations in Narrative	15 credits
293126	Explorations in Image and Meaning	15 credits
293127	Explorations in Colour and Context	15 credits

Part Two**Professional Cultures (15 credits from)**

133280	Professional Cultures in Commercial Music 2	15 credits

The Degree of Bachelor of Engineering with Honours BE(Hons)

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Engineering with Honours requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Engineering with Honours shall follow a parts-based programme of study, which shall consist of courses totalling at least 480 credits, comprising:
 - a First Part, Second Part, Third Part, and Fourth Part;
 - at least 4 years of study; and including:

- 800 hours of practical work experience;
 - completion of one major;
 - attending field trips, studios, workshops, tutorials and laboratories as required.
- Candidates who, in the opinion of the Academic Board, have passed with sufficient merit subjects for the New Zealand Certificate in Science, The National Diploma in Engineering, or an equivalent qualification, may be granted credit, including part or all of the First and Second Parts. The credit granted will be determined by Academic Board after taking into account the areas of study of the certificate and the standard of pass attained.
 - Notwithstanding Regulation 2, candidates who, in the opinion of the Academic Board, have achieved the admission requirements for the Degree of Bachelor of Engineering with Honours to an excellent standard, may be admitted to the programme after the commencement of Part One, but no later than the start of Part Two, and may be granted an exemption, including part or all of the First Part. The exemption granted will be determined by Academic Board after taking into account the level of achievement in the subjects passed prior to, and subsequent to, admission. Alternative courses of an equivalent credit value must be substituted for the exempted courses.

- Notwithstanding Regulation 2, candidates who have passed courses in engineering from a recognised overseas tertiary institution with which Massey University has a cross-crediting agreement may cross-credit up to 240 credits at 100-, 200- or 300-level as permitted by the terms of the agreement.
- The maximum credit or exemption granted under any credit recognition process shall be 240 credits.

Specialisations

- Candidates shall complete one of the following majors:

- Chemical and Bioprocess Engineering
- Electronics and Computer Engineering
- Engineering and Innovation Management
- Mechatronics.

The requirements for each major are set out in the Schedule for the Degree of Bachelor of Engineering with Honours.

Academic Requirements

- Every candidate for the Degree of Bachelor of Engineering with Honours shall complete to the satisfaction of Academic Board a minimum of 800 hours of approved practical work and associated reports in accordance with the following courses:
 - 228210 Practicum I;
 - 228310 Practicum II.
 Passes in these courses will be awarded on the basis of practical work completed in accordance with the guidelines governing the practical work requirements.

Student Progression

- Candidates may progress from Part One to Two, Two to Three, and Three to Four, by passing all courses in the prior part, either by examination or by the award of a combined results pass.
- Candidates who fail to pass a complete Part in accordance with Regulation 10 shall re-enrol in the remaining unpassed course(s) at the next available offering of the course(s).
- Candidates who are retaking courses from Part One in accordance with Regulation 11 may not progress to Part Two until all of Part One has been successfully completed.
- Candidates who are retaking courses in Parts Two and Three in accordance with Regulation 11 may apply for permission to enrol in courses from the subsequent part, where the nominated courses are from different areas of study to the courses not passed; permission will only be granted where, in the opinion of Academic Board, the academic record of the candidate shows proven merit.
- The Degree of Bachelor of Engineering with Honours may be awarded with First Class Honours or with Second Class Honours (Division I) or with Second Class Honours (Division II) or with Third Class Honours. The class of Honours shall be determined by the candidate's performance in the Second, Third and Fourth Parts of the Degree.
- Candidates who have passed all courses and completed all other requirements for a Bachelor of Engineering with Honours but whose performance in the courses is deemed by the Academic Board, upon recommendation of the examiners, not to be of Honours standard will be awarded the Degree of Bachelor of Engineering.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Bachelor of Science should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress Regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates who were enrolled in the Electronics and Computer Engineering major prior to 1 January 2023 may substitute 281785 for 281780 and 281756 and/or 281786 for 281776 and/or one 15 credit 700-level course with the 158 or 159 prefix until 31 December 2026.
- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Engineering with Honours (Electronics and Computer Engineering) prior to 1 January 2024 may substitute 158222 if successfully completed for 297201 and 158333 if successfully completed for 297301 until 31 December 2027.

Schedule for the Bachelor of Engineering with Honours

Specialisations

Chemical and Bioprocess Engineering (480 credits)

No new enrolments

First Part

Auckland and Manawātū Campuses

123104	Chemistry for Biological Systems.....	15 credits
	R 123101, 123171	
123105	Chemistry and the Physical World	15 credits
	R 123102, 123172	
124104	Physics 1A: Mechanics and Thermodynamics	15 credits
	R 124101, 124111, 124171	
160101	Calculus	15 credits
	R 160112, 160133, 228172	
160102	Algebra	15 credits
	R 160112, 160133, 228172	
228115	Introduction to Food Technology	15 credits
	R 141111 or 228111	
247114	Science and Sustainability for Engineering and Technology	15 credits
	R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247111, 247112, 247113	

15 credits from

120101	Plant Biology.....	15 credits
150103	Nau mai e noho: Engaging with Māori	15 credits
159100	Programming for Engineering and Technology	15 credits
	R 159101	

Second Part

Auckland and Manawātū Campuses

123201	Chemical Energetics	15 credits
	P One of (123102, 123105, 124104 or 123172) and one of (160101, 160102, 160105, 160132 or 160133)	
123271	Molecules to Materials.....	15 credits
	P (123101, 123104 or 123171) and (123102, 123105 or 123172)	
141212	Food Manufacturing Principles	15 credits
	P (123105 or 123172), (124104 or 124172), (160102 or 228172) and (141112 or 228112 or 228115) C 123201, 280201, 280272 R 228212	
228211	Engineering Practice 3: Product Development	15 credits
	P (228115, 247114) or (124172, 228172, 228112 and (123172 or 159172) R 141211	
228271	Engineering Mathematics 2	15 credits

The Degree of Bachelor of Fine Arts with Honours BFA(Hons)

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Fine Arts with Honours requires that the candidate will:
 - meet the University admission requirements as specified; and
 - be selected into the Qualification based partially on the assessment of a portfolio of work submitted by the applicant, and an interview at the discretion of the University.
- An applicant who holds the degree of Bachelor of Fine Arts shall not be admitted to the Bachelor of Fine Arts with Honours.

Qualification Requirements

- Candidates for the Degree of Bachelor of Fine Arts with Honours shall follow a parts based programme of study, which shall consist of courses totalling at least 480 credits, comprising:
 - Part 1, Part 2, Part 3, and Part 4 as specified in Schedule A;
 - elective courses from Schedule C to the Degree; and/or elective courses from Schedule C to the Degree of the Bachelor of Design with Honours; or any other course. And including:
 - not more than 165 credits at 100 level;

- at least 90 credits at 200-level;
- at least 105 credits at 300-level;
- at least 120 credits at 400 level or above.

- Notwithstanding Regulation 3, holders of a Massey University Diploma in Photography who are admitted to the Degree of Bachelor of Fine Arts with Honours may be permitted to credit up to 120 credits at 100-level and up to 75 credits at 200-level to the Bachelor of Fine Arts with Honours.

Specialisations

- The Bachelor of Fine Arts with Honours is awarded with or without a specialisation.
- The specialisation available is: Mātauranga Toi Māori. Candidates can earn this specialisation by meeting the requirements set out in Schedule B.
- Candidates fulfilling the requirements of the specialisation under Regulation 6 may count up to 150 credits towards both the Mātauranga Toi Māori major and the Core.
- Candidates may include a minor from any undergraduate degree within the University for which recognised minors are specified, in accordance with the following requirements:
 - the overall balance of credits as specified in Regulation 3 are maintained;
 - the minor must be in a different subject area from the major(s);
 - where the minor is from another undergraduate degree the regulations of that programme for the minor will apply;
 - no course may be credited to both a major and a minor.

Student Progression

- In order to progress to Part Two the candidate shall have passed a total of 75 credits at 100 level with at least 60 credits from the College of Creative Arts.

10. For progression to Part 4 of Bachelor of Fine Arts with Honours, candidates must have passed the Part 3 credits from Schedule A.
11. The Academic Board may grant exemptions to the requirements of Regulations 6 and 7 based on the subjects studied and prior performance of the student.
12. The Degree of Bachelor of Fine Arts with Honours may be awarded with First Class Honours or with Second Class Honours Division I or Second Class Honours Division II or with Third Class Honours. The class of Honours awarded shall be determined by the examiners on the performance of the candidate in Part 4 of the programme.

Completion Requirements

13. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, and Undergraduate Certificates, and Graduate Diplomas and Graduate Certificates will apply.
14. Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an alternative creative arts qualification should they meet the relevant Qualification requirements.

Academic Progress

15. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

15. Subject to any maximum time to completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Fine Arts with Honours prior to 1 January 2025 who have completed more than 300 credits will complete the Bachelor of Fine Arts with Honours under the 2024 regulations. Candidates enrolled in the Bachelor of Fine Arts with Honours prior to 1 January 2025 who have completed up to 300 credits will complete the Bachelor of Fine Arts with Honours in accordance with the 2025 regulations and may substitute a course or courses already completed for a course or courses of the same value and at the same or lower level within the Schedule.
16. This transition regulation expires 31 December 2030

Schedule for the Bachelor of Fine Arts with Honours

Schedule A: Core courses

Part One

Critical Studies (At least 15 credits from)

133154 Music, People, Places	15 credits
R 133255	
150106 Nga Hanga Whakairo: Traditional Māori Visual Art	15 credits
197139 Design, Purpose, People and Place	15 credits
R 237130	
237131 Art, Culture and Contexts	15 credits
R 237102	
289100 Screen Arts, Creativity and Critical Thinking	15 courses

Professional Cultures (15 credits from)

133180 Professional Cultures in Commercial Music 1	15 credits
R 298160 289150 197190 213170	
197190 Professional Cultures in Design 1	15 credits
R 298160 289150 133180 213170	
213170 Professional Cultures in Art 1	15 credits
R 298160 289150 197190 133180	
289150 Professional Cultures in Screen Arts 1	15 credits
R ringfencing required -- open to any students enrolled in any Creative Arts qualification	
298160 Mātauranga Toi Māori 1: Māori Practices as a Māori Creative Practitioner	15 credits
R 133180 213170 197190 289150	

Core Studios (At least 30 credits from)

213157 Fine Arts Studio 1.1: Art Lab	15 credits
R 197132	
213158 Fine Arts Studio 1.2: Media and Processes	15 credits
R 197131	
298157 Toi Atea 1	15 credits

Explorations: choose at least 2 (At least 30 credits from)

197123 Explorations in Visualisation	15 courses
197124 Explorations in Materials and Making	15 credits
197191 Explorations in Creative Coding and Media	15 credits
198124 Explorations in Digital Asset Creation	15 credits
213155 Explorations in Drawing	15 credits
293125 Explorations in Narrative	15 credits
293126 Explorations in Image and Meaning	15 credits
293127 Explorations in Colour and Context	15 credits

Part Two

Critical Studies (At least 15 credits from)

133257 Music and Ethics	15 credits
P 15 credits from 150106, 133154, 197139, 237131, 289100	
150206 Ngā Momo Whakairo: Contemporary Māori Visual Art	15 credits
P 150106

The Degree of Bachelor of Food Technology with Honours

BFoodTech(Hons)

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Degree of Bachelor of Food Technology with Honours requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Food Technology with Honours shall follow a parts-based programme of study, which shall consist of courses totalling at least 480 credits, comprising:
 - a First Part, Second Part, Third Part and Fourth Part;
 - at least four years of study;
 and including:
 - a minimum of 800 hours of practical work experience;
 - completion of one major; and
 - attending field trips, studios, workshops, tutorials and laboratories as required.
- Candidates, who in the opinion of the Academic Board, have passed with sufficient merit subjects for the New Zealand Certificate in Science, the National Diploma in Engineering or an equivalent qualification, may be granted credit, including part or all of the First and Second Parts. The credit granted will be determined by Academic Board after taking into account the areas of study of the certificate and the standard of pass attained.

- Notwithstanding Regulation 2, candidates who, in the opinion of the Academic Board, have achieved the admission requirements for the Degree of Bachelor of Food Technology with Honours to an excellent standard, may be admitted to the programme after the commencement of Part One but no later than the start of Part Two, and may be granted an exemption, including part or all of the First Part. The exemption granted will be determined by Academic Board after taking into account the level of achievement in the subjects passed prior to, and subsequent to, admission. Alternative courses of an equivalent credit value must be substituted for the exempted courses.
- Notwithstanding Regulation 2, candidates who have passed courses in food technology or food science from a recognised overseas tertiary institution with which Massey University has a cross-crediting agreement may cross-credit up to 240 credits at 100-, 200- or 300-level as permitted by the terms of the agreement.
- The maximum credit or exemption granted under Regulations 3, 4 or 5 or any other credit recognition process shall be 240 credits.

Specialisations

- Candidates shall complete one of the following majors:
 - Food Product Technology; or
 - Food Process Engineering.
 The requirements for each major are set out in the Schedule for the Degree of Bachelor of Food Technology with Honours.

Academic Requirements

- Every candidate for the Degree of Bachelor of Food Technology with Honours shall complete to the satisfaction of Academic Board a minimum of 800 hours of approved practical work and associated reports in accordance with the following courses:
 - 228210 Practicum I;
 - 228310 Practicum II.

Passes in these or approved equivalent courses will be awarded on the basis of practical work completed in accordance with the guidelines governing the practical work requirements.

Student Progression

- Candidates may progress from Part One to Two, Two to Three, and Three to Four, by passing all courses in the prior part, either by examination or by the award of a combined results pass.
- Candidates who fail to pass a complete Part in accordance with Regulation 9 shall re-enrol in the remaining unpassed course(s) at the next available offering(s) of the course(s).
- Candidates who are re-taking courses from Part One in accordance with Regulation 10 may not progress to Part Two until all of Part One has been successfully completed.
- Candidates who are re-taking courses in Parts Two and Three in accordance with Regulation 10 may apply for permission to enrol in courses from the subsequent part, where the nominated courses are from different areas of study to the courses unpassed; permission will only be granted where, in the opinion of Academic Board, the academic record of the candidate shows proven merit.
- The Degree of Bachelor of Food Technology with Honours may be awarded with First Class Honours or with Second Class Honours (Division I) or with Second Class Honours (Division II), or with Third Class Honours. The class of Honours shall be determined by the candidate's performance in the Second, Third and Fourth Parts of the Degree.
- Candidates who have passed all courses and completed all other requirements for a Bachelor of Food Technology with Honours but whose performance in the courses is deemed by the Academic Board, upon recommendation of the examiners, not to be of Honours standard will be awarded the Degree of Bachelor of Food Technology.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Bachelor of Science should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Regulation Notes

Specific Regulations for the Degree of Bachelor of Food Technology with Honours jointly delivered and awarded with the Singapore Institute of Technology

Schedule for the Bachelor of Food Technology with Honours

Part One (120 credits from)

120101 Plant Biology.....	15 credits
123104 Chemistry for Biological Systems.....	15 credits
R 123101, 123171	
123105 Chemistry and the Physical World.....	15 credits
R 123102, 123172	
124104 Physics 1A: Mechanics and Thermodynamics.....	15 credits
R 124101, 124111, 124171	
160101 Calculus.....	15 credits
R 160112, 160133, 228172	
160102 Algebra.....	15 credits
R 160112, 160133, 228172	
228115 Introduction to Food Technology.....	15 credits
R 141111 or 228111	
247114 Science and Sustainability for Engineering and Technology.....	15 credits
R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247111, 247112, 247113	

Part Two (120 credits from)

123201 Chemical Energetics.....	15 credits
P One of (123102, 123105, 124104 or 123172) and one of (160101, 160102, 160105, 160132 or 160133)	
123271 Molecules to Materials.....	15 credits
P (123101, 123104 or 123171) and (123102, 123105 or 123172)	
141211 Food Product Development Principles.....	15 credits
P (228115, 247114) OR (123172, 124172, 228172, 141112) R 228211	
141212 Food Manufacturing Principles.....	15 credits
P (123105 or 123172), (124104 or 124172), (160102 or 228172) and (141112 or 228112 or 228115) C 123201, 280201, 280272 R 228212	

228271 Engineering Mathematics 2.....	15 credits
P 228172 or (160101 and 160102) R 228222, 228223	
280201 Industrial Microbiology.....	15 credits
P (123101 or 123104 or 123171) and (123102 or 123105 or 123172 or 122102) R 162212, 162214	
280271 Heat and Mass – Conservation and Transfer.....	15 credits
P (124104, 160102 and 228115) OR (124172 and 228172)	
280272 Fluid Flow and Particle Technology.....	15 credits
P (123104 or 123172), (124104 or 124172), (160102 or 228172)	

Part Three (120 credits from)

141311 Food Microbiology and Safety.....	15 credits
P One of 280201, 141222, 162212 or 162214	
141312 Food Characterisation.....	15 credits
P 123271, 123201, 141211, 141212 R 141330	
141362 Food Formulation Technology.....	15 credits
P 123271, 123201	
141395 Food Chemistry.....	15 credits
P 123271 and 123201 R 151231	
228371 Statistical Modelling for Engineers and Technologists.....	15 credits
P 228271	
280371 Food Process Engineering Operations.....	15 credits
P 280271 and 280272 R 280391	
280372 Reaction Technologies and Process Modelling.....	15 credits
P 123201, 123271, 228271, 280271, 280272, 280201 R 280391 and 280392	

Part Four (120 credits from)

141710 Food Packaging Engineering and Legislation.....	15 credits
141723 Industrial Systems Improvement.....	15 credits
R 287342	

Majors

Food Process Engineering (105 credits)

Part Three (15 credits from)

280304 Bioseparation and Purification Processes.....	15 credits
P (141294 and (280299 or 141221)) or (280271 and 280272) R 142304	

Part Four

Compulsory courses (90 credits from)

141749 Food Engineering Research Project.....	30 credits
P 141311, 141362, 141395, 228371, 280304, 141312, 280371 and 280372 R 141759	
141797 Food Engineering Design.....	30 credits
P (141311 or 141393), (141312 or 280393), 141362, 141395, (228371 or 228340), 280304, (280371 or 280391), (280372 or 280392) R 141471, 141444	
280702 Process Control.....	15 credits
P (228222 or 228271) and (280371 or 280391) R 142402	
280771 Advanced Food Engineering.....	15 credits
P 280371 and 280372 R 280403	

Food Product Technology (105 credits)

Part Three (15 credits from)

R 287730

The programme of study for the degree of Bachelor of Food Technology with Honours jointly delivered and awarded with the Singapore Institute of Technology will consist of modules/courses totalling 240 Singapore Institute of Technology credits/480 Massey University credits, completed in accordance with Regulations 1 to 17 for the degree. Notwithstanding Regulation 13, students from the Singapore Institute of Technology may be awarded higher distinction or distinction, in accordance with Singapore Institute of Technology regulations.

Part IA

For the degree of Bachelor of Food Technology with Honours jointly delivered and awarded with the Singapore Institute of Technology, the regulations are to be read in conjunction with the regulations relating to Massey University's qualifications and with all other Statutes and Regulations of the Singapore Institute of Technology.

The Degree of Bachelor of Screen Arts with Honours BSA(Hons)

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Bachelor of Screen Arts with Honours requires that the candidate will meet the University admission requirements as specified.
2. An applicant who holds the degree of Bachelor of Screen Arts shall not be admitted to the Bachelor of Screen Arts with Honours.

Qualification Requirements

3. Candidates for the Degree of Bachelor of Screen Arts with Honours shall follow a flexible programme of study, which shall consist of courses totalling 480 credits, comprising:
 - (a) a minimum of 405 credits as specified in the Schedule to the Qualification; and
 - (b) up to 75 credits from any other courses offered by the University; and including
 - (c) a maximum of 165 credits at 100 level;
 - (d) at least 90 credits at 200 level;
 - (e) at least 105 credits at 300 level;
 - (f) at least 120 credits at 400 level or above
 - (g) completion of at least one major

Specialisations

4. Candidates must complete the requirements of at least one major as specified in Schedule B of the Qualification.
5. Single majors available are: Animation; Factual Production; Film Production; Game Development; Immersive Media; Media Technology; and Visual Effects
6. Candidates may complete a double major in Mātauranga Toi Māori and one other specialisation from Regulation 5 by the requirements of the specialisations as set out in Schedule B. Individual courses cannot be counted towards both majors. Such candidates may, however, count up to 135 credits towards both the Mātauranga Toi Māori major and the Core.
7. Candidates may include a minor from any other undergraduate degree within the University for which recognised minors are specified, in accordance with the requirements for the minor as specified in the regulations of the qualification from which the minor has been drawn.

Student Progression

8. The Degree of Bachelor of Screen Arts with Honours may be awarded with First Class Honours or with Second Class Honours Division I or Second Class Honours Division II or with Third Class Honours. The class of Honours awarded shall be determined by the examiners on the performance of the candidate in the 700- and 800-level courses within the schedule.

Completion Requirements

9. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
10. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. The Degree of Bachelor of Speech and Language Therapy with Honours

BSpchLNgThHons

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Speech and Language Therapy with Honours requires that the candidate will:
 - meet the University admission requirements as specified; and will have;
 - been selected into the Qualification based on a selection process that will include a written application, criminal record check, interview and referee checks; and
 - achieved an IELTS of 7.0 with no band less than 7.0 within the preceding two years if English is not the applicant's first language.

Qualification Requirements

- Candidates for the Degree of Bachelor of Speech and Language Therapy with Honours shall follow a parts-based programme of study, which shall consist of courses totalling at least 480 credits, comprising Part 1, Part 2, Part 3, Part 4 courses, as specified in the Schedule to the Qualification; and including attending field trips, workshops, tutorials, and laboratories as required.

Specialisations

- There are no specialisations for this qualification.

Academic Requirements

- Every candidate for the Degree of Bachelor of Speech and Language Therapy with Honours shall perform to the satisfaction of Academic Board or their delegate supervised clinical practice, in accordance with the requirements of the following courses:
 - 271390 Field Work and Clinical Skills
 - 271796 Advanced Clinical Practicum I
 - 271798 Advanced Clinical Practicum II

Student Progression

- In order to progress from Part 1 to Part 2, or Part 2 to Part 3 a candidate must have passed all courses in the preceding Part.
- For progression to Part 4 of Bachelor of Speech and Language Therapy with Honours, candidates must have maintained at least a B+ grade average in the Part 3 courses.
- The Degree of Bachelor of Speech and Language Therapy with Honours may be awarded with First Class Honours or with Second Class Honours Division I or Second Class Honours Division II or with Third Class Honours. The class of Honours awarded shall be determined by the examiners on the performance of the candidate in Part 4 of the programme.

Completion Requirements

- A candidate's programme of study may not exceed eight consecutive years, unless a specified time of suspension or extension has been approved by the Academic Board. Permission must be sought in advance of any suspension or extension by applying in writing to the College Pro Vice-Chancellor or their delegate. Suspensions or extensions granted will appear on the academic transcript.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Bachelor of Speech and Language Therapy should they meet the relevant qualification requirements.

Academic Progress

- For candidates enrolled in the Bachelor of Speech and Language Therapy with Honours the following will lead to exclusion from the qualification:
 - failure to complete a compulsory course in two successive attempts;
 - failure to pass courses totalling at least 75 credits or failure to pass at least 60 percent of an approved part-time programme of study in any academic year;
 - failure to complete the degree within eight consecutive years, unless a suspension or extension has been granted under Regulation 8.

Transitional Provisions

11. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Bachelor of Speech and Language Therapy with Honours prior to 01 January 2021 will be permitted to substitute 271151, if already completed, for 214101. These transition arrangements expire 01 December 2027.
12. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Bachelor of Speech and Language Therapy with Honours prior to 01 January 2024 who have successfully completed both 271395 and 271396 may substitute these for 271390. Such students may take Special Topic course 230793 instead of 271781. These transition arrangements expire 31 December 2026.

Schedule for the Bachelor of Speech and Language Therapy with Honours**Part One**

- not more than 135 credits at 100 level;
 - at least 90 credits at 300 level;
- and including:
- all of the core courses listed in Schedule A of the Schedule to the Qualification (285 credits);
 - courses as specified in Schedule B to the Qualification (45 credits), including 30-45 credits from 110304, 110369, 110379 or 110389 and no more than 15 credits from 125320 or 125330;

- one numeracy course as specified in Schedule C to the Qualification (15 credits);
- One course with a 110, 114, 115, 125, 127, 152, 153, 155, 156, 157, 178 or 295 prefix at 100-level or above 100 level (15 credits).

Specialisations

3. There are no specialisations for this degree.

Student Progression

4. Progression requirements as specified in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Business Studies should they meet the relevant Qualification requirements.

Academic Progress

7. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Bachelor of Accountancy

Schedule A: Core courses (285 credits from)

110109	Introductory Financial Accounting	15 credits
	P 115112 or 115102 or 110100 C 115112 or 115102 R 110215, 110230, 110213 (1999)	
110209	Intermediate Financial Accounting	15 credits

155210	Commercial Law	15 credits
	P 115211 or 115103 or 155202 R 155200, 155700	

Schedule B: Accountancy and Finance courses (45 credits from)

Between 30 and 45 credits from

110304	Data Analytics for Accounting and Business	15 credits
	P 115112 and 115114 and 115116	
110369	Forensic Accounting	15 credits
	P 110279	
110379	Advanced Auditing	15 credits
	P 110109 or 110215 or 110230; and 110279 or 110274	
110389	Advanced Taxation	15 credits
	P 110109 or 110215 or 110230; and 110289 or 110274 R 110783	

No more than 15 credits from (No more than 15 credits from)

125320	International Finance	15 credits
	P 125230; and one of 125220 or 125241 or 110209 or 152261	
125330	Advanced Business Finance	15 credits
	P 125230	

Schedule C: Numeracy courses (15 credits from)

161101	Statistics for Business	15 credits
	R 115101, 161100, 161111, 161120, 161122, 161130, 161140, 297101	
161111	Applied Statistics	15 credits
	R 115101, 161101, 161120, 161122, 161130, 161140	

The Degree of Bachelor of Agribusiness BAgribusiness

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Bachelor of Agribusiness requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Agribusiness shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 165 credits at 100 level;
 - at least 75 credits at 300 level;
 and including:
 - the core courses as defined by Schedule A for the Qualification;
 - completion of one major;
 - attending field trips, studios, workshops, tutorials and laboratories as required.
- Candidates who, in the opinion of the Academic Board, have passed with sufficient merit subjects for either a Diploma in Farm or Horticultural Management from a New Zealand university, or relevant subjects from some other recognised tertiary qualification, may be cross-credited with specified or unspecified courses not exceeding a total of 120 credits.

Specialisations

- Candidates must complete a major by completing the requirements for a major set out in Schedule B for the Qualification.
- No course may be credited to more than one major subject.
- Majors available are Farm Management, Horticultural Management, International Agribusiness, and Rural Valuation.
- Candidates who complete the Rural Valuation major must additionally meet the non-academic requirements specified by the Valuers Registration Board for eligibility to apply for registration.

- Candidates may include a minor in the Bachelor of Agribusiness.
 - A minor must include a minimum of 60 credits, including at least 45 credits above 100 level, of which at least 15 credits must be at 300 level.
 - The requirements for each minor are set out in Schedule B for the Qualification.
 - The minor must be in a different subject area from the major.
 - Minors may be included from any undergraduate degree within the University for which recognised minors are specified.
 - Where the minor is from another undergraduate degree the regulations of that programme for the minor will apply.
 - No course may be credited to both a major and a minor.
 - No course may be credited to more than one minor subject.
- Minors available are: International Agribusiness, Māori Agribusiness and Rural Valuation.

Academic Requirements

- Candidates must complete to the satisfaction of the Academic Board a period of not less than 26 weeks of approved practical work experience and associated reports in accordance with the requirements of 119150 Practicum I, and 119250 Practicum II.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Qualifications will apply.
- Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Agribusiness (Farm Management) who have successfully completed 123103 or 123104 may substitute one of these for 247111.

15. Candidates enrolled in the Bachelor of Agribusiness (Rural Valuation) who have successfully completed 123103 or 123104 may substitute one of these for 247111. Such candidates who have successfully completed 132221 may substitute this for 127378.
16. These transition arrangements expire 31 December 2026.
17. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Agribusiness (International Agribusiness) prior to 1 January 2024 may substitute 178358 if successfully completed for 178312, until 31 December 2026.
18. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Agribusiness (Farm Management or Rural Valuation) prior to 1 January 2025 may substitute an elective course that has been successfully passed for 112301, until 31 December 2027.

Schedule for the Bachelor of Agribusiness

Schedule A: Core courses (135 credits from)

112248	Food and Agribusiness Value Chains P 119180	15 credits

The Degree of Bachelor of Agricultural Science BAGSci

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Degree of Bachelor of Agricultural Science requires that the candidate will meet the University admission requirements as specified.
- In all cases, if English is not the applicant's first language and the admission requirements were not completed at an educational institution where English is the medium of instruction, the applicant shall have achieved an IELTS of 6.5 with no band less than 6.0.

Qualification Requirements

- Candidates for the Degree of Bachelor of Agricultural Science shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 165 credits at 100 level;
 - at least 75 credits at 300 level;
 and including:
 - the courses defined by Schedule A for the Qualification;
 - the remaining courses should normally be from Schedule B;
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.
- Notwithstanding the requirements of Regulation 3, the programme of study for candidates enrolling in the Equine major shall consist of courses as defined by Schedule C.
- Candidates who, in the opinion of the Academic Board, have passed with sufficient merit subjects for either a New Zealand University Diploma in Farm Management or a New Zealand Diploma in Horticultural Management or subjects for some other recognised tertiary qualification may be cross-credited with specified or unspecified courses not exceeding a total of 120 credits.

Specialisations

- The Bachelor of Agricultural Science may be awarded with or without a specialisation.
- The approved major is Equine, the requirements for which are set out in Schedule C.

- Notwithstanding Regulation 7, candidates enrolled in the Bachelor of AgriScience prior to 2019 may complete a major in Agriculture or Horticulture in accordance with Transition Provision 13.

Academic Requirements

- Candidates must complete to the satisfaction of the Academic Board two 13-week periods of practical work experience and a total of not less than 26 weeks of approved practical work experience in accordance with the following courses: 119150 Practicum I and 119250 Practicum II.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Agricultural Science prior to 1 January 2022 who have successfully completed one or more of 117381, 189363, 189365 and/or 283305 may substitute the course or courses taken for a course or courses of the same value and at the same level from the Compulsory Course Selection schedule. Such candidates who have successfully completed at least 30 credits of elective courses from Schedule B may substitute a course or courses completed from Schedule B for a course or courses in the Compulsory Course Selection schedule, up to a maximum of 45 credits.
- These transition arrangements expire 31 December 2025.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Agricultural Science prior to 1 January 2023 who have successfully completed 123103 may substitute this for 117107 or 233105 until 31 December 2026.

117345	Genetics for Livestock Improvement.....	15 credits
	P One of 117201, 117245 or 117254 or 203202	
117371	Animal Production.....	15 credits
	P One of 117201, 117202 or 117254	

119358	Farm Production Systems.....	15 credits
	P 119381	
138301	Precision Agriculture Technologies.....	15 credits
189362	Integrated Farm and Environmental Management.....	15 credits
	P 189251 or 121213	
235312	Case Studies in Māori Agribusiness.....	15 credits
	P 119180	
283301	Pasture Production and Practice.....	15 credits
	P 283201	
283310	Topics in Agronomy.....	15 credits
	P 119120	

Schedule B: Elective courses (30 credits from)

Approved courses selected from the schedules to the following degree programmes: BAgSci, BHortSci, BAgribusiness, BSc, BA, BBus, BAnSci and BInfSc.

Schedule C: Specialisations

Equine (150 credits)

No new enrolments

Core AgriScience courses (150 credits from)

115113	Economics for Business.....	15 credits
	R 115106	
119150	Practicum I.....	0 credits
119180	Introduction to Agribusiness.....	15 credits
119250	Practicum II.....	0 credits
	P 119150	
119281	Decision Tools for Primary Industries.....	15 credits
	P 119180 or 117155	
119373	Integrative Studies.....	15 credits
	P 119250	
119381	Decision-Making in Primary Industry.....	15 credits
	P 119281	
138255	Applied Engineering in Agriculture and Horticulture Systems.....	15 credits
161140	Agri-Statistics.....	15 credits
	R 161100, 161101, 161111, 161120, 161122, 161130, 115101, 195101, 297101	

Equine Major courses (150 credits from)

119258	Agricultural Systems.....	15 credits
	P 119281 R 284201	
119358	Farm Production Systems.....	15 credits
	P 119381	
286251	Equine Behaviour, Training and Welfare.....	15 credits
286321	Responses to Training in the Equine Athlete.....	15 credits
	P One of 117152, 117153, 117155 or 194101	

Elective Courses (60 credits)

Elective courses (60 credits from)

An approved selection of 100-, 200- and 300-level courses listed in the schedules to the following degree programmes: BAgSci, BAgribusiness, BSc, BA, BBus, BAnSci and BInfSc.

The Degree of Bachelor of Animal Science BAnSci

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Degree of Bachelor of Animal Science requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Animal Science shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 150 credits at 100 level;
 - at least 90 credits at 300 level;

and including:

- the core courses listed in Schedule A for the Qualification;
- completion of a major;
- attending contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- Candidates must complete a major by passing at least 120 credits in a major. The requirements for each major are set out in Schedule B for the Qualification.
- Approved majors are: Animal Genetics and Breeding, Animal Nutrition and Growth, Animal Welfare and Equine Science.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation

may, subject to the approval of Academic Board, be awarded the Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

7. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Bachelor of Animal Science

Schedule A: Core Courses (195 credits from)

117107	Introduction to Animal Behaviour and Welfare	15 credits
117155	Introduction to Animal Science R 117152, and 117153	15 credits
117201	Livestock Production Science P One of 117152, 117153, 117155, 194101, 199101, or 199103	15 credits
117202	Animal Science P One of 117152, 117153, 117155, 194101, 199101 or 199103	15 credits
117371	Animal Production P One of 117201, 117202 or 117254	15 credits
122102	Biochemistry P 123101 or 123104 or 123103 (A pass required) R 122222, 227111, 227106	15 credits
123104	Chemistry for Biological Systems R 123101, 123171	15 credits
124103	Biophysical Principles R 160101, 160102, 160103, 160104, 160105, 160111, 160112, 160132, 160133, 124100, 124104, 124105, 124111	15 credits
161140	Agri-Statistics R 161100, 161101, 161111, 161120, 161122, 161130, 115101, 195101, 297101	15 credits
162101	Cell Biology	15 credits
199103	Animals and the Environment R 199101	15 credits
247111	Science and Sustainability for Agriculture and Horticulture R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247112, 247113, 247114	15 credits

15 credits from

117381	Solving Problems in Animal Production P 117201 or 117202 or 117254	15 credits
235312	Case Studies in Māori Agribusiness P 119180	15 credits

Schedule B: Specialisations

Animal Genetics and Breeding (120 credits)

Compulsory courses (120 credits from)

117243	Animal Reproduction and Lactation in Livestock P One of 117153, 117155 or 194101	15 credits
117245	Principles of Animal Breeding and Genetics	15 credits
117301	Animal Biosecurity and Health	15 credits
117343	Animal Reproduction and Lactational Physiology P 117243 or 194242 R 117347	15 credits
117345	Genetics for Livestock Improvement P One of 117201, 117245 or 117254 or 203202	15 credits
117348	Animal Metabolism P (One of 122202, 122233 or 151232) and (one of 117202 or 194241)	15 credits

122202	The Dynamic Cell P 122102 R 122233	15 credits
194243	Physiological Strategies for Survival P One of 117155, 194101, 199101 or 199103 R 194245	15 credits

Animal Nutrition and Growth (120 credits)

Compulsory Courses (120 credits from)

117224	Animal Feed Science and Technology	15 credits
117225	Animal Production through to Carcass Classification	15 credits
117226	Performance Animal Nutrition P One of 117152, 117153, 117155 or 194101	15 credits
117302	Monogastric Animal Nutrition P 117201 or 117202 or 117254 R 117342	15 credits
117303	Ruminant Animal Nutrition P 117201 or 117202 or 117254 R 117342	15 credits
117344	Animal Growth and Meat Production P 117201 or 117225 or 117254	15 credits
117348	Animal Metabolism P (One of 122202, 122233 or 151232) and (one of 117202 or 194241)	15 credits
122202	The Dynamic Cell P 122102 R 122233	15 credits

Animal Welfare (120 credits)

Compulsory Courses (120 credits from)

117231	Animal Health and Welfare P One of 117152, 117153, 117155 or 117107 R 117255	15 credits
117301	Animal Biosecurity and Health	15 credits
117331	Dilemmas in Animal Welfare	15 credits
117332	Animal Welfare Science P Two of 194241, 194242, 194243 or 199203 R 194343	15 credits
117361	Companion Animal Science	15 credits
194242	Physiology of Mammalian Organ Systems P 194101 or 214101 or 117155 or 117153 or 199103	15 credits
194243	Physiological Strategies for Survival P One of 117155, 194101, 199101 or 199103 R 194245	15 credits
199203	Evolutionary Principles of Animal Behaviour P One of (199103, 199101 or 196101) R 199204, 117255	15 credits

Equine Science (120 credits)

Compulsory Courses (120 credits from)

117226	Performance Animal Nutrition P One of 117152, 117153, 117155 or 194101	15 credits
117231	Animal Health and Welfare P One of 117152, 117153, 117155 or 117107 R 117255	15 credits
117302	Monogastric Animal Nutrition P 117201 or 117202 or 117254 R 117342	15 credits
117361	Companion Animal Science	15 credits
286201	Equine Production R 286101	15 credits
286251	Equine Behaviour, Training and Welfare	15 credits
286301	The Equine Lower Limb R 286222	15 credits
286321	Responses to Training in the Equine Athlete P One of 117152, 117153, 117155 or 194101	15 credits

The Degree of Bachelor of Applied Economics BApplEcon

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Degree of Applied Economics requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Applied Economics shall follow a flexible programme of study which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 180 credits at the 100 level; and
 - at least 270 credits from the Schedule to the Degree;
 - at least 90 credits at the 300 level from the Schedule to the Degree; and including:
 - the core courses as specified in Schedule A for the Degree;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- The Bachelor of Applied Economics is awarded without a major.
- Candidates may complete a minor by passing at least 60 credits for one of the Bachelor of Applied Economics minoring subjects, including:

- (a) at least 45 credits above 100 level; and
 (b) at least 15 credits at 300 level.
5. The requirements for each minor are set out in Schedule B for the Degree of Applied Economics.
6. Minors available in the Bachelor of Applied Economics are: Accountancy; Finance; and Valuation and Property Management.

Completion Requirements

7. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees will apply.
8. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Business Studies should they meet the relevant Qualification requirements.

Academic Progress

9. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Bachelor of Applied Economics

Schedule A: Core courses (150 credits from)

115113 Economics for Business.....	15 credits
R 115106	
178100 Principles of Economic Policy.....	15 credits
178111 Quantitative Methods for Economics.....	15 credits
178200 Macroeconomics.....	15 credits
P 178100 or 115113	
178201 Microeconomics.....	15 credits
P 115113 or 115106	
178280 Regression and Predictive Analysis.....	15 credits
P 115113 or 115109	
178300 Macroeconomic Policy and Applications.....	15 credits
P 178200	
178301 Competition and Industry.....	15 credits
P 178201	
178380 Business Forecasting.....	15 credits
P 178220 or 178280 R 178321 and 178320	

Business Communication Course (At least 15 credits from)

115111 Communication Theory and Practice.....	15 credits
R 219100 and 219203	

Schedule B: Minors

Accountancy (60 credits)

Selection from

110109 Introductory Financial Accounting.....	15 credits
P 115112 or 115102 or 110100 C 115112 or 115102 R 110215, 110230, 110213 (1999)	
110209 Intermediate Financial Accounting.....	15 credits
P 110109 or 110215 or 110230 R 10210, 10213 (Pre 1999), 110313	
110229 Management Accounting.....	15 credits
P 110109 or 110215 or 110230 R 10200, 10220, 110223	
110249 Accounting Information Systems.....	15 credits
P 110109 or 110215 or 110230 R 10240, 110243	
110309 Advanced Financial Accounting.....	15 credits
P 110209 or 110313 R 110713, 10310	
110329 Advanced Management Accounting.....	15 credits
P 110229 or 110223 R 110320	

Finance (60 credits)

Selection from

115114 Finance Fundamentals.....	15 credits
R 115105	
125220 Financial Institutions and Markets.....	15 credits
P 115114	
125230 Business Finance.....	15 credits
P 115114	
125241 Introduction to Investments.....	15 credits
P 115114 R 125240	
125320 International Finance.....	15 credits
P 125230; and one of 125220 or 125241 or 110209 or 152261	
125330 Advanced Business Finance.....	15 credits
P 125230	
125340 Investment Analysis.....	15 credits
P 125241 R 125342	
125350 Financial Risk Management.....	15 credits
P 125230; and either 125220 or 125241	
125364 Bank Financial Management.....	15 credits
P 115114 or 115105; and 125220 R 125360, 125361, 125362, 125363	

Valuation and Property Management (60 credits)

Selection from

127241 Property Market Principles.....	15 credits
127242 Introduction to Property Valuation.....	15 credits
R 127255	
127245 Introduction to Property Finance and Investment.....	15 credits
P 115114 or 115105	
127341 Property Management and Development.....	15 credits
P 127241	
127342 Applied Property Finance and Investment.....	15 credits
P 127241, 127242, 127245 and one of 127341 or 127343 or 127378 C 127341 or 127343 or 127378	
127378 Property Economics and Planning.....	15 credits

Schedule C: Elective courses

112248 Food and Agribusiness Value Chains.....	15 credits
P 119180	
112302 Food and Agribusiness Strategies.....	15 credits
P 112248	
115112 Accounting for Business.....	15 credits

178370 Development Economics.....	15 credits

Approved courses from any other degree offered by the University

The Degree of Bachelor of Arts

BA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Degree of Bachelor of Arts requires that the candidates will meet the University admission requirements as specified.

Qualification Requirements

2. Candidates for the Degree of Bachelor of Arts shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
- (a) not more than 165 credits at 100 level;

- (b) at least 75 credits at 300 level; and including:
 - (c) at least 240 credits from the Schedule to the Degree;
 - (d) completion of at least one major;
 - (e) core courses as listed in Schedule A for the Qualification;
 - (f) attending field trips, studios, workshops, tutorials and laboratories as required.
3. For the purposes of meeting Regulation 2 (c), where a course with the prefix 114, 121, 152, 153, 190, 219, 249 or 258 is included in the schedule for a Bachelor of Arts major or minor, for candidates completing that major or minor the course is considered to be from the Schedule for the Bachelor of Arts degree. For all other candidates such courses will be regarded as being from outside the Schedule for the Bachelor of Arts.
 4. Candidates who have been awarded or qualified for a Bachelor's degree, or equivalent may be granted exemption from the requirement to include courses 230111 and 230112 in their programme of study.

Specialisations

5. Candidates may complete a major by passing at least 120 credits in a major including:
 - (a) at least 15 credits at 100 level;
 - (b) at least 30 credits at 200 level;
 - (c) at least 45 credits at 300 level;
 - (d) any compulsory courses identified in the Schedule to the Major. The requirements for each major are set out in Schedule B for the Qualification.
6. Notwithstanding Regulation 5, a candidate may complete a major in Mathematics by completing at least 135 credits in the major including:
 - (a) at least 30 credits at 100 level;
 - (b) at least 45 credits at 200 level;
 - (c) at least 60 credits at 300 level;
 - (d) any compulsory courses identified in the Schedule to the Major. The requirements for the Mathematics major are set out in Schedule B for the Qualification.
7. Candidates may complete a double major by passing at least 120 credits in each of two of the majoring subjects listed in Regulation 8 including:
 - (a) at least 15 credits at 100 level for each major;
 - (b) at least 30 credits at 200 level for each major;
 - (c) at least 45 credits at 300 level for each major;
 - (d) any compulsory courses identified in the Schedule to the Degree; and, only where a course is listed in the requirements for both majors:
 - (e) an additional course of at least the same credit value, at the same or higher level, with the same discipline prefix.
8. Majors available are: Chinese, Classical Studies, Creative Writing, Defence Studies, Economics, Education, Educational Psychology, English, Environmental Studies, Geography, History, Japanese, Linguistics, Māori Knowledge, Mathematics, Media Studies, Philosophy, Politics and International Relations, Psychology, Security Studies, Social Anthropology, Social Policy, Sociology, Spanish, Statistics, Te Reo Māori.
9. Notwithstanding Regulations 5, 7 and 8 a candidate may complete a major in Business Psychology by completing 195 credits, including:
 - (a) 30 credits at 100 level;
 - (b) 75 credits at 200 level;
 - (c) 90 credits at 300 level;
 - (d) any compulsory courses listed in the Schedule to the Degree. The requirements for the Business Psychology major are set out in Schedule B for the Qualification.
10. Candidates may include a maximum of two minors in the Degree of Bachelor of Arts.
11. The minor(s) must be in a different subject area from the major(s).
12. Minors may be included from the Bachelor of Business or the Bachelor of Science degree.
13. Where the minor is from another undergraduate degree the regulations of that programme for the minor will apply, unless the minor is also available in the Bachelor of Arts, in which case the Bachelor of Arts regulations will apply.
14. A minor must include:
 - (a) a minimum of 60 credits;
 - (b) at least 45 credits above 100 level;
 - (c) 15 credits at 300 level;
 - (d) any additional requirements as specified in Part Two to the Schedule to the Degree.
15. Notwithstanding Regulation 14, a candidate may complete a minor in Chinese, French, Japanese, Portuguese, Spanish or Te Reo Māori by completing 60 credits, including:
 - (a) at least 30 credits above 100 level;
 - (b) at least 15 credits at 300 level;
 - (c) any compulsory courses identified in the Schedule to the Minor.

16. Notwithstanding Regulation 14, a candidate may complete a minor in Mathematics, Public and Professional Writing, or Women's Studies by completing at least 75 credits in the minor including:
 - (a) at least 45 credits above 100 level;
 - (b) 15 credits at 300 level;
 - (c) any additional requirements as specified in Part Two to the Schedule to the Degree.
17. Minors available are: Chinese, Classical Studies, Creative Writing, Defence Studies, Development Studies, Disability and Rehabilitation Studies, Economics, Education, Educational Psychology, Emergency Management, English, Environmental Studies, French, Geography, History, Indigenous Psychologies, Japanese, Linguistics, Māori Knowledge, Mathematics, Media Studies, Philosophy, Planning Studies, Politics and International Relations, Portuguese, Psychology, Public and Professional Writing, Security Studies, Social Anthropology, Social Policy, Sociology, Spanish, Statistics, Te Reo Māori, Theatre Studies and Women's Studies.
18. No course may be credited to more than one major, to a major and a minor, or to more than one minor.

Student Progression

19. Core courses 230110, 230111 and 230112 must be completed within the first 120 credits, and 230210 within the first 240 credits of study towards the degree.

Completion Requirements

20. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates will apply.
21. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Arts or the Certificate in Arts should they meet the relevant Qualification requirements.

Academic Progress

22. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

23. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Educational Psychology major or minor prior to 01 January 2021 will be permitted to substitute 256303, if already completed, for 263331, and/or 249284, 249287 and/or 258301 for a non-compulsory course(s) at the same level included in the schedule. These transitional arrangements expire on 31 December 2025.
24. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Politics and International Relations major or minor prior to 01 January 2021 may elect to be awarded the alternative specialisation title of Politics on completion. These transition arrangements expire 31 December 2025.
25. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the English major prior to 1 January 2021 will be permitted to substitute 139275 and/or 139374 for course(s) at the same level included in the schedule. These transitional arrangements expire on 31 December 2025.
26. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Statistics major prior to 01 January 2021 will be permitted to substitute 161200, if already completed, for a compulsory course at the same or lower level included in the schedule. These transitional arrangements expire on 31 December 2025.
27. Subject to any Maximum Time to Completion regulation and the Abandonment of Study provisions specified in the Part I regulations for the degree, candidates who commenced study towards the Disability and Rehabilitation Studies minor prior to 01 January 2022 may elect to be awarded the alternative specialisation title of Rehabilitation Studies on completion. Such candidates may substitute 147202 and/or 147302, if already completed, for 147317 and/or 147304. These transition arrangements expire 01 December 2026.
28. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Economics major prior to 01 January 2022 will be permitted to substitute a 200 and/or 300 level course(s) already completed towards the major for 178250 or 178280. Such candidates will be permitted to substitute a 300-level

The Degree of Bachelor of Arts / Bachelor of Business BA/BBus

No new enrolments**Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Conjoint Programme for Bachelor of Arts and Bachelor of Business requires that the candidate will meet the University admission requirements as specified.
- A candidate who has already completed the requirements of one of the component degrees will not be permitted to enrol in the conjoint programme.

Qualification Requirements

- Candidates for the Conjoint Programme for Bachelor of Arts and Bachelor of Business shall follow a flexible programme of study, which shall consist of courses totalling at least 510 credits, comprising:
 - completion of a Bachelor of Arts component;
 - completion of a Bachelor of Business component;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Each course successfully completed for the conjoint programme shall be credited to one or other of the two components. Except as provided by these regulations, each component shall be governed by the regulations of the corresponding degree.
- Courses may not be cross-credited into or between components of the conjoint BA/BBus programme.
- The Bachelor of Arts component shall consist of a total of 255 credits made up as follows:
 - The five compulsory Arts courses: 230110, 230111, 230112, 230210, and 230310. Courses 230110, 230111 and 230112 must be completed within the first 120 credits of the BA component. Course 230210 must be completed within the first 195 credits of the BA component.
 - The majoring requirements of at least one subject as specified in the BA Schedule. Business Psychology is not available as a major in the conjoint programme.
 - Courses with prefixes 114, 115, 152, 153, 178, 190, 219 and 295 may be included in the BA component only if they are listed on the schedule for a major in Defence Studies, Economics, Environmental Studies, Media Studies, Politics, Security Studies or Social Policy, and only by students enrolled in that major.
 - The remaining credits selected from Schedule B and/or Schedule C of the Bachelor of Arts Schedule. Students may not include in these credits courses with prefixes 114, 115, 152, 153, 178, 190, 219 or 295.

- The Bachelor of Business component shall consist of a total of 255 credits made up as follows:
 - The compulsory eight core business courses: 115111, 115112, 115113, 115114, 115115, 115116, 115211, 115212.
 - Completion of a major in accordance with the regulations for the BBus.
 - No fewer than 120 credits at the 200 level or above, of which at least 60 credits must be at the 300 level, selected from Schedule B of the Schedule for the BBus degree.
 - Students taking a major in Economics in the BA component may not include courses from this major in the BBus component.

Specialisations

- Candidates may complete a major in each component by complying with the requirements of the regulations of the corresponding degree.

Student Progression

- Candidates shall pass all courses and maintain a grade average of B or higher in order to continue enrolment in the conjoint programme.
- A candidate is required to advance studies concurrently in both components of the programme in each year of enrolment.

Completion Requirements

- A candidate's programme of study may not exceed 10 years from date of first enrolment in a course to be credited to the Conjoint Programme for Bachelor of Arts and Bachelor of Business.
- Candidates may be graduated and jointly awarded the Bachelor of Arts and the Bachelor of Business when they meet the Admission, Qualification, and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Bachelor of Arts or the Bachelor of Business or another qualification should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Notwithstanding Regulation 9, candidates who were enrolled in the Conjoint Programme for Bachelor of Arts and Bachelor of Business commencing in 2015 or earlier shall pass all courses and achieve a grade average of B- or higher each year in order to continue enrolment in the conjoint programme.

The Degree of Bachelor of Arts / Bachelor of Science

BA/BSc

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Conjoint Programme for Bachelor of Arts and Bachelor of Science requires that the candidate will meet the University admission requirements as specified.
2. A candidate who has already completed the requirements of one of the component degrees will not be permitted to enrol in the conjoint programme.

Qualification Requirements

3. Candidates for the Conjoint Programme for Bachelor of Arts and Bachelor of Science shall follow a flexible programme of study, which shall consist of courses totalling at least 510 credits, comprising:
 - (a) completion of a Bachelor of Arts component;
 - (b) completion of a Bachelor of Science component;
 - (c) attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
4. Each course successfully completed for the conjoint programme shall be credited to one or other of the two components. Except as provided by these regulations, each component shall be governed by the regulations of the corresponding degree.
5. Courses may not be cross-credited into or between components of the conjoint BA/BSc programme.
6. The Bachelor of Arts component shall consist of a total of 255 credits made up as follows:
 - (a) The five compulsory Arts courses: 230110, 230111, 230112, 230210, and 230310. Courses 230110, 230111 and 230112 must be completed within the first 120 credits of the BA component. Course 230210 must be completed within the first 195 credits of the BA component.
 - (b) The majoring requirements of at least one subject as specified in the BA Schedule. Business Psychology is not available as a major in the conjoint programme.
 - (c) Courses with prefixes 121, 160, and 161 may be included in the BA component only if they are listed on the schedule for a major in Environmental Studies, Mathematics or Statistics, and only by students enrolled in that major.
 - (d) The remaining credits selected from Schedule B and/or Schedule C of the Bachelor of Arts Schedule. Students may not include in these credits courses with prefixes 121, 160, and 161.
7. The Bachelor of Science component shall consist of a total of at least 255 credits from Schedules A and B of the BSc Schedule made up as follows:
 - (a) core courses as defined by Schedule A to the Degree. At least 90 credits from Schedule A, including any compulsory courses, must be completed within the first 120 credits of study towards the BSc component, unless otherwise approved by Academic Board or their delegate.
 - (b) the majoring requirements of at least one subject as specified in Schedule B of the BSc Schedule.
 - (c) Courses with the 175 prefix may be included in the BSc component only if they are needed to meet the majoring requirements for the Psychology major in this component.

Specialisations

8. Candidates must complete a major in each component by complying with the requirements of the regulations of the corresponding degree.

Student Progression

9. Candidates shall pass all courses and maintain a grade average of B or higher in order to continue enrolment in the conjoint programme.
10. A candidate is required to advance studies concurrently in both components of the programme in each year of enrolment.

Completion Requirements

11. A candidate's programme of study may not exceed ten years from date of first enrolment in a course to be credited to the Conjoint Programme for Bachelor of Arts and Bachelor of Science.
12. Candidates may be graduated and conjointly awarded the Bachelor of Arts and the Bachelor of Science when they meet the Admission, Qualification, and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Bachelor of Arts or the Bachelor of Science or another qualification should they meet the relevant Qualification requirements.

Academic Progress

13. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

14. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates who commenced study towards the Conjoint Programme for Bachelor of Arts and Bachelor of Science prior to 1 January 2020 may, subject to approval, substitute a course or courses already taken towards the Bachelor of Science component for a course or courses at the same level included in the Schedule of the degree.
15. Candidates who have passed 90 credits or more towards the Bachelor of Science component prior to 1 January 2020 and who have passed at least 15 credits towards a major listed in Regulation 6 of the Bachelor of Science degree will be permitted to complete the major by completing the requirements as specified in Schedule C of the relevant major.
16. Candidates who have passed at least 15 credits towards a major listed in Regulation 7 of the Bachelor of Science degree prior to 1 January 2020 will be permitted to complete the major by completing the requirements as specified in Schedule C of the Bachelor of Science degree.
17. Courses with the 145 prefix may be included in the Bachelor of Science component only if they are needed to meet the majoring requirements for the Geography major in this component.
18. The transition arrangements established under Regulations 15 to 18 expire 31 December 2025.

The Degree of Bachelor of Aviation

BAv

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Bachelor of Aviation requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been selected into the programme on the basis of:
 - a Pilot Aptitude Assessment test;
 - a simulator assessment;
 - a selection interview and written tasks;
 - a 'trial flight' if required; and
 - hold the relevant medical certificate(s) for the Air Transport Pilot major (a Class One medical certificate of fitness in accordance with the CAA NZ medical requirements for the issue of an Airline Transport Pilot Licence (ATPL)); and
 - meet the requirements for 'fit and proper person' as defined by the CAA NZ; and
 - where English is not the candidate's first language, have achieved an Academic IELTS of 6.5 with no band less than 6.0, or equivalent.

Qualification Requirements

- Candidates for the Bachelor of Aviation shall follow a parts-based programme of study, which shall consist of courses totalling at least 480 credits, comprising:
 - Parts 1, 2, 3, 4, subject courses and option courses as defined by the Schedule to the Qualification;
 - no more than 225 credits at 100 level;
 - at least 75 credits at 300 level; and including:
 - any compulsory courses listed in the Schedule to the Qualification;
 - one major;
 - attending field trips, simulations, workshops, tutorials, laboratories and flight training as required.

Specialisations

- The requirements for each major are set out in the Schedule for the Qualification.
- The approved major is Air Transport Pilot (480 credits).

Academic Requirements

- Candidates are required to meet the required competencies to achieve their Commercial Pilots licence, multi-engine instrument rating and Airline Transport Pilot Licence subject theory credits in accordance with the following courses:

190104 Principles of Navigation I
 190107 Human Performance
 190112 Introduction to Flying II
 190113 Aviation Meteorology
 190114 Aircraft Systems I
 190120 Aeronautical Legislation
 190121 Aviation Meteorology 2
 190123 Aircraft Systems 2
 190124 Aircraft Performance
 190154 Principles of Navigation II
 190164 Aeroscience
 190201 Aircraft Systems 3
 190203 Air Traffic Control/Aviation Law
 190204 Flight Planning and Advanced Navigation (Part I)
 190205 Crew Resource Management
 190206 Aerodynamics 1
 190221 Climatology
 190237 Heavy Aeroplane Performance
 190254 Flight Planning and Advanced Navigation (Part 2)
 190288 Advanced Aircraft Handling
 190351 Aircraft Systems 4
 190356 Aerodynamics 2

- Candidates completing the Flight Instruction Option must complete the necessary competencies to achieve a CAA NZ 'C' Category Flight

Instructor Rating, a night instructor endorsement removal and pass the following integrated courses:

190282 Introduction to Flight Instruction
 190285 Aerobatic Aircraft Handling
 190301 Flight Instructor Human Factors
 190315 Flight Instruction Fundamentals I
 190335 Flight Instruction

- Integrated courses comprise two components: academic and practicum. A candidate must pass both the academic component and the practicum component to obtain a pass in the course.

Student Progression

- Candidates must continue to meet the requirements for 'fit and proper person' as defined by the Civil Aviation Authority throughout the duration of the programme.
- Candidates must continue to hold the required medical certifications throughout the duration of the programme.
- Progression from Part 1 to Part 2 and to each subsequent part is conditional upon the candidate's successful completion of the prior part. At the discretion of the Chief Executive Officer of the School of Aviation, or their delegate, a candidate may be granted approval to re-enrol for a failed course concurrently with the next part, subject to the University's maximum workload regulation.
- The Academic Board may, under such conditions as it may determine and taking into account the recommendations of the examiners, admit any candidate to a supplementary examination where available in a course in which the candidate failed to gain a pass.

Completion Requirements

- A candidate's programme of study may not exceed six years from the date of first enrolment in the Bachelor of Aviation, unless a specified time of suspension or extension has been approved by the Academic Board or their delegate. Permission must be sought in advance of any suspension or extension by applying in writing to the Chief Executive Officer of the School of Aviation. Suspensions or extensions granted will appear on the academic record.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Certificate in Aviation Studies or the Graduate Diploma in Aviation should they meet the relevant Qualification requirements.

Academic Progress

- For students enrolled in the Bachelor of Aviation - Air Transport Pilot major the following will lead to exclusion:
 - No candidate will be given more than two opportunities to pass each flight assessment, unless in exceptional circumstances and subject to the prior recommendation of the Student Review Board and the approval of the Chief Executive Officer for the School.
 - Candidates who have failed a flight assessment twice and whose performance is deemed unacceptable by the School of Aviation Student Review Board will be recommended to the Chief Executive Officer for the School to be excluded from the Bachelor of Aviation - Air Transport Pilot major. The Chief Executive Officer will consider the recommendation(s) of the School of Aviation Student Review Board and any other matters the Chief Executive Officer considers relevant and make a recommendation to the Academic Board (or its delegate). The Academic Board (or its delegate) will make the final decision.
 - Candidates who have failed a compulsory course twice and whose performance is deemed unacceptable by the School of Aviation Student Review Board will be recommended to the Chief Executive Officer for the School to be excluded from the Bachelor of Aviation - Air Transport Pilot major. The Chief Executive Officer will consider the recommendation(s) of the School of Aviation Student Review Board and any other matters the Chief Executive Officer considers relevant and make a recommendation to the Academic Board (or its delegate). The Academic Board (or its delegate) will make the final decision.
 - Failure to pass 45 credits in a first attempt at Part 1 of the Bachelor of Aviation - Air Transport Pilot major.
 - Persons excluded under clause (b), (c) and (d) above will not be re-admitted to the Bachelor of Aviation - Air Transport Pilot

major without first submitting themselves for re-selection into the programme and being accepted.

P 190282	
190335 Flight Instruction	30 credits
P 190282	

Option Two Aviation: Business Management

120 credits of elective courses as approved by the Chief Executive Officer.
At least 60 credits including 190288 must be selected from the 190 prefix
Aviation and up to 60 credits may be selected from the following prefixes:
110 (Accountancy), 114 (Human Resource Management), 115 (Business),
125 (Finance), 152 (Management), 153 (Dispute Resolution), 155 (Business
Law), 156 (Marketing), 157 (Information Systems), 178 (Economics), 219
(Business Communication), 295 (Business).
At least 30 credits must be at 300 level.

The Degree of Bachelor of Aviation Management BAvMan

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Aviation Management requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Aviation Management shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 135 credits at 100 level;
 - at least 75 credits at 300 level;
 and including:
 - at least 270 credits from the Schedule to the Degree, including at least 60 credits at 300 level;
 - all compulsory courses in the Schedule to the Degree;
 - up to 90 credits from the schedules of other undergraduate degrees.

- attending field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- The Degree of Bachelor of Aviation Management is awarded without specialisation.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an appropriate qualification should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Bachelor of Business requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Bachelor of Business shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 180 credits at 100 level;
 - at least 75 credits at 300 level;
 and including:
 - at least 240 credits from the Schedule to the Degree.
 - at least 120 credits from Schedule A of the Bachelor of Business Schedule;
 - completion of at least one major.
- Candidates who have been awarded the Graduate Diploma in Business Studies may cross-credit up to 45 credits at the 200 level to the BBus degree. Where the Diploma contained fewer than 45 credits at the 200 level, up to 45 unspecified 200 level credits may be credited.
- Candidates, who in the opinion of the Academic Board have passed with sufficient merit subjects for the New Zealand Certificate of Commerce, New Zealand Diploma in Business, or subjects for some other recognised tertiary qualification, may be cross-credited with specified or unspecified courses not exceeding a total of 120 credits.

Specialisations

- Candidates must complete a major by passing at least 120 credits in a major including:
 - at least 45 credits at 200 level;
 - at least 60 credits at 300 level;
 - any compulsory courses identified in Schedule B of the Schedule to the Degree.
 The requirements for each major are set out in Schedule B of the Schedule for the Qualification.
- Notwithstanding Regulation 5, candidates who are completing a double major may substitute one of the internship courses 115388 or 115389 for 15 credits from the elective course(s) specified for one or both majors (not including the Applied Professional Practice major) in Schedule B of the Schedule to the degree.

- Candidates who wish to meet the requirements for accreditation by the Valuers Registration Board, must complete:
 - all of the following courses specified in the Schedule as compulsory courses for the Property major: 127241, 127242, 127,245, 155201, 127341, 127342, 127343; and
 - all of the following courses: 127100, 127378, 218102 and 218201.
 - Notwithstanding Regulation 2 (e), candidates enrolled in the Applied Professional Practice major must also complete the requirements of one minor or a second major from the Bachelor of Business.
 - Candidates may complete a double major by passing at least 120 credits in each of two of the majoring subjects listed in Regulation 16 including:
 - at least 45 credits at 200 level for each major;
 - at least 60 credits at 300 level for each major;
 - any compulsory courses identified in Schedule B of the Schedule to the Degree;
 and, only where a course is listed in the requirements for both majors:
 - an additional course of at least the same credit value, at the same or higher level, with the same discipline prefix; or, where the course listed in the requirements for both majors is a capstone course, an additional course of at least the same credit value, at the same or higher level, with the same discipline prefix as one of the candidate's majoring subjects, or 115388 Internship in Business as an additional course.
 - Candidates may include a minor in the Degree of Bachelor of Business.
 - The minor must be in a different discipline from the major(s).
 - Minors may be included from any undergraduate degree within the University for which recognised minors are specified.
 - Where the minor is from another undergraduate degree the regulations of that qualification for the minor will apply.
 - A BBus minor must include:
 - a minimum of 60 credits;
 - at least 45 credits above 100 level;
 - at least 15 credits at 300 level.
 The requirements for each minor are set out in Schedule B of the Schedule for the Qualification.
 - No course may be credited to both a major and a minor.
 - No course may be credited to more than one minor.
 - Majors and Minors available in the Bachelor of Business are Applied Professional Practice, Accountancy, Business Analytics, Business Law (Minor only), Economics, Entrepreneurship and Innovation, Finance, Financial Planning and Advice, Global Communication, Human Resource Management and Employment Relations, International Business, Management, Māori Business (Minor only), Marketing, Organisational Technology Management, Property, and Strategic Communication.
- #### Student Progression
- Candidates must pass at least 60 credits at 100-level from Schedule A in their first 120 credits of study and at least 30 credits at 200- or 300-level

from Schedule A in their first 240 credits towards the Bachelor of Business, unless otherwise approved by Academic Board or their delegate.

Completion Requirements

19. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
20. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Business Studies should they meet the relevant Qualification requirements.

Academic Progress

21. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

22. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I qualification regulations, students enrolled in the Bachelor of Business prior to 1 January 2023 are exempt from having to fulfil the requirements of Regulation 18. These transition arrangements expire 31 December 2026.
23. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I qualification regulations, students enrolled in the Bachelor of Business prior to 1 January 2024 who wish to substitute 115388 or 115389 for 15 credits of elective courses, in accordance with Regulation 6, are not required to complete a double major. This transition arrangement expires 31 December 2027.
24. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I qualification regulations candidates enrolled in the Bachelor of Business (Economics) prior to 1 January 2024 may count 178250 towards the compulsory course requirements.
25. Students who have completed one of 178300 or 178301 may be exempt from completing the one they have not taken.
26. Students who have not completed 178360 may be exempt from the requirement to take this course.
27. Students who have not completed either 178370 or 178380 may be exempt from the requirements to complete either of them.
28. Students may count 15 credits of 115388 and/or 115389, if successfully completed, towards the requirements of the major.
29. Students may substitute 178352, if successfully completed, for 178312.
30. The transition arrangements specified in regulations 26-31 expire 31 December 2027.
31. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I qualification regulations candidates enrolled in the Bachelor of Business (Economics minor) prior to 1 January 2024 may count 178100 and 178352 towards the minor requirements, and may substitute 178360, if successfully completed, for 178380. Such candidates are exempt from having to take either 178230 or 178280. These transition arrangements expire 31 December 2027.
32. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I qualification regulations candidates enrolled in the Bachelor of Business (Human Resource Management and Employment Relations major) prior to 1 January 2024 will be granted the following substitutions:
114332 for 114343
114396 for 114321
153200 for 152393
These transition arrangements expire 31 December 2027.
33. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I qualification regulations candidates enrolled in the Bachelor of Business (Human Resource Management and Employment Relations minor) prior to 1 January 2024 may substitute 114396, if successfully completed, for 114321. These transition arrangements expire 31 December 2027.
34. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I qualification regulations candidates enrolled in the Bachelor of Business (Business Analytics minor) prior to 1 January 2024 who have successfully completed 156233 may substitute this for 115213. Candidates who have successfully completed 158244 may substitute this for 157216. Candidates who have successfully completed 156340 may substitute this for 115325. This transition arrangement expires 31 December 2027.
35. Subject to any Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I qualification regulations candidates enrolled in the Bachelor of Business (Global Communication major) prior to 1 January 2025 will be granted the following substitutions: 219206 for 219219 or 219228

219309 for 152355 or 152393

219211 for 152261

219311 for 219303

These transition arrangements expire 31 December 2029.

The Degree of Bachelor of Business / Bachelor of Science

BBus/BSc

No new enrolments**Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Conjoint Programme for Bachelor of Business and Bachelor of Science requires that the candidate will meet the University admission requirements as specified.

- A candidate who has already completed the requirements of one of the component degrees will not be permitted to enrol in the conjoint programme.

Qualification Requirements

- Candidates for the Conjoint Programme for Bachelor of Business and Bachelor of Science shall follow a flexible programme of study, which shall consist of courses totalling at least 510 credits, comprising:
 - completion of a Bachelor of Business component;
 - completion of a Bachelor of Science component;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Each course successfully completed for the conjoint programme shall be credited to one or other of the two components. Except as provided by these regulations, each component shall be governed by the regulations of the corresponding degree.

5. Courses may not be cross-credited into or between components of the conjoint BBus/BSc programme.
6. The Bachelor of Business component shall consist of a total of 255 credits made up as follows:
 - (a) The compulsory eight core business courses: 115111, 115112, 115113, 115114, 115115, 115116, 115211, 115212.
 - (b) Completion of a major in accordance with the regulations for the BBus.
 - (c) No fewer than 120 credits at the 200 level or above, of which at least 60 credits must be at the 300 level, selected from Schedule B of the Schedule for the BBus degree.
7. The Bachelor of Science component shall consist of a total of at least 255 credits from Schedules A and B of the BSc Schedule made up as follows:
 - (a) core courses as defined by Schedule A to the Degree;
 - (b) the majoring requirements of at least one subject as specified in Schedule B of the BSc Schedule.

Specialisations

8. Candidates must complete a major in each component by complying with the requirements of the regulations of the corresponding degree.

Student Progression

9. Candidates shall pass all courses and maintain a grade average of B or higher in order to continue enrolment in the conjoint programme.
10. A candidate is required to advance studies concurrently in both components of the programme in each year of enrolment.

Completion Requirements

11. A candidate's programme of study may not exceed 10 years from date of first enrolment in a course to be credited to the Conjoint Programme for Bachelor of Business and Bachelor of Science.
12. Candidates may be graduated and conjointly awarded the Bachelor of Business and the Bachelor of Science when they meet the Admission, Qualification, and Academic requirements within the prescribed

timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Bachelor of Business or the Bachelor of Science or another qualification should they meet the relevant Qualification requirements.

Academic Progress

13. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

14. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates who commenced study towards the Conjoint Programme for Bachelor of Business and Bachelor of Science prior to 1 January 2020 may, subject to approval, substitute a course or courses already taken towards the Bachelor of Science component for a course or courses at the same level included in the Schedule of the degree.
15. Candidates who have passed 90 credits or more towards the Bachelor of Science component prior to 1 January 2020 and who have passed at least 15 credits towards a major listed in Regulation 6 of the Bachelor of Science degree will be permitted to complete the major by completing the requirements as specified in Schedule C of the relevant major.
16. Candidates who have passed at least 15 credits towards a major listed in Regulation 7 of the Bachelor of Science degree prior to 1 January 2020 will be permitted to complete the major by completing the requirements as specified in Schedule C of the Bachelor of Science degree.
17. The transition arrangements established under Regulations 14 to 16 expire 31 December 2025.

Schedule for the Bachelor of Business / Bachelor of Science

247111 Science and Sustainability for Agriculture and Horticulture	15 credits
R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247112, 247113, 247114	

The Degree of Bachelor of Commercial Music

BCommMus

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Degree of Bachelor of Commercial Music requires that the candidate will meet the University admission requirements as specified.
2. Admission to the Music Practice major will be by selection on the basis of an audition.

Qualification Requirements

3. Candidates for the Degree of Bachelor of Commercial Music shall follow a flexible programme of study, which shall consist of courses totalling 360 credits, comprising:
 - (a) at least 300 credits selected from the Schedule to the degree;
 - (b) not more than 150 credits at 100 level;
 - (c) at least 105 credits at 300 level; and including
 - (d) the core courses as specified in Schedule A;
 - (e) any compulsory courses specified in the Schedule to the degree;
 - (f) attending studios, workshops, tutorials, and events as required.

Specialisations

4. Candidates must complete the requirements of at least one major as specified in Schedule B to the Qualification.
5. Single majors available for the Bachelor of Commercial Music are: Music Industry, Music Practice and Music Technology.
6. Candidates may complete a double major in Mātauranga Toi Māori and one other specialisation from Regulation 5 by the requirements of the specialisations as set out in Schedule B. Individual courses cannot be counted towards both majors. Such candidates may, however, count up to 105 credits towards both the Mātauranga Toi Māori major and the Core.
7. Candidates may complete a minor by passing at least 60 credits from the schedule for one of the Bachelor of Commercial Music majors, including:
 - (a) at least 45 credits above 100 level; and
 - (b) at least 15 credits at 300 level.

- (c) any compulsory courses identified for the minor in Schedule B for the degree.

8. Minors available for the Bachelor of Commercial Music are: Music Industry, Music Practice, and Music Technology.
9. Notwithstanding Regulation 7, candidates may include a minor from any undergraduate degree within the university for which recognised minors are specified.
10. Where a minor is from another undergraduate degree the regulations of that qualification for the minor will apply.
11. No course may be credited to both a major and a minor.

Completion Requirements

12. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
13. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an alternative qualification should they meet the relevant qualification requirements.

Academic Progress

14. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

15. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Commercial prior to 1 January 2025 will be granted the following substitutions:
 - (a) 133152 for 133180
 - (b) 133356 for 133380
 - (c) 133256 for 133280
16. This transition expires 31 December 2028.

The Degree of Bachelor of Communication**BC****Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Bachelor of Communication requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Bachelor of Communication shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits comprising:
 - not more than 165 credits at 100 level;
 - at least 75 credits at 300 level;
 - at least 300 credits from the Schedule for the Degree of Bachelor of Communication;
 and including:
 - the core communication courses listed in Part A of the Bachelor of Communication Schedule;
 - one major (120 credits);
 - one minor (60 credits);
 - the remaining courses (60 credits) from any undergraduate degree of the University.

Specialisations

- Candidates must complete a major by passing at least 120 credits in a major. The requirements for each major are set out in Part B of the Schedule for the Qualification.
- Majors available are: Applied Communication, Communication Management, Digital Marketing, Expressive Arts, Expressive Arts and Media Studies, Journalism, Linguistics, Media Studies, and Public Relations.
- Candidates must complete a minor by passing at least 60 credits in a minor. The requirements for each minor are set out in 5a-5c
 - The minor must be in a different discipline from the major(s).
 - Minors may be included from any undergraduate degree within the University for which recognised minors are specified.
 - Where the minor is from another undergraduate degree, the regulations of that programme for the minor will apply.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Communication, or the Diploma in Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Candidates enrolled in the Bachelor of Communication prior to 1 January 2019 who have already completed the core course 219107 may

- be permitted to substitute this for the compulsory course 219108. These transitional arrangements expire on 31 December 2025.
10. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Communication prior to 1 January 2022 who have successfully completed 219100 may substitute this for 115111. These transitional arrangements expire on 31 December 2025.
11. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Communication prior to 1 January 2023, who are enrolled in one or more of the following may substitute a course or courses already completed for a course or courses of the same value and at the same level within the Schedule to fulfil the requirements of the qualification: Communication Management major or minor, Journalism major or minor; Public Relations major or minor. These transitional arrangements expire on 31 December 2027.
12. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Communication (Public Relations) prior to 1 January 2025 who have successfully completed 219309 may substitute this for 219219. Students who have successfully completed either 219206 or 219231 may substitute one of these for 219320.
13. This transition expires 31 December 2029.

The Degree of Bachelor of Construction

BConst

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Degree of Bachelor of Construction requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

2. Candidates for the Degree of Bachelor of Construction shall follow a parts-based programme of study, which shall consist of courses totalling at least 360 credits, comprising:

- Parts One, Two, and Three as defined by the Schedule to the Degree; and including;
- the compulsory courses listed in the Schedule for the Qualification;

- (c) at least one major;
- (d) attending field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

3. Candidates may complete a major by completing the specified Part Two and Three for that major. The requirements for each major are set out in the Schedule for the Qualification.
4. Majors available are Quantity Surveying and Construction Management.

Academic Requirements

5. Each candidate shall complete to the satisfaction of Academic Board a minimum of 600 hours of approved industry work experience relating to the chosen major and two associated reports in accordance with the requirements for:
 - (a) 218110 Construction Industry Work Experience I; and
 - (b) 218210 Construction Industry Work Experience II. Work experience must be completed in accordance with the requirements laid down by the Practical Work Office.

Student Progression

6. Progression from Part One to Two and from Part Two to Three is on the basis of completion of the requirements of the prior part.
7. Notwithstanding Regulation 6, and at the discretion of Academic Board, Candidates may be permitted to enrol in courses from a later part while completing the unpassed courses from the prior part. Such permission will be granted where, in the opinion of Academic Board, both the academic record of the candidate shows proven merit, and the nominated courses from the later Part are from different areas of study to the unpassed courses in the prior part.

Completion Requirements

8. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, and Graduate Diplomas and Graduate Certificates will apply.
9. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

10. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

11. Subject to the recommended time to completion and abandonment of studies provisions specified in the Part I regulations for the degree, candidates enrolled prior to January 2021 who have completed 120 credits or less may substitute a course or courses already taken for a course or courses listed in Part One, in order to fulfil Core requirements.
12. Candidates enrolled in the Bachelor of Construction prior to January 2021 who have completed more than 120 credits will fulfil the requirements of the major they were first enrolled in, as defined by Schedule B. Such candidates may substitute a course or courses already taken for those listed in Part One in order to fulfil Core requirements.
13. These transition arrangements expire 31 December 2025.
14. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Construction prior to 1 January 2023 who have successfully completed 160131 may substitute this for 218104 until 31 December 2027.

Schedule for the Bachelor of Construction

Part One: Core courses (120 credits from)

115112	Accounting for Business	15 credits
	R 115102	
115114	Finance Fundamentals	15 credits
	R 115105	
218101	Building Materials, Elements and Regulation	15 credits
	R 218100	
218102	Construction Technology and Services I	15 credits
	R 218172	
218103	Construction Design and Drawings	15 credits
	R 218123	
218104	Mathematics and Structural Principles	15 credits
	R 160131, 160103	
218105	Integrating Design and Delivery in Built Environment	15 credits
	R 218150	
218106	Construction Health, Safety and Wellbeing	15 credits
	R 218151	

Majors

Construction Management (240 credits)

Part Two: Compulsory courses (120 credits from)

127241	Property Market Principles	15 credits

The Degree of Bachelor of Design BDes

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Design requires that the candidate will:
 - meet the University admission requirements as specified; and
 - be selected into the Qualification based partially on the assessment of a portfolio of work submitted by the applicant.

Qualification Requirements

- Candidates for the Degree of Bachelor of Design shall follow a parts-based programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - Part One, Part Two, and Part Three as specified in Schedules A and B;
 - Elective courses from Schedule C or other courses from Massey University; and including
 - not more than 180 credits at 100 level;
 - at least 90 credits must be at 300 level or above;
 - completion of at least one major.
- Notwithstanding Regulation 3 holders of a Massey University Diploma in Fashion Design and Technology may be permitted to credit up to 120 credits at 100 level and include up to 195 credits at 100 level in a Bachelor of Design, fashion design major.
- Notwithstanding Regulation 3 holders of a Massey University Diploma in Photography may be permitted to credit up to 120 credits at 100 level and up to 120 credits at 200 level to the Bachelor of Design, Photography major.
- The Academic Board may grant exemptions to the requirements of Regulation 3 based on the subjects studied and prior performance of the student.

Specialisations

- Candidates may complete a single major by passing Parts One, Two, and Three specified for a major selected from: Concept Design, Integrated Design, Fashion Design, Industrial Design, Photography, Spatial Design, Textile Design and Visual Communication Design. The requirements for each major are set out in Schedule B to the Qualification.
- Candidates may complete a double major in Mātauranga Toi Māori and one other specialisation from Regulation 6 by fulfilling the requirements of the specialisations as set out in Schedule B. Individual courses cannot be counted towards both majors. Such candidates may, however, count up to 105 credits towards both the Mātauranga Toi Māori major and the Core.
- Candidates may include a minor from any undergraduate degree within the University for which recognised minors are specified, in accordance with the following requirements:
 - The overall balance of credits as specified in Regulation 3 are maintained.
 - The minor must be in a different subject area from the major(s).
 - Where the minor is from another undergraduate degree the regulations of that programme for the minor will apply.

- No course may be credited to both a major and a minor.

Student Progression

- In order to progress to Part Two the candidate shall have passed a total of 75 credits at 100 level with at least 60 credits from the Part I courses including one of the Schedule B courses relevant to the major to be taken.
- The Academic Board may grant exemptions to the requirements in Regulation 10 based on the subjects studied and prior performance of the student.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, and Undergraduate Certificates, and Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an alternative creative arts qualification should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any maximum time to completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Design with Honours prior to 1 January 2025 who have completed more than 240 credits and who are exiting into the Bachelor of Design, will complete the Bachelor of Design under the 2024 regulations. Candidates enrolled in the Bachelor of Design with Honours prior to 1 January 2025 who have completed up to 240 credits and who are exiting into the Bachelor of Design, will complete the Bachelor of Design in accordance with the 2025 regulations and may substitute a course or courses already completed for a course or courses of the same value and at the same or lower level within the Schedule.
- This transition expires 31 December 2030.
- Subject to any maximum time to completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Design prior to 1 January 2025 who have completed more than 240 credits will complete the Bachelor of Design under the 2024 regulations. Candidates enrolled in the Bachelor of Design prior to 1 January 2025 who have completed up to 240 credits will complete the Bachelor of Design in accordance with the 2025 regulations and may substitute a course or courses already completed for a course or courses of the same value and at the same or lower level within the Schedule.
- This transition regulation expires 31 December 2030.

The Degree of Bachelor of Earth and Environmental Science

BEarthEnvSc

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Earth and Environmental Science requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Earth and Environmental Science shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 165 credits at 100 level;
 - at least 75 credits at 300 level; and including:
 - core courses as defined by Schedule A to the Degree;
 - at least 300 credits from the Schedule to the Degree;
 - completion of one major;
 - attending block courses, Contact Workshops, field trips, workshops, tutorials and laboratories as required.

Specialisations

- Candidates must complete a major by passing 120 credits in a major. The requirements for each major are specified in Schedule B to the Degree.
- Approved majors are: Geoscience and Land and Water Science.
- Candidates may include a minor in the Bachelor of Earth and Environmental Science.
- The minor must be in a different discipline from the major.
- Minors may be included from any other undergraduate degree within the University for which recognised minors are specified, in accordance with the requirements for the minor as specified in the regulations of the qualification from which the minor has been drawn.
- A Bachelor of Earth and Environmental Science minor must include:
 - 60 credits above 100 level;
 - at least 30 credits at 300-level.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification, and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Certificate in Science and Technology or Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Bachelor of Earth and Environmental Science

Core courses (180 credits from)

Compulsory courses (150 credits from)

121101 Climate and the Environment	15 credits
R 121210 or 121311	
121213 Land and Water Science	15 credits
P (189151 OR 145111) AND (233105 OR 117153 OR 199103) R 145222	
123103 Chemistry for Modern Sciences	15 credits
R 119153, 119158, 123103 may not be taken after 123101, 123102, 123104, 123105, 123171 or 123172 have been passed.	
132111 Oranga Taiao, Oranga Tangata: Planning and the Environment	15 credits
161111 Applied Statistics	15 credits
R 115101, 161101, 161120, 161122, 161130, 161140	
189151 Principles of Soil Science	15 credits
P 247111 or 247113	
196101 Ecology, Evolution and Behaviour	15 credits
233105 Our Dynamic Earth	15 credits
R 233101 and 145121	

233214 GIS and Spatial Statistics	15 credits
P 161111 or 161122 or 297101 R 233251, 233301	

233303 Natural Hazards and Climate Change	15 credits
-------------------------------------------------	------------

15 credits from

160102 Algebra	15 credits
R 160112, 160133, 228172	

160105 Methods of Mathematics	15 credits
R 160101, 160102, 160103, 160111, 160112, 160131, 160132, 160133, 228171, 228172	

15 credits from

247111 Science and Sustainability for Agriculture and Horticulture	15 credits
R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247112, 247113, 247114	

247113 Science and Sustainability for Science	15 credits
R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247111, 247112, 247114	

Majors (120 credits from)

Geoscience (120 credits)

120 credits from

121200 Environmental Monitoring and Field Skills	15 credits
121310 Environmental Solutions	15 credits
P 121210 R 121211	

233209 Earth's Critical Resources	15 credits
P 233105 R 233211	

233215 Earth Surface Processes and Landforms	15 credits
P 233105 R 233212	

233309 Earth's Changing Climate	15 credits
---------------------------------------	------------

233313 Earth Systems	15 credits
P (160101 or 160102 or 160105) and (233211 or 233212)	

233314 Remote Sensing and Earth Observation	15 credits
P 233214 R 233301	

247220 Pūtaiao: Mātauranga and the Environment	15 credits
------------------------------------------------------	------------

Land and Water Science (120 credits)

120 credits from

121200 Environmental Monitoring and Field Skills	15 credits
121214 Landscape and Human Ecology	15 credits
P 196101	

121310 Environmental Solutions	15 credits
P 121210 R 121211	

121313 Applied River Management	15 credits
P 121213 or 145222	

188363 Applied Environmental Management	15 credits
-----------------------------------------------	------------

189251 Soil Fertility Management	15 credits
P 189151	

189362 Integrated Farm and Environmental Management	15 credits
P 189251 or 121213	

247220 Pūtaiao: Mātauranga and the Environment	15 credits
------------------------------------------------------	------------

Minors (60 credits from)

Geoscience (60 credits)

Compulsory courses (45 credits from)

233215 Earth Surface Processes and Landforms	15 credits
P 233105 R 233212	

233309 Earth's Changing Climate	15 credits
---------------------------------------	------------

233313 Earth Systems	15 credits
P (160101 or 160102 or 160105) and (233211 or 233212)	

15 credits from

233209 Earth's Critical Resources	15 credits
P 233105 R 233211	

233314 Remote Sensing and Earth Observation	15 credits
P 233214 R 233301	

Land and Water Science (60 credits)

Compulsory courses (45 credits from)

121214 Landscape and Human Ecology	15 credits
P 196101	

121313 Applied River Management.....15 credits
P 121213 or 145222

188363 Applied Environmental Management.....15 credits

15 credits from

189251 Soil Fertility Management.....15 credits
P 189151

189362 Integrated Farm and Environmental Management.....15 credits
P 189251 or 121213

The Degree of Bachelor of Engineering

BE

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Qualification Requirements

- Candidates who have passed all courses and completed all other requirements for a BE(Hons) but whose performance in the courses is deemed by the Academic Board, upon recommendation of the examiners, not to be of Honours standard will be awarded a degree of Bachelor of Engineering.

The Degree of Bachelor of Fine Arts

BFA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Fine Arts requires that the candidate will:
 - meet the University admission requirements as specified; and
 - be selected into the Qualification based partially on the assessment of a portfolio of work submitted by the applicant, and an interview at the discretion of the University.

Qualification Requirements

- Candidates for the Degree of Bachelor of Fine Arts shall follow a parts-based programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - Part 1, Part 2 and Part 3 as specified in Schedule A;
 - elective courses from Schedule C to the Degree; and/or elective courses from Schedule C to the Degree of the Bachelor of Design with Honours or any other course.
 and including:
 - not more than 180 credits at 100 level;
 - at least 90 credits at 200 level;
 - at least 90 credits at 300 level;
- Notwithstanding Regulation 2, holders of a Massey University Diploma in Photography who are admitted to the Degree of Bachelor of Fine Arts may be permitted to credit up to 120 credits at 100 level and up to 75 credits at 200 level to the Bachelor of Fine Arts.

Specialisations

- The Bachelor of Fine Arts is awarded with or without specialisation.
- The specialisation available is: Mātauranga Toi Māori. Candidates can earn this specialisation by meeting the requirements set out in Schedule B.
- Candidates fulfilling the requirements of the specialisation under Regulation 5 may count up to 135 credits towards both the Mātauranga Toi Māori major and the Core.
- Candidates may include a minor from any undergraduate degree within the University for which recognised minors are specified, in accordance with the following requirements:
 - the overall balance of credits as specified in Regulation 2 are maintained;
 - the minor must be in a different subject area from the major(s);
 - where the minor is from another undergraduate degree the regulations of that programme for the minor will apply;
 - no course may be credited to both a major and a minor.

Student Progression

- In order to progress to Part Two the candidate shall have passed a total of 75 credits at 100 level with at least 60 credits from the College of Creative Arts.
- The Academic Board may grant exemptions to the requirements of Regulation 5 based on the subjects studied and prior performance of the student.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Qualification requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an alternative creative arts qualification should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any maximum time to completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Fine Arts with Honours prior to 1 January 2025 who have completed more than 300 credits and who are exiting into the Bachelor of Fine Arts, will complete the Bachelor of Fine Arts under the 2024 regulations. Candidates enrolled in the Bachelor of Fine Arts with Honours prior to 1 January 2025 who have completed up to 300 credits and who are exiting into the Bachelor of Fine Arts, will complete the Bachelor of Fine Arts in accordance with the 2025 regulations and may substitute a course or courses already completed for a course or courses of the same value and at the same or lower level within the Schedule.
- This transition expires 31 December 2030.
- Subject to any maximum time to completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Fine Arts prior to 1 January 2025 who have completed more than 300 credits will complete the Bachelor of Fine Arts under the 2024 regulations. Candidates enrolled in the Bachelor of Fine Arts prior to 1 January 2025 who have completed up to 300 credits will complete the Bachelor of Fine Arts in accordance with the 2025 regulations and may substitute a course or courses already completed for a course or courses of the same value and at the same or lower level within the Schedule.
- This transition expires 31 December 2030.

Schedule for the Bachelor of Fine Arts

Schedule A: Core courses**Part One****Critical Studies (At least 15 credits from)**

133154	Music, People, Places	15 credits
	R 133255	
150106	Nga Hanga Whakairo: Traditional Māori Visual Art	15 credits
197139	Design, Purpose, People and Place	15 credits
	R 237130	
237131	Art, Culture and Contexts	15 credits
	R 237102

The Degree of Bachelor of Food Technology

BFoodTech

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Qualification Requirements

Candidates who have passed all courses and completed all other requirements for a BFoodTech(Hons) but whose performance in the courses is deemed by the Academic Board, upon recommendation of the examiners, not to be of Honours standard will be awarded a degree of Bachelor of Food Technology.

The Degree of Bachelor of Health Science

BHlthSc

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Health Science requires that the candidate will meet the University admission requirements as specified.
- In addition to Regulation 1, admission to the Degree of Bachelor of Health Science (Mental Health and Addiction) requires candidates to be selected into the programme.

Qualification Requirements

- Candidates for the Degree of Bachelor of Health Science shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits as defined by the Schedule for the Bachelor of Health Science degree, comprising:
 - not more than 165 credits at 100 level;
 - at least 75 credits at 300 level;
 and including:
 - the core courses as defined by Schedule A for the Qualification;
 - completion of one major;
 - attending field trips, studios, workshops, tutorials and laboratories as required.
- Notwithstanding Regulation 3(c), candidates completing the Degree of Bachelor of Health Science with a major in Psychology must substitute 175203 Introduction to Psychological Research for core course 214212 Research Methods in the Health Sciences.
- Candidates completing the Degree of Bachelor of Health Science with a major in Mental Health and Addiction wishing to meet the accreditation requirements in Mental Health and Addiction are required to complete 250320, Work Integrated Learning in the Health Sciences and 147204, Whakamahi: Introduction to Mental Health and Addiction Placement as their Schedule C elective courses. Prior to enrolling in 147204 and 250320 candidates will be required to undertake a further selection process as approved by the Programme Leader and/or Major Leader.

Specialisations

- Candidates must complete a major by passing at least 120 credits in a specialisation including at least 120 credits above 100 level of which at

least 60 credits must be at 300 level. The requirements for each major are set out in Schedule B for the Qualification.

- Approved majors are: Environmental Health, Health Promotion, Health Services Navigation*, Integrated Human Health, Mental Health and Addiction, Occupational Health and Safety, and Psychology.

Student Progression

- The Academic Board may, under such conditions as it may determine and taking into account the recommendations of the examiners, admit any candidate to a supplementary privilege (normally an examination) where available in a course in which the candidate failed to gain a pass.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Science and Technology or the Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.
- Notwithstanding Regulation 11, the following will lead to exclusion from the Mental Health and Addiction specialisation:
 - Failure to obtain a pass in either 147204 or 250320 on the second attempt.
 - Persons excluded under clause 12 (a) will only be re-admitted to the Mental Health and Addiction specialisation with approval of the Academic Board, which may be declined, or granted under such conditions as it may determine.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Integrated Human Health major prior to 1 January 2023 who have successfully completed 214231 may substitute this for 147202 in order to fulfil the qualification and academic requirements until 31 December 2026.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Integrated Human Health major prior to 1 January 2025 who have successfully completed courses

214331 may substitute this for 151334; and 252201 may substitute this for 194241. These transition arrangements expire 31 December 2027.

15. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Health Promotion major prior to 1 January 2025 who have successfully completed courses 150201 may substitute this for 152252; and 231306 may substitute this for 147317. These transition arrangements expire 31 December 2027.

16. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Occupational Health and Safety major prior to 1 January 2025 who have successfully completed 251272 may substitute this for 214213. These transition arrangements expire 31 December 2027.

Regulation Notes

* No New Enrolments. Candidates enrolled in the Bachelor of Health Science major in Health Services Navigation prior to 1 January 2024 who have successfully completed at least 30 credits towards the major requirements, will be able to complete the qualification under previous regulations, or will be transferred to an alternative major or qualification, or exited, by 31 December 2025.

Schedule for the Bachelor of Health Science

Schedule A: Core courses (210 credits from)

Compulsory courses (165 credits from)

150112	Hauora Tangata: Foundations of Māori Health	15 credits
150202	Mauri ora: Māori Wellbeing and Vitality P 15 credits from 1501xx	15 credits
214101	Human Bioscience: Normal Body Function R 194101, 117155	15 credits
214102	Applied Sciences for Health Professionals	15 credits
214201	Human Bioscience: Impaired Body Function P (214101 and 214102) OR (162101; and 194101 or 117155 or 214101)	15 credits
231106	Introduction to Public Health	15 credits
231107	Social Determinants of Health	15 credits
250100	Health Communication	15 credits
250205	Principles and Practice of Epidemiology	15 credits
250303	Systems Thinking and Design for Health R 250301	15 credits
250331	Health of Communities	15 credits

15 credits from

Either

214212 Research Methods in the Health Sciences 15 credits

Or Psychology Major only

175203 Introduction to Psychological Research 15 credits
P 175102

30 credits from

147101	Rehabilitation Studies	15 credits
147102	Whakapiri: Engagement in Mental Health and Addiction Work	15 credits
151131	Introduction to Food and Nutrition R 141101, 151232, 151344, 214131	15 credits
175101	Psychology as a Social Science	15 credits
175102	Psychology as a Natural Science	15 credits
179155	A Foundation of Interpersonal Skills for the Helping Professions	15 credits
234121	Functional Anatomy R 214170	15 credits
234141	Introduction to Human Movement and Hauora R 274104	15 credits

Schedule B: Specialisations

Majors

Environmental Health (120 credits)

Compulsory courses (120 credits from)

214213	Toxic Substances, Human Health and the Environment	15 credits
214215	Food Safety and Human Health	15 credits
214216	Environmental and Public Health Law	15 credits
214301	Environmental Health Risk Management for Disasters	15 credits
214311	Epidemiology and Communicable Diseases	15 credits
214312	Environmental Monitoring and Investigative Methods	15 credits
214314	Water and Waste Treatment	15 credits
214316	Bio-Physical Effects of Noise and Vibration	15 credits

Health Promotion (120 credits)

Compulsory courses (120 credits from)

147202	Mental Health Promotion P 147102	15 credits
147317	Disability in Society R 250317	15 credits
150302	Whānau ora: Principles of Flourishing Whānau P 15 credits from 1502xx (and 45 credits at 200 level)	15 credits
152252	Project Management	15 credits
179230	Tangata Moana Perspectives and Practices for Transformation	15 credits
231200	Navigating Health Promotion	15 credits
231307	Intervention Design P 214212	15 credits
231308	Health Promotion Advocacy	15 credits

Health Services Navigation (120 credits)

No new enrolments

Compulsory courses (120 credits from)

115212	Fundamentals of Leadership and Teamwork P 90 credits at 100 level	15 credits
147201	Issues in Rehabilitation	15 credits
147202	Mental Health Promotion P 147102	15 credits
147302	Alcohol, Other Drugs and Addiction	15 credits
147304	Health Services Navigation	15 credits
147317	Disability in Society R 250317	15 credits
152250	Managing Organisations R 152200	15 credits
231308	Health Promotion Advocacy	15 credits

Integrated Human Health (120 credits)

Compulsory courses (120 credits from)

147202	Mental Health Promotion P 147102	15 credits
151334	Nutrition Communication and Promotion P 151131	15 credits
194241	Physiological Control Systems P 194101 or 214101 or 117155 or 199103	15 credits
231200	Navigating Health Promotion	15 credits
231307	Intervention Design P 214212	15 credits
231308	Health Promotion Advocacy	15 credits
234223	Exercise Physiology P 234121 or 214101 or 194101 R 234203	15 credits
252301	Sleep, Health and Performance P 252201	15 credits

Mental Health and Addiction (120 credits)

Compulsory courses (120 credits from)

147202	Mental Health Promotion P 147102	15 credits
147302	Alcohol, Other Drugs and Addiction	15 credits
147305	Whakamana: Change Agency in Mental Health and Addiction P 150235	15 credits
150235	Whakamārama: Approaches to Māori Mental Health and Addiction P 147102	15 credits
150302	Whānau ora: Principles of Flourishing Whānau P 15 credits from 1502xx (and 45 credits at 200 level)	15 credits
179210	A Relational Framework for Social Work Theory and Practice P 179155 and (179110 or 147102)	15 credits
179230	Tangata Moana Perspectives and Practices for Transformation	15 credits
179310	Integrated Social Work Practice - Decolonising Social Work P 179210	15 credits

Occupational Health and Safety (120 credits)

Compulsory courses (120 credits from)

114240	Organisational Behaviour	15 credits
128300	Human Factors and Ergonomics: Work, Performance, Health and Design	15 credits
214213	Toxic Substances, Human Health and the Environment	15 credits
214316	Bio-Physical Effects of Noise and Vibration	15 credits
251271	Occupational Health and Safety I	15 credits
251370	Health and Safety Auditing	15 credits
251372	Occupational Hygiene P 251271 and 251272 or 114271 and 114272	15 credits

251374 Project in Occupational Health and Safety	15 credits
P 251271 and 251272 or 114271 and 114272	

Psychology (120 credits)

Compulsory courses (120 credits from)

175201 Social Psychology	15 credits
175205 Brain and Behaviour	15 credits
P 175102	
175206 Memory and Cognition	15 credits
P 175102	
175210 Ngā Tirohanga Rua o te Taha Hinengaro: Bicultural Perspectives in Psychology	15 credits
R 175312	
175301 Community Psychology	15 credits
P 175203	
175302 Introduction to Clinical Psychology	15 credits
P 175203	
175306 Assessment of Individual Differences	15 credits
P 175203	
175317 Health Psychology	15 credits
P 175203	

Schedule C: Electives (30 credits from)

145216 Urban Environments	15 credits
147204 Whakamahi: Introduction to Mental Health and Addiction Placement	
P 147102 and 150235	
147302 Alcohol, Other Drugs and Addiction	15 credits
150103 Nau mai e noho: Engaging with Māori	15 credits
175303 The Practice of Psychological Research	15 credits
P 175203	
175309 Forensic Psychology	15 credits
P 175203	
175311 Psychology of Women	15 credits
P 175203	
175318 Conducting Psychological Research	15 credits
P 175203	
175345 Organisational Psychology	15 credits
P 175203	
179320 Community Development	15 credits
234331 Sport and Physical Activity in the Social Context	15 credits
250320 Work Integrated Learning in Health Sciences	15 credits
Approved elective course from the Bachelor of Health Science schedule.	

The Degree of Bachelor of Horticultural Science

BHortSci

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Horticultural Science requires that the candidate will meet the University admission requirements as specified.
- In all cases, if English is not the applicant's first language and the admission requirements were not completed at an educational institution where English is the medium of instruction, the applicant shall have achieved an IELTS of 6.5 with no band less than 6.0.

Qualification Requirements

- Candidates for the Degree of Bachelor of Horticultural Science shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 165 credits at 100 level;
 - at least 75 credits at 300 level;
 and including:
 - the courses defined by the Schedule for the Qualification;
 - the remaining courses selected from any undergraduate courses offered by the University;
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.
- Candidates who, in the opinion of the Academic Board, have passed with sufficient merit subjects for either a New Zealand University Diploma in Farm Management or a New Zealand Diploma in Horticultural Management or subjects for some other recognised tertiary qualification may be cross-credited with specified or unspecified courses not exceeding a total of 120 credits.

Specialisations

- The Degree of Bachelor of Horticultural Science is awarded without specialisation.

Academic Requirements

- Candidates must complete to the satisfaction of the Academic Board two 13-week periods of practical work experience and a total of not less than 26 weeks of approved practical work experience in accordance with the following courses:
 - 119150 Practicum I (0 credits)
 - 119250 Practicum II (0 credits)
 - P 119150

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, all candidates enrolled in the Bachelor of Horticultural Science prior to 1 January 2022 who have successfully completed 199310 may substitute this course for one of 114241, 115212 or 120219 until 31 December 2025.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Horticultural Science prior to 1 January 2023 who have successfully completed 123103 may substitute this for 196101 or 233105 until 31 December 2026.

Schedule for the Bachelor of Horticultural Science

Core courses (255 credits from)

112248 Food and Agribusiness Value Chains	15 credits
P 119180	
115113 Economics for Business	15 credits
R 115106	
119120 Plants for Agriculture and Horticulture	15 credits
R 283101, 284101	
119150 Practicum I	0 credits
119180 Introduction to Agribusiness	15 credits
119250 Practicum II	0 credits
P 119150	
119270 Policy, Regulation and Government in Primary Industry	15 credits
119281 Decision Tools for Primary Industries	15 credits
P 119180 or 117155	
119373 Integrative Studies	15 credits
P 119250	
119381 Decision-Making in Primary Industry	15 credits
P 119281	
120101 Plant Biology	15 credits
161140 Agri-Statistics	15 credits
R 161100, 161101, 161111, 161120, 161122, 161130, 115101, 195101, 297101	

189151	Principles of Soil Science.....	15 credits
	P 247111 or 247113	
189251	Soil Fertility Management.....	15 credits
	P 189151	
247111	Science and Sustainability for Agriculture and Horticulture	15 credits
	R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247112, 247113, 247114	
284201	Horticultural Production Systems.....	15 credits
	P 119281 R 119258	
284301	Horticultural Crop Development & Yield.....	15 credits
	P 284201	
284342	Horticultural Productivity and Quality	15 credits
	P 120217 or 284201	
285201	Understanding Plant Protection	15 credits
	P 119120 or 120101 or 283101 or 284101 R 171284	

Compulsory course selections (At least 15 credits from)

196101	Ecology, Evolution and Behaviour.....	15 credits
233105	Our Dynamic Earth.....	15 credits
	R 233101 and 145121	

Compulsory course selections (30 credits from)

114241	Principles of Human Resources Management.....	15 credits
115212	Fundamentals of Leadership and Teamwork.....	15 credits
	P 90 credits at 100 level	
120219	Plants and People.....	15 credits
138255	Applied Engineering in Agriculture and Horticulture Systems	15 credits

Compulsory course selections (45 credits from)

112301	International Food and Agribusiness Strategies.....	15 credits
120303	Plant Diversity.....	15 credits
	P One of (120201, 120218, 120219, 196205, 196207 or 203210)	
120306	Plant Improvement.....	15 credits
	P 203210 or 284201 R 120304	
138301	Precision Agriculture Technologies.....	15 credits
189362	Integrated Farm and Environmental Management	15 credits
	P 189251 or 121213	
235312	Case Studies in Māori Agribusiness.....	15 credits
	P 119180	
283310	Topics in Agronomy	15 credits
	P 119120	

The Degree of Bachelor of Information Sciences BlnfSc

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Information Sciences requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Information Sciences shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 165 credits at 100 level;
 - at least 75 credits at 300 level;
 and including:
 - core courses as set out in Schedule A for the Qualification;
 - at least one major or joint major;
 - attending field trips, workshops, tutorials and laboratories as required.
- Candidates who, in the opinion of the Academic Board, have passed with sufficient merit an NZQF recognised Level 6 diploma in a relevant subject, or equivalent, may be granted specified or unspecified credit not exceeding a total of 240 credits. The credit granted will be determined by Academic Board after taking into account the areas of study, the quantum of study and the standard of pass attained.
- Candidates who, in the opinion of the Academic Board, have passed with sufficient merit an NZQF recognised Level 5 diploma in a relevant subject, or equivalent, may be granted specified or unspecified credit not exceeding a total of 60 credits. The credit granted will be determined by Academic Board after taking into account the areas of study, the quantum of study and the standard of pass attained.

Specialisations

- Candidates may complete a major by fulfilling the requirements for a major or joint major as set out in Schedule B for the Qualification.
- Majors available are: Computer Science, Data Science, Information Technology and Information Systems.
- Joint Major available is Software Engineering.
- Candidates may complete a double major in the qualification subject to the following:
 - the qualification requirements regarding core courses are met;
 - the requirements of both majors are met.
 - Notwithstanding Regulation 8(b), candidates completing a double major are required to complete a capstone course from one of the majors; the other capstone course may be waived.
 - A joint major may not be included as part of a double major.

- Candidates may include a minor in the qualification subject to the following:
 - the minor must be in a different subject area from the major;
 - no course may be credited to both a major and a minor;
 - the minor may be included from any undergraduate degree within the University for which recognised minors are specified;
 - where the minor is from another undergraduate degree the regulations of that programme for the minor will apply.
- Minors available within the Degree of Bachelor of Information Sciences are: Business, Computer Science, Data Science, Games Programming, Information Technology, and Information Systems; the requirements for which are specified in Schedule B for the Qualification.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, and Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded either the Certificate in Science and Technology or the Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, all candidates who commenced study towards the Bachelor of Information Sciences prior to 1 January 2022 will be permitted to substitute 159171, if already completed, for 159100 or 159101, and 159172, if already completed, for 159102, until 31 December 2026.
- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Information Sciences prior to 1 January 2024 may substitute 161122 if successfully completed for 297101. Candidates enrolled in the Information Technology, Software Engineering or Data Science Majors and/or the Data Science Minor prior to 1 January 2024 may substitute 158222 if successfully completed for 297201 and 158333 if successfully completed for 297301.
- These transition arrangements expire 31 December 2028.
- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Information Sciences (Computer Science) prior to 1 January 2025 may substitute 159356 if successfully completed for 159333. Candidates enrolled in the Data Science major may substitute 158383 if successfully completed for 159333. Candidates enrolled in the Information Technology may substitute 158383 if successfully completed for any 300-level within the Information Technology Schedule they have not taken.
- These transition arrangements expire 31 December 2028.

Schedule for the Bachelor of Information Sciences

Schedule A: Core courses

15 credits from

247112 Science and Sustainability for ICT	15 credits
R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247111, 247113, 247114	

15 credits from

159100 Programming for Engineering and Technology	15 credits
R 159101	
159101 Applied Programming	15 credits
R 159100	

15 credits from

161111 Applied Statistics	15 credits
R 115101, 161101, 161120, 161122, 161130, 161140	
297101 Statistical Data Science	15 credits
R 161122	

15 credits from

1573xx, 1583xx, 1593xx, 1603xx, 1613xx, 2973xx

For the major in Computer Science or for the joint major in Software Engineering (15 credits from)

159102 Computer Science and Programming	15 credits
P 159100 or 159101	

For the majors in Computer Science or Data Science, or for the joint major in Software Engineering (15 credits from)

160101 Calculus	15 credits
R 160112, 160133, 228172	
160102 Algebra	15 credits
R 160112, 160133, 228172	
160105 Methods of Mathematics	15 credits
R 160101, 160102, 160103, 160111, 160112, 160131, 160132, 160133, 228171, 228172	

For the majors in Information Systems or Information Technology (At least 30 credits from)

157151 Living and Working with Technology	15 credits
R 115107, 157150, 157100	
158100 Information Technology Principles	15 credits
158120 Web-based IT Fundamentals	15 credits

Schedule B: Specialisations

Majors

Computer Science (120 credits)

60 credits from

159201 Algorithms and Data Structures	15 credits
P 159102 R 159271	
159234 Object-Oriented Programming	15 credits
P 159102	
159235 Programming for Computer Graphics	15 credits
P 159102 R 159360	
159236 Embedded Programming	15 credits
P 159102 R 159233, 159270	
159251 Software Engineering Design and Construction	15 credits
P 159234	
159261 Games Programming	15 credits
P 159101	
159272 Programming Language Paradigms	15 credits
P 159102 R 159202	

60 credits from

159302 Artificial Intelligence	15 credits
P 159201 or 159234 R 159372	
159333 Programming Project	15 credits
P Three (3) of 1592xx, 1582xx or 2972xx and Appraisal Required R 159356	
159336 Mobile Application Development	15 credits
P 159234 or 159235	
159341 Programming Languages, Algorithms and Concurrency	15 credits
P 159201 or 159202 R 159331	
159342 Operating Systems and Networks	15 credits
P 159201 or 159234 R 159334, 159335, 159354, 159355	

159352 Advanced Web Development	15 credits
P 159201 or 159234 R 159339	
159361 Advanced Games Programming	15 credits
P 159261	

Data Science (135 credits)

Compulsory courses (45 credits from)

158337 Database Development	15 credits
P One of 1582xx or 1592xx R 158247	
297201 Data Wrangling and Machine Learning	15 credits
P 297101 or 161122 or (one of 159101, 159100 and one of 1611xx, 160101, 160102) R 158222	
297301 Applied Machine Learning and Big Data Processing	15 credits
P 158222 or 297201 R 158333	

Subject Courses

At least 30 credits from

Any 1612xx Courses

At least 15 credits from

Any 1613xx courses

At least 15 credits from

158258 Web Development	15 credits
P 1581xx or 1591xx R 158256	
159201 Algorithms and Data Structures	15 credits
P 159102 R 159271	

At least 15 credits from

158326 Software Construction	15 credits
P 158256 or 158258 or 159234 or 159270	
159302 Artificial Intelligence	15 credits
P 159201 or 159234 R 159372	

Compulsory capstone course (15 credits from)

158383 Information Technology Project	15 credits
P At least two (2) 1582xx courses	
159333 Programming Project	15 credits
P Three (3) of 1592xx, 1582xx or 2972xx and Appraisal Required R 159356	

Information Systems (120 credits)

The Degree of Bachelor of Māori Visual Arts

BMVA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to Part I of the Bachelor of Maori Visual Arts will conform to the normal requirements and procedures of the University and will be based partly on the assessment of a portfolio of work submitted by the candidate.

Qualification Requirements

- The Bachelor of Maori Visual Arts degree consists of four parts, each containing 120 credits.
- The degree of Bachelor of Maori Visual Arts may be awarded with or without Honours. A candidate who has fulfilled the requirements prescribed in the Regulations and whose work has been of a sufficiently high standard may be recommended by the Academic Board for admission to the degree with First or Second Class Honours. Candidates awarded Second Class Honours shall be listed in Division I or Division II.
- The following Schedule sets out parts, course numbers and credit values applying to courses offered for the degree of Bachelor of Maori Visual Arts.

Schedule for the Bachelor of Māori Visual Arts

Part One (At least 120 credits from)

Compulsory courses (90 credits from)

150106 Nga Hanga Whakairo: Traditional Māori Visual Art.....	15 credits
150107 Mata Puare: Studio IA.....	30 credits
150108 Mata Puare: Studio IB.....	45 credits

Plus either

300110 Te Reo Whakahoahoa: Socialising in Te Reo.....	15 credits
-------------------------------------------------------	------------

Or

300111 Te Reo Kōnakinaki: Developing Te Reo.....	15 credits
--------------------------------------------------	------------

Elective courses: Any one of the following courses or another course approved by the Head of School

146101 Understanding Cultural Difference.....	15 credits
150114 He Tirohanga Taketake: Māori Perspectives.....	15 credits
154101 Media and Society.....	15 credits

Part Two (At least 120 credits from)

Compulsory courses (90 credits from)

150206 Ngā Momo Whakairo: Contemporary Māori Visual Art.....	15 credits
P 150106	
150207 Mata Oho: Studio IIA.....	30 credits
P 150107	
150208 Mata Oho: Studio IIB.....	45 credits
P 150108	

Plus either

300111 Te Reo Kōnakinaki: Developing Te Reo.....	15 credits
--------------------------------------------------	------------

Or

300210 Te Reo Kōrerorero: Discussing in Te Reo.....	15 credits
P 300111	

Elective courses: Any one of the following courses or another course approved by the Head of School

139362 Oceanic Literatures of Aotearoa: Ngā Tuhinga Kōrero o te Moana nui a Kiwa.....	15 credits
148309 The New Zealand Wars.....	15 credits
R 148204	
150303 Mana Wahine: Māori Women.....	15 credits

Part Three (At least 120 credits from)

Compulsory courses (105 credits from)

150201 Te Kawenata o Waitangi: The Treaty of Waitangi in New Zealand Society R 269274.....	15 credits
150307 Mata: Studio IIIA.....	30 credits
P 150207	
150308 Mata: Studio IIIB.....	60 credits
P 150208	

Plus

300210 Te Reo Kōrerorero: Discussing in Te Reo.....	15 credits
P 300111	

Note, if 300210 has already been passed, a course approved by the Head of School

Part Four (120 credits from)

Compulsory courses (120 credits from)

150407 Matatau: Studio IVA.....	60 credits
P 150307	
150408 Matatau: Studio IVB.....	60 credits
P 150308	

The Degree of Bachelor of Natural Sciences

BNatSc

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Degree of Bachelor of Natural Sciences requires that the candidate will have:
 - (a) met the University admission requirements as specified; and
 - (b) have achieved at least 16 credits in each of two of NCEA Level 3 Biology, Chemistry, Physics, Mathematics; or
 - (c) have achieved a minimum B grade at A level in two of Biology, Chemistry, Physics, Mathematics in the University of Cambridge International Examinations; or
 - (d) have achieved at least 29 points including five points in each of two of Biology, Chemistry, Physics, Mathematics in the International Baccalaureate; or
 - (e) passed with a minimum C grade two of 162103 Introductory Biology, or 123103 Introductory Chemistry, or 124100 Introductory Physics; or
 - (f) have achieved to an equivalent level as in Regulations 1(b) to (e) in an alternative examination; or
 - (g) have achieved 16 credits at Merit or Excellence in each of five subjects in NCEA Level 3; or
 - (h) have achieved a B grade average across previous University study.

Qualification Requirements

2. Candidates for the Degree of Bachelor of Natural Sciences shall follow a parts-based programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - (a) completion of Parts One, Two, and Three;
 - (b) not more than 165 credits at 100 level;
 - (c) at least 75 credits at 300 level.
 and including:
 - (d) the courses listed in the Schedule for the Qualification;
 - (e) at least 75 credits from Schedule B to the Bachelor of Science;
 - (f) up to 75 credits from any subject area offered by the University;
 - (g) attending field trips, workshops, tutorials, and laboratories as required.

Specialisations

3. The Degree of Bachelor of Natural Sciences is awarded without specialisations.

Student Progression

4. Candidates must complete the requirements of Part One prior to progressing to Part Two.

Completion Requirements

5. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.

6. Candidates may be graduated when they meet the Admission, Qualification, and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

7. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Bachelor of Natural Sciences

Part One (120 credits from)

Compulsory courses (60 credits from)

15 credits from

120101 Plant Biology.....	15 credits
162101 Cell Biology.....	15 credits

15 credits from

30 credits from any approved courses from any subject area in the University

Part Two (120 credits from)

Compulsory courses (45 credits from)

15 credits from

200161 Introduction to Politics.....	15 credits
219101 Media Skills.....	15 credits
30 credits at any level from Schedule B to the Degree of Bachelor of Science	
30 credits from any approved courses from any subject area in the University	

Part Three (120 credits from)

Compulsory courses (60 credits from)

134308 Philosophy of Science.....	15 credits
R 134208	

45 credits from Schedule B to the Degree of Bachelor of Science, with at least 15 credits at 300 level

15 credits from any approved courses from any subject area in the University

The Degree of Bachelor of Nursing

BN

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Degree of Bachelor of Nursing requires that the candidate will:
 - (a) meet the University admission requirements as specified;
 - (b) hold a current First Aid Certificate from an approved provider;
 - (c) meet Health Clearance and Police Vetting requirements as specified by the Academic Board or their delegate;

- (d) meet the requirements for registration as a nurse in New Zealand as set down by the Nursing Council of New Zealand in terms of good character and fitness to be a nurse;
- (e) have achieved an IELTS of 6.5 with no band less than 6.5 within the preceding two years, if English is not the applicant's first language and the language of instruction in previous schooling is not English; and
- (f) be selected into the programme on the basis of a selection process which include a written application, and may include an interview as determined by the Academic Board or their delegate.

Qualification Requirements

2. Candidates for the Degree of Bachelor of Nursing shall follow a parts-based programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - (a) Part One, Part Two, and Part Three, as defined by the Schedule to the Qualification; and including:
 - (b) the compulsory courses listed in the Schedule for the Qualification; and
 - (c) attending Contact Workshops, block courses, field trips, workshops, tutorials, laboratories, and clinical experiences as required.

Specialisations

3. The Degree of Bachelor of Nursing is awarded without specialisation.

Academic Requirements

4. Every candidate for the Degree of Bachelor of Nursing shall complete to the satisfaction of Academic Board a minimum of 1100 hours of approved clinical practice and associated reports in accordance with the following courses:
 - 168172 Nursing Practice I: Foundations of Care
 - 168173 Nursing Practice II: Foundations of Practice
 - 168274 Nursing Practice III: Integrated Care Part A
 - 168275 Nursing Practice III: Integrated Care Part B
 - 168372 Nursing Practice IV: Acute Care
 - 168374 Pre-graduate Nursing Practice.
 A passing grade in these courses will be awarded on the basis of practical work completed in accordance with the guidelines and standards governing the practical work requirements.

Student Progression

5. Candidates may progress from Part One to Part Two, and from Part Two to Part Three, by passing all courses in the previous part.
6. The Academic Board may, under such conditions as it may determine and taking into account the recommendations of the examiners, admit any candidate to a supplementary examination where available in a course in which the candidate failed to gain a pass.
7. Candidates who fail to complete all the courses related to any Part in accordance with Regulation 5 shall re-enrol in the remaining unpassed course(s) at the next available offering of the course(s).
8. Candidates must maintain their eligibility for registration with the Nursing Council of New Zealand in terms of good character and fitness to be a nurse, throughout the duration of their enrolment in the programme.

Completion Requirements

9. A candidate's programme of study may not exceed five years, unless a specified time of suspension or extension has been approved by the Academic Board and the Nursing Council of New Zealand. Permission must be sought in advance of any suspension or extension by applying in writing to the Bachelor of Nursing Programme Director. Suspensions or extensions granted will appear on the academic transcript.
10. Candidates may be permitted to graduate when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

11. For candidates enrolled in the Degree of Bachelor of Nursing, the following will lead to exclusion from the qualification:
 - (a) failure to obtain a pass in any of the Bachelor of Nursing courses for which they have been enrolled for two occasions;
 - (b) failure to pass courses totalling at least 75 academic credits or failure to pass at least 60% of an approved part-time programme of study in any academic year; or
 - (c) failure to complete the Degree within five years from the date of first enrolment.

Candidates excluded under (a), (b), or (c) above will only be re-admitted to the Bachelor of Nursing with the approval of the Academic Board.

Transitional Provisions

12. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I qualification regulations, candidates enrolled in the Bachelor of Nursing prior to 1 January 2022 will be granted the following substitutions:

- (a) 168161 for 231107
- (b) 168162 for 168172
- (c) 168163, 168164, 168165 for 168171 and 168173
- (d) 168261 for 168273
- (e) 168262 and 168263 and 168264 and 168265 for 168272
- (f) 168266 for 168271
- (g) 168361 and 168365 for 168371 and 168373
- (h) 168362 and 168363 for 168372
- (i) 168364 and 168366 for 168374

These transition arrangements expire on 31 December 2025.

13. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I qualification regulations, candidates enrolled in the Bachelor of Nursing prior to 1 January 2025 who have successfully completed 168272 may substitute this for both 168274 and 168275. These transition arrangements expire 31 December 2027.

The Degree of Bachelor of Resource and Environmental Planning

BRP

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

1. Admission to the Degree of Bachelor of Resource and Environmental Planning requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

2. Candidates for the Degree of Bachelor of Resource and Environmental Planning shall follow a parts-based programme of study, which shall consist of courses totalling at least 480 credits, comprising:
- completion of 120 credits in each of Parts I, II, III, and IV. and including:
 - the compulsory courses from Schedule A for the Qualification;
 - at least one minor;
 - a minimum of 15 credits from Schedule C of the Degree;
 - elective courses to a maximum of 15 credits from courses offered for other Bachelor degrees;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

3. Courses with significant overlap of content will not be approved for inclusion in the Degree; course 132221 Planning Studies cannot be credited to the Degree of Bachelor of Resource and Environmental Planning.

Specialisations

4. Candidates shall complete a minor by passing at least 120 credits in a minor including 90 credits above 100 level of which at least 45 credits must be above 200 level. The requirements for each minor are set out in Schedule B for the Qualification.
5. Minors are available in: Agriculture, Ecology, Economics, Geography, Management, Māori Studies and Property Management.

Student Progression

6. Candidates shall not enrol in Part II unless they have passed all of their Part I requirements (120 credits) within two years of their enrolment into the Degree of Bachelor of Resource and Environmental Planning.
7. Candidates must complete the Schedule A requirements for Part II prior to progressing to Part III, and for Part III prior to progressing to Part IV.
8. The Degree of Bachelor of Resource and Environmental Planning may be awarded with or without a class of Honours.

Completion Requirements

9. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, and Undergraduate Certificates, and Graduate Diplomas and Graduate Certificates will apply.
10. Candidates may be graduated when they meet the Admission, Qualification, and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an alternative qualification should they meet the relevant Qualification requirements.

Academic Progress

11. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

12. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Resource and Environmental Management prior to 1 January 2020 will be permitted to substitute course(s) already completed for the a course or courses included in Schedule C. Such candidates who have already completed a course or courses towards the Agriculture, Geography, Ecology or Soil/Earth Science minor will be permitted to substitute the course(s) for a course or courses at the same level included in the Schedule for the minor. These transition arrangements expire 31 December 2025.
13. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Resource and Environmental Management prior to 1 January 2023 who have

successfully completed the requirements of Part Three within Schedule A with 90 credits may be exempt from taking 132318, until 31 December 2026.

Schedule for the Bachelor of Resource and Environmental Planning

Schedule A: Compulsory Planning courses

Part One

132101 Introduction to Professional Planning	15 credits
132102 Introduction to Planning Analytics	15 credits
132111 Oranga Taiao, Oranga Tangata: Planning and the Environment	15 credits
132112 Planning for Sustainable Development	15 credits

Part Two

132212 Professional Practice I	15 credits
P 132111, 132112	
132213 Policy Analysis and Evaluation	15 credits
132217 Planning Hazard-Resilient Communities	15 credits
145202 Working With Geographic Data	15 credits
R 132106	
150201 Te Kawenata o Waitangi: The Treaty of Waitangi in New Zealand Society	
R 269274	15 credits

Part Three

132304 Tūhono Taiao: Foundation of Māori Planning	15 credits
P 150201	
132305 Natural Resource Policy and Planning	15 credits
132311 Planning Theory	15 credits

The Degree of Bachelor of Retail and Business Management

BRBM

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Retail and Business Management requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Retail and Business Management shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 150 credits at 100 level;
 - at least 75 credits at 300 level; and including:
 - at least 300 credits selected from the schedule to the degree;
 - the core courses listed in Schedule A to the Qualification;
 - attending field trips, studios, workshops, tutorials and laboratories as required.
- Candidates who, in the opinion of the Academic Board, have passed with sufficient merit subjects for a Retail qualification registered on the New Zealand Qualifications Framework at Level 5 or higher, may be cross-credited with specified or unspecified courses not exceeding a total of 120 credits.

Specialisations

- Candidates may complete a minor by passing at least 60 credits in a specialisation, including at least 45 credits above 100 level, of which at least 15 credits must be at 300 level. The requirements for each minor are set out in Schedule B to the Qualification.
- Approved minors are: Business Information Systems and Electronic Commerce, Design, Logistics and Supply Chain Management, Management and Entrepreneurship, Marketing and Retail Banking.
- Minors may be included from any undergraduate degree within the University for which recognised minors are specified.
 - Where the minor is from another undergraduate degree the regulations of that programme for the minor will apply.
 - No course may be credited to more than one specialisation.

Academic Requirements

- Candidates are required to complete 315 hours of practical work in internship placements, in accordance with the requirements of courses:
 - 290100 Retail Practice Internship (45 hours; 6 days);
 - 290201 Retail Knowledge (90 hours; 12 days);
 - 290301 Retail Experience (180 hours; 24 days).
- Candidates will be responsible for securing their own placements with suitable retail organisations, which must be approved by the Internship Coordinator. All work undertaken must be completed in accordance with the required standards issued.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Business should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Degree of Bachelor of Science

BSc

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Degree of Bachelor of Science requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Science shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 165 credits at 100 level;
 - at least 75 credits at 300 level;
 and including:
 - core courses as defined by Schedule A to the Degree;
 - at least 240 credits from the Schedule to the Degree;
 - completion of at least one major;
 - attending block courses, Contact Workshops, field trips, workshops, tutorials and laboratories as required.
- Notwithstanding Regulations 2(c – e) and Regulation 4, and at the discretion of Academic Board, students exiting the Bachelor of Engineering with Honours, Bachelor of Food Technology with Honours, and Bachelor of Veterinary Science may have a personal programme variation approved in excess of stated limits, to meet the requirements of the BSc through substitution of courses from the schedules to those degrees, and may be exempt from the requirement to complete a major.

Specialisations

- Candidates must complete a major by passing 120 credits in a major, including 60 credits at 200-level and 60 credits at 300-level. The requirements for each major are specified in Schedule B to the Degree.
- Candidates may complete a double major by meeting the requirements of both majors as specified in Schedule B to the Degree. No course may be credited to two majors.
- Approved majors available are: Chemistry, Computer Science, Data Science*, Earth Science, Ecology and Conservation, Ecology and Sustainability*, Environmental Science, Exercise and Sport Science, Human Nutrition, Integrative Biology*, International Agriculture*, Marine Biology*, Mathematics, Microbiology, Molecular and Cellular Biology*, Molecular Cell Biology, Physics*, Physiology*, Plant Science, Psychology, Statistics, and Zoology.

* No new enrolments.
- Candidates may include up to two minors in the Degree of Bachelor of Science.

- A minor must include 60 credits, including 30 credits at 200-level and 30 credits at 300-level.
 - The requirements for each minor are set out in Schedule B to the Degree.
 - A candidate may not complete a major and a minor of the same name.
 - Minors may be included from any undergraduate degree within the University for which recognised minors are specified.
 - Where the minor is from another undergraduate degree the regulations of that programme for the minor will apply.
 - No course may be credited to both a major and a minor, or to more than one minor.
- Minors available are: Chemistry, Computer Science, Data Science*, Earth Science, Ecology and Conservation, Ecology and Sustainability*, Environmental Science, Exercise and Sport Science, Human Nutrition, Integrative Biology*, International Agriculture*, Marine Biology*, Mathematics, Microbiology, Molecular and Cellular Biology*, Molecular Cell Biology, Physics*, Physiology, Plant Science, Psychology, Statistics, and Zoology.

* No new enrolments.

Student Progression

- Candidates must pass at least 90 credits from Schedule A, including any compulsory courses, in their first 120 credits of study towards the Bachelor of Science, unless otherwise approved by Academic Board or their delegate.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification, and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Certificate in Science and Technology or Diploma in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Bachelor of Science prior to 1 January 2022 may substitute a relevant course or courses already completed towards the degree for a course or courses of the same level and credit value within the Schedule for the degree. Such candidates who are enrolled in the Ecology major or minor or Molecular Genetics and Biochemistry major or minor may graduate with the name of the major or minor under which they enrolled.

14. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Integrative Biology major or minor or Marine Biology major or minor prior to 1 January 2022 may transfer to either the Ecology and Conservation major or minor or the Zoology major or minor. Candidates enrolled in the Ecology and Sustainability major or minor may transfer to the Ecology and Conservation major or minor. Candidates enrolled in the Molecular and Cellular Biology major or minor may transfer to the Molecular Cell Biology major or minor. In all cases candidates may substitute a relevant course or courses already completed for a course or courses of the same level and credit value within the relevant schedule.
15. These transitions arrangements expire 31 December 2025.
16. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled within either the Mathematics major or minor prior to 1 January 2023 may substitute 160319, if successfully completed, for 160314 until 31 December 2026.
17. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Exercise and Sport Science major or minor within the Bachelor of Science prior to 1 January 2023 who have successfully completed 234324 may substitute this for 234327 until 31 December 2026.
18. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Bachelor of Science prior to 1 January 2024 may substitute 161122 if successfully completed for 297101. Candidates enrolled in the Data Science major or minor may substitute 158222 if successfully completed for 297201 and 158333 if successfully completed for 297301.
19. These transition arrangements expire 31 December 2027.
20. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I qualification regulations, candidates enrolled within the Bachelor of Science (Earth Science major and minor) prior to 1 January 2025 will be granted the following substitutions:
- 233211 for 233209
 - 233212 for 233215
 - 233213 for 121200
 - 233311 for 233309
 - 233312 for 233303
- These transition arrangements expire 31 December 2028.
21. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Physiology minor within the Bachelor of Science prior to 1 January 2025 who have successfully completed 194342 and/or 194346 may substitute these for 194350 and/or 199313 until 31 December 2027.
22. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the **Exercise and Sport Science major** prior to 1 January 2025 who have successfully completed at least 30 credits towards the major requirements, will be able to complete the major, or will be transferred to an alternative major or qualification. In addition candidates who have successfully completed 194348 may substitute this for 234361. These transitional arrangements expire on 31 December 2027.
23. Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Exercise and Sport Science minor prior to 1 January 2025 who have successfully completed 234327 and/or 234360 may substitute these for 234361, or 234312, or 151332. These transitional arrangements expire on 31 December 2027.

Schedule for the Bachelor of Science

Schedule A: Core Courses (At least 90 credits from)

Compulsory courses (At least 45 credits from)

15 credits from

- 247111 Science and Sustainability for Agriculture and Horticulture 15 credits
R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247112, 247113, 247114
- 247112 Science and Sustainability for ICT 15 credits
R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247111, 247113, 247114

- 247113 Science and Sustainability for Science 15 credits
R 247177, 141111, 141112, 228111, 228112, 247155, 119155, 246102, 247111, 247112, 247114

15 credits from

- 161111 Applied Statistics 15 credits
R 115101, 161101, 161120, 161122, 161130, 161140
- 297101 Statistical Data Science 15 credits
R 161122

At least 15 credits from

- 124103 Biophysical Principles 15 credits
R 160101, 160102, 160103, 160104, 160105, 160111, 160112, 160132, 160133, 124100, 124104, 124105, 124111
- 160101 Calculus 15 credits
R 160112, 160133, 228172
- 160102 Algebra 15 credits
R 160112, 160133, 228172
- 160104 Introductory Mathematics for Science 15 credits
R 124103, 160101, 160102, 160103, 160105, 160111, 160112, 160131, 160132, 160133, 228171, 228172
- 160105 Methods of Mathematics 15 credits
R 160101, 160102, 160103, 160111, 160112, 160131, 160132, 160133, 228171, 228172

Remaining credits from

- 117155 Introduction to Animal Science 15 credits
R 117152, and 117153
- 119120 Plants for Agriculture and Horticulture 15 credits
R 283101, 284101
- 120101 Plant Biology 15 credits
- 122102 Biochemistry 15 credits
P 123101 or 123104 or 123103 (A pass required) R 122222, 227111, 227106
- 123103 Chemistry for Modern Sciences 15 credits
R 119153, 119158, 123103 may not be taken after 123101, 123102, 123104, 123105, 123171 or 123172 have been passed.
- 123104 Chemistry for Biological Systems 15 credits
R 123101, 123171
- 123105 Chemistry and the Physical World 15 credits
R 123102, 123172
- 124100 Introductory Physics 15 credits
R 119153, 124103 124100 may not be taken after any of 124101, 124102, 124111, 124171, 124172, 124104, 124105 has been passed
- 124104 Physics 1A: Mechanics and Thermodynamics 15 credits
R 124101, 124111, 124171
- 124105 Physics 1B: Electricity, Waves and Modern Physics 15 credits
R 124102, 124172
- 151131 Introduction to Food and Nutrition 15 credits
R 141101, 151232, 151344, 214131
- 158120 Web-based IT Fundamentals 15 credits
- 159100 Programming for Engineering and Technology 15 credits
R 159101
- 159101 Applied Programming 15 credits
R 159100
- 159102 Computer Science and Programming 15 credits
P 159100 or 159101
- 162101 Cell Biology 15 credits
- 162103 Introductory Biology 15 credits
R 162103 may not be taken after 162101 has been passed
- 175101 Psychology as a Social Science 15 credits
- 175102 Psychology as a Natural Science 15 credits
- 189151 Principles of Soil Science 15 credits
P 247111 or 247113
- 196101 Ecology, Evolution and Behaviour 15 credits
- 199103 Animals and the Environment 15 credits
R 199101
- 214101 Human Bioscience: Normal Body Function 15 credits
R 194101, 117155
- 233105 Our Dynamic Earth 15 credits
R 233101 and 145121
- 234121 Functional Anatomy 15 credits
R 214170
- 246100 Climate Science Consciousness 15 credits
R 246101

Schedule B: Specialisations**Majors****Chemistry (120 credits)****200-level courses (60 credits from)**

123201	Chemical Energetics	15 credits
	P One of (123102, 123105, 124104 or 123172) and one of (160101, 160102, 160105, 160132 or 160133)	
123207	Molecular Chemistry	15 credits
	P One of (123101 or 123104 or 123171) AND one of (123102 or 123105 or 123172) R 123202, 123203	
123208	Chemical Analysis	15 credits
	P One of 123101 or 123102 or 123104 or 123105 or 123171 or 123172 R 123204, 123206	
123271	Molecules to Materials	15 credits
	P (123101, 123104 or 123171) and (123102, 123105 or 123172)	

300-level courses (60 credits from)

123305	Contemporary Topics in Chemistry	15 credits
	P One of (123101, 123102, 123104, 123105, 123171, 123172) and one of (247111, 247112, 247113, 247114)	
123307	Advanced Inorganic Chemistry	15 credits
	P 123207 and 123208 R 123313	
123308	Advanced Organic Chemistry	15 credits
	P (123207 and 123208) or (123206 and 123210) R 123312	
123310	Advanced Concepts in Organic Chemistry	15 credits
	P 123202 or 123210 R 123312	
123331	Advanced Physical and Computational Chemistry	15 credits
	P 123201	
123332	Advanced Topics in Chemistry	30 credits
	P Any two of 123201, 123202, 123203, 123204, 123206, 123210, or 123271	
141395	Food Chemistry	15 credits
	P 123271 and 123201 R 151231	

Computer Science (120 credits)**200-level courses (60 credits from)**

159201	Algorithms and Data Structures	15 credits
	P 159102 R 159271	
159234	Object-Oriented Programming	15 credits
	P 159102	
159236	Embedded Programming	15 credits
	P 159102 R 159233, 159270	
159251	Software Engineering Design and Construction	15 credits
	P 159234	
159272	Programming Language Paradigms	15 credits
	P 159102 R 159202	

300-level courses (60 credits from)

159302	Artificial Intelligence	15 credits
	P 159201 or 159234 R 159372	
159336	Mobile Application Development	15 credits
	P 159234 or 159235	
159341	Programming Languages, Algorithms and Concurrency	15 credits
	P 159201 or 159202 R 159331	
159342	Operating Systems and Networks	15 credits
	P 159201 or 159234 R 159334, 159335, 159354, 159355	
159352	Advanced Web Development	15 credits
	P 159201 or 159234 R 159339	

Data Science (120 credits)**No new enrolments****Compulsory courses**

158337	Database Development	15 credits
	P One of 1582xx or 1592xx R 158247	
159201	Algorithms and Data Structures	15 credits
	P 159102 R 159271	
159302	Artificial Intelligence	15 credits
	P 159201 or 159234 R 159372	
161250	Data Analysis	15 credits
	P 1611xx or 297101 R 161220	
161251	Regression Modelling	15 credits
	P 1611xx or 297101 R 161221	
161324	Data Mining	15 credits
	P One of 161122, 297101, 161220, 161221, 161250 or 161251 R 161223 and 161777	
297201	Data Wrangling and Machine Learning	15 credits
	P 297101 or 161122 or (one of 159101, 159100 and one of 1611xx, 160101, 160102) R 158222	

297301	Applied Machine Learning and Big Data Processing	15 credits
	P 158222 or 297201 R 158333	

Earth Science (120 credits)**Compulsory courses**

121200	Environmental Monitoring and Field Skills	15 credits
233209	Earth's Critical Resources	15 credits
	P 233105 R 233211	
233214	GIS and Spatial Statistics	15 credits
	P 161111 or 161122 or 297101 R 233251, 233301	
233215	Earth Surface Processes and Landforms	15 credits
	P 233105 R 233212	
233303	Natural Hazards and Climate Change	15 credits
233309	Earth's Changing Climate	15 credits
233313	Earth Systems	15 credits
	P (160101 or 160102 or 160105) and (233211 or 233212)	
233314	Remote Sensing and Earth Observation	15 credits
	P 233214 R 233301	

Ecology and Conservation (120 credits)**200 level courses (60 credits from)****Compulsory courses (45 credits from)**

196201	Biodiversity of New Zealand	15 credits
	P One of 196101, 199103, or 120101 R 199206	
196205	Ecology and Conservation	15 credits
	P 1611xx and one of (196101 or 199101 or 199103 or 120101 or 121103) R 196206	
196217	Evolutionary Biology	15 credits
	P 162101 and (123103 or 123104) R 196207	

15 credits from

196223	Freshwater Ecology	15 credits
	P 196101 or 199103 or 199101 or 121103 R 196313	
196225	Introductory Marine Biology	15 credits
	P 196101 and (199101 or 199103)	

300 level courses**60 credits from**

196315	Conservation Science	15 credits
	P 196205	
196317	Community and Ecosystem Ecology	15 credits
	P 196205	
196318	Molecular Ecology	15 credits
	P One of 196207, 196217, 203210 or 203212 R 199317	
196319	Terrestrial Ecology	15 credits
	P One of (196205, 196207, 196217, 203210)	
196329	Marine Ecology	15 credits
	P 196225 R 196350	

Ecology and Sustainability (120 credits)**No new enrolments****Compulsory courses (120 credits from)**

161250	Data Analysis	15 credits
	P 1611xx or 297101 R 161220	
196217	Evolutionary Biology	15 credits
	P 162101 and (123103 or 123104) R 196207	
196318	Molecular Ecology	15 credits
	P One of 196207, 196217, 203210 or 203212 R 199317	
199312	Behavioural Ecology	15 credits
	P One of 199203, 199204, 196207 or 196217 R 196307	

Environmental Science (120 credits)**Compulsory courses**

121210	Environmental Issues	15 credits
	R 121311	
121213	Land and Water Science	15 credits
	P (189151 OR 145111) AND (233105 OR 117153 OR 199103) R 145222	
121214	Landscape and Human Ecology	15 credits
	P 196101	
121310	Environmental Solutions	15 credits
	P 121210 R 121211	
121313	Applied River Management	15 credits
	P 121213 or 145222	
188363	Applied Environmental Management	15 credits
233214	GIS and Spatial Statistics	15 credits
	P 161111 or 161122 or 297101 R 233251, 233301	
233314	Remote Sensing and Earth Observation	15 credits
	P 233214 R 233301	

Exercise and Sport Science (120 credits)**No new enrolments****200-level courses (60 credits from)**

122202 The Dynamic Cell.....	15 credits
P 122102 R 122233	
234222 Sport Biomechanics.....	15 credits
R 234201	
234223 Exercise Physiology.....	15 credits
P 234121 or 214101 or 194101 R 234203	
234242 Motor Learning and Control.....	15 credits
R 274254, 234224	

300-level courses (60 credits from)

151332 Nutrition for Sport and Performance.....	15 credits
P 151232 or 234223	
234327 Investigating Sports Performance.....	15 credits
P Any 30 credits at 200-level from the 2342xx range of courses	
234360 Sport Psychology.....	15 credits
R 152318	
234361 Exercise Psychology.....	15 credits

Human Nutrition (120 credits)**200-level courses (60 credits from)**

122202 The Dynamic Cell.....	15 credits
P 122102 R 122233	
151231 Science of Food.....	15 credits
P 123101 or 123104	
151232 Nutrition and Metabolism.....	15 credits
P 122102 and (123101 or 123104) R 151344	
194241 Physiological Control Systems.....	15 credits
P 194101 or 214101 or 117155 or 199103	

300-level courses (60 credits from)

151331 Maternal and Child Nutrition.....	15 credits
P 151232 R 151345	
151332 Nutrition for Sport and Performance.....	15 credits
P 151232 or 234223	
151333 Adult Nutrition and Positive Ageing.....	15 credits
P 151232	
151334 Nutrition Communication and Promotion.....	15 credits
P 151131	

Integrative Biology (120 credits)**No new enrolments****Compulsory courses (120 credits from)**

196217 Evolutionary Biology.....	15 credits
P 162101 and (123103 or 123104) R 196207	
196318 Molecular Ecology.....	15 credits
P One of 196207, 196217, 203210 or 203212 R 199317	

International Agriculture (120 credits)**No new enrolments****Compulsory courses (60 credits from)**

119202 International Agricultural Production Systems.....	15 credits
119203 Agriculture and the Environment.....	15 credits
P 123103 or 123104	
119302 Problem Solving in International Agriculture.....	15 credits
P 119202, 119203	
119303 Professional Experience in Agriculture.....	15 credits
P 119202, 119203	

Compulsory course selection**30 credits from**

117201 Livestock Production Science.....	15 credits
P One of 117152, 117153, 117155, 194101, 199101, or 199103	
189251 Soil Fertility Management.....	15 credits
P 189151	
283201 Pasture and Crop Agronomy.....	15 credits
P 283101 or 120101 or 119120 R 171202	
284201 Horticultural Production Systems.....	15 credits
P 119281 R 119258	

30 credits from

117371 Animal Production.....	15 credits
P One of 117201, 117202 or 117254	
283301 Pasture Production and Practice.....	15 credits
P 283201	
284301 Horticultural Crop Development & Yield.....	15 credits
P 284201	

Marine Biology (120 credits)**No new enrolments****Compulsory courses (120 credits from)**

161250 Data Analysis.....	15 credits
P 1611xx or 297101 R 161220	
196217 Evolutionary Biology.....	15 credits
P 162101 and (123103 or 123104) R 196207	
196225 Introductory Marine Biology.....	15 credits
P 196101 and (199101 or 199103)	
196318 Molecular Ecology.....	15 credits
P One of 196207, 196217, 203210 or 203212 R 199317	
196327 Marine Mammalogy.....	15 credits
P 199101 or 199103	
196329 Marine Ecology.....	15 credits
P 196225 R 196350	

Mathematics (120 credits)**200-level courses (60 credits from)**

160203 Multivariable Calculus.....	15 credits
P One of 160101, 160112, 160133 or 228172	
160204 Differential Equations I.....	15 credits
P 160101 or 160112 or 160133 or 228172	
160211 Linear Algebra.....	15 credits
P 160102, 160112, 160133 or 228172	
160212 Discrete Mathematics.....	15 credits
P One of (160101, 160102, 160103, 160105, 160111, 160112, 160132, 160133, 228171 or 228172) and one of (159101, 159171 or 230112)	

300-level courses (60 credits from)

160301 Real and Complex Analysis.....	15 credits
P 160203	
160302 Modern Algebra.....	15 credits
P 160211 or 160212	
160314 Combinatorics.....	15 credits
P 160212	
160318 Differential Equations II.....	15 credits
P 160204	

Microbiology (120 credits)**Compulsory courses**

162211 Biology and Genetics of Microorganisms.....	15 credits
P 162101 or 123104	
162221 Immunology.....	15 credits
P 162101 R 162303, 162389	
162301 Medical Microbiology.....	15 credits
P 162211 and (162221 or 162283) R 162384	
162304 Applied and Environmental Microbiology.....	15 credits
P One of 162211, 162212, 162214, 196213, 203210, 203300, 203310, 203340 or 280201	
203210 Genetics and Evolution.....	15 credits
P 162101 R 203202 and 203212	
203310 DNA Technology.....	15 credits
P One of 122231, 162211, 203240 or 203211 R 203300, 203340	
203311 Genome Science.....	15 credits
P 162101 R 203328 and 203341	
280201 Industrial Microbiology.....	15 credits
P (123101 or 123104 or 123171) and (123102 or 123105 or 123172 or 122102) R 162212, 162214	

Molecular Cell Biology (120 credits)**200 level courses (60 credits from)****Compulsory courses (45 credits from)**

122202 The Dynamic Cell.....	15 credits
P 122102 R 122233	
122231 Genes and Gene Expression.....	15 credits
P 162101 and (123101 or 123103 or 123104) R 203211 and 203240	
203210 Genetics and Evolution.....	15 credits
P 162101 R 203202 and 203212	

15 credits from

122201 The Molecular Cell.....	15 credits
P Either (122102 and 162101) or 122231	
203203 Biomedicine.....	15 credits
P 162101	

300 level courses (60 credits from)**Compulsory courses (45 credits from)**

122303 Gene Regulation.....	15 credits
P 122202 or 122233 or 122231 or 203240 or 203211 or 203300 or 203310	

203310 DNA Technology 15 credits
P One of 122231, 162211, 203240 or 203211 R 203300, 203340

203311 Genome Science 15 credits
P 162101 R 203328 and 203341

15 credits from

122301 Advanced Cell Biology 15 credits
P One of 122201 or 122202 or 122231

196318 Molecular Ecology 15 credits
P One of 196207, 196217, 203210 or 203212 R 199317

Molecular and Cellular Biology (120 credits)

No new enrolments

Compulsory courses (120 credits from)

196217 Evolutionary Biology 15 credits
P 162101 and (123103 or 123104) R 196207

196318 Molecular Ecology 15 credits
P One of 196207, 196217, 203210 or 203212 R 199317

203203 Biomedicine 15 credits
P 162101

Physics (120 credits)

No new enrolments

Compulsory courses

123201 Chemical Energetics 15 credits
P One of (123102, 123105, 124104 or 123172) and one of (160101, 160102, 160105, 160132 or 160133)

160203 Multivariable Calculus 15 credits
P One of 160101, 160112, 160133 or 228172

Physiology (120 credits)

No new enrolments

200-level courses (60 credits from)

Compulsory courses (45 credits from)

122202 The Dynamic Cell 15 credits
P 122102 R 122233

194241 Physiological Control Systems 15 credits
P 194101 or 214101 or 117155 or 199103

194242 Physiology of Mammalian Organ Systems 15 credits
P 194101 or 214101 or 117155 or 117153 or 199103

Compulsory course selection (15 credits from)

194243 Physiological Strategies for Survival 15 credits
P One of 117155, 194101, 199101 or 199103 R 194245

214201 Human Bioscience: Impaired Body Function 15 credits
P (214101 and 214102) OR (162101; and 194101 or 117155 or 214101)

300-level courses (60 credits from)

Compulsory courses (30 credits from)

194346 Metabolic Physiology 15 credits

Compulsory course selection (30 credits from)

117332 Animal Welfare Science 15 credits
P Two of 194241, 194242, 194243 or 199203 R 194343

194350 Human Lifecycle Physiology 15 credits
P One of the following: 194241, 194242, 122202 or 214201

199313 Environmental Physiology 15 credits
P 194241 or 194242 or 199212 R 194345

Plant Science (120 credits)

Compulsory courses

120217 Plant, Cell and Environment 15 credits
P 120101

120219 Plants and People 15 credits

120303 Plant Diversity 15 credits
P One of (120201, 120218, 120219, 196205, 196207 or 203210)

120306 Plant Improvement 15 credits
P 203210 or 284201 R 120304

196205 Ecology and Conservation 15 credits
P 1611xx and one of (196101 or 199101 or 199103 or 120101 or 121103) R 196206

196319 Terrestrial Ecology 15 credits
P One of (196205, 196207, 196217, 203210)

203210 Genetics and Evolution 15 credits
P 162101 R 203202 and 203212

284342 Horticultural Productivity and Quality 15 credits
P 120217 or 284201

Psychology (120 credits)

200-level courses (60 credits from)

Compulsory course

175203 Introduction to Psychological Research 15 credits
P 175102

Compulsory course selection (45 credits from)

175201 Social Psychology 15 credits

175205 Brain and Behaviour 15 credits
P 175102

175206 Memory and Cognition 15 credits
P 175102

175210 Ngā Tirohanga Rua o te Taha Hinengaro: Bicultural Perspectives in Psychology 15 credits
R 175312

300-level courses (60 credits from)

175301 Community Psychology 15 credits
P 175203

175302 Introduction to Clinical Psychology 15 credits
P 175203

175303 The Practice of Psychological Research 15 credits
P 175203

175304 The Psychology of Security 15 credits

175306 Assessment of Individual Differences 15 credits
P 175203

175309 Forensic Psychology 15 credits
P 175203

175311 Psychology of Women 15 credits
P 175203

175316 Evolution, Culture and Mind 15 credits
P 175203

175317 Health Psychology 15 credits
P 175203

175318 Conducting Psychological Research 15 credits
P 175203

175343 Personnel Psychology and Career Development 15 credits
P 175203

175345 Organisational Psychology 15 credits
P 175203

Statistics (120 credits)

200-level courses (60 credits from)

Compulsory courses (30 credits from)

161250 Data Analysis 15 credits
P 1611xx or 297101 R 161220

161251 Regression Modelling 15 credits
P 1611xx or 297101 R 161221

Compulsory course selection (30 credits from)

160211 Linear Algebra 15 credits
P 160102, 160112, 160133 or 228172

161222 Design and Analysis of Experiments 15 credits
P 1611xx or 297101 R 161322

233214 GIS and Spatial Statistics 15 credits
P 161111 or 161122 or 297101 R 233251, 233301

300-level courses (60 credits from)

161304 Statistical Modelling 15 credits
P (160101 or 160102 or 160105) and (161250 or 161251 or 161220 or 161221)

161323 Multivariate Analysis 15 credits
P One of 161222, 161220, 161221, 161250, 161251, 233214 R 161762

161324 Data Mining 15 credits
P One of 161122, 297101, 161220, 161221, 161250 or 161251 R 161223 and 161777

161331 Biostatistics 15 credits
P 161250 or 161251 or 161220 or 161221 R 161327, 161778

Zoology (120 credits)

200-level courses (60 credits from)

Compulsory courses (45 credits from)

196217 Evolutionary Biology 15 credits
P 162101 and (123103 or 123104) R 196207

199211 Invertebrate Zoology 15 credits
P One of 196101, 199101 or 199103 R 199214

199212 Vertebrate Zoology 15 credits
P 196101 and (199101 or 199103)

15 credits from

196225 Introductory Marine Biology 15 credits
P 196101 and (199101 or 199103)

199203 Evolutionary Principles of Animal Behaviour	15 credits
P One of (199103, 199101 or 196101) R 199204, 117255	

300-level courses (60 credits from)**Compulsory courses (45 credits from)**

199312 Behavioural Ecology	15 credits
P One of 199203, 199204, 196207 or 196217 R 196307	
199313 Environmental Physiology	15 credits
P 194241 or 194242 or 199212 R 194345	
199330 Ornithology	15 credits
P One of 196201, 199206, 199212 or 194245	
15 credits from	
196327 Marine Mammalogy	15 credits
P 199101 or 199103	
199310 Entomology	15 credits
P 196201 or 199206 or 199211 or 283201 or 285201	

Minors**Chemistry (60 credits)****200-level courses (30 credits from)**

123201 Chemical Energetics	15 credits
P One of (123102, 123105, 124104 or 123172) and one of (160101, 160102, 160105, 160132 or 160133)	
123207 Molecular Chemistry	15 credits
P One of (123101 or 123104 or 123171) AND one of (123102 or 123105 or 123172) R 123202, 123203	
123208 Chemical Analysis	15 credits
P One of 123101 or 123102 or 123104 or 123105 or 123171 or 123172 R 123204, 123206	
123271 Molecules to Materials	15 credits
P (123101, 123104 or 123171) and (123102, 123105 or 123172)	

300-level courses (30 credits from)

123305 Contemporary Topics in Chemistry	15 credits
P One of (123101, 123102, 123104, 123105, 123171, 123172) and one of (247111, 247112, 247113, 247114)	
123307 Advanced Inorganic Chemistry	15 credits
P 123207 and 123208 R 123313	
123308 Advanced Organic Chemistry	15 credits
P (123207 and 123208) or (123206 and 123210) R 123312	
123310 Advanced Concepts in Organic Chemistry	15 credits
P 123202 or 123210 R 123312	
123331 Advanced Physical and Computational Chemistry	15 credits
P 123201	
123332 Advanced Topics in Chemistry	30 credits
P Any two of 123201, 123202, 123203, 123204, 123206, 123210, or 123271	
141395 Food Chemistry	15 credits
P 123271 and 123201 R 151231	

Computer Science (60 credits)**200-level courses (30 credits from)**

159201 Algorithms and Data Structures	15 credits
P 159102 R 159271	
159234 Object-Oriented Programming	15 credits
P 159102	
159235 Programming for Computer Graphics	15 credits
P 159102 R 159360	
159236 Embedded Programming	15 credits
P 159102 R 159233, 159270	
159251 Software Engineering Design and Construction	15 credits
P 159234	
159272 Programming Language Paradigms	15 credits
P 159102 R 159202	

300-level courses (30 credits from)

159302 Artificial Intelligence	15 credits
P 159201 or 159234 R 159372	
159336 Mobile Application Development	15 credits
P 159234 or 159235	
159341 Programming Languages, Algorithms and Concurrency	15 credits
P 159201 or 159202 R 159331	
159342 Operating Systems and Networks	15 credits
P 159201 or 159234 R 159334, 159335, 159354, 159355	
159352 Advanced Web Development	15 credits
P 159201 or 159234 R 159339	

Data Science (60 credits)**No new enrolments****Compulsory courses**

161324 Data Mining	15 credits
P One of 161122, 297101, 161220, 161221, 161250 or 161251 R 161223 and 161777	
297201 Data Wrangling and Machine Learning	15 credits
P 297101 or 161122 or (one of 159101, 159100 and one of 1611xx, 160101, 160102) R 158222	
297301 Applied Machine Learning and Big Data Processing	15 credits
P 158222 or 297201 R 158333	
Compulsory course selection (15 credits from)	
161250 Data Analysis	15 credits
P 1611xx or 297101 R 161220	
161251 Regression Modelling	15 credits
P 1611xx or 297101 R 161221	

Earth Science (60 credits)**Compulsory course selection****200-level courses (30 credits from)**

233209 Earth's Critical Resources	15 credits
P 233105 R 233211	
233214 GIS and Spatial Statistics	15 credits
P 161111 or 161122 or 297101 R 233251, 233301	
233215 Earth Surface Processes and Landforms	15 credits
P 233105 R 233212	
300-level courses (30 credits from)	
233303 Natural Hazards and Climate Change	15 credits
233309 Earth's Changing Climate	15 credits
233313 Earth Systems	15 credits
P (160101 or 160102 or 160105) and (233211 or 233212)	
233314 Remote Sensing and Earth Observation	15 credits
P 233214 R 233301	

Ecology and Conservation (60 credits)**200 level courses (30 credits from)**

196201 Biodiversity of New Zealand	15 credits
P One of 196101, 199103, or 120101 R 199206	
196205 Ecology and Conservation	15 credits
P 1611xx and one of (196101 or 199101 or 199103 or 120101 or 121103) R 196206	
196217 Evolutionary Biology	15 credits
P 162101 and (123103 or 123104) R 196207	
196223 Freshwater Ecology	15 credits
P 196101 or 199103 or 199101 or 121103 R 196313	
196225 Introductory Marine Biology	15 credits
P 196101 and (199101 or 199103)	

300-level courses (30 credits from)

196315 Conservation Science	15 credits
P 196205	
196317 Community and Ecosystem Ecology	15 credits
P 196205	
196318 Molecular Ecology	15 credits
P One of 196207, 196217, 203210 or 203212 R 199317	
196319 Terrestrial Ecology	15 credits
P One of (196205, 196207, 196217, 203210)	
196329 Marine Ecology	15 credits
P 196225 R 196350	

Ecology and Sustainability (60 credits)**No new enrolments****Compulsory courses (60 credits from)****Environmental Science (60 credits)****Compulsory courses**

121213 Land and Water Science	15 credits
P (189151 OR 145111) AND (233105 OR 117153 OR 199103) R 145222	
121214 Landscape and Human Ecology	15 credits
P 196101	
121313 Applied River Management	15 credits
P 121213 or 145222	
188363 Applied Environmental Management	15 credits

Exercise and Sport Science (60 credits)**Compulsory courses (45 credits from)**

234222 Sport Biomechanics	15 credits
R 234201	

234223 Exercise Physiology 15 credits
P 234121 or 214101 or 194101 R 234203

234361 Exercise Psychology 15 credits

Compulsory course selection (15 credits from)

151332 Nutrition for Sport and Performance 15 credits
P 151232 or 234223

234312 Advanced Exercise Prescription and Therapy 15 credits
R 214371

Schedule C: Exercise and Sport Science Minor available under Transitional Provisions (60 credits from)

At least one of

45 credits, with at least 15 credits at 300 level from the following

Human Nutrition (60 credits)

Compulsory courses

151231 Science of Food 15 credits
P 123101 or 123104

151232 Nutrition and Metabolism 15 credits
P 122102 and (123101 or 123104) R 151344

151232 Nutrition and Metabolism 15 credits
P 122102 and (123101 or 123104) R 151344

151331 Maternal and Child Nutrition 15 credits
P 151232 R 151345

151333 Adult Nutrition and Positive Ageing 15 credits
P 151232

International Agriculture (60 credits)

No new enrolments

Compulsory courses (60 credits from)

119202 International Agricultural Production Systems 15 credits

119203 Agriculture and the Environment 15 credits
P 123103 or 123104

119302 Problem Solving in International Agriculture 15 credits
P 119202, 119203

119303 Professional Experience in Agriculture 15 credits
P 119202, 119203

Marine Biology (60 credits)

No new enrolments

Compulsory courses (60 credits from)

196225 Introductory Marine Biology 15 credits
P 196101 and (199101 or 199103)

196329 Marine Ecology 15 credits
P 196225 R 196350

Mathematics (60 credits)

200-level courses (30 credits from)

160203 Multivariable Calculus 15 credits
P One of 160101, 160112, 160133 or 228172

160204 Differential Equations I 15 credits
P 160101 or 160112 or 160133 or 228172

160211 Linear Algebra 15 credits
P 160102, 160112, 160133 or 228172

160212 Discrete Mathematics 15 credits
P One of (160101, 160102, 160103, 160105, 160111, 160112, 160132, 160133, 228171 or 228172) and one of (159101, 159171 or 230112)

300-level courses (30 credits from)

160301 Real and Complex Analysis 15 credits
P 160203

160302 Modern Algebra 15 credits
P 160211 or 160212

160314 Combinatorics 15 credits
P 160212

160318 Differential Equations II 15 credits
P 160204

Microbiology (60 credits)

Compulsory courses

162211 Biology and Genetics of Microorganisms 15 credits
P 162101 or 123104

162221 Immunology 15 credits
P 162101 R 162303, 162389

162301 Medical Microbiology 15 credits
P 162211 and (162221 or 162283) R 162384

162304 Applied and Environmental Microbiology 15 credits
P One of 162211, 162212, 162214, 196213, 203210, 203300, 203310, 203340 or 280201

Molecular Cell Biology (60 credits)

200 level courses (30 credits from)

122201 The Molecular Cell 15 credits
P Either (122102 and 162101) or 122231

122202 The Dynamic Cell 15 credits
P 122102 R 122233

122231 Genes and Gene Expression 15 credits
P 162101 and (123101 or 123103 or 123104) R 203211 and 203240

203203 Biomedicine 15 credits
P 162101

203210 Genetics and Evolution 15 credits
P 162101 R 203202 and 203212

300 level courses (30 credits from)

122301 Advanced Cell Biology 15 credits
P One of 122201 or 122202 or 122231

122303 Gene Regulation 15 credits
P 122202 or 122233 or 122231 or 203240 or 203211 or 203300 or 203310

196318 Molecular Ecology 15 credits
P One of 196207, 196217, 203210 or 203212 R 199317

203310 DNA Technology 15 credits
P One of 122231, 162211, 203240 or 203211 R 203300, 203340

203311 Genome Science 15 credits
P 162101 R 203328 and 203341

Molecular and Cellular Biology (60 credits)

No new enrolments

Compulsory courses (60 credits from)

203203 Biomedicine 15 credits
P 162101

Physics (60 credits)

No new enrolments

Compulsory courses

Schedule C: Physics Minor available under Transitional Provisions (75 credits from)

15 credits from

15 credits from

45 credits at 200-level and 300-level, with at least 15 credits at 300-level, with the prefix 124

Physiology (60 credits)

Compulsory courses (45 credits from)

194242 Physiology of Mammalian Organ Systems 15 credits
P 194101 or 214101 or 117155 or 117153 or 199103

194350 Human Lifecycle Physiology 15 credits
P One of the following: 194241, 194242, 122202 or 214201

199313 Environmental Physiology 15 credits
P 194241 or 194242 or 199212 R 194345

Compulsory course selection (15 credits from)

194241 Physiological Control Systems 15 credits
P 194101 or 214101 or 117155 or 199103

214201 Human Bioscience: Impaired Body Function 15 credits
P (214101 and 214102) OR (162101; and 194101 or 117155 or 214101)

Plant Science (60 credits)

Compulsory courses

120217 Plant, Cell and Environment 15 credits
P 120101

120219 Plants and People 15 credits

120303 Plant Diversity 15 credits
P One of (120201, 120218, 120219, 196205, 196207 or 203210)

120306 Plant Improvement 15 credits
P 203210 or 284201 R 120304

Psychology (60 credits)

200-level courses (30 credits from)

Compulsory course

175203 Introduction to Psychological Research 15 credits
P 175102

15 credits from

175201 Social Psychology 15 credits

175205 Brain and Behaviour 15 credits
P 175102

175206 Memory and Cognition 15 credits

The Degree of Bachelor of Screen Arts

BSA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Bachelor of Screen Arts requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Screen Arts shall follow a flexible programme of study, which shall consist of courses totalling 360 credits, comprising:
 - a minimum of 285 credits as specified in the Schedule to the Qualification; and
 - up to 75 credits from any other courses offered by the University; and including
 - a maximum of 165 credits at 100 level;
 - at least 90 credits at 200 level;
 - at least 105 credits at 300 level;
 - completion of at least one major

Specialisations

- Candidates must complete the requirements of at least one major as specified in Schedule B of the Qualification.
- Single majors available are: Animation; Factual Production; Film Production; Game Development; Immersive Media; Media Technology; and Visual Effects
- Candidates may complete a double major in Mātauranga Toi Māori and one other specialisation from Regulation 4 by the requirements of the specialisations as set out in Schedule B. Individual courses cannot be counted towards both majors. Such candidates may, however, count up to 135 credits towards both the Mātauranga Toi Māori major and the Core.
- Candidates may include a minor from any other undergraduate degree within the University for which recognised minors are specified, in

accordance with the requirements for the minor as specified in the regulations of the qualification from which the minor has been drawn.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Certificate in Creative Arts, Diploma in Creative Arts or Diploma in Screen Arts should they meet the Qualification Requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations, candidates enrolled in the Bachelor of Creative Media Production prior to 1 January 2023 may substitute a course or courses already completed for a course or courses of the same value and at the same or lower level within the Schedule. Such candidates may be exempt from the requirement to complete a major and may be permitted to graduate under the Bachelor of Creative Media Production, until 31 December 2027.

Schedule for the Bachelor of Screen Arts

Schedule A: Core courses

100 level Studios (15 credits from)

289103	Introduction to Animation.....	15 credits
289104	Introduction to Visual Effects.....	15 credits
289106	Introduction to Game Development.....	15 credits
289112	Introduction to Film Production.....	15 credits
289113	Introduction to Media Technology.....	15 credits
289116	Introduction to Immersive Media.....	15 credits
289117	Introduction to Factual Production.....	15 credits
298157	Toi Atea 1.....	15 credits

100 Level Explorations (At least 30 credits from)

197123	Explorations in Visualisation.....	15 credits
--------	------------------------------------	------------

197124	Explorations in Materials and Making	15 credits
197191	Explorations in Creative Coding and Media	15 credits
198124	Explorations in Digital Asset Creation	15 credits
213155	Explorations in Drawing	15 credits
293125	Explorations in Narrative	15 credits
293126	Explorations in Image and Meaning	15 credits
293127	Explorations in Colour and Context	15 credits

Critical Studies: Minimum 1 from each level (At least 45 credits from)

133154	Music, People, Places	15 credits
	R 133255	
133257	Music and Ethics	15 credits
	P 15 credits from 150106, 133154, 197139, 237131, 289100	
133355	Music, Politics, Economies	15 credits
	P 15 credits from 237231, 133257, 289200, 150206, 197239	
150106	Nga Hanga Whakairo: Traditional Māori Visual Art	15 credits
150206	Ngā Momo Whakairo: Contemporary Māori Visual Art	15 credits
	P 150106	
197139	Design, Purpose, People and Place	15 credits
	R 237130	
197239	Design in the Pluriverse	15 credits
	P 289100 OR 237131 OR 133154 OR 150106 OR 197139 R 237230	
197339	Transformation: Discourse in Design	15 credits
	P 197239 OR 289200 OR 237231 OR 133257 OR 150206 R 237330	
237131	Art, Culture and Contexts	15 credits
	R 237102	
237231	Critical Perspectives on Contemporary Art	15 credits
	P 15 credits from 150106, 237131, 289100, 133154, 197139	
237331	Critical Understandings of Contemporary Art	15 credits
	P 15 credits from 237231, 289200, 150206, 133257, 197239	
289100	Screen Arts, Creativity and Critical Thinking	15 credits
289200	Screen Arts, Societies and Cultures	15 credits
	P 15 credits from 150106, 133154, 197139, 237131, 289100	
289300	Locating a Critical Screen Practice	15 credits
	P 15 credits from 150206, 133257, 237231, 197239, 289200	
298330	Cosmological Narratives within Māori Creative Expression	15 credits
	P 1 of 150206; 237230; 237231; 133257; 289200	

Professional Cultures: 1 course from each level (45 credits from)

133180	Professional Cultures in Commercial Music 1	15 credits

The Degree of Bachelor of Social Work

BSW

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Degree of Bachelor of Social Work requires that the candidate will:
 - meet the University admission requirements as specified;
 - meet the requirements for registration as set down by the New Zealand Social Workers Registration Board in terms of candidates being 'fit and proper persons to practice social work';
 - provide satisfactory evidence of their proficiency in English, if English is not the applicant's first language, in the form of:
 - overall academic score of at least 6.5 in an IELTS assessment with no band score less than 6.5 within the preceding two years; or
 - A TOEFL internet-based test (iBT) score of 85 or higher with a writing score of 22; or
 - at least two years of successful study in a New Zealand secondary school, with at least ten Level 2 NCEA credits in Literacy (five reading and five writing) or equivalent; and
 - be selected into the programme.

Qualification Requirements

- Candidates for the Bachelor of Social Work shall follow a parts-based programme of study, which shall consist of courses totalling at least 480 credits, comprising:
 - Parts One, Two, Three, and Four;
 - at least four years of study;
 and including:
 - any compulsory courses listed in the Schedule to the Degree;
 - attending field trips, workshops, tutorials, and practice laboratories as required.

Specialisations

- The Degree of Bachelor of Social Work is awarded without specialisation.

Academic Requirements

- Every candidate for the Bachelor of Social Work shall complete the required Field Education courses and at least 120 days of approved supervised field education and associated reports, in accordance with the requirements of the following courses:
 - 179255 Introduction to Field Education
 - 179355 Field Education I
 - 179455 Field Education II.

Student Progression

- Candidates may progress from Parts One to Two, Two to Three, and Three to Four, by passing all courses in the prior part.
- The Academic Board may, under such conditions as it may determine and taking into account the recommendations of the examiners, admit any candidate to a supplementary privilege (normally an examination) where available in a course in which the candidate failed to gain a pass.
- Notwithstanding Regulation 5:
 - Candidates shall not enrol in Part II unless they have passed courses to at least 75 credits. The candidate may on the recommendation of Academic Board, be permitted to enrol in approved courses of Part II in the same year that the candidate is enrolled in the remaining courses of the previous part.
 - Candidates shall not enrol for Part III unless they:
 - have passed all the compulsory requirements of the previous parts except that a candidate who has passed all the prerequisites for entry to Part III of the degree, except one of the compulsory courses in Part I or Part II may, with the approval of the Academic Board, be permitted to enrol in Part III;
 - have been admitted to Part III by a selection process approved by the Head of School; and
 - hold a current full driver's licence valid in New Zealand unless otherwise exempted.
 - Candidates shall not enrol in Part IV unless they have been admitted to Part IV by a selection process approved by the Head of School.
- Candidates must continue to meet the requirements for registration as set down by the New Zealand Social Workers Registration Board in terms of candidates being 'fit and proper persons to practice social work'; Candidates must advise the Programme Coordinator of any change to their circumstances in this regard within 7 days, including any conviction or criminal charges pending. Annual confirmation of eligibility is required.

9. The Degree of Bachelor of Social Work may be awarded with or without a class of Honours.

Completion Requirements

10. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
11. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Diploma in Arts should they meet the relevant Qualification requirements.

Academic Progress

12. For candidates enrolled in the Degree of Bachelor of Social Work, the following will lead to exclusion from the qualification:
- Failure to continue to meet the requirements for registration as set down by the New Zealand Social Workers Registration Board in terms of candidates being 'fit and proper persons to practice social work';
 - Failure to obtain a pass in either 179355 or 179455 on their second attempt;
 - Persons excluded under clause 12(b) will only be re-admitted to the Degree of Bachelor of Social Work with approval of the Academic Board, which may be declined, or granted under such conditions as it may determine.

Transitional Provisions

13. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I qualification regulations, candidates enrolled in the Bachelor of Social Work prior to 1 January 2022 will be granted the following substitutions:
- 30 credits of elective courses for 179120 and 179121
 - 279201 for 179240
 - 279401 for 179340
 - 179410 for 179430 and 179431
 - 179420 for 179432 and 179433
- These transition arrangements expire 31 December 2025.

The Degree of Bachelor of Speech and Language Therapy

BSpchLangTher

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for

Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Degree of Bachelor of Speech and Language Therapy with Honours requires that the candidate will:
 - meet the University admission requirements as specified; and will have:
 - been selected into the Qualification based on a selection process that will include a written application, criminal record check, interview and referee checks; and
 - achieved an IELTS of 7.0 with no band less than 7.0 within the preceding two years if English is not the applicant's first language.

Qualification Requirements

- Candidates for the Bachelor of Speech and Language Therapy shall follow a programme of study, which shall consist of courses totalling at least 480 credits, comprising Part 1, Part 2, Part 3, Part 4 courses, as specified in the Schedule to the Qualification.

Specialisations

- There are no specialisations for this qualification.

Academic Requirements

- Every candidate for the Degree of Bachelor of Speech and Language Therapy shall perform to the satisfaction of the College Pro Vice-Chancellor or their delegate supervised clinical practice, in accordance with the requirements of the following courses:
 - 271390 Field Work and Clinical Skills
 - 271496 Advanced Clinical Course I
 - 271498 Advanced Clinical Course II.

Student Progression

- In order to progress from Part 1 to Part 2, Part 2 to Part 3, or Part 3 to Part 4 a candidate must have passed all courses in the preceding Part.

Completion Requirements

- A Candidate's programme of study may not exceed eight consecutive years, unless a specified time of suspension or extension has been approved by the College Pro Vice-Chancellor or their delegate, under such conditions as they may determine. Permission must be sought in advance of any suspension or extension by applying in writing to the Pro Vice-Chancellor or their delegate. Details of any suspension or extension granted will appear on the academic record.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- For candidates enrolled in the Bachelor of Speech and Language Therapy the following will lead to exclusion from the qualification:
 - failure to complete a compulsory course in two successive attempts;
 - failure to pass courses totalling at least 75 credits or failure to pass at least 60 percent of an approved part-time programme of study in any academic year;
 - failure to complete the degree within eight consecutive years, unless a suspension or extension has been granted under Clause 7.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Bachelor of Speech and Language Therapy prior to 01 January 2021 will be permitted to substitute 271151, if already completed, for 214101. These transition arrangements expire 31 December 2027.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates enrolled in the Bachelor of Speech and Language

Therapy prior to 1 January 2024 who have successfully completed both 271395 and 271396 may substitute these for 271390. Such students may take 271490 instead of 271481. These transition arrangements expire 31 December 2026.

The Degree of Bachelor of Sport Management

BSptMgt

No new enrolments**Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Degree of Bachelor of Sport Management requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Degree of Bachelor of Sport Management shall follow a flexible programme of study, which shall consist of courses totalling at least 360 credits, comprising:
 - not more than 150 credits at 100 level;
 - at least 90 credits at 300 level;

and including:

- (c) the core courses listed in the Schedule for the Qualification;
- (d) attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

3. Candidates may include a minor in the Degree of Bachelor of Sport Management.
 - (a) Minors may be included from any undergraduate degree within the University for which recognised minors are specified.
 - (b) Where the minor is from another undergraduate degree the regulations of that programme for the minor will apply.
 - (c) No course may be credited to both a major and a minor.

Academic Requirements

4. Every candidate for the Degree of Bachelor of Sport Management shall complete to the satisfaction of the Academic Board, a minimum of 200 hours of approved field experience, practical work and associated reports in accordance with the following courses:
 - (a) 152238 Professional Development for the Sport Industry;
 - (b) 234338 Sport and Exercise Practicum

Completion Requirements

5. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
6. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an appropriate qualification, should they meet the relevant Qualification requirements.

Academic Progress

7. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

8. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates who were enrolled in the Bachelor of Sport Management prior to January 2022 may substitute courses already completed towards the core for courses in the Schedule as follows: 156239 for 152271 and 219100 for 115111. These transition arrangements expire 31 December 2025.

The Degree of Bachelor of Veterinary Science

BVSc

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

The Bachelor of Veterinary Science consists of two parts, being a pre-selection phase followed by the professional phase.

- Admission to the pre-selection phase of the Bachelor of Veterinary Science requires that the candidate will meet the University admission requirements as specified.
- Entry to the professional phase is by selection in accordance with criteria established by the Veterinary Student Selection Sub-Committee, which

will include consideration of academic performance, non-academic performance and relevant experience. Candidates whose first language is not English must show evidence of English language competence that meets the requirements of the Veterinary Council of New Zealand.

- Notwithstanding Regulation 13 candidates seeking admission or re-admission into the Degree of Bachelor of Veterinary Science after the first year (100-level), will be prioritised in accordance with the criteria outlined under the Progression, Re-Entry and Transfer Policy for the Degree and may only be (re)admitted should sufficient places be available.

Qualification Requirements

- Candidates for the Bachelor of Veterinary Science shall follow a fixed programme of study, over at least 5 years, which shall consist of courses totalling at least 600 credits, comprising a first, second, third, fourth, and fifth year (100-, 200-, 300-, 400-, and 500- level). The courses for each year are prescribed in the Schedule to the Degree.
- Notwithstanding Regulation 9, a candidate who has satisfied the requirements for a course at a university or other tertiary institution

where, in the opinion of the Pro Vice-Chancellor (or delegate), the content and standard are substantially the same as for the Degree of Bachelor of Veterinary Science may, subject to the approval of, and under conditions required by, the Head of the BVSc Programme (or their delegate), be given credit for that course.

6. Candidates may, at the discretion of the Pro Vice-Chancellor (or delegate), be permitted to enrol into the Bachelor of Veterinary Science after the first year, but no later than the start of the fourth year, subject to:
 - (a) being in good standing in a recognised Veterinary Science degree programme or equivalent; and
 - (b) having passed, with sufficient merit, courses recognised as equivalent to specified BVSc courses or unspecified credit, not exceeding 360 credits.

Specialisations

7. The Degree of Bachelor of Veterinary Science is awarded without specialisation.

Academic Requirements

8. Every candidate for the Degree of Bachelor of Veterinary Science shall perform, to the satisfaction of the Pro Vice-Chancellor (or delegate), approved practical work in accordance with the following courses:
 - (a) 227110 Farm Practical Training;
 - (b) 227130 Veterinary Work Integrated Learning 1
 - (c) 227230 Veterinary Work Integrated Learning 2
 - (d) 227310 Farm Practical Work;
 - (e) 227410 Veterinary Practical Work.

Credit will be given only for the practical work completed in accordance with the conditions detailed by the Veterinary Practical Work Committee.

Student Progression

9. Candidates must pass all courses offered in each year of the programme before progressing to the next year of the programme. This includes all zero-credited courses. In special circumstances, 227110 and 227130 may be deferred until the second year of the programme with permission of the Academic Lead for the BVSc Programme (or their delegate) but must be passed no later than 31 December of the BVSc2 year before the candidate may progress to the next year of the programme.
10. Students required by Regulation 2 to show proof of English Language competence may, under special circumstances and with permission from the Head of School or delegate, defer such provision and proceed to the First Year of the professional phase. In order to proceed to the Second Year, proof of English Language competence that meets the requirements of the Veterinary Council of New Zealand, must be provided by 15 February of the year in which the student plans to commence the Second Year of the BVSc.
11. For candidates enrolled in the BVSc curriculum commencing in 2022 or earlier the Pro Vice-Chancellor (or delegate) may admit any candidate to a supplementary assessment in a course or courses in which the candidate failed to gain a pass, in accordance with the BVSc Supplementary Assessment Policy.
12. For candidates enrolled in the BVSc curriculum commencing in 2022 or earlier the Pro Vice-Chancellor (or delegate) may grant students a compensated pass with a C- grade for any one course in a year (with the exception of pass/fail courses) in light of their overall performance for the year, where either of the following conditions apply:
 - (a) for a course that is failed on the basis of not achieving a total mark of at least 50%: any compulsory minimum marks in individual assessments in that course are achieved, and only that course in the year is failed with an overall mark of at least 48%, and at least a C+ grade pass has been obtained in all other courses in the year; or
 - (b) for a course that is failed on the basis of not achieving the required compulsory minimum mark in an assessment: the attained mark in the compulsory assessment is no more than 2 percentage points below the minimum required, and at least a C+ grade has been obtained for all other assessments for that course, and the minimum marks have been achieved in all other courses that year.
13. Candidates must re-enrol in consecutive academic years unless approved in writing by the Head of the BVSc Programme (or their delegate).
14. The Bachelor of Veterinary Science may be awarded with Distinction to the top 15 percent of the final year class, based on the grade average achieved upon first attempt in 300-, 400- and 500-level courses.

Completion Requirements

15. A candidate's programme of study may not exceed 8 years from the date of first enrolment in the professional phase of the Bachelor of Veterinary Science, unless a specified time of suspension or extension has been approved by the Pro Vice-Chancellor (or delegate). Extensions granted will appear on the candidate's academic record.
16. Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes; candidates who

do not meet the requirements for graduation may, subject to the approval of Pro Vice-Chancellor (or delegate), be awarded an exit qualification should they meet the relevant qualification requirements.

Academic Progress

17. For candidates enrolled in the Degree of Bachelor of Veterinary Science, any one of the following will lead to permanent exclusion from that qualification:
 - (a) failure of the first semester of the professional phase of the programme;
 - (b) failure of the same year in two successive attempts (for candidates enrolled in the BVSc curriculum commencing in 2022 or earlier), or failure of the same semester in two successive attempts (for candidates enrolled in the BVSc curriculum commencing in 2023 or later);
 - (c) failure of any two years of the programme
 - (d) not passing all courses in a year on the first attempt (i.e. without supplementary assessments or repeating the year) in any three years of the programme;
 - (e) failure to complete the requirements of the Degree within eight years from the date of first enrolment in the professional phase of the Degree;

Persons permanently excluded from the Degree of Bachelor of Veterinary Science under clause 17(a) to 17(e) shall have no right to seek re-entry to the Degree as outlined in the Massey University Exclusion Regulations.

18. Breaches of professional conduct:

For candidates enrolled in the Degree of Bachelor of Veterinary Science, any one of the following may lead to permanent exclusion from that qualification:

- (a) being subject to criminal charges; or
- (b) being subject to disciplinary proceedings of the University or of a professional body; or
- (c) significant or repeated breaches of the Veterinary Student Code of Conduct.

Transitional Provisions

19. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in Part I regulations for the degree, candidates enrolled in the Bachelor of Veterinary Science prior to January 2023 who have successfully completed 227108 and 227109 may substitute these for 227120 until 31 December 2027.
 20. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in Part I regulations for the degree, candidates enrolled in the Bachelor of Veterinary Science prior to January 2021 who have completed 227222, 227223, 227225, 227226, 227221 and 227224 may substitute these for 227231 and 227232. These transition arrangements expire 31 December 2027.
 21. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in Part I regulations for the degree, Candidates enrolled prior to 1 January 2024 who have successfully completed all course requirements will be granted the following exemptions (if applicable):
 - (a) Students who have successfully completed the requirements of the First Year are exempt from completing 227130;
 - (b) Students who have successfully completed the requirements of the Second Year are exempt from completing 227130 and may count all Second Year courses completed towards the qualification requirements;
 - (c) Students who have successfully completed the requirements of the Second Year and take time out from study and have not enrolled in the next available enrolment period may take a special topic course or courses (as required) from Schedule B to ensure they can move to the next year of the programme.
 - (d) Students who have successfully completed the requirements of the Second Year but then fail a subsequent year of the programme and need to repeat that year may take a special topic course or courses (as required) from Schedule B to ensure they can move to the next year of the programme.
 - (e) Students who take six months or more time out from studying after completing Semester One of any Year and who are returning to study, may take a special topic course or courses (as required) from Schedule B to ensure they can move to the next year of the programme.
- These transition arrangements expire 31 December 2030.
22. Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in Part I regulations for the degree, candidates enrolled in the Bachelor of Veterinary Science prior to January 2025 who have completed 227311, 227312, 227313, 227314, 227316, 227317 and 227325 may substitute these for 227331 and 227332.

Students who have successfully completed the requirements of the Second Year and take time out from study and have not enrolled in the next available enrolment period may take a special topic course or courses (as required) from Schedule C to ensure they can move to the next year of the programme.

These transition arrangements expire 31 December 2028.

The Degree of Bachelor of Veterinary Technology BVetTech

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

The Degree of Bachelor of Veterinary Technology consists of two phases, being a pre-selection phase followed by the professional phase.

- Admission to the pre-selection phase of the Bachelor of Veterinary Technology requires that the candidate will meet the University admission requirements as specified.
- Entry to the professional phase is by selection in accordance with criteria established by the Veterinary Student Selection Sub-Committee, which will include consideration of academic performance, non-academic performance, and relevant experience.
- Candidates seeking admission or re-admission into the Degree of Bachelor of Veterinary Technology after Part One of the professional phase will be ranked in accordance with the criteria outlined under the Progression and Re-Entry Policy for the Degree and may only be (re)admitted should sufficient places be available.

Qualification Requirements

- Candidates for the Degree of Bachelor of Veterinary Technology shall follow a parts-based programme of study, over at least 3 years, which shall consist of courses totalling at least 360 credits, comprising:
 - a Pre-Selection Phase, and then Part One, Part Two and Part Three in the professional phase;
 - completion of the requirements for a Track; and including:
 - no more than 165 credits at 100 level;
 - at least 75 credits at 300 level.

The Bachelor of Veterinary Technology Parts are prescribed in the Schedule to the Degree.

- Notwithstanding Regulation 4, a candidate who has satisfied the requirements for a subject or course at a university or other tertiary institution where, in the opinion of the Academic Board, the content and standard are substantially the same as for the Degree of Bachelor of Veterinary Technology may, subject to the approval of, and under conditions required by the Programme Director, be given credit for that subject.
- Notwithstanding Regulation 4, a candidate who has been awarded the Diploma in Veterinary Nursing from Massey University may be credited with courses at any level to a maximum of 150 credits.

Specialisations

- The Degree of Bachelor of Veterinary Technology is awarded without specialisation.

Academic Requirements

- Every candidate for the Degree of Bachelor of Veterinary Technology shall perform to the satisfaction of the Academic Board, approved practical work in accordance with the following courses:
 - 193105 Veterinary Technology Practical Experience and Farm Training;
 - 193220 Veterinary Technology Clinical Experience;
 - 193306 Integrative Studies for Veterinary Technologists,
- Failure to complete practical placement requirements of Regulation 8(a) will preclude candidates from entry into Part Two and failure to complete practical requirements of Regulation 8(b) will preclude candidates from entry into Part Three.

Student Progression

- In order to progress from Pre-Selection Phase to Part One, Part One to Part Two, or Part Two to Part Three, a candidate must have passed all courses in the preceding Part.
- The Academic Board (or its delegate) may admit any candidate to a supplementary assessment in a subject or subjects in which the candidate failed to gain a pass, in accordance with the BVetTech Supplementary Assessment Policy.
- The Academic Board may grant students a compensated pass with a C- grade for any one course in light of their overall performance for the year, where either of the following conditions apply:
 - only one course in the year is failed with an overall mark of at least 48% and at least a C+ grade pass has been obtained in all other courses in the year; or

- (b) for an assessment with a compulsory minimum mark, the attained mark is no more than 2 percentage points below the minimum required, at least a C+ grade has been obtained for all other assessments for that course, and the minimum marks have been achieved in all other courses that year.

13. Candidates must re-enrol in consecutive academic years unless approved in writing by the Programme Director.

Completion Requirements

14. A candidate's programme of study may not exceed 5 years from the date of first enrolment in the professional phase of the Bachelor of Veterinary Technology, unless a specified time of suspension or extension has been approved by the Academic Board. Extensions granted will appear on the candidate's academic record.
15. Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded an exit qualification should they meet the relevant qualification requirements.

Academic Progress

16. For candidates enrolled in the Degree of Bachelor of Veterinary Technology, any one of the following will lead to exclusion from that programme:
- failure to pass any course in which they have enrolled on two occasions;
 - failure to complete the requirements of the degree within five years from the date of first enrolment in the professional phase of the degree;
 - persons excluded under regulation 16(a) or 16(b) will only be re-admitted to the Degree of Bachelor of Veterinary Technology with approval of the Academic Board under such conditions as it may determine.
17. Breaches of professional conduct: For candidates enrolled in the Degree of Bachelor of Veterinary Technology, any one of the following may lead to exclusion from that programme:
- being subject to criminal charges; or
 - being subject to disciplinary proceedings of the University or of a professional body; or
 - significant or repeated breaches of the Veterinary Student Code of Conduct.

The Degree of Te Aho Tātaiarangi: Bachelor of Teaching and Learning Kura Kaupapa Māori BTchgLrnKKM

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to Te Aho Tātaiarangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori requires that the candidate will:

- meet the University admission requirements as specified; and;
- have demonstrated a high level of competency in Te Reo Māori me ōna tikanga; and
- have demonstrated competence in literacy and numeracy (including but not limited to English); and;
- have met the requirements set down by the Teaching Council of Aotearoa New Zealand for registration as a teacher in New Zealand in terms of good character and fitness to be a teacher; and
- have been selected into the qualification based on a selection process that may include a written application, police vetting report, interview, and practical exercises.

Qualification Requirements

2. Candidates for Te Aho Tātairangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori shall follow a parts-based programme of study, which shall consist of courses totalling at least 360 credits, comprising:
- Part One, Part Two and Part Three courses as specified in the Schedule to the Qualification;
 - attending professional practice placements, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

3. Te Aho Tātairangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori is awarded without specialisation.

Academic Requirements

4. Every candidate for Te Aho Tātairangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori shall perform to the satisfaction of the Academic Board or their delegate at least twenty four weeks of supervised professional practice, in accordance with the requirements of the following courses:
- 268106 Te Taiao mō Te Aho Matua o ngā Kura Kaupapa Māori I;
 - 268207 Te Taiao mō Te Aho Matua o ngā Kura Kaupapa Māori II;
 - 268307 Te Taiao mō Te Aho Matua o ngā Kura Kaupapa Māori III.

Student Progression

5. In order to progress from Part One to Part Two, or Part Two to Part Three a candidate must have passed all courses in the preceding Part.
6. If the Academic Board or their nominee is of the opinion that any student does not meet in general terms the requirements set down by the Teaching Council of Aotearoa New Zealand for registration as a teacher in New Zealand in terms of good character and fitness to be a teacher, the student's enrolment in the Te Aho Tātairangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori programme will be refused or cancelled.

Completion Requirements

7. A candidate's programme of study may not exceed five consecutive years from the date of first enrolment in a course to be credited to Te Aho Tātairangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori, unless a specified time of suspension or extension has been approved by the Academic Board. Permission must be sought in advance of any suspension or extension by applying in writing to the Academic Board or their delegate. Suspensions or extensions granted will appear on the academic transcript.
8. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

9. Students enrolled in Te Aho Tātairangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori will be excluded from re-enrolment for that degree on the following basis:
- failure to obtain a pass in a compulsory course for which they have been enrolled for two occasions;
 - failure to pass courses totalling at least 75 academic credits or failure to pass at least 60 percent of an approved part-time programme of study in any academic year; or
 - failure to complete Te Aho Tātairangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori within five years from the date of first enrolment.
10. Persons excluded under Regulation 9 will only be re-admitted to Te Aho Tātairangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori with approval of Academic Board under such conditions as it may determine.
11. Persons excluded twice under Regulation 9 will not be permitted to re-enrol for Te Aho Tātairangi: The Degree of Bachelor of Teaching and Learning Kura Kaupapa Māori.

Transitional Provisions

12. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree,

candidates enrolled in Te Aho Tātairangi: Bachelor of Teaching and Learning Kura Kaupapa may fulfil the professional practice requirements in place when they first enrolled. Such students may substitute 268131, if successfully completed, for 268106 and 268107, if successfully completed, for 268132.

13. These transition arrangements expire 31 December 2026.
14. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in to Te Aho Tātairangi/ Bachelor of Teaching and Learning Kura Kaupapa Māori prior to 1 January 2025 will be granted the following substitutions:
- 300111 for 268108
300211 for 268208
300311 for 268308
15. These transition arrangements expire 13 December 2028.

The Postgraduate Diploma in Agribusiness PGDipAgribus

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Agribusiness requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for an agricultural or business-related Bachelor's degree, or equivalent; or
 - have been awarded or qualified for a Bachelor's degree or equivalent and have completed at least three years of relevant work experience.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Agribusiness shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits at 700 level, comprising:
 - courses selected from the Schedule to the Qualification; and including:
 - no more than a total of 30 credits of approved Special Topic or professional development courses.

Specialisations

- The Postgraduate Diploma in Agribusiness is awarded without endorsement.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Business or the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

- Candidates may complete an endorsement by passing at least 75 credits in an endorsement. The requirements for each endorsement are set out in Schedule A for the Qualification.
- Endorsements available are Building Technology*, Construction Law, Construction Project Management, Digital Built Environment, Facilities Management*, Quantity Surveying, Sustainable Built Environment.

*No new enrolments

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma may be awarded with distinction or merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Diploma in Construction

Schedule A: Endorsements

Building Technology (60 credits)

No new enrolments

Compulsory courses

218730 Construction Project Management	15 credits
218769 Energy-Efficient Building Design	15 credits
R 228769	
218770 Advanced Construction Technology	15 credits

Construction Law (75 credits)

Compulsory courses

218717 Research Methods in Built Environment	15 credits
R 218711	
218763 Advanced Construction Law	15 credits
218764 Construction Contracts and Administration	15 credits
218765 Construction Adjudication	15 credits

218781 Construction Financial Administration	15 credits
----------------------------------------------------	------------

Construction Project Management (75 credits)

Compulsory courses

218710 Advanced Construction Planning and Scheduling	15 credits
218717 Research Methods in Built Environment	15 credits
R 218711	
218720 Advanced Construction Site Operations and Control	15 credits
218730 Construction Project Management	15 credits
218770 Advanced Construction Technology	15 credits

Digital Built Environment (75 credits)

Compulsory courses (75 credits from)

218712 Building Information Modelling Practices	15 credits
218713 Digital Technology Applications in Construction	15 credits
218717 Research Methods in Built Environment	15 credits
R 218711	
218730 Construction Project Management	15 credits
218770 Advanced Construction Technology	15 credits

Facilities Management (75 credits)

No new enrolments

Compulsory courses

114702 Human Resource Management and Workplace Relations	30 credits
218730 Construction Project Management	15 credits
218770 Advanced Construction Technology	15 credits

Quantity Surveying (75 credits)

Compulsory courses

218717 Research Methods in Built Environment	15 credits
R 218711	
218730 Construction Project Management	15 credits
218764 Construction Contracts and Administration	15 credits
218780 Quantity Surveying Practice	15 credits
218781 Construction Financial Administration	15 credits

Sustainable Built Environment (75 credits)

Compulsory courses (75 credits from)

127702 Sustainable Property Development	15 credits
218714 Sustainable Buildings and Structures	15 credits
218715 Sustainability and Climate Change for Construction Industry	15 credits
218717 Research Methods in Built Environment	15 credits
R 218711	
218730 Construction Project Management	15 credits

The Postgraduate Diploma in Counselling and Guidance Studies

PGDipCounGuidSt

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Counselling and Guidance requires that the candidate:
 - meet the University admission requirements as specified; and shall have:
 - been awarded or qualified for a Bachelor's degree in a relevant discipline, or equivalent.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Counselling and Guidance shall follow a flexible programme of study totalling at least 120 credits as detailed in the Schedule for the Qualification.

Specialisations

- The Postgraduate Diploma in Counselling and Guidance is awarded without specialisation.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Diploma in Counselling and Guidance Studies

Compulsory Courses (120 credits from)

253750	Counselling Theory	30 credits
253753	Guidance in Education	30 credits
253754	Family and Couples Counselling	30 credits
253755	Culture and Counselling	30 credits

The Postgraduate Diploma in Design

PGDipDes

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Design requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for the award of a Bachelor of Design or equivalent with a grade average of at least a B, or equivalent;
 - been selected into the Diploma following a selection process which will include the assessment of a portfolio of work submitted by the candidate and, at the discretion of Academic Board or their delegate, an interview.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Design shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - 15 credits from Schedule A;
 - 60 credits from Schedule B;
 - 30 credits from Schedule C;
 - the remaining courses from Schedule D.
- With the approval of the Academic Board or their delegate a candidate may be permitted to transfer up to 30 credits from an incomplete postgraduate qualification in design or related programme of study to the Postgraduate Diploma in Design.

Specialisations

- The Postgraduate Diploma in Design is awarded without an endorsement.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Design may be awarded with distinction or merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Diploma in Design

Schedule A: Core courses (15 credits from)

197465	Creative Leadership	15 credits
	P 198358 or 212358 or 213342 or 221358 or 222358 or 223358 or 224358 or 296358	
213465	Exhibition	15 credits

Schedule D: Elective courses

Any 400-level or 700-level courses from the College of Creative Arts (Prefixes: 133, 197, 198, 212, 213, 221, 222, 223, 224, 237, 293, 289, 296, 298)

The Postgraduate Diploma in Education PGDipEd

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Education requires that the candidate will:
 - meet the University admission requirements as specified; and shall have
 - been awarded or qualified for the Bachelor of Education, or equivalent; or
 - been awarded or qualified for any other Bachelor's degree or equivalent, and hold a professional qualification in teaching; or
 - been awarded or qualified for any other Bachelor's degree or equivalent, and have professional experience relevant to the intended postgraduate subject.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Education shall follow a flexible programme of study, which shall consist of 700-level courses totalling at least 120 credits from the Schedule to the Diploma.
- Notwithstanding Regulation 2, subject to the approval of the Academic Board variation in excess of the limits specified in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates are permitted.

Specialisations

- The qualification may be awarded with or without an endorsement.
- Candidates may complete an endorsement by passing at least 60 credits in an endorsement, including any compulsory courses. The requirements for each endorsement are set out in the Schedule for the Qualification.
- The endorsements available for the Postgraduate Diploma in Education are Digital Education, Early Years, Educational Administration and Leadership, Inclusive Education, Literacy Education, Māori Education, and Mathematics Education.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Education may be awarded with distinction or merit.

Completion Requirements

- The timeframes for completion as outlined in General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Education should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Postgraduate Diploma in Education prior to 1 January 2024 who have successfully completed at least 60 credits will complete the qualification under the 2023 regulations. Where necessary all candidates

enrolled prior to 1 January 2023, regardless of how many credits they have completed, will be permitted course substitutions beyond the stated limits.

- These transition arrangements expire 31 December 2026.

The Postgraduate Diploma in Educational and Developmental Psychology

PGDipEdDevPsych

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Educational and Developmental Psychology requires that the candidate will:
 - meet the University admission requirements as specified; and shall have
 - been awarded or qualified for either a Master of Educational and Developmental Psychology or a Postgraduate Certificate in Educational Psychology, having achieved a grade average of at least a B+, or equivalent; and shall have:
 - completed at least 60 credits of Academic Board or delegate approved psychology courses including at least 45 credits at 200 level or higher; and
 - have completed at least 45 credits of Academic Board or delegate approved education courses including at least 30 credits at 200 level or higher; and
 - have completed at least one year of full-time or equivalent part-time professional, learning or community learning experience in a relevant field.
 - met all requirements as set by the New Zealand Psychologists Board for registration as an Intern Educational Psychologist; and
 - met the requirements as set down by the New Zealand Psychologists Board, in terms of good character and fitness to be registered; and
 - access to a suitable psychology practice context and professional supervision for the duration of the programme, as approved by Academic Board or their delegate.
- Admission to the Postgraduate Diploma in Educational and Developmental Psychology will be granted or withheld on consideration of the admission requirements specified under Regulations 1, a Police Vetting report and a selection process which may include a written application, interview, and written and/or practical exercises as may be determined by the Academic Board or their delegate.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Educational and Developmental Psychology shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - courses from the Schedule to the Diploma; and including:
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Postgraduate Diploma in Educational and Developmental Psychology is awarded without specialisation.

Academic Requirements

- Every candidate shall perform to the satisfaction of Academic Board or their delegate supervised full-time practical work for a period of one academic year, in accordance with the requirements of the courses included in the schedule to the diploma. In exceptional circumstances and only with the approval of Academic Board or their delegate, the supervised practical work may be completed half-time over two academic years.

Student Progression

- Students must maintain their registration with the New Zealand Psychologist Board in terms of being 'a fit and proper person' to be registered.
- The timeframes for completion as outlined in the General Regulations for Postgraduate Qualifications will apply.

Completion Requirements

- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.
- In cases of sufficient merit, the Postgraduate Diploma in Educational and Developmental Psychology may be awarded with distinction or merit.

Academic Progress

- The following will lead to exclusion from the qualification:
 - Failure to continue to meet the requirements for registration as set down by the New Zealand Psychologists Board in terms of being 'fit and proper person' to be registered.
 - If the Pro Vice Chancellor or their nominee is of the opinion that a candidate does not meet the criteria outlined in the Health Practitioners Competence Assurance Act (2003), and regarding 'fitness for registration' (Section 16) the candidate's enrolment in the Post Graduate Diploma in Educational and Developmental Psychology programme will be cancelled.
 - If the Pro Vice Chancellor or their nominee is of the opinion that a candidate does not meet the criteria outlined by New Zealand Psychologists Board regarding 'fitness for registration' as a psychologist, the candidate's enrolment in the Post Graduate Diploma in Educational and Developmental Psychology programme will be cancelled.

Transitional Provisions

- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Postgraduate Diploma of Educational and Developmental Psychology prior to 1 January 2025 may be exempt from meeting the requirements of Regulation 1(d) and 1 (e) until 31 December 2026.

The Postgraduate Diploma in Emergency Management

PGDipEmergMgt

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Emergency Management requires that the candidate will:
 - meet the University admission requirements as specified; and have been awarded;
 - or qualified for an undergraduate degree and have completed at least two years of relevant industry or professional experience, or equivalent; or
 - or qualified for the Graduate Certificate in Emergency Management having achieved at least a B grade average, or equivalent; or
 - the Graduate Diploma in Emergency Management having achieved at least a B grade average, or equivalent.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Emergency Management shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits from the schedule to the qualification; including:
 - any compulsory courses listed in the Schedule for the Qualification; and
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Postgraduate Diploma in Emergency Management is awarded without endorsement.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Emergency Management may be awarded with distinction or merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Emergency Management should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Postgraduate Diploma in Engineering

PGDipE

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Engineering requires that the candidate will:
 - meet the University admission requirements as specified; and
 - shall have been awarded or qualified for the Bachelor of Engineering with Honours or an equivalent qualification.
- Notwithstanding Regulation 1, and at the discretion of Academic Board, candidates who have successfully completed 450 credits in the Bachelor of Engineering with Honours may be admitted into the Postgraduate Diploma in Engineering provided:
 - the candidate's previous work within the Bachelor of Engineering with Honours is of a satisfactory standard; and
 - the candidate enrolls for the remaining course(s) for the Bachelor of Engineering with Honours in the first year of enrolment in the Postgraduate Diploma in Engineering.
 - Should the candidate not pass the remaining course(s) for the Bachelor of Engineering with Honours in the first year of enrolment in the Postgraduate Diploma in Engineering, the Postgraduate Diploma will not be awarded and/or continuation of enrolment in the

Postgraduate Diploma shall be suspended until the requirements of the Bachelor of Engineering with Honours have been met.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Engineering shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - at least 120 credits at 700 level or above from the Schedules A and B for the Qualification.
 and including:
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Postgraduate Diploma in Engineering may be completed with or without an endorsement.
- Candidates may complete an endorsement by completing at least 45 credits in an endorsement from Schedule A for the Qualification.
- Approved endorsements are Electronics and Computer Engineering, Energy Management, Engineering and Innovation Management, Mechatronics, Packaging Technology, and Renewable Energy Systems.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Engineering may be awarded with distinction or merit, provided that the diploma has been completed within one year of first enrolling for full-time study, or within three years of first enrolling for part-time study.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed

timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

10. The general Unsatisfactory Academic Progress regulations will apply.

The Postgraduate Diploma in Environmental Management PGDipEnvMgmt

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Environmental Management requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a relevant Bachelor's degree or an equivalent qualification.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Environmental Management shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits at 700 level, comprising:
 - courses selected from the Schedule to the Qualification; and including:
 - any compulsory courses listed in the Schedule for the Qualification;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 2, and at the discretion of Academic Board, candidates may be required to complete one or more bridging courses, 188707 and/or 188708, should their undergraduate qualification be deficient in important aspects of environmental science.

Specialisations

- The Postgraduate Diploma in Environmental Management is awarded without specialisation.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Diploma in Environmental Management

Core courses

30 credits from

188764	Advanced Environmental Management I	15 credits
	R 188763	
188765	Advanced Environmental Management II	15 credits
	R 188763	

At least 60 credits from

176718	Environmental Sociology	30 credits
178742	Environmental Economic Issues	15 credits
	R 178360	
188707	Environmental Management Principles and Practice	15 credits
188708	Land System Change	15 credits
188751	Advanced Zero Waste for Sustainability	30 credits
189730	Sustainable Land and Water Management	15 credits
232701	Conservation Biology.....	30 credits
	R 196719	
233712	Environmental Geographic Information Systems	15 credits
	R 233706	
235701	Māori Values and Resource Management.....	15 credits
	R 188704	
238700	Life Cycle Assessment (LCA) and Footprinting Principles.....	15 credits

Elective courses (No more than 30 credits from)

119710	Nutrient Management in Grazed Pasture Systems.....	30 credits
119731	Topics in Agricultural Extension and Consultancy	15 credits
	R 111755	
119752	Advanced Farm and Horticultural Management	15 credits
	P 119381, 119382, 119358 R 111752, 119751	
130705	Emergency Management.....	30 credits
131704	Sustainable Development	30 credits
132735	Natural Resource Policy and Planning	30 credits
145710	Consumption and Place	30 credits
145739	GIS Principles and Applications	30 credits
	R 132738	
145740	GIS Programming and Practice.....	30 credits
	P 132738 or 145739 R 132740	
152704	Business and Sustainability	30 credits
	R 115783	
152730	Advanced Contemporary Issues in Sustainability.....	30 credits

152752 Project Management.....	30 credits	218769 Energy-Efficient Building Design.....	15 credits
158740 Location Systems: Spatial Databases, Tools and Applications.....	15 credits	R 228769	
158741 Location Data: Mapping, Analysis and Visualisation.....	15 credits	232703 Wildlife Management.....	30 credits

175733 Sustainable Livelihood.....	15 credits	233713 Environmental Remote Sensing.....	15 credits
178719 Climate Change Economics and Policy.....	30 credits	R 233707	
189731 Advanced Studies in Soil Science.....	15 credits	233714 Advanced Geoscience Techniques.....	15 credits
196713 Ecology.....	30 credits	233715 Environmental and Geological Hazards.....	15 credits
P 1963xx or 1993xx			

The Postgraduate Diploma in Fine Arts

PGDipFA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Fine Arts requires that the candidate will have:
 - met the University admission requirements as specified;
 - have been awarded or qualified for a Bachelor of Fine Arts, Bachelor of Māori Visual Arts, or equivalent with a grade average of at least a B, or equivalent;
 - been selected into the Diploma following a selection process which will include the assessment of a portfolio of work submitted by the candidate and, at the discretion of Academic Board or their delegate, an interview.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Fine Arts shall follow a flexible course of study, which shall consist of courses totalling at least 120 credits, comprising:
 - 15 credits from Schedule A;
 - 60 credits from Schedule B;
 - 30 credits from Schedule C;
 - the remaining courses from Schedule D.
- With the approval of the Academic Board or their delegate a candidate may be permitted to transfer up to 30 credits from an incomplete postgraduate qualification in design or related programme of study to the Postgraduate Diploma in Design.

Specialisations

- The Postgraduate Diploma in Fine Arts is awarded without endorsement.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Fine Arts may be awarded with distinction or merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation

may, subject to the approval of Academic Board or their delegate, be awarded the Postgraduate Certificate in Creative Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Diploma in Fine Arts

15 credits from

197465 Creative Leadership.....	15 credits
P 198358 or 212358 or 213342 or 221358 or 222358 or 223358 or 224358 or 296358	
213463 Fine Arts Research Seminar.....	15 credits
P 213357 or Appraisal Required C 213441

P One of 213341, 213344, or (213357 and 213342) R 213441	

Schedule D: Elective Courses

Any 400-level or 700-level courses from the College of Creative Arts (Prefixes: 133, 197, 198, 212, 213, 221, 222, 223, 224, 237, 289, 293, 296, 298)

The Postgraduate Diploma in Health Science

PGDipHlthSc

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Health Science requires that the candidate will:

- meet the University admission requirements as specified; and
 - have been awarded or qualified for the Bachelor of Health Science or an equivalent undergraduate qualification.
- Notwithstanding Regulation 1, Admission to the Postgraduate Diploma in Health Science (Medical Laboratory Science) requires that the candidate will:
 - meet the University admission requirements as specified;
 - have been awarded or qualified for a Bachelor of Science or Bachelor of Bio Medical Science or equivalent;
 - hold a current Annual Practising Certificate (APC) for employment in the Scope of Practice of "Medical Laboratory Technician";

- (d) have been practicing as a Medical Laboratory Technician in an ISO15189 accredited NZ Diagnostic Medical Laboratory for at least one year; and
- (e) have written employer support allowing the candidate the necessary laboratory resources and time for the completion of Medical Laboratory Science endorsement.
3. Notwithstanding Regulation 1, in order to be admitted to the Postgraduate Diploma in Health Science, Psychology endorsement, candidates must:
- (a) meet the University admission requirements as specified; and
- (b) have been awarded or qualified for the Bachelor of Health Science with a major in Psychology, having achieved at least a B- grade average in the 300-level psychology specialisation courses, or equivalent.

Qualification Requirements

4. Candidates for the Postgraduate Diploma in Health Science shall follow a flexible course of study, which shall consist of courses totalling at least 120 credits at 700 level, comprising:
- (a) Courses selected from the Schedule for the Qualification, and including:
- (b) Any compulsory courses listed in the Schedule for the Qualification,
- (c) Attending any contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.
5. Notwithstanding Regulation 4, and at the discretion of Academic Board, students exiting the Master of Clinical Practice (Nursing) may have a personal course variation approved in excess of stated limits to meet the requirements of the Postgraduate Diploma in Health Science through the substitution of courses from the schedule to that degree.

Specialisations

6. The Postgraduate Diploma in Health Science may be awarded with or without an endorsement.
7. Candidates may complete an endorsement by passing at least 120 credits in an endorsement. The requirements for each endorsement are set out in the Schedule for the Qualification.
8. Endorsements available are: Bioscience*, Māori Health, Psychology, Sport and Exercise*, Medical Laboratory Science*, and Occupational Health and Safety.

Student Progression

9. In cases of sufficient merit, the Postgraduate Diploma in Health Science may be awarded with distinction or merit.

Completion Requirements

10. The timeframes for completion as outline in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
11. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

12. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

13. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the **Medical Laboratory Science** endorsement prior to 1 January 2024 who have successfully completed 202704 Diagnostic Medical Microbiology, will be able to complete the qualification under the 2023 Calendar regulations, or will be transferred to without specialisation, or exited, by 31 December 2025.
14. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the **Bioscience** endorsement prior to 1 January 2025 who have successfully completed at least 30 credits will be able to complete the qualification under the 2024 Calendar regulations, or will be transferred to without specialisation, or exited, by 31 December 2026.
15. Subject to the Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the **Sport and Exercise** endorsement prior to 1 January 2025 who have successfully completed at least 30 credits will be able to complete the qualification under the 2024 Calendar regulations, or will be transferred to without specialisation, or exited, by 31 December 2026.

The Postgraduate Diploma in Health Service Management

PGDipHSM

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Postgraduate Diploma in Health Service Management requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor's degree or equivalent; and
 - be working in the health and/or disability sectors.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Health Service Management shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits at 700 level, including:
 - at least 90 credits from the Schedule to the Diploma;
 - the core courses as listed in Schedule A for the Qualification;
 - with the approval of the Academic Board or their delegate, up to 30 credits at 700 level from courses outside of the Schedule to the Diploma; and
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Postgraduate Diploma in Health Service Management is awarded without specialisation.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Health Service Management may be awarded with distinction or merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic Requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Business should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Diploma in Health Service Management

The Postgraduate Diploma in Information Sciences

PGDipInfSc

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Postgraduate Diploma in Information Sciences requires that the candidate will:
 - meet the University admission requirements as specified; and
 - shall have been awarded or qualified for the Bachelor of Information Sciences, or an equivalent qualification, having achieved a B- grade average or higher over the 300-level majoring courses; or
 - shall have been awarded or qualified for a Bachelor's degree or an equivalent qualification, having achieved a B- grade average or higher over the 300-level majoring courses, and have at least two years' relevant professional experience demonstrated via a portfolio, and an interview at the discretion of the University.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Information Sciences shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - 120 credits at 700 level selected from the Schedule for the Qualification;
 - and including:
 - attending workshops, block courses, tutorials, and laboratories as required.

Specialisations

- The Postgraduate Diploma in Information Sciences is awarded without an endorsement.
- Notwithstanding Regulation 3, the following endorsements and joint endorsement are available in accordance with transitional provisions outlined in Regulation 10: Computer Science; Information Technology; and Software Engineering.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Information Sciences may be awarded with distinction or merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.

7. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

8. The general Unsatisfactory Academic Progress regulations will apply.

The Postgraduate Diploma in Māori Visual Arts

PGDipMVA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Māori Visual Arts requires that the candidate will meet the University admission requirements as specified; and will:
 - have been awarded or qualified for a Bachelor of Māori Visual Arts, or equivalent; or
 - have been awarded or qualified for a relevant Bachelor's degree, or equivalent, and provide evidence of professional experience of an appropriate kind and duration in an area relevant to the qualification; or
 - have been granted admission under the Admission with Equivalent Status regulations and demonstrate practical, professional, and scholarly experience at an appropriate level.
- In considering applications for admission to the Postgraduate Diploma in Māori Visual Arts, the University shall pay due regard to indigenous

systems for the acquisition of knowledge and shall apply a fair, large and liberal interpretation to the concepts of "scholarly experience" and "academic work".

Qualification Requirements

- Candidates for the Postgraduate Diploma in Māori Visual Arts shall follow a flexible course of study, which shall consist of courses totalling at least 120 credits at 700-level, comprising:
 - courses selected from the Schedule for the Diploma; and including
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required

Specialisations

- The Postgraduate Diploma in Māori Visual Arts is awarded without an endorsement.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Māori Visual Arts may be awarded with distinction or merit

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Qualification Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic Requirements within the prescribed time

frames; candidates who do not meet the requirements for graduation, may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Creative Arts should they meet the relevant Qualification requirements.

Academic Progress

8. The general Unsatisfactory Academic Progress regulations will apply.

The Postgraduate Diploma in Psychological Practice PGDipPsychPrac

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Psychological Practice requires that the candidate will:
 - have met the University admission requirements as specified; and
 - have been awarded or qualified for a Master's or Doctoral degree specialising in psychology which is approved as meeting Psychologists Board requirements. Entry on the basis of a Master's degree requires a minimum B+ grade point average; and

- have been selected into the Diploma following a selection process which may include a written application, consideration of references, interview, written and/or practical exercises, as may be determined by the Pro Vice-Chancellor or their delegate; and
- have provided evidence to the satisfaction of the Pro Vice-Chancellor or their delegate that they are currently, or will be, in employment (paid or unpaid) in a work place where their activities require them to engage in psychologically-based practice, and where the organisation has agreed that 1500 hours during one year be designated as internship hours;
- have provided evidence to the satisfaction of the Pro Vice-Chancellor or their delegate of appropriate supervision arrangements in respect to their psychology practice;
- have met the requirements set down by the Health Practitioners Competence Assurance Act in terms of good character and reputation, and is a fit and proper person to be registered;

- (g) have satisfied the Pro Vice-Chancellor, or their delegate, that they have sufficient personal qualities, ethical standards, and professional potential, and are suitable to undertake a professional programme of study which satisfies the eligibility requirements to practice as a registered psychologist in accordance with the Health Practitioners Competency Assurance Act of 2003, or as amended.

Qualification Requirements

2. Candidates for the Postgraduate Diploma in Psychological Practice shall follow a flexible course of study, which shall consist of 800-level courses totalling at least 120 credits, comprising:
- courses specified in the Schedule to the Diploma; and including
 - attending contact courses, block courses, workshops, tutorials, and laboratories as required.

Specialisations

3. The Postgraduate Diploma in Psychological Practice is awarded without endorsement.

Academic Requirements

4. Every candidate for the Postgraduate Diploma in Psychological Practice shall perform to the satisfaction of the Pro Vice-Chancellor or their delegate at least one year of full-time professional psychology practice, or equivalent, in accordance with the requirements of the following courses: 175853 Practicum in Psychological Practice Part I; 175854 Practicum in Psychological Practice Part II.

Student Progression

5. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.

6. Notwithstanding Regulation 5, the Pro Vice-Chancellor or their delegate may approve a period of suspension or extension where they are satisfied that a change in employment circumstances is likely to adversely affect the candidate's programme of study. Suspensions or extensions granted will appear on the academic transcript.
7. The Postgraduate Diploma in Psychological Practice is awarded without distinction or merit.

Completion Requirements

8. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

9. The general Unsatisfactory Academic Progress regulations will apply.

Admission

- Admission to the Postgraduate Diploma in Quality Systems requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor's degree with a relevant major, or equivalent, having achieved a B- grade average or higher over the qualifying 300-level courses and have completed at least two years of relevant professional experience; or shall have:
 - been awarded or qualified for a relevant Graduate Diploma in Quality Systems, or equivalent, having achieved a B- grade average or higher and completed at least two years of relevant professional experience; or shall have:
 - demonstrated at least five years of relevant professional experience, including completion of appropriate professional qualifications or equivalent, via a portfolio, and an interview at the discretion of the University.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Quality Systems shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - courses selected from the Schedule for the Qualification; and including
 - the compulsory courses from the Schedule for the Qualification;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- The Postgraduate Diploma in Quality Systems is awarded without an endorsement.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Quality Systems may be awarded with distinction or merit.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic Requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of the Academic Board, be awarded the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Diploma in Quality Systems

Compulsory courses (105 credits from)

240756	Value Chain Management	15 credits
240758	Research Methods and Skills	30 credits
287735	Quality Improvement	15 credits
	R 143785	
287741	Quality System Development and Management	15 credits
	R 287730	
287745	Lean Six Sigma	30 credits
	R 287731	

Elective courses (15 credits from)

141724	Food Quality Safety and Innovation	15 credits
	P 280201	
152771	Management in Organisations	15 credits
158739	Data Mastery: Scripting, Databases and Data Privacy	15 credits
	R 161750	
161725	Statistical Quality Control	15 credits
240753	Supply Chain Analytics	15 credits
240759	Integrated Logistics	15 credits
	R 240752	
287740	Innovation Management	15 credits
	P 228311 or 228312 R 287703	

The Postgraduate Diploma in Science and Technology

PGDipScTech

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Science and Technology requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor's degree or an equivalent qualification with a major in the intended postgraduate subject, or equivalent, with a grade average of at least a B- in the major 300 level courses; or
 - have been awarded or qualified for a Postgraduate Certificate that includes at least 30 credits of courses from the Schedule to the Postgraduate Diploma in Science and Technology, or equivalent.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Science and Technology shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits at 700 level, comprising:
 - at least 90 credits from courses selected from the Schedule for the Qualification; and including:
 - attendance at contact workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

- For candidates completing an endorsement, the remaining credits for the qualification will comprise a selection of courses approved by the Academic Board or delegate.
- Notwithstanding Regulation 2, and with the approval of Academic Board or its delegate, students exiting from a relevant postgraduate qualification may substitute relevant 700 level courses for courses included in the Postgraduate Diploma in Science and Technology schedule beyond the normal limits permitted.

Specialisations

- The Postgraduate Diploma in Science and Technology may be awarded with or without an endorsement.
- Candidates may complete the postgraduate diploma without an endorsement only with the prior approval of a coherent programme of study by the Academic Board or their delegate.
- Candidates may complete an endorsement by passing at least 75 credits in an endorsement. The requirements for each endorsement are set out in the Schedule for the Qualification.
- The endorsements available for the Postgraduate Diploma in Science and Technology are: Agricultural Science, Animal Science, Biological

Sciences, Conservation Biology, Earth Science, Horticultural Science, Plant Breeding, Psychology and Zoology.

9. The endorsements available for the Postgraduate Diploma in Science and Technology under Transitional Provisions are: Biochemistry, Chemistry, Computer Science, Ecology, Genetics, Geography, Mathematics, Microbiology, Nanoscience, Physics, Plant Biology, Soil Science and Statistics.

Student Progression

10. In cases of sufficient merit, the Postgraduate Diploma in Science and Technology may be awarded with Distinction or Merit.

Completion Requirements

11. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
12. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

13. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Diploma in Science and Technology

Schedule A: Endorsements

Agricultural Science (75 credits)

Subject courses

117710	Reproduction, Lactation and Fertility	15 credits
	R 117767, 117769	
117711	Nutrition, Growth and Meat Science	15 credits
	R 117761, 117762, 117764	
117765	Genetics and Breeding	15 credits
	P 117345	
117768	Metabolism and Endocrinology	15 credits
	P 117348	
117785	Advanced Studies in Animal Production	15 credits
117786	Advanced Studies in Animal Production	30 credits
119710	Nutrient Management in Grazed Pasture Systems	30 credits
119711	Nutrient Management in Arable Systems	15 credits
119728	Research Methods in Animal, Veterinary and Agricultural Sciences	15 credits
	R 119729, 162760, 162761, 162762	
119729	Research Methods	15 credits
	R 119728, 162760, 162761, 162762	
162760	Research Methods and Communication in the Biosciences	30 credits
	R 162761, 162762, 119728, 119729	
189730	Sustainable Land and Water Management	15 credits
189731	Advanced Studies in Soil Science	15 credits
283702	Advanced Agronomy	30 credits
	P 283301 or 283311 or 283305	
283708	Quantitative Plant Breeding	30 credits
	P One of 1203xx, 283305, 284301 or 284342 R 171754	
284703	Vegetable Production Science	15 credits
	R 171722; 171724; 284701; 284702	
284704	Fruit Production Science	15 credits
	R 171722; 171724; 284701; 284702	
284741	Post-harvest Physiology	30 credits
	R 171749	
285742	Topics in Advanced Plant Protection	30 credits
	P 199310 or 283311 or 285301	

Animal Science (75 credits)

At least 30 credits from

117710	Reproduction, Lactation and Fertility	15 credits
	R 117767, 117769	
117711	Nutrition, Growth and Meat Science	15 credits
	R 117761, 117762, 117764	
117765	Genetics and Breeding	15 credits
	P 117345	
117768	Metabolism and Endocrinology	15 credits
	P 117348	
Subject courses		
117709	Biometrics for the Animal and Nutritional Sciences	15 credits
	R 151709	
117783	Advanced Studies in Animal Science	15 credits

117784	Advanced Studies in Animal Science	30 credits
119728	Research Methods in Animal, Veterinary and Agricultural Sciences	15 credits
	R 119729, 162760, 162761, 162762	
122713	Advanced Topics in Biochemistry	15 credits
	P One of 122303, 122322, 122327, 123326, 203300, 203307, 203340, 203342	
199714	Animal Behaviour	30 credits
	P 199312	
199717	Entomology	30 credits
	P 199310 or 285301	
283702	Advanced Agronomy	30 credits
	P 283301 or 283311 or 283305	

Biochemistry (75 credits)

No new enrolments

Compulsory course

At least 30 credits from

247712	Advanced Studies in Molecular Biosciences	30 credits
	P One of 120303, 120306, 122301, 122303, 122322, 122327, 123326, 162301, 162304, 194342, 194346, 196318, 203300, 203307, 203310, 203311, 203340, 203341, 203342, 203343	

Subject courses

122713	Advanced Topics in Biochemistry	15 credits
	P One of 122303, 122322, 122327, 123326, 203300, 203307, 203340, 203342	
162760	Research Methods and Communication in the Biosciences	30 credits
	R 162761, 162762, 119728, 119729	

Biological Sciences (75 credits)

Subject courses

700 level from 120, 122, 162, 194, 196, 199, 203, 232, 247 prefixes

Chemistry (75 credits)

No new enrolments

Compulsory course

123711	Research Methods in Chemistry and Nanoscience	30 credits
--------	-----------------------------------------------	------------

Subject courses

123713	Advanced Chemical Synthesis	30 credits
--------	-----------------------------	------------

Computer Science (75 credits)

No new enrolments

Subject courses

159709	Computer Graphics	15 credits
159731	Studies in Computer Vision	15 credits
159732	Studies in Computer Programming	15 credits
159735	Studies in Parallel and Distributed Systems	15 credits
159736	Studies in Operating Systems and Architecture	15 credits
159740	Studies in Intelligent Systems	15 credits

Conservation Biology (75 credits)

Compulsory courses (60 credits from)

232701	Conservation Biology	30 credits
	R 196719	
232703	Wildlife Management	30 credits
	C 232701 or 196713 R 199715	

Subject courses

145739	GIS Principles and Applications	30 credits
	R 132738	
158740	Location Systems: Spatial Databases, Tools and Applications	15 credits
158741	Location Data: Mapping, Analysis and Visualisation	15 credits
161762	Multivariate Analysis for Big Data	15 credits
	R 161323, 161772	
188764	Advanced Environmental Management I	15 credits
	R 188763	
188765	Advanced Environmental Management II	15 credits
	R 188763	
199714	Animal Behaviour	30 credits
	P 199312	
235701	Māori Values and Resource Management	15 credits
	R 188704	

Earth Science (75 credits)

Subject courses

233712	Environmental Geographic Information Systems	15 credits
	R 233706	
233713	Environmental Remote Sensing	15 credits
	R 233707	
233714	Advanced Geoscience Techniques	15 credits
233715	Environmental and Geological Hazards	15 credits

15 credits from

119728	Research Methods in Animal, Veterinary and Agricultural Sciences	15 credits
	R 119729, 162760, 162761, 162762	
119729	Research Methods	15 credits
	R 119728, 162760, 162761, 162762	

Ecology (75 credits)**No new enrolments****At least 60 credits from**

196712	Aquatic Ecology	30 credits
	P 196313 or 121313	
196713	Ecology	30 credits
	P 1963xx or 1993xx	

Subject courses

120713	Advanced Topics in Plant Biology	30 credits
	P 1203xx	
120715	Advanced Topics in Evolutionary Genetics	30 credits
	P One of 1203xx or 2033xx or 1963xx	
199714	Animal Behaviour	30 credits
	P 199312	
199717	Entomology	30 credits
	P 199310 or 285301	
232701	Conservation Biology	30 credits
	R 196719	
232703	Wildlife Management	30 credits
	C 232701 or 196713 R 199715	

Genetics (75 credits)**No new enrolments****Compulsory course selection (At least 60 credits from)**

247712	Advanced Studies in Molecular Biosciences	30 credits
	P One of 120303, 120306, 122301, 122303, 122322, 122327, 123326, 162301, 162304, 194342, 194346, 196318, 203300, 203307, 203310, 203311, 203340, 203341, 203342, 203343	

Subject courses

120715	Advanced Topics in Evolutionary Genetics	30 credits
	P One of 1203xx or 2033xx or 1963xx	
122713	Advanced Topics in Biochemistry	15 credits
	P One of 122303, 122322, 122327, 123326, 203300, 203307, 203340, 203342	
161744	Statistical Genetics	15 credits
162760	Research Methods and Communication in the Biosciences	30 credits
	R 162761, 162762, 119728, 119729	
162762	Grant Writing and Oral Communication in Biosciences	15 credits
	R 162760 119728, 119729	

Geography (75 credits)**No new enrolments****At least 60 credits from****Subject courses**

145707	Economic Geography	30 credits
145710	Consumption and Place	30 credits
145711	Foundations in Human Geography	30 credits
	R 145706	
145712	Frontiers in Human Geography	30 credits
	R 145701	

Horticultural Science (75 credits)**Subject courses**

119728	Research Methods in Animal, Veterinary and Agricultural Sciences	15 credits
	R 119729, 162760, 162761, 162762	
119729	Research Methods	15 credits
	R 119728, 162760, 162761, 162762	
162760	Research Methods and Communication in the Biosciences	30 credits
	R 162761, 162762, 119728, 119729	
283708	Quantitative Plant Breeding	30 credits
	P One of 1203xx, 283305, 284301 or 284342 R 171754	
284703	Vegetable Production Science	15 credits
	R 171722; 171724; 284701; 284702	
284704	Fruit Production Science	15 credits
	R 171722; 171724; 284701; 284702	
284741	Post-harvest Physiology	30 credits
	R 171749	
285742	Topics in Advanced Plant Protection	30 credits
	P 199310 or 283311 or 285301	

Microbiology (75 credits)**No new enrolments****Compulsory courses (60 credits from)**

162704	Current Topics in Microbiology	30 credits
	P Two of 141311, 162301, 162303, 162304, 162307, 162312 or 203300 R 162702	
162760	Research Methods and Communication in the Biosciences	30 credits
	R 162761, 162762, 119728, 119729	

Subject course

122713	Advanced Topics in Biochemistry	15 credits
	P One of 122303, 122322, 122327, 123326, 203300, 203307, 203340, 203342	
247712	Advanced Studies in Molecular Biosciences	30 credits
	P One of 120303, 120306, 122301, 122303, 122322, 122327, 123326, 162301, 162304, 194342, 194346, 196318, 203300, 203307, 203310, 203311, 203340, 203341, 203342, 203343	

Nanoscience (75 credits)**No new enrolments****Compulsory course**

123711	Research Methods in Chemistry and Nanoscience	30 credits
--------	-----------------------------------------------	------------

Subject courses

122713	Advanced Topics in Biochemistry	15 credits
	P One of 122303, 122322, 122327, 123326, 203300, 203307, 203340, 203342	
123713	Advanced Chemical Synthesis	30 credits

Physics (75 credits)**No new enrolments****At least 60 credits from****Subject courses**

The Postgraduate Diploma in Screen Arts

PGDipScreenArts

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Postgraduate Diploma in Screen Arts requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for the award of a Bachelor of Screen Arts or equivalent; and
 - have been selected into the programme on the basis of a portfolio prepared by the candidate, and an interview if required.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Screen Arts shall follow a flexible course of study, which shall consist of courses totalling at least 120 credits, comprising:
 - Courses as defined by the schedule for the Postgraduate Diploma; and including
 - attending Contact Courses, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Postgraduate Diploma in Screen Arts is awarded without endorsement.

Student Progression

- In cases of sufficient merit, the Postgraduate Diploma in Design may be awarded with distinction or merit.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.

- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board or their delegate, be awarded the Diploma in Visual Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Diploma in Screen Arts**Compulsory courses (90 credits from)**

289701	Production Planning and Development	30 credits

The Postgraduate Diploma in Specialist Teaching

PGDipSpecTchg

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Diploma in Specialist Teaching requires that the candidate will meet the University admission requirements; and shall have:
 - been awarded or qualified for a Bachelor's degree, or equivalent; and
 - been awarded or qualified for a relevant professional qualification; and
 - have completed at least two years of relevant professional experience.
- For entry into the Te Korowai Mokopuna endorsement candidates shall have:
 - been awarded or qualified for the professional qualification Te Tohu Mātauranga Whakapakari Tino Rangatiratanga o Te Kōhanga Reo; and
 - have completed at least two years of relevant professional experience in Kōhanga Reo; and
 - hold a current letter of endorsement from Te Kōhanga Reo National Trust.
- In all cases candidates will be required to:
 - be selected on the basis of a selection process which may include written application, interview, referee reports and practical exercises; and

- meet requirements equivalent to those set down by the Teaching Council of Aotearoa New Zealand for registration as a teacher in terms of values, fitness and disposition to teach; and will:
- hold current relevant New Zealand Professional Registration; or
- be required to undergo police vetting prior to gaining entry to the programme.

- All candidates whose first language is not English or Te Reo Māori who have not gained a New Zealand university entrance qualification, or an overseas entrance qualification in a country where the main language is English, will be required to provide evidence of their proficiency in English in the form of an academic IELTS (International English Language Testing System) score of 7.0 with no band less than 7.0 (or the equivalent TOEFL score) or other evidence that is acceptable to Academic Board.

Qualification Requirements

- Candidates for the Postgraduate Diploma in Specialist Teaching shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - two core courses as listed in Schedule A for the qualification (60 credits);
 - two courses for one endorsement as listed in Schedule B for the qualification (60 credits).

Specialisations

- Candidates must complete one endorsement by completing the requirements for that endorsement as set out in Part B of the Schedule for the Qualification.
- The endorsements available for the Postgraduate Diploma in Specialist Teaching are Blind and Low Vision, Complex Educational Needs, Deaf and Hard of Hearing, Early Intervention, Gifted Education, Te Korowai Mokopuna, Learning and Behaviour.

Completion Requirements

8. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
9. Any candidate who has previously been awarded a Postgraduate Certificate in Specialist Teaching may be permitted to cross-credit the courses into the Postgraduate Diploma in Specialist Teaching. Time limits for completion and for the award of distinction will apply from the time that the candidate first enrolled in a course credited towards the diploma.
10. In order to graduate with the Postgraduate Diploma in Specialist Teaching endorsed in Blind and Low Vision a candidate must pass the Trans-Tasman Braille Proficiency Examination.
11. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Postgraduate Certificate in Specialist Teaching should they meet the relevant Qualification requirements.

Academic Progress

12. The general Unsatisfactory Academic Progress regulations will apply.
13. For candidates enrolled in the Postgraduate Diploma in Specialist Teaching failure to complete a course in two successive attempts will lead to exclusion from the qualification.

Transitional Provisions

14. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in Gifted Education prior to 01 January 2025 who have successfully completed 262751 may substitute this for 262760.
15. This transition arrangement expires 31 December 2027.

Established Endorsements

The Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium PGDipT&LMM

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- 1. Admission to Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium requires that the candidate will:
 - (a) meet the University admission requirements as specified; and shall
 - (b) have been awarded or qualified for a Bachelor’s degree of at least 360 credits with a minimum of a B average across the 200- and 300-level courses, or equivalent; and
 - (c) have demonstrated fluency in Te Reo Māori; and
 - (d) have demonstrated competence in literacy and numeracy; and
 - (e) meet the requirements for registration as set down by the New Zealand Education Council, in terms of good character and fitness to be a teacher; and
 - (f) have been selected on the basis of a selection process which may include a written application, police vetting report, interview, referee reports and practical exercises.

Qualification Requirements

- 2. Candidates for Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium shall follow a fixed programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - (a) the compulsory courses listed in the Schedule for the Qualification;

- (b) attending wānanga, professional practice and community workshops, field trips, studios, tutorials and laboratories as required.

Specialisations

- 3. Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium is awarded without specialisation.

Academic Requirements

- 4. Every candidate for Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium shall perform to the satisfaction of the Pro Vice-Chancellor or their delegate a total of at least 600 hours of supervised professional practice in accordance with the requirements of each course.

Student Progression

- 5. Massey University may cancel or refuse to permit the enrolment of a candidate in Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium if, in the opinion of the University, a candidate is found not to meet in general terms the requirements set down by the Education Council of Aotearoa New Zealand for registration as a teacher in New Zealand in terms of good character and fitness to be a teacher.
- 6. Should a candidate in Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium be charged with, or convicted of an offence against the law after entry into the qualification, the candidate must advise the Pro Vice-Chancellor or their nominee of the charge or conviction within three days.
- 7. If the Pro Vice-Chancellor or their nominee is of the opinion that any candidate does not meet in general terms the requirements set down by the Education Council of Aotearoa New Zealand for registration as a teacher in New Zealand in terms of good character and fitness to be a teacher, the candidate’s registration in Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium, will be cancelled.

8. In cases of sufficient merit, Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium may be awarded with Distinction or Merit.

Completion Requirements

9. A candidate's programme of study may not exceed three years from date of first enrolment in a course to be credited with Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium.
10. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the time-frames prescribed in Regulation 9.

Academic Progress

11. For candidates enrolled in Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium the following may lead to exclusion from the qualification:
- failure to obtain a pass in a course in two successive attempts;
 - failure to pass courses totalling at least 60 academic credits, or failure to pass at least 50 percent of an approved part-time programme of study in any academic year; or
 - failure to complete Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium within three years from the date of first enrolment in a course to be credited to the qualification.
12. A person excluded under Regulation 11 will only be readmitted to Te Aho Paerewa Postgraduate Diploma Teaching and Learning in Māori Medium with the approval of the Pro Vice-Chancellor or nominee. Such approval may be withheld or granted subject to conditions.

The Postgraduate Certificate in Business PGCertBus

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II

Admission

- Admission to the Postgraduate Certificate in Business requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor's degree having achieved at least a B- grade average in the highest level courses, or equivalent.
- Notwithstanding Regulation 1, admission to the Postgraduate Certificate in Business endorsed in Business Administration requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have completed at least seven years business experience, at least three of which must be at management level; and
 - have been selected into the programme on the basis of a selection process which may include a written application, interview and practical exercises.

Qualification Requirements

- Candidates for the Postgraduate Certificate in Business shall follow a flexible programme of study, which shall consist of courses totalling at least 60 credits at 700 level, comprising:
 - courses from the Postgraduate Certificate in Business Schedule; and including:
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 2, and with the approval of Academic Board or their delegate, relevant 700 level courses may be substituted for courses included in the Postgraduate Certificate in Business schedule beyond the normal limits permitted.

Specialisations

- The Postgraduate Certificate in Business is awarded with or without an endorsement.
- Candidates may complete an endorsement by passing 60 credits in that endorsement. The requirements for each endorsements are set out in the schedule for the Certificate.
- The endorsement available in the Postgraduate Certificate in Business is Business Administration.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Postgraduate Certificate in Science and Technology

PGCertScTech

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Postgraduate Degrees, Postgraduate Diplomas, and Postgraduate Certificates.

Part II**Admission**

- Admission to the Postgraduate Certificate in Science and Technology requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a Bachelor's degree in the sciences, technology or engineering with a major in the intended postgraduate subject, or equivalent; or
 - have been awarded or qualified for a Bachelor's degree in the sciences, technology or engineering followed by a Graduate

Certificate in Science and Technology comprising approved 300-level courses in the intended postgraduate subject; or

- have been awarded or qualified for any Bachelor's degree followed by a Graduate Diploma in Science and Technology comprising approved 300-level courses in the intended postgraduate subject; or
- have completed extensive relevant practical, professional or scholarly experience equivalent to the requirements of regulation 1(b) as approved by Academic Board or its delegate; and have performed at an acceptable level in any tests of academic aptitude and/or interviews prescribed by Academic Board or its delegate.

Qualification Requirements

- Candidates for the Postgraduate Certificate in Science and Technology shall follow a flexible programme of study, which shall consist of courses totalling at least 60 credits, comprising:
 - a selection of courses approved by the Academic Board (or its delegate) from the Schedule to the Qualification; and including:

- (b) attending contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.
3. Notwithstanding Regulation 2, and with the approval of Academic Board or its delegate, students exiting from a relevant postgraduate qualification may substitute relevant 700 level courses for courses included in the Postgraduate Certificate in Science and Technology Schedule beyond the normal limits permitted.

Specialisations

4. The Postgraduate Certificate in Science and Technology is awarded without specialisation.

Completion Requirements

5. The timeframes for completion as outlined in the General Regulations for Postgraduate Degrees, Postgraduate Diplomas and Postgraduate Certificates will apply.
6. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

7. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Postgraduate Certificate in Science and Technology

Taught postgraduate courses, that is 700 level, selected from the following prefixes:

112 Agribusiness, 117 Animal Science, 118 Veterinary Science, 119 Agriculture and Horticulture, 120 Plant Biology, 122 Biochemistry, 123 Chemistry, 124 Physics, 141708, 141712, 141713, 141715, 145 Geography, 151 Nutritional Science, 157 Information Systems, 158 Information Technology, 159 Computer Science, 160 Mathematics, 161 Statistics, 162 Biology, 175 Psychology, 188 Natural Resource Management, 189 Soil Science, 194 Physiology, 196 Ecology, 199 Zoology, 203 Genetics, 214 Health Sciences, 218 Building and Construction, 228 Technology and Engineering, 232 Ecology, 233 Earth Science, 234 Sport and Exercise Science, 235 Maori Resource and Environmental Management, 236 Nanoscience, 238 AgriScience, 240 Logistics and Supply Chain Management, 247 College of Sciences courses, 280 Process and Environmental Technology, 281 Electronics and Information Engineering, 282 Mechatronics and Automation Engineering, 283 Agronomy, 284 Horticulture, 285 Plant Health, 286 Equine, 287 Industrial Innovation, 502 College of Sciences courses.

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Applied Statistics requires that the candidate will meet the University admission requirements as specified, and shall have:
 - been awarded or qualified for the award of a university degree; and
 - passed approved 100 level courses in Mathematics and Statistics (one of 160101, 160102, 160103, 160105, 160111, 160112, 160131, 160132, 160133, 228171; and one of 161111, 161122, 161101, 161140, or their equivalents).

Qualification Requirements

- Candidates for the Graduate Diploma in Applied Statistics shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - courses selected from the Schedule to the Qualification;
 - at least 120 credits at 200 level or higher, of which at least 75 credits must be at 300 level or higher; and including:
 - 45 credits from Schedule A courses;
 - at least 75 credits from Schedule B and Schedule C courses;
 - no more than 30 credits from Schedule C courses;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 2, and with the permission of the Programme Director, up to 30 credits from Schedules A or B may be substituted with appropriate alternative courses, including 700 level courses.

Specialisations

- The Graduate Diploma in Applied Statistics is awarded without specialisation.

Student Progression

- In order to progress to courses in Schedule C candidates must have successfully completed at least 30 credits from Schedule B courses, and have achieved at least a B+ grade average over all courses previously completed towards the Graduate Diploma in Applied Statistics, in addition to meeting the pre-requisites for the selected course.
- In cases of sufficient merit, the Graduate Diploma in Applied Statistics may be awarded with distinction.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Graduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

 - at least 120 credits at the 200 or 300 level from the Schedule to the Diploma;
 - at least 75 credits at 300 level.
- Notwithstanding Regulation 2, with the approval of Academic Board or their delegate, a candidate who has completed at least 30 credits at 200 level and 30 credits at 300 level towards a Graduate Diploma in Arts subject may be permitted to include up to 30 credits at the 700 level from the Bachelor of Arts (Honours), Postgraduate Diploma in Arts or Master of Arts Schedules.

Specialisations

- The Graduate Diploma in Arts may be awarded with or without an endorsement.
- Candidates may complete the diploma without an endorsement only with the prior approval of a coherent programme of study by the Academic Board or their delegate.
- Candidates may complete an endorsement by passing at least 90 credits in a subject area including:
 - at least 60 credits at 300 level;
 - any compulsory courses for the endorsement as listed in the schedule. The requirements for each endorsement are set out in the Schedule for the Qualification.
- Endorsements available in the Graduate Diploma in Arts are: Chinese, Classical Studies, Creative Writing, Defence Studies, Development Studies, Economics, Education, Educational Psychology, English, Environmental Studies, Geography, History, Japanese, Linguistics, Māori Knowledge, Mathematics, Media Studies, Philosophy, Politics and International Relations, Psychology, Security Studies, Social Anthropology, Social Policy, Sociology, Spanish, Statistics and Theatre Studies.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the diploma, candidates who commenced study towards the Economics endorsement prior to 01 January 2022 will be permitted to substitute

- a 300-level course(s) already completed towards the endorsement for 178352. These transitional arrangements expire on 31 December 2025.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the diploma, candidates who commenced study towards the Educational Psychology endorsement prior to 01 January 2022 will be permitted to substitute a 300-level course already completed towards the endorsement for 263301. These transitional arrangements expire on 31 December 2025.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the degree, candidates who commenced study towards the Social Anthropology endorsement prior to 01 January 2022 will be permitted to substitute 146303 for 146301. Such candidates who have completed 146213 may count this course towards the requirements of the subject course schedule and may substitute (if completed) one of 146302, 146304, 146311, 146313, 146316, 146317 or 146318 for 146300. Candidates will be permitted to substitute completed courses for courses at the same or lower level included in the subject course schedule. These transitional arrangements expire on 31 December 2025.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the diploma, candidates who commenced study towards the Social Policy endorsement prior to 01 January 2022 will be permitted to substitute a 300-level course(s) already completed towards the endorsement for 179320 and/or 179330. These transitional arrangements expire on 31 December 2025.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Study provisions specified in the Part I regulations to the diploma, candidates who commenced study towards the Statistics endorsement prior to 01 January 2022 will be permitted to substitute 161220 and/or 161221, if already completed, for 161250 and/or 161251. These transitional arrangements expire on 31 December 2025.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Graduate Diploma in Arts (Economics) prior to 1 January 2024 who have successfully completed 178352 may substitute this for 178312 until 31 December 2027.

Schedule for the Graduate Diploma in Arts

Endorsements

Chinese (90 credits)

Subject courses

241201 Chinese 2A 15 credits
P 241102 or appraisal required R 241202, 241301, 241302, 241304, 241305
241202 Chinese 2B 15 credits
P 241201 or appraisal required R 241301, 241302, 241304, 241305, 241306

The Graduate Diploma in Aviation

GDipAv

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Aviation requires that the candidate will:
 - meet the University admission requirements as specified; and
 - shall have been awarded or qualified for a Bachelor's degree or be admitted on the basis of equivalence.
 - Candidates are deemed to have met the prerequisite requirements for the 200-level courses listed in the Schedule below.
- Admission to the Graduate Diploma in Aviation with a Flight Instruction endorsement requires that the candidate will:
 - meet the requirements of Regulation I; and
 - hold a Class One Medical Certificate recognised by the CAA NZ and meet appropriate pilot aptitude selection criteria as defined from time to time by the School of Aviation; and
 - hold a Commercial Pilot Licence (CPL) - Aeroplane (A).

Qualification Requirements

- Candidates for the Graduate Diploma in Aviation shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - courses selected from the Schedule to the Qualification;
 - completion of an endorsement;
 - at least 75 credits at 300 level;
 - any compulsory courses identified in the Schedule to the Qualification;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- Candidates may complete an endorsement by passing at least 120 credits in a specialisation including 75 credits at 300 level. The requirements for each endorsement are set out in the Schedule for the Qualification.
- Approved endorsements are Aviation Studies and Flight Instruction.

Academic Requirements

- Candidates completing the Flight Instruction endorsement must complete the necessary competencies to achieve a CAA NZ 'C' Category Flight Instructor Rating, a night instructor endorsement removal and an aerobatics instructor endorsement removal and pass the following integrated courses:
 - 190282 Introduction to Flight Instruction
 - 190285 Aerobatic Aircraft Handling
 - 190301 Flight Instructor Human Factors
 - 190315 Flight Instruction Fundamentals I
 - 190335 Flight Instruction
- Integrated courses comprise two components: academic and practicum. A candidate must pass both the academic component and the practicum component to obtain a pass in the course.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

15 credits at 300 level from 190 prefix (Aviation)

15 credits at 200 or 300 level from the 190 prefix (Aviation).

The Graduate Diploma in Business Studies

GradDipBusStuds

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Business Studies requires that the candidate will:
 - meet the University admission requirements as specified; and shall
 - have been awarded or qualified for a Bachelor's degree, or equivalent; or
 - have demonstrated equivalent practical, professional and/or scholarly experience.

Qualification Requirements

- Candidates for the Graduate Diploma in Business Studies shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits at 200 level or above, comprising:
 - courses selected from the Graduate Diploma in Business Studies schedule;
 - at least 75 credits at 300 level or above;
 - courses selected are restricted to 200-level, 300-level, and 700-level courses from the relevant prefixes and including:
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulations 2, up to 45 200-level credits may be cross-credited from a completed Massey University degree provided that the courses are listed in Schedule B of the Bachelor of Business or the Bachelor of Retail and Business Management schedule.

Specialisations

- The Graduate Diploma in Business Studies may be awarded with or without an endorsement. The requirements for each endorsement are set out in the Schedule for the Graduate Diploma in Business Studies.
- The endorsements available are: Accounting, Human Resource Management, and Personal Financial Planning.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Certificate in Business Studies should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the diploma, candidates enrolled in the Graduate Diploma in Business Studies (Human Resource Management) prior to 1 January 2024 will be granted the following substitutions:
 - 114332 for 114343
 - 114396 for 114321
- Such students are exempt from having to take 152393 but must ensure they complete the graduate diploma with at least 75 credits at 300-level.
- These transitions arrangements expire 31 December 2027.

The Graduate Diploma in Dairy Science and Technology

GDipDairySciTec

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Dairy Science and Technology requires that the candidate will have met the University admission requirements as specified, and will have:
 - have been awarded or qualified for a relevant Bachelor's degree, or equivalent; or;
 - produced evidence of informal learning equivalent to that specified in 1 (a).
- In all cases candidates shall have been employed in the dairy industry for at least one year, and have ongoing employment in the dairy industry while studying.

Qualification Requirements

- Candidates for the Graduate Diploma in Dairy Science and Technology shall follow a parts-based programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - Parts One and Two as defined by the Schedule for the Diploma; and including;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Graduate Diploma in Dairy Science and Technology is awarded without a specialisation.

Student Progression

- For progression from Part One to Part Two, candidates must have successfully completed all courses in Part One.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Graduate Diploma in Dairy Science and Technology

Part One

141240	Dairy Processing Technology	15 credits
141241	Dairy Engineering	15 credits
141242	Dairy Microbiology and Food Safety	15 credits
141320	Dairy Chemistry	15 credits

Part Two

141321	Dairy Ingredient Technology	15 credits
141322	Dairy Product Technology	15 credits
141323	Cheese and Whey Technology	15 credits
141324	Dairy Manufacturing Principles	15 credits

The Graduate Diploma in Design

GDipDes

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Design requires that the candidate will have:
 - met the University admission requirements as specified; and will have;
 - been awarded or qualified for a Bachelor's degree, or equivalent; or
 - been assessed by Academic Board or their delegate as having equivalent practical, professional and scholarly experience at the appropriate level.
- In all cases candidates must be selected into the Diploma following a selection process which will include the assessment of a portfolio of work submitted by the candidate and, at the discretion of Academic Board or their delegate, an interview.

Qualification Requirements

- Candidates for the Graduate Diploma in Design shall follow a flexible course of study, which shall consist of courses totalling at least 120 credits, comprising:
 - At least 30 credits of core courses selected from Schedule A of the Diploma;
 - At least 60 credits of core studio courses selected from Schedule B of the Diploma;
 - 30 credits of elective courses selected from Schedule C of the Diploma;
 - attending contact courses, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 1, with the approval of the Academic Board or their delegate a candidate may be permitted to transfer up to 30 credits from an incomplete graduate qualification in design or related programme of study to the Graduate Diploma in Design.

Specialisations

- The Graduate Diploma in Design is awarded without an endorsement.

Student Progression

- In cases of sufficient merit, the Graduate Diploma in Design may be awarded with Distinction or Merit if completed in one year of full-time study or three years of part-time study.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board or their delegate, be awarded the Certificate in Creative Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Graduate Diploma in Emergency Management

GradDipEmergMgt

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Graduate Diploma in Emergency Management requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for the award of a Bachelor's degree, or equivalent, or another approved qualification; and
 - have completed at least one year of emergency management-related experience.

Qualification Requirements

- Candidates for the Graduate Diploma in Emergency Management shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - at least 75 credits at 300 level;
 - any compulsory courses listed in the Schedule for the Qualification; and including:
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Graduate Diploma in Emergency Management is awarded without an endorsement.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Graduate Certificate in Emergency Management should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Graduate Diploma in Environmental Health

GradDipEH

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Environmental Health requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a relevant Bachelor's degree or equivalent.

Qualification Requirements

- Candidates for the Graduate Diploma in Environmental Health shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - at least 75 credits at 300-level; and including:
 - any compulsory courses listed in the Schedule for the Qualification;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Graduate Diploma in Environmental Health is awarded without an endorsement.

Student Progression

- In cases of sufficient merit, the Graduate Diploma in Environmental Health may be awarded with distinction.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Graduate Diploma in Facilities Management

GradDipFM

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Facilities Management requires candidates to:
 - meet the university's admission requirements as specified;
 - have been awarded or qualified for a Bachelor's degree or equivalent qualification; and
 - have completed at least two years of relevant professional experience.

Qualification Requirements

- Candidates for the Graduate Diploma in Facilities Management shall follow a programme of study that shall consist of courses totalling at least 120 credits, comprising:
 - at least 75 credits at 300-level or above;
 - any compulsory courses listed in the Schedule for the qualification; and including:
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Graduate Diploma in Facilities Management is awarded without a specialisation.

Student Progression

- In cases of sufficient merit, the Graduate Diploma in Facilities Management may be awarded with distinction if completed in one year of full-time study or three years of part-time study.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates will apply.

- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of the Academic Board, be awarded the Graduate Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Graduate Diploma in Fine Arts

GDipFA

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Fine Arts requires that the candidate will have:
 - met the University admission requirements as specified; and will have
 - been awarded or qualified for a Bachelor's degree, or equivalent; or
 - been assessed by Academic Board or their delegate as having equivalent practical, professional and scholarly experience at the appropriate level.
- In all cases candidates must be selected into the Diploma following a selection process which will include the assessment of a portfolio of work submitted by the candidate and, at the discretion of Academic Board or their delegate, an interview.

Qualification Requirements

- Candidates for the Graduate Diploma in Fine Arts shall follow a flexible course of study, which shall consist of courses totalling at least 120 credits, comprising:
 - At least 30 credits of core courses selected from Schedule A of the Diploma;
 - At least 60 credits of core studio courses selected from Schedule B of the Diploma;
 - 30 credits of elective courses selected from Schedule C of the Diploma;
 - attending contact courses, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 1, with the approval of the Academic Board or their delegate a candidate may be permitted to transfer up to 30 credits from an incomplete graduate qualification in design or related programme of study to the Graduate Diploma in Fine Arts.

Specialisations

- The Graduate Diploma in Fine Arts is awarded without endorsement.

Student Progression

- In cases of sufficient merit, the Graduate Diploma in Fine Arts may be awarded with distinction if completed in one year of full-time study or three years of part-time study.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.

- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board or their delegate, be awarded the Certificate in Creative Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Graduate Diploma in Information Sciences

GradDiplInfSc

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Information Sciences requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for an undergraduate degree or equivalent qualification.

Qualification Requirements

- Candidates for the Graduate Diploma in Information Sciences shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits at 200 level or above, comprising:
 - at least 120 credits from courses listed in the Schedules for the qualification;
 - at least 75 credits at 300 level or above; and including:
 - any compulsory courses listed in the Schedules for the qualification;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- The Graduate Diploma in Information Sciences is awarded without an endorsement.
- Notwithstanding Regulation 3, the following endorsements and joint endorsement are available in accordance with transitional provisions

outlined in Regulation 9: Computer Science; Data Science; Information Systems; Information Technology; and Software Engineering.

Student Progression

5. In cases of sufficient merit, the Graduate Diploma in Information Sciences may be awarded with distinction.

Completion Requirements

6. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
7. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

8. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

9. Subject to any Maximum Time to Completion and Abandonment of Studies provisions specified in the Part I qualification regulations, candidates enrolled in the Graduate Diploma in Information Sciences prior to 1 January 2023 may complete the Graduate Diploma by fulfilling the requirements of Schedule B, including endorsement requirements for those candidates enrolled in an endorsement. These transition arrangements expire 31 December 2025.
10. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the diploma, candidates enrolled in the Graduate Diploma in Information Sciences prior to 1 January 2024 may substitute 158222 if successfully completed for 297201 and 158333 if successfully completed for 297301. This includes students enrolled in the Data Science endorsement under transition regulations.
11. These transition arrangements expire 31 December 2026.

The Graduate Diploma in Journalism

GDipJ

No new enrolments**Qualification Regulations****Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Graduate Diploma in Journalism requires that the candidate will:
 - meet the University admission requirements as specified; and
 - shall have been awarded or qualified for an undergraduate degree or an equivalent qualification; or
 - have been admitted to the qualification on the basis of equivalent relevant professional experience.

Qualification Requirements

- Candidates for the Graduate Diploma in Journalism shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - courses selected from the Schedule to the Qualification;
 - at least 120 credits above 100 level of which at least 75 credits must be at 300 level or above;
 and including:
 - any compulsory courses listed in the Schedule for the Qualification;
 - attending field trips, studios, workshops, tutorials and laboratories as required.
- Notwithstanding Regulation 2, up to 30 credits at 200 level may be cross-credited from a completed Massey University qualification provided that the course is listed in the Schedule to the Graduate Diploma in Journalism.

Specialisations

- The Graduate Diploma in Journalism is awarded without specialisation.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the

Certificate in Business Studies should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Graduate Diploma in Occupational Health and Safety

GradDipOHS

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma in Occupational Health and Safety requires that the candidate will:
 - meet the University admission requirements as specified;
 - have been awarded or qualified for a relevant Bachelor's degree or equivalent; and
 - have completed at least two years of relevant professional experience or equivalent.

Qualification Requirements

- Candidates for the Graduate Diploma in Occupational Health and Safety shall follow a programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - at least 75 credits at 300-level; and including:
 - any compulsory courses listed in the Schedule for the Qualification;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.
- Candidates seeking graduate membership of the Institution of Occupational Safety and Health (UK) must include courses 114240, 251370 and 251372.

Specialisations

- The Graduate Diploma in Occupational Health and Safety is awarded without an endorsement.

Student Progression

- In cases of sufficient merit, the Graduate Diploma in Occupational Health and Safety may be awarded with distinction or merit provided that the programme of study does not extend beyond 36 months of part-time study.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Qualifications will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled prior to 1 January 2022 who have successfully completed either 114254 or 128200 may substitute one of these for 114240. Candidates who have successfully completed 214312 may substitute this for 214316. These transition arrangements expire 31 December 2025.
- Subject to any Maximum Time to Completion regulations and the Abandonment of Studies provisions specified in the Part I regulations for the diploma, candidates enrolled prior to 1 January 2025 who have successfully completed 251272 may substitute this for 214213. These transition arrangements expire 31 December 2027.

The Graduate Diploma in Quality Systems

GradDipQS

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Before enrolment for the Graduate Diploma in Quality Systems a candidate shall have:
 - qualified for the award of a university degree, a diploma or a qualification approved for the purpose of these Regulations by the Academic Board, or have been granted admission with equivalent status as entitled to proceed to the Graduate Diploma in Quality Systems; and
 - satisfied the Academic Board that they have sufficient background of professional experience to be likely to benefit from the programme.

Qualification Requirements

- To qualify for the award of the Graduate Diploma in Quality Systems the candidate shall pass a total of 120 credits selected from the Schedule.

Specialisations

- The Graduate Diploma in Quality Systems is offered without an endorsement.

Completion Requirements

- The timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Regulation Notes

- Any 700-level course taken in the GDipQS that is also offered in the PGDipQS may not subsequently be counted in the PGDipQS, or re-taken by any student progressing from GDipQS to PGDipQS.
- A maximum of 45 credits may be taken in 200-level courses.
- Students whose work is of outstanding merit throughout the programme and in the Diploma examinations shall, on the recommendation of the examiners and the Academic Board, be awarded the Diploma with Distinction.

The Graduate Diploma in Science and Technology

GDipScTech

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Graduate Diploma in Science and Technology requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a relevant Bachelor's degree, or equivalent; or

- have been admitted to the qualification on the basis of equivalent relevant professional experience.

Qualification Requirements

- Candidates for the Graduate Diploma in Science and Technology shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits comprising:
 - at least 75 credits at 300 level or higher;
 - a selection of courses from the Schedule to the Qualification; and including;
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Graduate Diploma in Science and Technology is not awarded with an endorsement.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes. Candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Graduate Certificate in Science and Technology or Certificate in Science and Technology should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Graduate Diploma in Science and Technology

120 credits from courses at 200 level and 300 level selected from the following prefixes:

112 Agribusiness, 117 Animal Science, 119 Agriculture and Horticulture, 120 Plant Biology, 121 Environmental Science, 122 Biochemistry, 123 Chemistry, 138 Agricultural Engineering, 141 Food Technology, 147 Rehabilitation Studies, 151 Nutritional Science, 160 Mathematics,

The Graduate Diploma in Screen Arts GradDipSCA

Qualification Regulations**Part I**

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II**Admission**

- Admission to the Graduate Diploma in Screen Arts requires that the candidate will have:
 - met the University admission requirements as specified; and will have;
 - been awarded or qualified for a Bachelor's degree, or equivalent; or
 - been assessed by Academic Board or their delegate as having equivalent practical, professional and scholarly experience at the appropriate level.
- In all cases candidates must be selected into the Graduate Diploma following a selection process which will include the assessment of a portfolio of work submitted by the candidate and, at the discretion of Academic Board or their delegate, an interview.

Qualification Requirements

- Candidates for the Graduate Diploma in Screen Arts shall follow a flexible course of study, which shall consist of courses totalling at least 120 credits, comprising:
 - At least 75 credits at 300-level or above;
 - Any compulsory courses listed in the Schedule for the qualification; and
 - attending field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 3, with the approval of the Academic Board or their delegate a candidate may be permitted to transfer up to 30 credits from an incomplete graduate qualification in screen arts or related programme of study to the Graduate Diploma in Screen Arts.

Specialisations

- The Graduate Diploma in Screen Arts is awarded without endorsement.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board or their delegate, be awarded the Diploma in Visual Arts should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Graduate Diploma of Learning and Teaching

GradDipLnTchg

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma of Learning and Teaching requires that the candidate will:
 - meet the University admission requirements as specified; and have
 - been awarded or qualified for a Bachelor's degree of at least 360 credits, or equivalent; and
 - demonstrated competence in literacy and numeracy as set down by the Teaching Council of Aotearoa New Zealand; and
 - achieved an Academic IELTS score of at least 7.0 with no band less than 7.0 or approved equivalent within the preceding two years, unless the candidate holds New Zealand University Entrance Level 2 literacy credits or higher, or Teaching Council of Aotearoa New Zealand recognised equivalent qualification(s) and/or schooling; and
 - met the requirements for registration as set down by the Teaching Council of Aotearoa New Zealand, in terms of values, fitness and disposition to teach; and
 - been selected on the basis of a selection process which may include a written application, Police Vetting report, interview, referee reports and practical exercises, as may be determined by the Academic Board or their delegate.
- Admission to the Secondary endorsement requires that candidates will:
 - meet the requirements specified in Regulation 1; and
 - have completed a body of study at New Zealand Qualifications Framework Levels 5 to 7 and/or higher in at least one subject that is relevant for teaching a particular Secondary School subject.

Qualification Requirements

- Candidates for the Graduate Diploma of Learning and Teaching shall follow a flexible programme of study, which shall consist of courses totalling at least 150 credits, comprising:
 - the core courses listed in the Schedule to the diploma; and
 - the courses listed in the schedule for one endorsement; and
 - attendance at professional practice and community placements, field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- Candidates must complete an endorsement by passing at least 120 credits in that subject. The requirements for each endorsement are set out in Part B of the Schedule for the Qualification.
- The endorsements available for the Graduate Diploma of Learning are: Primary, Secondary, Early Childhood Education.

Academic Requirements

- Every candidate for the Graduate Diploma of Learning and Teaching shall perform to the satisfaction of the Academic Board or their delegate at least 16 weeks of supervised professional experience placements, in accordance with the requirements of the courses listed in the schedule for the endorsement in which they are enrolled.

Student Progression

- Massey University may cancel or refuse to permit the enrolment of a candidate in the Graduate Diploma of Learning and Teaching if, in the opinion of the University, that candidate is found not to meet in general terms the requirements set down by the Teaching Council of Aotearoa New Zealand for registration as a teacher in New Zealand in terms of good character and fitness to be a teacher.
- Should a candidate in the Graduate Diploma of Learning and Teaching be charged with, or convicted, of an offence against the law after entry into the qualification, the candidate must advise the Pro Vice-Chancellor or their nominee of the charge or conviction within three days.
- If the Pro Vice-Chancellor or their nominee is of the opinion that any candidate does not meet in general terms the requirements set down by the Teaching Council of Aotearoa New Zealand for registration as a teacher in New Zealand in terms of good character and fitness to be a teacher, the

candidate's registration in the Graduate Diploma of Learning and Teaching programme will be cancelled.

Completion Requirements

- A candidate's programme of study may not exceed three years from date of first enrolment in a course to be credited to the Graduate Diploma of Learning and Teaching.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- For candidates enrolled in the Graduate Diploma of Learning and Teaching the following will lead to exclusion from the qualification:
 - failure to obtain a pass in a course in two successive attempts; or
 - failure to pass courses totalling at least 75 academic credits or failure to pass at least 50 percent of an approved part-time programme of study in any academic year; or
 - failure to complete the Graduate Diploma of Learning and Teaching within three years from date of first enrolment in a course to be credited to the Graduate Diploma of Learning and Teaching.
- A person excluded under Regulation 12 will only be readmitted to the Graduate Diploma of Learning and Teaching with the approval of Academic Board or their nominee. Such approval may be withheld or granted subject to conditions.

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Diploma of Teaching (Secondary) requires that the candidate will:
 - meet the University admission requirements as specified; and shall
 - have been awarded or qualified for a Bachelor's degree of at least 360 credits, or equivalent; and
 - hold a qualification(s) approved by the Teaching Council of Aotearoa New Zealand as appropriate for entry; and
 - have completed approved courses at Level 7 or Level 8 in at least one subject area deemed suitable for teaching in New Zealand secondary schools;
 - have demonstrated competence in literacy and numeracy; and
 - have achieved an Academic IELTS score of at least 7.0 with no band less than 7.0 or approved equivalent within the preceding two years, unless the candidate holds New Zealand University Entrance Level 2 literacy credits or higher, or Teaching Council of Aotearoa New Zealand recognised equivalent qualification(s) and/or schooling; and
 - have met the requirements for registration as set down by the Teaching Council of Aotearoa New Zealand, in terms of in terms of good character and fitness to be a teacher.
- Admission to the Graduate Diploma of Teaching (Secondary) will be granted or withheld on consideration of the admission requirements specified under Regulation 1, a Police Vetting report and a selection process which may include a written application, interview, and written and/or practical exercises as may be determined by the Academic Board or their delegate.

Qualification Requirements

- Candidates for the Graduate Diploma of Teaching (Secondary) shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - the Teaching Studies courses listed in Schedule A of the Graduate Diploma of Teaching (Secondary) Schedule (45 credits); and
 - the Teaching Experience courses listed in Schedule B of the Graduate Diploma of Teaching (Secondary) Schedule (30 credits); and
 - 45 credits of Curriculum Subjects Studies courses as specified in Schedule C of the Graduate Diploma of Teaching (Secondary) Schedule; and
 - attending professional practice and community placements, field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- The Graduate Diploma of Teaching (Secondary) is awarded without specialisation.

Academic Requirements

- Every candidate for the Graduate Diploma of Teaching (Secondary) shall perform to the satisfaction of the Academic Board or their delegate at least fourteen weeks of supervised clinical practice, in accordance with the requirements of the following courses:
 - 260483 Secondary Teaching Experience I;
 - 260484 Secondary Teaching Experience II.

Student Progression

- Should a student in the Graduate Diploma of Teaching (Secondary) be charged with an offence against the law after entry into the qualification, the student must advise the College Pro Vice-Chancellor or their nominee of the charge within three working days.
- If the Academic Board or their nominee is of the opinion that any student does not meet in general terms the requirements set down by the Teaching Council of Aotearoa New Zealand for registration as a teacher in New Zealand in terms of good character and fitness to be a teacher, the student's enrolment in the Graduate Diploma of Teaching (Secondary) programme will be refused or cancelled.

Completion Requirements

- A candidate's programme of study may not exceed two years of full-time study, or three years of part-time study from date of first enrolment in a course to be credited to Graduate Diploma of Teaching (Secondary).
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- For candidates enrolled in the Graduate Diploma of Teaching (Secondary), the following will lead to exclusion from the qualification:
 - failure to obtain a pass in a course in two successive attempts; or
 - failure to pass courses totalling at least 60 academic credits or failure to pass at least 50 percent of an approved part-time programme of study in any academic year; or
 - failure to complete the Graduate Diploma of Teaching (Secondary) within two years of full-time study, or three years of part-time study from the date of first enrolment in a course to be credited to the Graduate Diploma of Teaching (Secondary).
- A person excluded under Clause 10 will only be readmitted to the Graduate Diploma of Teaching (Secondary) with the approval of Academic Board or their nominee. Such approval may be withheld or granted subject to conditions.

The Graduate Certificate in Emergency Management

GCertEmergMgt

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Certificate in Emergency Management requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for the award of a Bachelor's degree, or equivalent, or an approved qualification; and
 - have completed at least one year of emergency management-related experience.

Qualification Requirements

- Candidates for the Graduate Certificate in Emergency Management shall follow a flexible course of study, which shall consist of papers totalling at least 60 credits, comprising:
 - at least 45 credits at 300 level;
 - any compulsory papers listed in the Schedule for the Qualification; and including
 - attending contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.

Specialisations

- The Graduate Certificate in Emergency Management is awarded without an endorsement.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Graduate Certificate in Emergency Management

Compulsory courses (30 credits from)

130202 Introduction to Emergency Management.....	15 credits

The Graduate Certificate in Science and Technology

GCertScTech

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Graduate Certificate in Science and Technology requires that the candidate will:
 - meet the University admission requirements as specified; and
 - have been awarded or qualified for a relevant Bachelor's degree, or equivalent; or
 - have been admitted to the qualification on the basis of equivalent relevant professional experience.

Qualification Requirements

- Candidates for the Graduate Certificate in Science and Technology shall follow a flexible programme of study, which shall consist of courses at 200, 300 and 700 level totalling at least 60 credits, comprising:
 - at least 45 credits at 300 level or higher;
 - a selection of courses from the Schedule for the Qualification; and including:
 - attendance at contact workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Graduate Certificate in Science and Technology may be awarded with or without an endorsement.
- Candidates may complete an endorsement by passing 60 credits in an endorsement. The requirements for endorsements are set out in the Schedule for the Qualification.
- The endorsement available in the Graduate Certificate in Science and Technology is Lighting.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Graduate Certificate in Science and Technology

Schedule A: Endorsement

Lighting (60 credits)

The Diploma in Agriculture DipAg

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Diploma in Agriculture requires that the candidate will have met the University admission requirements as specified and will have successfully completed, to the satisfaction of Academic Board,
 - 12 weeks farm employment; or
 - a level 3 NZQF Certificate that is agriculture related.

Qualification Requirements

- Candidates for the Diploma in Agriculture shall follow a parts-based programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - Parts One and Two as specified in the Schedule for the Diploma in Agriculture; and including
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Diploma in Agriculture is awarded without specialisations.

Student Progression

- Candidates are required to complete all courses from Part One before proceeding to Part Two.
- Students who are admitted to the qualification on the basis of successful completion of the Foundation Certificate in Agriculture will be considered to have completed the requirements of Part One.
- The Academic Board, in restricted circumstances and on the advice of the examiners, may award a combined results pass. Course 119101 Farm Production Systems must be passed with a minimum C grade.

Completion Requirements

- A candidate's programme of study may not exceed four years from the date of first enrolment in the Diploma in Agriculture.

- Candidates may be graduated when they meet the Admission, Qualification, and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded the Foundation Certificate in Agriculture should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Diploma in Agriculture**Part One**

The Diploma in Business Studies

DipBusStuds

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Diploma in Business Studies requires that the candidate will meet the University admission requirements as specified.
- Admission to the Diploma in Business Studies (Financial Advice) requires that the candidate will have been awarded or qualified for the Certificate in Financial Advice.

Qualification Requirements

- Candidates for the Diploma in Business Studies shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - at least 45 credits above 100 level from the Schedule for the Diploma in Business Studies;
 - at least 90 credits from the Schedule for the Diploma in Business Studies.
 and including:
 - any compulsory courses;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.

- Notwithstanding Regulation 3 (a) candidates who are enrolled in the Financial Advice endorsement are exempt from the requirement to complete at least 45 credits above 100-level.
- Candidates who have successfully completed an approved Micro-credential may apply for credit towards the Financial Advice endorsement in accordance with the Recognition of Prior Learning regulations and have a personal programme variation in excess of the stated limits.

Specialisations

- The Diploma in Business Studies is awarded with or without an endorsement.
- Candidates may complete an endorsement by passing 120 credits in an endorsement. The requirements for each endorsement are set out in the Schedule for the Qualification.
- The endorsements available for the Diploma in Business Studies are: Financial Advice.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes; candidates who do not meet the requirements for graduation may, subject to the approval of Academic Board, be awarded a Certificate in Business Studies should they meet the relevant Qualification requirements.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

12. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the diploma, students enrolled in the Diploma in Business Studies prior to 1 January 2024 may include courses from outside the schedule to fulfil the requirements of 3a.
13. This transition arrangement expires 31 December 2026.

Schedule for the Diploma in Business Studies

190116	Introduction to Management in Aviation	15 credits
190211	Aviation Strategic Management	15 credits
190220	Managing Airline Systems	15 credits
	P 190116	
190306	Airline Strategic Management	15 credits
	P 190211	
190318	Air Transport Economics	15 credits

The Diploma in Meat Technology

DipMeatTech

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to Diploma in Meat Technology requires that the candidate will:
 - have attained at least 14 credits at NCEA Level 2 in each of English, Mathematics, and either Science or Biology, and at least 7 credits in a fourth subject;
 - or
 - produce evidence of a satisfactory standard of general education and/or informal learning equivalent to that specified in Regulation 1(a).

Qualification Requirements

- Candidates for the Diploma in Meat Technology shall follow a parts-based programme of study, which shall consist of courses totalling at least 135 credits, comprising:
 - completion of Part One and Part Two; and including:
 - courses as specified in the Schedule to the Diploma;
 - completion of practicum requirements;

- attending field trips, studios, workshops, tutorials, and laboratories as required.

- Candidates who, in the opinion of the Academic Board, have provided sufficient evidence of attainment in the subjects of Part One may be cross-credited with specified or unspecified courses not exceeding a total of 45 credits from Part One. This is additional to standard cross-crediting maxima.
- Notwithstanding Regulations 2(c) and 6, practicum requirements may be waived if the candidate has recently completed a total of at least two years of meat industry experience that in the opinion of Academic Board or their delegate is sufficient to enable the candidate to complete the programme of study.

Specialisations

- The Diploma in Meat Technology is awarded without specialisation.

Academic Requirements

- Candidates must complete to the satisfaction of Academic Board two periods of practical work totalling not less than 300 hours and practical reports in accordance with the requirements of courses 142018 Practicum I and 142019 Practicum II.

Student Progression

- Progression to Part Two from Part One is on the basis of successful completion of Part One or waiver in accordance with Regulation 3.
- Progression from Part Two to completion is on the basis of passing all of Part Two or through the award of Combined Results Pass.
- In cases of sufficient merit achieved throughout Part Two of the programme, the Diploma in Meat Technology may be awarded with Distinction.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, and Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

The Certificate in Aviation Studies

CertAvStuds

No new enrolments

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University including General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas, and Graduate Certificates.

Part II

Admission

- Admission to the Certificate in Aviation Studies requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

- Candidates for the Certificate in Aviation Studies shall follow a flexible programme of study, which shall consist of courses totalling at least 60 credits, including:
 - at least 45 credits from courses selected from the Schedule to the Certificate; and including:
 - any compulsory courses identified in the Schedule to the Certificate;
 - attending field trips, studios, workshops, tutorials, and laboratories as required.
- Notwithstanding Regulation 2(a), and at the discretion of Academic Board, students exiting or proceeding to the Bachelor of Aviation or the Bachelor of Aviation Management may have a personal programme variation approved in excess of stated limits, to meet the requirements of the Certificate in Aviation Studies through substitution of courses from the schedules to those degrees.

Specialisations

- The Certificate in Aviation Studies is awarded without specialisation.

Completion Requirements

- Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Undergraduate Diplomas, Undergraduate Certificates, Graduate Diplomas and Graduate Certificates will apply.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Part II

Admission

1. Admission to the Certificate in Science and Technology requires that the candidate will meet the University admission requirements as specified.

Qualification Requirements

2. Candidates for the Certificate in Science and Technology shall follow a flexible programme of study, which shall consist of courses totalling at least 60 credits at 100 level or above, including:
 - (a) at least 45 credits from courses selected from the Schedule to the Certificate;
 - (b) attending contact workshops, block courses, field trips, studios, workshops, tutorials and laboratories as required.
3. Notwithstanding Regulation 2(a), and at the discretion of Academic Board, students exiting from or proceeding to the Bachelor of AgriCommerce, Bachelor of Construction, Bachelor of Engineering with Honours, Bachelor of Food Technology with Honours, Bachelor of Health Science, Bachelor of Veterinary Science, or Bachelor of Veterinary Technology,

may have a personal programme variation approved in excess of stated limits, to meet the requirements of the Certificate in Science and Technology through substitution of courses from the schedules to those degrees.

Specialisations

4. The Certificate in Science and Technology is awarded without endorsement.

Completion Requirements

5. Any timeframes for completion as outlined in the General Regulations for Undergraduate Degrees, Diplomas and Certificates, and Graduate Diplomas and Certificates will apply.
6. Candidates may be graduated when they meet the Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

7. The general Unsatisfactory Academic Progress regulations will apply.

Schedule for the Certificate in Science and Technology

Unendorsed Certificate

Courses selected from the following prefixes:

112 Agribusiness, 117 Animal Science, 119 Agriculture and Horticulture, 120 Plant Biology, 121 Environmental Science, 122 Biochemistry, 123 Chemistry, 124 Physics, 138 Agricultural Engineering, 145 Geography, 151 Nutritional Science, 157 Information Systems, 158 Information Technology, 159 Computer Science, 160 Mathematics, 161 Statistics, 162 Biology, 175 Psychology, 188 Natural Resource Management, 189 Soil Science, 192102 Academic Writing in English for Speakers of Other Languages, 194 Physiology, 196 Ecology, 199 Zoology, 203 Genetics, 214 Health Sciences, 218 Building and Construction, 228153 Introductory Engineering Studies, 230112 Tū Arohae: Critical Thinking, 231 Public Health, 233 Earth Science, 234 Sport and Exercise Science, 235 Māori Resource and Environmental Management, 240 Logistics and Supply Chain Management, 246 Natural Sciences, 247 College of Sciences, 250 College of Health, 280 Process and Environmental Technology, 283 Agronomy, 284 Horticulture, 285 Plant Health, 286 Equine.

The Certificate in Foundation Studies CertFoundStud

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University.

Part II

Admission

- Admission to the Certificate in Foundation Studies requires that the candidate will:
 - have completed NCEA Level 2, or equivalent; and
 - if English is not the applicant's first language, have achieved an IELTS of 5.5 overall with no band less than 5.0, or equivalent.

Qualification Requirements

- Candidates for the Certificate in Foundation Studies shall follow a flexible programme of study, which shall consist of courses totalling at least 120 credits, comprising:
 - the core courses listed in Schedule A for the Certificate in Foundation Studies schedule; and
 - courses selected for one pathway as listed in Schedule B for the Certificate in Foundation Studies; and including:
 - attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

- The Certificate in Foundation Studies is awarded without specialisation.

Completion Requirements

- A candidate's programme of study may not exceed four academic years from date of first enrolment in a course to be credited to the Certificate in Foundation Studies.
- Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

- The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

- Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Certificate in Foundation Studies prior to 1 January 2025 who have successfully completed 192041 may substitute this for 192013. Candidates who have successfully completed 192042 may substitute this for 192012. Candidates enrolled in the Business Pathway may substitute a course or courses already completed for a course or

courses within the Business Pathway schedule. Candidates who have successfully completed 115014 may count this towards the Humanities/Social Science Pathway.

- These transition regulations expire 31 December 2026.

Schedule for the Certificate in Foundation Studies

Schedule A: Core courses

192012	Foundations of Tertiary Learning.....	15 credits
192013	Strategies for Undergraduate Success	15 credits
192040	Academic Language and Writing 1	15 credits
192043	Critical Academic Skills.....	15 credits

Schedule B: Specific courses Pathways

Business Pathway (60 credits from)

115030	Foundation Business Studies	15 credits
150001	Foundation Māori Culture	15 credits
192011	Foundation Communications.....	15 credits
247009	Foundation Analytical Thinking and Numeracy.....	15 credits

Humanities/Social Sciences Pathway (60 credits from)

150001	Foundation Māori Culture	15 credits
192011	Foundation Communications.....	15 credits
230001	Foundation Humanities	15 credits

293003	Foundation Fabricate	15 credits

The Certificate of University Preparation CertUniPrep

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University.

Part II

Admission

- Admission to the Certificate of University Preparation requires that the candidate will meet the University admission requirements as specified, or shall have:
 - completed Year 13 at a New Zealand secondary school, or equivalent; and
 - have achieved at least 14 credits in at least one approved subject at NCEA Level 3 or above, or equivalent; and

- (c) have achieved at least 10 credits in at least two other approved subjects at NCEA Level 3 or above, or equivalent; and
- (d) have met the literacy and numeracy standards required for University Entrance, or equivalent.

Qualification Requirements

2. Candidates for the Certificate of University Preparation shall follow a flexible programme of study, which shall consist of courses totalling at least 60 credits, comprising:
 - (a) the core courses listed in Schedule A for the Qualification;
 - (b) courses selected for one pathway as listed in Schedule B for the Certificate of University Preparation; and including:
 - (c) attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

3. The Certificate of University Preparation is awarded without specialisation.

Completion Requirements

4. A candidate's programme of study may not exceed two academic years from date of first enrolment in a course to be credited to the Certificate of University Preparation.
5. Candidates may be awarded the Certificate when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

6. The general Unsatisfactory Academic Progress regulations will apply.

Transitional Provisions

7. Subject to any Maximum Time to Completion and the Abandonment of Studies provisions specified in the Part I regulations for the degree, candidates enrolled in the Certificate of University Preparation prior to 1 January 2025 may substitute 192042, if successfully completed, for 192013.
8. This transition arrangement expires 31 December 2026.

The Foundation Certificate (International - Accelerated) FCert(IntAcc)

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University.

Part II

Admission

1. Admission to the Foundation Certificate (International - Accelerated) requires that the candidate will:
 - (a) Have completed NCEA Level 3, or equivalent; and
 - (b) if English is not the applicant's first language, have achieved an IELTS of 6.0 overall with no band less than 5.5, or equivalent TOEFL score, or other evidence acceptable to Academic Board.

Qualification Requirements

2. Candidates for the Foundation Certificate (International - Accelerated) shall follow a flexible programme of study, which shall consist of courses totalling at least 60 credits, comprising:
 - (a) the core courses listed in Schedule A for the Foundation Certificate (International - Accelerated) schedule; and
 - (b) courses selected for one pathway as listed in Schedule B for the Foundation Certificate (International - Accelerated); and including:
 - (c) attending Contact Workshops, block courses, field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

3. The Foundation Certificate (International - Accelerated) is awarded without specialisation.

Completion Requirements

4. A candidate's programme of study may not normally exceed four academic years from date of first enrolment in a course to be credited to the Foundation Certificate (International - Accelerated),

5. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

6. The general Unsatisfactory Academic Progress regulations will apply.

The Foundation Certificate in Agriculture FoundCertAg

Qualification Regulations

Part I

These regulations are to be read in conjunction with all other Statutes and Regulations of the University.

Part II

Admission

1. Admission to the Foundation Certificate in Agriculture requires that the candidate will have successfully completed, to the satisfaction of Academic Board:
 - (a) 12 weeks of farm employment; or
 - (b) A level 3 NZQF Certificate that is agriculture-related.
 and will have
 - (c) been selected into the programme on the basis of interview, if required by the Academic Board or their delegate

Qualification Requirements

2. Candidates for the Foundation Certificate in Agriculture shall follow a fixed programme of study, which shall consist of courses totalling at least 60 credits, comprising:
 - (a) the courses listed in the Schedule for the Qualification;
 - (b) attending field trips, studios, workshops, tutorials, and laboratories as required.

Specialisations

3. The Foundation Certificate in Agriculture is awarded without specialisations.

Completion Requirements

4. A candidate's programme of study may not exceed two years from date of first enrolment in the Foundation Certificate in Agriculture.
5. Candidates may be graduated when they meet the Admission, Qualification and Academic requirements within the prescribed timeframes.

Academic Progress

6. The general Unsatisfactory Academic Progress regulations will apply.

189006 Soil Productivity.....	15 credits
283006 Pasture and Crop Production.....	15 credits

GLOSSARY OF TERMS | KUPUTAKA

The terms listed in this glossary are commonly used in the University. The explanations and descriptions provided are general and brief. More detailed statements may be found elsewhere in the Massey University Calendar, provided by the Massey Contact Centre or the relevant College.

Abandoned	Students who have not been enrolled for a period of three consecutive years will be deemed to have abandoned their qualification. Abandonment releases the University from its obligation to ensure a qualification can be completed.	Admission with Equivalent Status	Admission with Equivalent Status (AES) is an entry opportunity for candidates who wish to study for a degree, diploma, or certificate but do not meet the entry requirements. AES at entrance level is required by students who are under 20 years of age and do not have University Entrance (or equivalent). AES with graduate status to postgraduate qualifications is normally granted on the basis of completed academic work that substantially corresponds to course work in this University. Candidates may be granted "AES with graduate status" to graduate qualifications on the basis of practical/professional experience equivalent to that of a graduate in an area relevant to the qualification. "AES with graduate status" is only granted to the specific qualification considered, i.e. it is not transferable.
Academic Board	A sub-committee of the Massey University Council, established under the Education and Training Act 2020, consisting of the Vice-Chancellor, members of staff and student representatives of Massey University. It advises Council on matters relating to programmes of study or training, awards and other academic matters, and exercises powers delegated to it by Council.	Aegrotat Application	A form of Specific Circumstances application that may be made when a student, due to Exceptional Personal Circumstances is unable to attend a learning experience, assessment or examination activity.
Academic Progress	A method used by the University for evaluating student academic performance in order to provide proactive, targeted academic performance-related interventions and recognition.	Aegrotat Pass (AG Pass)	A possible course grade outcome arising from a Specific Circumstances application. See Grades.
Academic Progress Committee (APC)	A University Committee working under the oversight of Academic Committee which has responsibility for managing Academic Progress processes including ESAP, P-PAQ, Repeat Course Non-Achievement and Re-Entry from Exclusion.	Approved Health Professional	Health professionals approved by Massey University include: Counsellors who are members of the New Zealand Association of Counsellors or New Zealand Christian Counsellors Association, Psychotherapists who are members of the New Zealand Association of Psychotherapists, Registered Dentists and Dental Specialists, Registered Medical Practitioners, Registered Nurses, Registered Midwives, Registered Physiotherapists, Registered Psychologists, Registered Specialist Medical Practitioners, Registered Social Workers or Social Workers who are members of the Aotearoa New Zealand Association of Social Workers, or are members of the overseas equivalent bodies to the preceding list, are registered and hold a current practicing certificate, Drug and Alcohol Practitioners. Other health professionals may be approved by Massey University by its Academic Board or its delegates.
Academic Record	The formal record of a student's study while at the university, including a transcript of course and programme outcomes.	Assessment	The process of judging how effectively learning is occurring through a process of generating and collecting evidence of a student's attainment of knowledge and skills and comparing that evidence against the assessment criteria.
Academic Standing	See Academic Progress	Assessment Criteria	Statements that describe how student performance in relation to the stated learning outcomes will be recognised.
Academic Unit	A School or Institute responsible for teaching a particular discipline or disciplines.	Bachelor Degree	The qualification awarded to a person who has completed a university undergraduate degree.
Academic Year	An academic year comprises two semesters (Semester One and Semester Two) and a Summer School. Where a course spans Semesters One and Two, this is referred to as Double Semester. Study within an academic year commences on the first Monday of Semester One and concludes at the end of the examinations at the end of Summer School. The starting date for Semester One for most qualifications begins late February, although some qualifications have earlier start dates. An individual student's programme of study may include enrolment in any or all enrolment periods in an academic year. For the purposes of the Section 10 (1) of the Education and Training Act 2020, academic year means the period of 12 months commencing 1 January.	Below Expectation Status	Following an Academic Progress evaluation the student's performance for a specific period is considered to be below expectations (usually because of repeated fail and/ or late withdrawal grades), as outlined in the Academic Progress Regulations.
Achieving Satisfactory Performance Status	Following an Academic Progress evaluation the student's performance for a specific period is considered to be in line with expectations.	Blended Learning	Blended learning combines on campus and online instruction in ways that enable students and staff to optimise learning opportunities. Blended learning goes beyond mixing technology and teaching; it extracts the best of both in order to enhance the learning and teaching experience.
Admission	The right to study at the University. Admission criteria and processes depend on the student's educational history, age and the programme specified. "Enrolment" in a programme means the student has been admitted to study at the University. Admission to the University and admission to a qualification are separate processes; however, they may be conducted concurrently.	Block Mode	University study undertaken on campus (or at an off-campus location) by face-to-face delivery compressed over one or more specific periods during the enrolment period. This mode may include online learning and the use of digital resources.
Admission Application	The application to be admitted to the University and to a specific qualification.	Calendar	The official University publication that outlines the primary statutes, primary rules, primary regulations, and definitions of and information about the University. The University Calendar is published annually, may be updated during the year by amendments published online and relates to the stated academic year. For the current and archived Calendars refer to calendar.massey.ac.nz .

Carry Forward of Postgraduate Enrolment	The process that enables students undertaking a research degree, other than a doctoral degree, to carry forward their enrolment into the enrolment period immediately following that in which a full fee was paid, without incurring further fees. Special conditions apply.
Census Date	Date by which on-time withdrawals need to be completed i.e. up to and including 17 percent of the course duration measured from the course start date.
Certificate	<p>Three different types exist:</p> <ol style="list-style-type: none"> 1. Certificate: A qualification at the under-graduate or pre-degree level with a total value of not less than 60 credits that provides tertiary level study in a specific or general area of study. 2. Graduate Certificate: A qualification open to graduates or to those granted AES, comprising a coherent programme with a total value of not less than 60 credits, which includes the requirement that 45 credits or more of the courses or other work prescribed shall be at the 300-level or higher. 3. Postgraduate Certificate: A qualification that builds on attainment in a prior degree, open to graduates or those granted AES, comprising a coherent programme with a total value of not less than 60 credits, which includes the requirement that the courses or other work prescribed shall be in advance of the 300-level.
Challenge Examination/Assessment	An examination/assessment that students may be permitted to complete to demonstrate competence in a course that they have not been enrolled in or studied at this University. Permission to sit is based on evidence of professional or other experience.
Chief Examiner	A senior academic designated to guide and manage course assurance within a discipline or qualification.
College	Colleges are made up of academic units related by discipline that plan, direct and coordinate research and teaching. There are five colleges at Massey University: College of Business (Massey Business School); College of Creative Arts; College of Health; College of Humanities and Social Sciences; and College of Sciences. "Massey University College" is considered an academic unit.
Combined Results Pass	A pass that is granted for a "Part" or year cohort of courses within a qualification, where permitted under the Qualification Regulations. This type of pass allows a student to progress into the next "Part".
Composite Major	Composite majors are available in the Bachelor of Communication degree only and are a prescribed combination of courses from two majors in the degree.
Concomitant Situations	A phrase to define the accumulation of Statuses of Concern within the Academic Progress Regulations and Policy and Procedures. The phrase governs whether statuses of concern remain active for a particular student.
Confirmation of Enrolment	Confirmation provided to the student following receipt by the University of acceptance of an Offer of Enrolment. For programmes that lead to qualifications on the Qualifications Framework, the Confirmation of Enrolment is issued following an Enrolment Application and satisfaction of conditions (if any). It shows the qualification(s) and course(s) for which the student is enrolled.
Conjoint Degrees	Allows candidates to qualify for the approved conjoint award of two degrees. The most common conjoint programmes entail the completion of two undergraduate degrees by passing a reduced number of credits in combinations as specified in the qualification regulations.

Contact Workshop: In-Person	A synchronous event, of one or more days' duration, in which students meet with academic staff and other students and participate in any of the following learning experiences: lectures, laboratory classes, workshops, tutorials, seminars, field trips, tests or similar. In-person contact workshops usually occur during the mid-semester and mid-year study periods, at either a Massey University campus or an approved alternative venue. Attendance at, and participation in, contact workshops is recommended and in some cases may be compulsory.
Contact Workshop: Online	A synchronous event, of one or more hours' duration, in which students meet online with academic staff and other students and participate in any of the following learning experiences: webinars, simulations, virtual laboratory classes, tutorials, virtual field-trips or similar. Online contact workshops usually occur during semester at a specified time, and in some cases at regular scheduled times, using University-approved and supported tools. Attendance at, and participation in, contact workshops is recommended and in some cases may be compulsory.
Core Course	A compulsory course that must be passed as part of a particular qualification.
Corequisite	A course that is completed in the same semester as another course, unless the corequisite course has already been passed, or waived as a requirement due to prior completion of an equivalent course.
Course	A module of work in a particular discipline that is identified by means of a unique code number and delivered by means of lectures, tutorials, seminars, practica, studios or other learning experiences. In distance mode delivery may be by correspondence or electronic means. The length of a course is generally one or two semesters or as otherwise specified by the start and end dates. In appropriate combinations courses fulfil programme of study requirements and thus contribute to qualifications. Each course carries its own credit value.
Course Code	Each Massey University course has a six-figure code to distinguish its discipline, level and identity, e.g. 150.214 where "150" denotes Māori Knowledge, the "2" shows it is a 200-level course and the final two digits ("14") identify the specific course.
Course Coordinator	An academic staff member responsible for the delivery of a course.
Course Guide	A study resource to provide enrolled students with sufficient detail regarding the requirements to pass the course successfully.
Course Offering	Delivery of a course at a particular campus location in a given semester in a specific mode.
Course Outline/ Course Description	A study resource available to all students, which provides an overview of the course – course code, title, prescription, learning outcomes and assessment details – to help them make good enrolment choices.
Credits	Certificate, diploma and degree programmes are defined in terms of credits. Every course has a credit value associated with it that indicates its contribution to the qualification enrolled for. (Each course's credit value applies to all qualifications to which that course can contribute.) The standard undergraduate course is 15 credits, except in some professional qualifications. (See also "Effective Weekly Hours".)
Critical Personal Circumstances	See Exceptional Personal Circumstances

CUAP	Committee on University Academic Programmes. The Committee is a sub-committee of Universities New Zealand and has statutory standing as the Quality Assurance Body for New Zealand universities. One of its functions is to review and approve new qualifications, new specialisations within existing qualifications, and significant changes to existing programmes.	Doctoral Degree	This is the most advanced supervised postgraduate qualification. The Doctor of Philosophy degree (PhD) requires the completion of a research thesis or creative work and exegesis that makes an original contribution to new knowledge. Named doctorates (e.g. the Doctor of Social Work or DSW and the Doctor of Clinical Psychology or DClinPsych) also require completion of a research thesis as well as specified course work. Normally a minimum of three years of full-time study is required for a doctoral degree.
Current Year of Regulations	The regulations as outlined in the current University Calendar. Each time students enrol or re-enrol at the University, they will be enrolled under the regulations as outlined in the Calendar (or as amended in the online version during the enrolment period) as at the date of enrolment or re-enrolment.	Doctoral Research Committee (DRC)	The purpose of the Doctoral Research Committee is to provide effective engagement of the University's doctoral research community in academic decision-making and doctoral degree governance. Its role and function is to oversee the administration of the University's doctoral degrees, and to maintain and promote the integrity and quality of these degrees.
Deferred Assessment	A replacement assessment opportunity offered to students who have missed an assessment held at a fixed time and place (usually an exam or test). The offer is normally limited to situations where the student has made a Specific Circumstances application which has been accepted.	Effective Weekly Hours	The value of a course in credits gives an indication of the total amount of time (including lecturer and tutor contact hours, workshops and tutorials, tests and assignments, supervised practical placements, and study time) required to complete a course. Converted into a number of hours per week, this is referred to as the effective weekly hours for the course. For a standard undergraduate (15-credit) single semester course, a commitment of about 10–12.5 hours of study time per week might reasonably be expected over the 15-week duration of the semester. (Normally, tuition takes place for 12 weeks and the study and examinations period cover the remaining three weeks. The average workload relates to the 15-week period.) For a standard undergraduate (15-credit) double semester course, a commitment of about 5–6.25 hours of study time per week might reasonably be expected.
Degree	A qualification awarded on the completion of a programme of study that meets the requirements set down by the University and as approved by CUAP. Bachelor's, Bachelor's Honours (one year), Bachelor's with Honours (four years), Master's and Doctoral qualifications are all referred to as degrees.	Equivalent Full-Time Student (EFTS)	Equivalent Full-Time Student. Used as a measure of the size of a programme of study and the courses of which it is comprised. 1.0 EFTS equates to one full-time year of study or 120 credits.
Designated Support Officer	A staff member of the University who has rights granted by the Academic Progress Committee to attest to a student's circumstance in matters relating to Academic Progress, exclusion and Specific Accommodations.	Elective Courses	Non-compulsory courses chosen by students (with guidelines often provided). Elective courses contribute to the qualification, but not to the specialisation(s).
Did Not Complete (DC)	See Grades	Endorsement	An academic discipline such as economics, social anthropology or physics, offered through courses at various levels which are taken at undergraduate diploma, graduate or postgraduate diploma or certificate level, through a combination of prescribed courses in a specific discipline that comprises most or all of the qualification requirements within the regulations for that qualification. An endorsement will normally appear printed on the graduation certificate and on the student academic record.
Diploma	Three different types of diploma exist: 1. Diploma: A qualification at the under-graduate or pre-degree level with a total value of not less than 120 credits that can build on defined prior qualifications or experience. 2. Graduate Diploma: A qualification open to graduates or granted AES, comprising a coherent programme with a total value of not less than 120 credits, which includes the requirement that 75 credits or more of the courses or other work prescribed shall be at the 300-level or higher. 3. Postgraduate Diploma: A qualification that builds on attainment in a prior degree, open to graduates or those granted AES, comprising a coherent programme with a total value of not less than 120 credits, which includes the requirement that the courses or other work prescribed shall be in advance of the 300-level.	Enrolment	Where a student has been admitted to the university, and a qualification, has applied for courses, has accepted an Offer of Enrolment and received a Confirmation of Enrolment for a programme or courses at the University.
Diplomate	A person who has met the University's requirements and has been awarded a diploma.	Enrolment Application	The application to study one or more courses in a programme at Massey University. This application may follow once an applicant has accepted an Offer of Place.
Discipline	A branch of knowledge which is researched and taught at the University.	Enrolment Period	The period during which particular courses are offered, e.g. Semester One.
Dissertation	A detailed examination of a specific topic, which may include aspects of original research, problem investigation, and/or study of pre-existing data or published literature. Work leading to a dissertation typically includes minor data collection, validation and analysis, as well as writing an original document. Dissertations are typically 30–60 credits and may be split into two parts to facilitate study across two study periods.	Equivalence	Equivalence, in relation to each offering of a course in a single Semester, is defined as the means by which equity and parity of the student learning experience and outcomes is achieved.
Distance Mode	University study undertaken off-campus delivered primarily online or by correspondence using digital and print resources. This mode may include some face-to-face delivery by one or more contact workshops during the enrolment period.	Evaluating Student Academic Progress (ESAP)	A process managed by the Academic Progress Committee which monitors and manages student performance.
Distinction	An award recognising academic excellence in some undergraduate, graduate and postgraduate qualifications.		

Examination	A type of assessment normally held at the end of a course or at completion of a thesis that consists of such written, oral and practical questions as the examiner(s) for a course or thesis may determine. These questions are set to assess candidates' knowledge, skills and understanding. The results of the examination will form part of the final grade for the course.
Excelling Status	Following an Academic Progress evaluation the student's performance for a specific period is considered to be above expectations.
Exegesis	A critical explanation accompanying a creative work that, together with other specified elements such as a presentation or exhibition, may comprise the requirements of a thesis.
Exceptional Personal Circumstances	Any extraordinary personal circumstances (supported by corroborative evidence) that have impacted on a student's learning opportunity. These include: <ol style="list-style-type: none"> 1. Unforeseen events beyond the student's control, which compromise their ability to participate as normal in, or attend, or complete, learning experiences, assessment or examination activity. 2. Circumstances which have a profound effect beyond the regular functioning of the specific student, i.e. a temporary impairment. The effect will usually be in terms of ability to concentrate, to think clearly, or to be able to put aside strong emotion, resulting in an impairment of functioning significant enough to substantially impact on participation in academic activity.
Exclusion	<p>(a) The cancellation of a person's enrolment at Massey University, or in a course or programme or qualification when during that person's enrolment it becomes evident that any of the Massey University Academic Progress, Enrolment or Disciplinary regulations apply, or when the University is at law permitted to cancel a student's enrolment; or</p> <p>(b) If any person is not enrolled and any of the clauses in the Massey University Unsatisfactory Academic Progress or Disciplinary regulations apply, or if the University is permitted at law to refuse to enrol a person, then exclusion means the refusal to enrol the person concerned in the course(s) or qualification(s) or at this University as the case may be.</p>
Exemption	A Personal Variation to Regulations permitting a student to replace a compulsory course with an alternative course. The attributes of the replacement course are defined at the time of granting the Personal Variation.
Extension	Extensions may be available for those who cannot meet assessment due dates which are not in a fixed time and place - see Fixed Time and Place definition. The length of an extension is considered on a case-by-case basis.
External Examiner	A suitably-qualified person with specialist knowledge, not employed by the University, who is appointed by the University to examine and grade a post-graduate thesis/research project or final under-graduate assessment.
Fee Return	A form of Specific Circumstance application which may be applied when a student, due to Exceptional Personal Circumstances, is unable to complete a course, and results in a refund or credit of fees for the course.
Field Trip	A visit to an off-campus location to view and investigate an activity or site that is not available on campus. There may be an item of assessment associated with the visit.
Final Date	Final date refers to the deadline for various processes related to enrolment in courses and admission into programmes. It also relates to the deadlines for credit transfer, withdrawal from courses and programmes, applications for hostels and for graduation ceremonies.

Fixed Time and Place	Compulsory Learning Experiences, Assessments and Examinations are considered to be of a Fixed Time and Place when the date and the location are specified and the activity cannot easily or practicably be replicated. This may include activities such as invigilated examinations and compulsory field trips, but will not include assignments and coursework where a due date is specified, or assessment activities where there is an element of choice as to the assessment or combination of assessments completed.
Full-time Study	<p>The status that applies to students who are enrolled in at least 0.8 EFT of a full-time workload of 120 credits. This equates to enrolment in 105 credits or more in one academic year, with part-time study defined as enrolment in 90 credits or less. Other definitions apply in specific circumstances, e.g. for StudyLink purposes enrolment in 96 or more credits in one academic year, 48 or more credits in one semester, or 36 credits or more in Summer School, meets the criteria for full-time study.</p> <p>Immigration New Zealand defines full-time as a minimum of 45 credits of internal/block mode courses per semester for the purposes of obtaining a student visa.</p> <p>Specific programmes may prescribe a full-time course load of 120 credits per year or 60 credits per semester.</p>
Grade	<p>A code, often a letter, given to describe the level of achievement. The possible grades are –</p> <p>Pass Grades A+, A, A-: First Class Pass B+, B, B-: Second Class Pass C+, C, C-: Pass AG: Aegrotat Pass P: Ungraded Pass</p> <p>Fail Grades D: Fail E: Low Fail F: Ungraded Fail</p> <p>Other Entries WD: Withdrew WS: Withdrew Specific Circumstances DC: Did Not Complete (A DC grade is awarded to candidates who withdraw from a course late i.e. 75 percent or more through the course duration, or who fail to complete all compulsory elements, or who fail to complete assessment components totalling 51 percent or more of the total assessment, or whose aegrotat application is unsuccessful.) NF: Not Finalised CT: Continuing Enrolment</p> <p>The # symbol on student result slips beside a grade result indicates confirmation that an aegrotat or impaired performance application was received and considered when the grade result was awarded.</p> <p>Restricted Pass: Awarded prior to 2017. A restricted pass "R" enables the course to be credited towards a qualification in which "R" passes are permitted but does not qualify as a pass for prerequisite or corequisite purposes. Courses with R passes will not be able to be credited to incomplete qualifications after 2025.</p>
Graduand	A person who has completed the University's requirements for a degree but has not yet had the degree conferred.
Graduate	A person who has met the University's requirements and has been conferred (awarded) a degree.
Graduate Profile	A statement of the intended capabilities of graduates, including from a particular qualification and/or specialisation. The profile includes descriptions of the generic and specific attributes that graduates are expected to possess including the body of knowledge attained.
Group Project	An assessment item in which students have been given approval to, or are required to, collaborate to produce evidence of their learning. Assessment judgements may apply to the whole group; individual contributions can also be judged separately.

HOI/HOS	Head of Institute/School (and Directors), i.e. the leaders of academic unit within one of the five Colleges and Massey University College.		
Honours	An award for academic excellence in eligible degree qualifications, which include four classes: First Class; Second Class Division I; Second Class Division II; and Third Class.	Major	A substantial component of an undergraduate degree (at least one-quarter and often consisting of one discipline area only) selected by the student in accordance with the regulations as the principal area of study for the degree. Where a degree allows both a major and a minor, the major and minor should be from different discipline areas. A major will normally appear on the graduation certificate and on the student academic record.
Honours Degree	Honours degrees are postgraduate qualifications comprising an additional year of study beyond the bachelor's degree in the discipline. Entry to an Honours degree requires prior high academic performance in undergraduate degree study, and students selected for an Honours degree may enrol in the postgraduate degree after completing the undergraduate degree. Completion of the Honours degree may qualify the graduate for doctoral study if achieved at the appropriate level. This is distinct from a Bachelor's degree with Honours, which is a four year degree.	Master's Degree	A postgraduate degree awarded for advanced study that normally builds on the principal discipline area(s) of a qualifying undergraduate degree. Master's degrees normally comprise 240 credits beyond a Bachelor's degree or 120 credits beyond a Bachelor's Honours Degree, Postgraduate Diploma, or significant relevant professional experience. Master's degrees may comprise 180 credits where the Bachelor's degree is completed at a specified level of attainment. A Master's by coursework and thesis will include a thesis or creative work and exegesis, whereas a Master's by coursework will include a research report, creative or scholarly work, as a defining feature. A Master's by thesis will primarily comprise a thesis or creative work and exegesis.
Impaired Performance Application	A form of Specific Circumstance application that may be made when a student's performance in, or preparation for, any compulsory learning experience, assessment or examination activity has been impaired due to illness, injury or Critical Personal Circumstances.	Matriculated	The status of a candidate who earns the right to commence undergraduate study at university through meeting the prescribed requirements for entrance on the basis of the National Certificate in Educational Achievement (NCEA) Level 3 or its current or past equivalent.
Intellectual Property Rights	The intellectual property rights as defined by Massey University's Intellectual Property Policy.	Mentor	A person, usually a staff member or senior student, available to students to support their participation in the University.
Internal Mode	University study undertaken on-campus by face-to-face delivery, which are scheduled on a regular basis, normally weekly (and not less than fortnightly), throughout the enrolment period. This mode may include online learning and the use of digital and print resources.	Merit	An award recognising academic achievement in some undergraduate, graduate and postgraduate qualifications.
Invigilate	To supervise candidates during an examination.		
Laboratory Class	A period of tuition during which students conduct experiments or practical exercises in a supervised environment.	Minor	A component of an undergraduate degree (usually a minimum of 60 credits with at least 45 credits above 100-level and at least 15 credits at 300-level, and usually consisting of one discipline area only) selected by the student in accordance with the regulations as a secondary area of study for the degree. Where a degree allows both a major and a minor, the major and minor should be from different discipline areas. A minor will normally appear on the student academic record but not on the graduation certificate.
Learning Experiences	Academic activities which include but are not limited to lectures, laboratory classes, workshops, tutorials, seminars, field trips, studios, webinars, simulations, practicum, placements, internships, self-directed learning, etc. Successful completion of some learning experiences may be compulsory for mastery of the course and its learning outcomes.	Mixed Delivery Mode Student	A student who is enrolled in a programme of study which includes courses which are delivered by different modes.
Learning Outcomes	Statements of the knowledge, skills and attitudes that students are expected to demonstrate as a result of successfully completing a course of learning. Learning outcomes are usually stated in terms of observable and/or measurable behaviour.	Mode	The method of delivery that students are expected to engage in, which may be internal, distance or block.
Lecture	An oral presentation of selected content of a course, usually delivered in a specific block of time, and may be delivered online.	Moderation of Assessment	The process of establishing comparability of standards between assessors or between assessments, to ensure the reliability and validity of marks and grades. Moderation occurs after marks are awarded and assessments administered.
Level of Courses	The level of a course indicates how advanced the content and learning outcomes of a course is. Most undergraduate degrees consist of 100-, 200- and 300-level courses in which 100-level courses are normally taught in the first year, 200-level courses build upon these and 300-level courses may be studied once 200-level courses are successfully completed. Some longer degrees require additional courses to be completed, e.g. Bachelor of Social Work to 400-level and Bachelor of Veterinary Science to 500-level. Postgraduate courses are taught at 700-, 800- and 900-levels.	MOST	Massey On-line Survey Tool – the University's on-line survey tool for course and teacher evaluation.
Limitation on Enrolment	A restriction on the number of students who can enrol in any given course, course offering or programme.	New Intellectual Property Rights	New intellectual property rights as defined by Massey University's Intellectual Property Policy.
Location	The campus or other designation for the site of a course offering.	Non-Standard Offerings	Non-standard offerings are course offerings with start and end dates different to the standard semester dates. There are two types of non-standard offerings: compressed and extended. Compressed offerings start and finish within the standard semester. They are different to the compressed nature of face-to-face contact within the Block Mode definition. Extended offerings have start and end dates which extend beyond the normal semester period. They either start before the semester begins and/or end after the semester ends.
		Non-Tuition Fees	Various fees that are payable in addition to the tuition fees and sundry fees for each course.
		Not Finalised (NF)	A place-marker used when a grade result for an assessment of performance in a course is not finalised. It does not qualify as a grade for any purpose.

Offer of Enrolment	An Offer of Enrolment may be issued by the University in response to an Enrolment Application. If the candidate accepts the Offer of Enrolment and gives the University notice of acceptance in the manner required, a contract is formed with the University. That contract may be subject to conditions which must be fulfilled by the student or waived by the University. A Confirmation of Enrolment is issued by the University when that contract is unconditional.	Practical Work Requirements	Relevant practical work other than laboratories, field or computer work, specified in the requirements for a course that is required for the particular qualification to be awarded. In some programmes this is undertaken during University holidays.
Offer of Place	An Offer of Place may be issued by the University in response to an Admission Application. If the candidate accepts the Offer of Place and gives the University notice of acceptance in the manner required, the candidate is admitted to the University to study the programme specified. The candidate is then invited to select courses and submit an Enrolment Application. The Offer of Place may be subject to conditions which must be fulfilled by the student or waived by the University.	Practicum	Assessed practical work that may be undertaken outside the University.
Online Enrolment	Massey University's interactive on-line enrolment service that provides intending and previously enrolled students with the ability to submit Admission and Enrolment Applications and accept Offers of Place and Offers of Enrolment using the web, with direct access to the services and information that support enrolment decisions.	Prerequisite	A course that must be completed to a defined standard or waived before a student's enrolment in another course is confirmed. For this purpose the minimum grade required is a C-, except where a different grade is specified in the Schedule for the qualification; e.g. P(B) means that the minimum grade that satisfies the requirement is B.
Online Learning Category	Communicates the online learning requirements associated with a course offering and provides information about the printing and supply of study resources. Information about the categories is communicated to students at enrolment and is available on the University website. Categories include: Course Guide & Administration (course material accessed in the online environment); Partially Taught Online; and Fully Taught Online.	Prescription	A brief statement of the academic content taught in a course.
Online Supervised Exam (OSE)	A closed book examination which is supervised electronically. There is a set date and time to start and finish and a time limit once a student begins	Presentation	A prepared performance, demonstration or exhibition, usually given to a group.
On-Time Withdrawal	A student withdrawing from a course prior to the Census Date (i.e. up to and including 17 percent of the course duration), which results in the course being removed from the student's record and no financial penalty to be applied.	Programme Director	Responsible for all academic matters relating to an individual qualification, including selected student-related matters.
PaCE	See 'Te Tumu Whakatipu'	Programme	A programme of study or training leading to a qualification listed on the Qualification Framework. Where the context requires in the University regulations, rules and other documents, "programme" includes course, course of study or training, programme of study and qualification.
Part/Examination	A fixed year of study consisting of a set of interrelating courses as defined within the Qualification Regulations.	Programme of study	The group of courses for which students are enrolled in an enrolment period or the set of related courses that a student must pass in order to satisfy the requirements of a particular qualification.
Performance on Professional and Accredited Qualifications (P-PAQ)	This applies to qualifications with specific non-standard Academic Progression requirements, it is a process which evaluates and manages qualification-specific student performance. P-PAQ relating to the specific qualifications is managed by a P-PAQ Subcommittee. P-PAQ Subcommittees are subcommittees of the Academic Progress Committee.	Pro-Vice Chancellor	The executive manager and academic leader of a College.
Performance Threshold	The level of performance expected and used in Academic Progress evaluations.	Provision of Support Offer (PSO)	An instrument normally arising from the Academic Progress Regulations, Policy and Procedures in which a formal and personalised offer of support is made to a student while they improve their performance or address their situation. These instruments are negotiated only by designated officers of the University. The PSO may also be associated with a negotiated set of conditions applied to a student.
Performance Below Expectations Status	Following an Academic Progress evaluation the student's performance for a specific period is considered to be below expectations.	Qualification	An official award given in recognition of the successful completion of a programme of study.
Permanent Qualification/ Programme Exclusion	Following a disciplinary or Academic Progress outcome, the person may not re-enrol on a designated course, or programme or qualification but they may seek admission to another qualification or programme.	Qualification Regulations	The academic requirements for enrolment in courses, and completion of a qualification.
PHOD/PHOI/PHOS/PPD	Permission of Head of Department, Institute, School or Programme (qualification) Director.	Quality Assurance	The setting of sector and university standards through documented policies and procedures that enable adherence to the stated quality standards to be assessed. In New Zealand, University qualifications are quality assured by the Committee on University Academic Programmes (CUAP) that are benchmarked across the university sector and evaluated by peer review. In a similar way, quality assured teaching and learning components must reflect agreed standards and review processes supported by documented evidence.
Postgraduate Study	Involves study at either 700-, 800- or 900-level, (Levels 8, 9 and 10 on the New Zealand Qualifications Framework) or a combination of these levels, normally for an Honours degree, Master's degree or Doctoral degree, a Postgraduate Certificate or a Postgraduate Diploma. Normally undertaken when a Bachelor's degree has been completed.	Recognition of Prior Learning	The term given to granting of credit on the basis of formal and informal learning. Credit on the basis of informal learning is assessed by a portfolio of supporting material or by the use of a challenge examination.
		Re-Entry	The process by which a person on a non-permanent exclusion seeks to return to study.
		Research Report	A written research component that may contribute between 30 and 60 credits of a postgraduate qualification.
		Re-Mark	The process by which a student seeks to have their assessment re-evaluated.
		Re-Sit	See Supplementary Assessment and Deferred Assessment
		Restriction	Some courses that are similar in content are restricted against each other. Students will not be permitted to enrol in both courses or credit them both to a qualification.

Rules	Rules include Statutes and Regulations made under Section 284 of the Education and Training Act 2020, and those University policies, procedures, guidelines and other documents that the Deputy Vice-Chancellor, Students and Global Engagement deems to be rules of the University.	Students' Association	The Students' association, Te Tira Ahu Pae, delivers services to Massey University students throughout the country ensuring equivalent and equitable services are delivered to all students. Te Tira Ahu Pae are contracted to deliver selected services through a Service Level Agreement. Te Tira Ahu Pae are fully accountable to students through the university for the funds they spend, delivering on contracts for service objectives, and milestones through regular reports. Massey University Students Association Federation [MUSAF] previously operated as a federation to 10 independent and autonomous students' associations (four mainstream, three tangata whenua, three Pacific) at Massey University's three campuses in Auckland, Palmerston North and Wellington and also Distance students. The restructure of student associations has been completed paving the way for a new single association – Te Tira Ahu Pae. The 10 former student bodies are represented on the Te Tira Ahu Pae board. Massey University's governing body, the Massey University Council, has one seat allocated for a student representative, elected by the student population. Most often, this Council member occupies a leading office-bearer role with one of the student bodies. tetiraahupae.ac.nz/
Satisfactory Performance Status	A phrase used when, following an Academic Progress evaluation, the student's performance for a specific period is considered to be in line with expectations.	Student Contract	The legally-binding contract entered into between the University and the student.
Schedule of Courses	A listing of the courses prescribed or allowed for a qualification, including any prerequisites, corequisites, and restrictions.	Student Loan Scheme/Study Link	A Government scheme available to students who are New Zealand citizens and to qualifying Permanent Residents living in New Zealand to assist with study costs. Other eligibility criteria apply.
Semester	A prescribed period of the academic year during which a course is taught and completed. A single semester normally comprises 12 weeks of teaching followed by final assessment where appropriate.	Student Management System (SMS)	The University's student records system.
Seminar	An oral presentation group discussion on a specific topic. The discussion may include a contribution from staff. Where the presentation is by a student, the seminar may form part of the internal assessment of a course.	Student Portal	The web-facing end of the University's Student Management System. This is where students can access and manage details for their admission and enrolment, academic record, graduation, examinations, academic progress, finances and their portal messages.
Special Permission Course Application	An application from a student to take a course that would not normally be permissible.	Study Resources	Teaching and Learning materials provided by the University to facilitate student learning, including, for example, the Course Description, Course Guide and other resources.
Special Topic	Special Topic courses allow students (or groups of students) to undertake a specifically tailored course of study in an area not available through existing course offerings and include the following circumstances: anomalous situations; trialling a new course; ongoing exploration of different topics within a discipline; and taking advantage of opportunities as they arise, such as a visiting lecturer.	Subject	An academic discipline, such as economics, anthropology or physics, offered through courses at various levels which are taken at Bachelor (Honours) or Master's level, through a combination of prescribed courses in a specific discipline that comprises most or all of the qualification requirements within the regulations for that qualification. A subject will normally appear printed on the graduation certificate and on the student academic record.
Specialisation	The collective term covering majors, minors, subjects and endorsements in a specific discipline for a qualification.	Subject Courses	Courses within a qualification that are associated with a specialisation – endorsement, subject or major. While not necessarily compulsory, they count towards the specialisation.
Specific Circumstances	A process by which students with Exceptional Personal Circumstances notify the University of their difficulties and the University seeks to make accommodations to support them.	Summer School	A period, which varies in length from a normal semester, from mid-November to mid-February during which courses are offered by the University.
Status of Concern	A phrase used in the Academic Progress Regulations, Policies and Procedures to describe circumstances where a student's performance is below expectations.	Supplementary Assessment	An additional assessment opportunity offered to students who have failed a course. It provides an opportunity for students to demonstrate they have met learning outcomes and obtain a passing grade. The offer is normally limited to situations where the student has made an application for Specific Circumstances which has been accepted. The outcome of supplementary assessment may be a letter grade (A-E), P (pass) or F (fail).
Stream	Stream is Massey University's online learning environment. Most courses are supported or enhanced by this environment, which may include features such as discussion boards, online quizzes, digital study resources and more. Students should be able to access the Stream site for each of their courses at least two weeks before the start of the enrolment period.	Swedish Rounding System	The Swedish Rounding system has been adapted and is applied to the final accumulated mark for a course. Accumulated marks, where the first decimal place is .1 to .4, are rounded down. Where the accumulated mark is .5 to .9, the mark is rounded up.
Student	For the purposes of the Regulations, an applicant becomes a student if the University receives acceptance of any Offer of Enrolment, although they will not be enrolled until the University issues a Confirmation of Enrolment.		
Student Registry	The staff group responsible for the organisation of many university student services, for example, multi-channel customer communications, academic advice, domestic and international admissions, fees and financial support, enrolment, examinations, progression, completion (graduation), academic records, distribution of study materials and academic standing.		
Student Allowance	A payment for living expenses to some full-time students by StudyLink. Entitlement depends on factors including but not limited to a student's age, income and, if applicable, parental income.		

Thesis	A research component of a postgraduate qualification having a value of 0.75 EFTS (90 credits) or more. A thesis may comprise a written document only or a creative work and exegesis.
Threshold	The level of student performance expected by Massey and used in Academic Progress evaluations.
Time Constrained Assessments (TCA)	An open book assessment which has a set date and time to start and finish. Will have a time limit once a student begins but is not supervised electronically.
Transitional Provisions	Provisions applying to students affected by new regulations for a qualification coming into effect partway through their programme of study towards the qualification. Transitional provisions are specific to a qualification and are included in the Qualification Regulations in the Calendar. Transitional provisions have an expiry date after which they cease to apply.
Tuition Fees	Fees that relate to a student's programme (qualification or courses). Tuition fees include fees charged for courses and component fees such as field trips and materials.
Tutorial	Usually a period of instruction where small groups discuss the academic content of a course with a tutor.
Undergraduate	Before graduation, e.g. an undergraduate student is someone who has yet to complete the requirements of a Bachelor's degree.
Waiver to Course Rules	A Personal Variation permitting a student to enrol in a course without meeting the prerequisite, corequisite or other general requirement which would otherwise prevent approval into that course. A waiver does not contribute to the total credit needed for the completion of a qualification.
Withdrew (WD)	A late Withdrawal from a course – after the On-time withdrawal Census Date. Late Withdrawals occur after 17 percent of the course duration has elapsed and prior to 75 percent of the course duration having elapsed.
Withdrew Specific Circumstances (WS)	An alternative to WD where a student is withdrawn from a course after the Census Date but, due to mitigating circumstances, there is no academic penalty
WMAR	The old name for the On-time withdrawal Date. See Census Date.

Accountancy

110209 Intermediate Financial Accounting 15 credits

A detailed study of financial reporting, with particular emphasis on corporate regulatory requirements, both professional and statutory.

110229 Management Accounting 15 credits

A study of cost accumulation and allocation processes used for internal routine reporting to managers for cost management and operational planning and control; internal non-routine reporting to managers for strategic and tactical decisions; inventory valuation and income determination for external reporting. Where appropriate, examples and applications in primary industries and the public sector will also be considered.

110249 Accounting Information Systems 15 credits

A study of systems for the measurement and reporting of information for internal and external decision-making, including the emerging technologies that lend support for this. The accountant's role in the formulation, design, implementation and management of these systems, including risk management and controls will also be addressed.

110279 Auditing 15 credits

An introduction to the basic principles of auditing, including the function of audits and the concepts that govern audit processes and practices.

110289 Taxation 15 credits

An introduction to the basic principles of taxation, the elements of taxation and the concepts that govern tax practice. The course will also provide an awareness of the economic implications of taxation at both local and global levels.

110303 Integrative Accounting 15 credits

An integrated study of accounting sub-disciplines and other related disciplines to create an appreciation of how accounting operates in practice. Emphasis will also be placed on integration of expanded competencies with knowledge-based skills.

110304 Data Analytics for Accounting and Business 15 credits

Develop an ability to use business data and analytics to gain insights that will improve current accounting and business decisions.

110309 Advanced Financial Accounting 15 credits

A study of advanced financial accounting topics and contemporary professional and conceptual issues relevant to financial reporting.

110329 Advanced Management Accounting 15 credits

A study of advanced topics and contemporary issues in management accounting in a range of industry settings, including strategic management and performance management.

110369 Forensic Accounting 15 credits

A study of forensic accounting, fraud auditing and investigation.

110379 Advanced Auditing 15 credits

A study of advanced topics and contemporary issues in auditing.

110380 Estate and Tax Planning 15 credits

Practical issues arising in estate and tax planning for investors and small business in New Zealand.

110389 Advanced Taxation 15 credits

A study of advanced topics and contemporary issues in taxation, including tax policy, international taxation and tax administration.

110701 Accounting Systems 15 credits

Accounting systems and the role of accountants in a systems environment.

110702 Financial Accounting and Reporting 15 credits

A comprehensive study of financial reporting, including current New Zealand GAAP and recognition of revenue, assets and liabilities.

110703 Management Accounting and Decision Making 15 credits

Cost and management accounting in the business environment.

110710 Contemporary Issues in Financial Accounting 30 credits

An in-depth study of selected contemporary financial accounting and external reporting issues through a review of the relevant extant literature.

110711 Advanced Accounting Theory 30 credits

This course is designed for students who wish to continue their search for truth in accounting at an advanced level. They will be introduced to various conceptual issues espoused in the accounting literature such as the historical development of accounting, the relationship between philosophy of science and accounting, and the theoretical foundation of some of the important issues currently facing accounting as a profession.

110717 Research Methods in Accounting 30 credits

This course explores a range of different conceptual approaches to researching accounting issues and examines tools and techniques that are available for research in accounting. As an integral part of the course, students are required to prepare and present a research proposal.

110730 Special Topic I 7.5 credits

An advanced course of study designed to meet the needs of a student at 700-level.

110731 Special Topic II 7.5 credits

An advanced course of study designed to meet the needs of a student at 700-level.

110732 Risk and Technology 7.5 credits

Students will evaluate and respond to the benefits, risks and challenges organisations face arising from existing and emerging technologies, process automation and the use and application of data.

110733 Financial Accounting and Reporting 7.5 credits

This course requires students to apply International Financial Reporting Standards (IFRS), or local equivalents, and regulatory and ethical requirements to account for and report on a diverse range of business transactions and events.

110734 Tax (NZ) 7.5 credits

This course focuses on areas of technical competence, including tax administration and controls, income tax, taxation of structures and transactions, and other taxes and interactions with taxes.

110735 Business Performance 7.5 credits

Students will evaluate quantitative and qualitative data using tools to analyse business performance. They also analyse financial and non financial factors and develop a model that incorporates sensitivity analysis to support business investment decisions, then evaluate funding options to support these investment decisions.

110736 Audit and Risk 7.5 credits

This course develops students' knowledge and skills required for applying professional judgement and professional scepticism in addressing risk in auditing areas where significant professional judgement is required in the context of the audit of general-purpose financial statements.

110737 Integrated Chartered Accounting Practice 7.5 credits

Students will build on and integrate existing technical knowledge, critical thinking and professional skills to provide business advice.

110792 Special Topic 30 credits

110804 Advanced Financial Accounting and Reporting 15 credits

Theory and application of current financial reporting standards in contemporary business.

110805 Advanced Strategic Management Accounting 15 credits

Strategic applications of cost and management accounting tools and techniques.

110806 Auditing and Assurance 15 credits

The role of external auditing and assurance including the application of professional, ethical and technical requirements, and current auditing research issues.

110807 Tax 15 credits

A comprehensive examination of key aspects of New Zealand's tax regime from a domestic and international perspective.

110894 Research Report 60 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

110897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

110898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

110900 PhD Accounting 120 credits**111****Agricultural and Horticulture Systems Management****111900 PhD Agricultural and Horticultural Systems Management 120 credits****112****Agribusiness****112248 Food and Agribusiness Value Chains 15 credits**

The study of the flow of food and agricultural products from the farm to the final consumer. Emphasis on successful value chain management applied to food and agribusiness. The course utilizes field trips to study local value chains.

112301 International Food and Agribusiness Strategies 15 credits

Application of a broad range of business concepts - economic, financial and marketing - to international agri-food business and marketing. Emphasis is placed on international consumers and agri-food exports, including external environment, terms of trade, transportation, packaging, documentation, methods of payment, risk management and negotiation.

112302 Food and Agribusiness Strategies 15 credits

Extensive use of food industry and agribusiness case studies. Emphasis is placed on strategic analysis and decision making applied to New Zealand and international agribusiness

112701 Farm Management 30 credits

An introduction to land based production systems. Particular emphasis is placed on the unique characteristics of farm/horticulture businesses and the tools and frameworks by which to assess them. This course is designed for students who do not have prior tertiary training in farm management and is relevant for those with farming experience.

112702 International Agri-Food Marketing Strategies 15 credits

An advanced study of international agri-food business and marketing. Emphasis is placed on international consumers and agri-food exports, including external environment, terms of trade, transportation, packaging, documentation, methods of payment, risk management, intercultural communication and negotiation.

112743 Cooperative Governance and Management 15 credits

An advanced study of the theory and practices of cooperatives and mutuals. Emphasis is placed on the governance and management of cooperatives and their subsequent performance in meeting the demands placed on them through shareholder/supplier or shareholder/buyer complexities. The competitiveness of cooperatives in a global environment is explored through appropriate case studies.

112747 International Food and Agribusiness Strategies 15 credits

Contemporary New Zealand and international agribusiness issues and strategies. Emphasis is placed on the dynamics of agribusiness strategies, structures and institutions in the context of agricultural trade and environmental issues, food and fibre markets and supply chains. Case studies are used extensively throughout the course.

112896 Professional Practice 60 credits

Candidates will undertake professional practice within the subject area in which the Master of Management is being completed. Professional Practice

may be conducted either individually or in groups and assessment of the outcome of the investigation may be in a variety of ways including written and oral presentations and case studies.

112900 PhD Agribusiness 120 credits**114****Human Resource Management****114240 Organisational Behaviour 15 credits**

A theoretical and practical examination of the behaviour of people in the work environment. Students develop a basic understanding of individual behaviour and team dynamics, exploring issues of motivation, communication, leadership, decision making, power and organisational change.

114241 Principles of Human Resources Management 15 credits

An introduction to human resources management (HRM) theories and practices in national and international contexts.

114254 Employment Relations 15 credits

An exploration of the theoretical frameworks used to analyse employment relations, including institutional processes and practices crucial to the workings of contemporary employment relations in New Zealand.

114321 Managing Talent & Performance 15 credits

An examination of the theories and principles of strategic human resource management and the application of those to acquiring, developing and managing talent for organisational success.

114330 Diversity, Equity, and Inclusion in the Workplace 15 credits

An examination of issues, opportunities, and responses to managing diversity, equity, and inclusion in the workplace.

114331 Contemporary Work and HRM 15 credits

An exploration of contemporary trends and issues relating to work, employment, human resource management, and employment relations in national (NZ) and international contexts.

114332 Decent Work 15 credits

An exploration of the principles, practices and issues surrounding decent work in contemporary work organisations.

114343 Healthy Workplaces 15 credits

An exploration of the principles and practices of healthy work and workplaces, focusing on the identification and management of psychosocial hazards and risks in a New Zealand context.

114396 Strategic Human Resource Management 15 credits

An exploration of human resources management as a strategy to achieve organisational goals. Particular emphasis is given to organisations' responses to trends in both their internal and external environments.

114702 Human Resource Management and Workplace Relations 30 credits

This course introduces the area of Human Resource Management and Workplace Relations. Specifically, the focus of the course is on the principles and practices associated with organisational behaviour, employment relations, human resources management and development.

114709 Managing the Employment Relationship 30 credits

A general understanding of Employment Relations and Human Resource Management with an emphasis on contemporary theory and practice. This course provides the opportunity for critical reflection and analysis of theories and practices relating to managing the employment relationship in any organisation.

114722 Advanced Organisational Behaviour 30 credits

This course is an examination of applied psychology and sociology in the context of organisations. The content is based on a foundation of theory which students are expected to critically analyse. The course is designed so that students apply the theory to modern organisational situations.

114735 Competitive Advantage and HRM Strategy 30 credits

An examination of how strategic human resource management theory and practice contributes to competitive advantage in business enterprises. Particular reference is made to the environmental factors that influence talent management in New Zealand and globally.

114761 International Human Resource Management 30 credits

An examination of the management of employees from an international perspective, including comparative HRM, the practice of HRM in multinational firm, and developments in the emerging field of Strategic International Human Resource Management (SIHRM).

114900 PhD Human Resource Management 120 credits**115****Management****115013 Foundation Management 15 credits**

An introduction to the key principles and practices of management and the business environment with a particular focus on business in New Zealand.

Economics**115014 Foundation Economics 15 credits**

An introduction to fundamental concepts in Economics.

Finance**115015 Foundation Financial Literacy 15 credits**

An introduction to key financial literacy concepts and the application of those concepts to a wide variety of situations including the workplace and business environments.

English Language Studies**115016 Academic English 15 credits**

Academic English provides an opportunity for students to explore, respond to, analyse and produce a range of academic and non-academic texts. Through reading, viewing, writing, listening, speaking, and using information and communication technologies (ICT), the course develops students' confidence and competence in using the English language; their understanding of how different text-types are constructed for academic purposes and audiences; and their competence in key academic literacies required for undergraduate studies.

Information Technology**115017 Information Technology for Academic Studies 15 credits**

In this course, students extend their competence with technology applications relevant to their academic studies. Students will particularly develop their capacity to identify problems that may benefit from a technological solution and identify which solution would be best in the specific context.

English Language Studies**115018 Introduction to Academic Communications 15 credits**

This course enables students to develop the oral and written skills that are required for tertiary level studies. It includes the skills and knowledge required to efficiently gather, organise and present information. Students will learn effective strategies to research and analyse information from a variety of sources and present that information in written and oral formats.

Sociology**115019 Socio-cultural context of Aotearoa New Zealand 15 credits**

This course provides students with an introduction to the socio-cultural context of Aotearoa New Zealand as a nation and how this impacts on people, organisations and businesses. It explores multiple perspectives and lenses in approaching questions of culture and society (particularly te ao Māori and te ao Pākehā). The course explores the principles and application of the Treaty of Waitangi/Te Tiriti o Waitangi to society, business and organisational contexts.

Accountancy**115020 Accounting Fundamentals 15 credits**

This course introduces students to accounting concepts and practices including the recording of business events in an accounting worksheet and the preparation of primary accounting reports.

Economics**115021 Economics Fundamentals 15 credits**

This course provides an introduction to the vital role of economics in the functioning and wellbeing of societies. This course will equip students with knowledge of the basic principles of microeconomics and macroeconomics.

Management**115023 Management Fundamentals 15 credits**

This course provides students with an understanding of the role of management within various types of businesses in Aotearoa New Zealand and the wider trading community. It provides an overview of the influencing factors to be considered by managers.

Business**115030 Foundation Business Studies 15 credits**

An introduction to fundamental principles and theories in business studies. Additionally, the course aims to equip students with the ability to apply key foundation finance, marketing, management, economic and accounting concepts to practical scenarios, fostering their ability to analyse, interpret, and propose solutions in various contexts.

115109 Introduction to Business Analytics 15 credits

An introduction to internal and external organisational data, mechanisms to obtain, analyse and interpret that data, and performance indicators used to define and assess the operational and financial viability of a business.

115111 Communication Theory and Practice 15 credits

This course identifies key theories and strategies to enhance written, oral, visual, and interpersonal communication for different purposes and audiences. Students explore, discuss, critique, and practise communication for a business and global environment and recognise how world views, culture, and contexts shape communication.

115112 Accounting for Business 15 credits

An introduction to how accounting information is used for planning, monitoring and evaluating organisational performance.

Economics**115113 Economics for Business 15 credits**

The course examines the nature of the contemporary economic environment in which businesses operate, and considers how economics can aid in business decision-making.

Finance**115114 Finance Fundamentals 15 credits**

This course introduces analytical techniques for evaluating personal and business investment and financing decisions, including coverage of the context and environment in which these decisions are made.

Management**115115 Management in Context 15 credits**

This course provides students with a theoretical and practical understanding of management and organisations in the contemporary context.

Marketing**115116 Introduction to Marketing 15 credits**

The course provides an understanding of the core concepts and practices of marketing.

Business

115120 Personal Development and Competence 15 credits

This course develops personal attributes associated with professions, careers and employment. It develops student's personal awareness, self-reflection and evaluation competences through the lens of 'employability' and career orientation. This course is designed to take students through a process of self-assessment and career exploration, and to develop students' self-awareness and personal PR narrative. They will learn to discover how to connect their skills, interests and values to a wide range of possible roles, to build relationships, and present themselves in the best possible manner to potential employers.

115121 Skills and Communication for Academic Success 15 credits

This course develops many of the thinking, writing and oral presentation skills that students need for success in academic studies and in employment. The course develops competence in the skills essential to writing for assessment, including summarising texts, utilising appropriate sources and evidence, critiquing arguments, taking notes, and referencing. At the same time, students will be introduced to practices and approaches that contribute to successful academic and workplace environments, including: writing summaries, analysing problems, and using reflection as a tool for professional development. They will also learn how to deliver a persuasive oral presentation.

115122 Skills for Numerical Analysis 15 credits

The ability to analyse, interpret and evaluate data is integral to student success. Therefore, this course is designed to develop students the knowledge, skills and confidence to apply mathematical and statistical concepts to their numerically-based academic subjects, as well as to their future professional careers. The course will use active learning within an interactive workshop structure to teach students basic numerical problem solving, mathematical notation, summary statistics techniques, and analysis and interpretation with regard to practical problems.

115123 Effective Communication 15 credits

The course is based on a personalised evaluation of each student's strengths and competences in relation to English language, with each student receiving instruction in English grammar, vocabulary, and writing targeted at developing and extending them. Students will engage in topic-based workshops covering grammar, spoken English, listening, comprehension and writing tasks. The course uses self-reflection journals to extend students through self-reflection. These activities are designed to ensure that students of differing abilities achieve at least the equivalent of a minimum of IELTS 6.0 on successful completion of the course.

Business Law

115211 Business Law 15 credits

The course will encompass an introduction to the key elements of the law within which business operates in New Zealand from a practical perspective.

Management

115212 Fundamentals of Leadership and Teamwork 15 credits

This course provides an introduction to the theory and practice of leadership and teamwork.

Business

115213 Quantitative Methods for Business 15 credits

A foundation to develop students' quantitative and analytical skills, providing knowledge of how and when to use those skills in real-life business decisions in public and private sector organisations. Providing a mathematical foundation for univariate and multivariate statistical analysis, it introduces the analysis of data to assist in business decision-making.

115230 Pakihi Māori 15 credits

Examines the Māori economy, Māori businesses, and the significance of Māori perspectives and values in organisations in Aotearoa New Zealand. Students will develop their understanding of the importance of cultural competencies in diverse organisations.

115231 Business Preparation and Simulation 30 credits

Students will develop personal and professional skillsets needed to engage with professional workplaces. Simulation and scenario-based learning will

be used to facilitate experiential learning and training to enable students to develop their capabilities in linking theory to practical application.

115232 Commerce and Sustainability in Practice 30 credits

Students will undertake specific real-world market and opportunity analyses, incorporating a business sustainability challenge that connects to the UN's Sustainable Development Goals.

115277 Special Topic 15 credits

115319 Special Topic 15 credits

115321 Academic Language for Postgraduate Study 15 credits

The course provides students from a range of educational backgrounds/ cultures and language settings with the academic language skills needed for final year undergraduate and postgraduate study. It equips students whose first language is not English with the necessary skills to successfully engage in group work, communicate effectively in collaborations with others, and gain confidence in building productive relationships to achieve their learning outcomes.

115322 Critical and Contextual Thinking Skills for Postgraduate Study 15 credits

This course aims to enable students to develop the critical and analytical thinking skills essential for studying at the final year of undergraduate and at postgraduate level. Students will learn to critically engage with academic reading material to examine and evaluate the argument of others. Students will learn to identify the difference between critical analysis and description and be able to better formulate an argument effectively in their own writing. Students will participate in interactive workshops to develop confidence in their ability to apply critical thinking strategies. Students will analyse differing viewpoints, challenge the views of others and clearly communicate their own position.

115323 Advanced Communication for Postgraduate Study 15 credits

This course takes an andragogical approach to develop students from a range of educational backgrounds and cultures such that they can adeptly navigate differing contexts demanding diverse language competencies. The skills developed extend the ability and reach of students through the use of real-world business contexts and contexts requiring differing genres and lexicons. It equips students whose first language is not English with the necessary skills to transition successfully between different contexts as effective communicators.

115324 Intercultural Competence 15 credits

This course will provide students with an understanding of how to interact, participate and communicate effectively in Aotearoa New Zealand. Emphasis will be placed on providing students with opportunities to understand their own culture, develop meaningful and empathic understandings of other cultures (with reference to Aotearoa New Zealand) and how they relate to each other. This course will also develop knowledge, understanding and intercultural communication skills that will enable students to participate effectively in a range of personal and professional contexts.

115325 Advanced Data Analysis 15 credits

Emphasis is placed on advanced data analysis appropriate for large and complex datasets with many variables, using real-world business data, developing an in-depth understanding of the methods to conduct, interpret and communicate the results of multivariate analyses with practical applications. This course integrates business analytical tools with an understanding of concepts from quantitative methods across disciplines.

115326 Data Visualisation 15 credits

This is a practical approach to data visualisation and development of business dashboards, which covers the underlying theory of human perception and cognition and what constitutes effective graphical communication. The foundational theories are combined with a strong applied approach using industry-based software.

115327 Critical Issues in Business Analytics 15 credits

A collaborative capstone that requires students to apply business analytics techniques to develop business opportunities, while considering the ethical, security, privacy and legality issues of data acquisition and processing.

115340 Sustainable Business Operations 15 credits

A study of integrated business operations with sustainability as an integrating theme. Interdisciplinary perspectives will highlight the interconnections of

environmental, social, cultural, and ethical concerns in business operations. Contemporary challenges will be examined through the lens of a range of organisations and business sectors.

115341 Business Client Project 30 credits

Students will work in groups to address a client brief, applying theoretical and conceptual knowledge, research skills, and problem-solving skills to an identified dilemma or challenge, in a consultancy style.

115377 Special Topic 15 credits

115388 Internship in Business 30 credits

Provides an individual practical experience in business, linking theory to practice. It consists of a period of supervised study and practical experience in an area related to individual disciplinary and professional interests.

Management

115389 Business Internship 15 credits

This course provides an individual practical experience in business in which students deliver a set project in a business, linking theory to practice.

Business

115709 Applied Personal Leadership 15 credits

An advanced-level study of leadership theory and practice. The course provides a particular focus on preparing students for senior leadership roles.

115725 Leadership and People 15 credits

A study of organisational behaviour theory and practice in the contemporary environment. The course provides a particular focus on the fundamental knowledge and skills involved in management, leadership and teamwork.

115726 Marketing 15 credits

A study of the marketing function in business, including a range of marketing tools and techniques and their application to marketing situations.

115728 Contemporary Strategy 15 credits

This course examines the purpose, processes and practices of strategic planning and execution in organisations. Contemporary strategic challenges are examined.

115732 Operations and Logistics 15 credits

This course examines the operations management function and its links to organisational strategic objectives. This course explores how organisations can leverage their operational capabilities to create value and achieve competitive advantage.

115735 Applied Business Research Methods 15 credits

This course provides students with an applied understanding of the role and techniques of business research.

115758 Interpersonal Communication at Work 15 credits

An introduction to the theory and practice of interpersonal communication.

115759 Current Issues in Business 15 credits

Comprehensive examination of contemporary business issues providing a contextual platform for further study of business specialisations.

115764 Leadership and Teamwork 15 credits

Applied and experiential study of leading and working in teams, and the interpersonal communication skills required to be successful.

115765 Managing People and Organisations 15 credits

Applied study of the behaviour and management of people and organisations in the contemporary business environment.

115766 Managing Financial Resources 15 credits

The study of corporate finance and accounting functions in business, including the analysis, sourcing, and use of funds in the pursuit of organisational goals.

115768 Marketing Analysis and Strategy 15 credits

A study of marketing strategies, practices and analytical methods, including a range of marketing tools, techniques and research methods.

115769 Business Economics 15 credits

Study of core micro- and macro-economic principles and how these can be used in a business environment to enable effective decision making.

115774 Operations and Supply Chain Management 15 credits

This course examines operations management functions and methods in pursuit of sustainable organisational effectiveness.

Business Law

115775 Business Law for New Zealand and International Contexts 15 credits

A study of the business law systems and rules applicable in NZ and selected international jurisdictions.

Business

115778 Special Topic 15 credits

115784 Balancing Innovation and Risk Management 15 credits

An applied and experiential study of the principles and practices that enable leaders to achieve the balance of innovation and risk management that enables resilient, sustainable businesses.

115786 Special Topic 30 credits

115790 Special Topic 30 credits

115791 Digital Transformation 15 credits

Applied study of the use of digital technology to solve business problems and exploit new business opportunities.

115792 Business Sustainability 15 credits

This course examines business practices that make organisations sustainable and resilient, with a particular focus on how to balance continuous innovation with good governance and risk management.

115793 Global Business 15 credits

A study of global trade practices and marketing strategies, including a range of trading tools, systems and techniques and their application to international marketing situations.

115796 Designing Globally Competitive Products and Services 15 credits

An applied and experiential study of innovative products and service design to achieve differential advantages for trading in global markets.

115799 Digital Design and Disruption 15 credits

Applied and experiential study of how digital technologies have disrupted various industries and how businesses can design digitally based innovations to achieve competitive advantage.

Statistics

115801 Applied Analytics Project 60 credits

Under the supervision of academic staff, students work with an external organisation on the application of computer-based analytics tools to a project in the domain of business analytics, healthcare system analytics, or public policy analytics. Special attention is given to privacy and ethical considerations, and to the (visual) communication of results.

115802 Applied Analytics Project Part 1 30 credits

Under the supervision of academic staff, students work with an external organisation on the application of computer-based analytics tools to a project in the domain of business analytics, healthcare system analytics, or public policy analytics. Special attention is given to privacy and ethical considerations, and to the (visual) communication of results.

115803 Applied Analytics Project Part 2 30 credits

Under the supervision of academic staff, students work with an external organisation on the application of computer-based analytics tools to a project in the domain of business analytics, healthcare system analytics, or public policy analytics. Special attention is given to privacy and ethical considerations, and to the (visual) communication of results.

Business

115810 Strategic Business in the Global Market 30 credits

This course includes guided field visits to international businesses. Students integrate and apply knowledge from diverse business functions to enhance their understanding of business models and value creation in global business.

115811 Strategic Complexities in International Business 30 credits

This course includes a self-initiated study of international businesses. Students integrate and apply knowledge from diverse business functions to enhance their understanding of business models and value creation in global business.

115812 Action Learning Project 30 credits

Supervised team-based project focused on deliverable improvement of practices in an existing business or development of a new business opportunity, drawing on knowledge from multiple business disciplines.

115815 Special Topic 30 credits

An advanced course of study designed to meet the needs of a student at 800-level.

115816 Special Topic 60 credits

An advanced course of study designed to meet the needs of a student at 800-level.

115821 Strategic Management and International Business 30 credits

This course requires students to integrate and apply knowledge from diverse business functions to enhance understanding of business models and value creation in global business.

115822 Applied Business Project 30 credits

Independent business project on a topic approved by the EMBA Director, directed towards the improvement of business practice.

115891 Thesis 90-Credit Part 1 45 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a thesis for examination.

115892 Thesis 90-Credit Part 2 45 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a thesis for examination.

115894 Research Report 60-Credit Part 1 30 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

115895 Research Report 60-Credit Part 2 30 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

115897 Thesis 120-Credit Part 1 60 credits

115898 Thesis 120-Credit Part 2 60 credits

115901 Introduction to Applied Doctoral Research 30 credits

The course introduces doctoral-level research of an applied nature to students undertaking postgraduate research studies and who are working towards confirmation of candidature.

115902 Understanding Applied Research Design and Research Methodologies 30 credits

Students will critically engage with research design and methodologies relevant to the social sciences. They will consider quantitative and qualitative perspectives and will ethically explore relevant evidence or data-gathering methods and analysis.

115903 Writing a Literature Review 30 credits

Students will initially be introduced to the purpose and structure of a literature review and its role in the identification and specification of a research problem. Argumentative and critical writing are covered.

115910 The Research Proposal 30 credits

Students will be introduced to the components and requirements of a research proposal that will support progression into Part B of the DBA and the undertaking of their DBA research

115999 Thesis 120 credits

117

Agriculture and Horticulture

117006 Animal Production and Health 15 credits

An overview of the sheep, dairy and beef cattle industries in New Zealand, and an introduction to the deer and intensive livestock industries. Topics covered include: principles of reproduction, genetics, nutrition, welfare and health of farmed livestock.

117106 Animal Production 15 credits

Development of production outputs of farmed animals and meat production. Students study beef cattle production, sheep production and dairy production. Topics covered in beef and sheep production include nutrition, reproduction, genetic improvement, wool and the wool industry. Topics covered in dairy production include nutrition, reproduction, genetic improvement, principles of milk production, milk harvesting and quality.

Animal Science

117107 Introduction to Animal Behaviour and Welfare 15 credits

An introduction to common ethical frameworks for animal use with a focus on domestic animal species. Principles of the behaviour and welfare of domestic animal species. Theory of safe and effective animal handling.

Agriculture and Horticulture

117153 Introduction to Animal Production in New Zealand 15 credits

An introduction to animals and animal science in New Zealand, covering a broad range of animal species and incorporating the principles of nutrition, reproduction, lactation, genetics and growth. A brief overview of New Zealand's livestock production systems and consideration of animal ethics, welfare and biosecurity issues.

Animal Science

117155 Introduction to Animal Science 15 credits

An introduction to animals and animal science, covering a range of animal species and incorporating the principles of nutrition, reproduction, lactation, genetics and growth. A overview of New Zealand's livestock production systems and consideration of animal ethics, welfare and biosecurity issues.

117201 Livestock Production Science 15 credits

Developing understanding of the important drivers underpinning New Zealand's livestock and companion animal industries and how these can be altered to achieve the desired outcomes. Knowledge will be gained on the major animal welfare and environmental issues facing New Zealand agriculture and how these might be mitigated against.

117202 Animal Science 15 credits

An exploration of scientific principles underpinning animal husbandry practices. Emphasis will be on examining biological systems in relevant animals, how they are purposely or inadvertently manipulated, and the impact of these manipulations on production, welfare, and the environment.

117224 Animal Feed Science and Technology 15 credits

An examination of feedstuffs and their physical and chemical characteristics and nutritive values. The exploration, through appropriate examples of the different feed preservation processes and feed processing technology employed in animal production.

117225 Animal Production through to Carcass Classification 15 credits

Current and future practices for meat production from farm to carcasses leaving the slaughter floor. Topics include animal growth and development, genetics and breeding, on-farm opportunities to influence carcass and meat quality, pre-slaughter handling of meat-producing animals, slaughter and carcass dressing procedures, carcass classification, animal welfare, occupational safety and health, and factory farming.

117226 Performance Animal Nutrition 15 credits

Develop understanding of the important drivers underpinning the relationship between nutrition and performance, and how these can be maximized to

achieve the desired performance outcomes. Knowledge will be gained on the major animal nutrition and performance issues facing New Zealand working and sport animals.

117231 Animal Health and Welfare 15 credits

Provide an understanding of the major diseases and welfare considerations/ issues of domestic animals in New Zealand and the relevance for animal management. The role of human behaviour in the productivity, function and welfare of animals. The importance of biosecurity to New Zealand and its relationship to human and animal health. Review the ethical frameworks associated with the ownership and use of animals.

117243 Animal Reproduction and Lactation in Livestock 15 credits

A study of reproductive and lactational physiology in livestock with emphasis on identifying possible means of altering those processes in production animals. The course will include exploration of the anatomy and histology of the gonads, placenta and mammary gland.

117245 Principles of Animal Breeding and Genetics 15 credits

An introduction of the basic principles of using bioinformatics to find genes. The principles to enable the calculation of genetic parameters, such as heritability. An introduction to the prediction of breeding values and the calculation of selection indices and genomic selection.

117301 Animal Biosecurity and Health 15 credits

The importance of biosecurity to New Zealand and its relationship to human and animal health, and farm productivity will be highlighted. Identification, prevention and treatment of selected companion and production animal diseases in New Zealand. Knowledge of biosecurity will be used to develop biosecurity plans for animals with recent biosecurity failures used to illustrate concepts.

117302 Monogastric Animal Nutrition 15 credits

The principles of monogastric nutrition are developed and applied to improve livestock productivity. An in-depth coverage of the digestive and absorptive processes and factors which affect them. The utilisation of absorbed nutrients is addressed, particularly in relation to the determination of nutrient requirements. Techniques central to the study of nutrition are emphasised. The science of nutrition is related back to the practice of feeding animals to optimise productivity and wellbeing. Students will become familiar with nutrients partitioning computer models used in a practical context.

117303 Ruminant Animal Nutrition 15 credits

Advanced principles of animal nutrition as related to ruminant livestock. An in-depth coverage of the processes of feed intake, digestion, absorption and metabolism, and the factors affecting them. The determination of the nutritive value of feedstuffs for ruminant, with particular emphasis on forages. Gain in-depth knowledge of schemes for estimating the ruminant animal requirements for energy, protein and minerals and the principles of ration formulation. Design practical feeding regimes and their implementation.

117331 Dilemmas in Animal Welfare 15 credits

Exploration of animal welfare as one of the various factors that influence our use of, and interactions with, animals. Integration of legal, scientific, ethical and practical considerations for making real-world improvements in animal welfare. Emphasis on student interaction with various stakeholders to define real-world animal welfare problems and explore solutions.

117332 Animal Welfare Science 15 credits

Understanding animal welfare is important to optimise animals' health and productivity, to improve their quality of life and to safeguard the reputation of New Zealand's animal production industries. This course explores how measurements of animal behaviour and physiology can be used to understand mental experiences such as pain, breathlessness, thirst, nausea and fear and thus the welfare states of domestic animals. These concepts will be applied to enable students to construct robust strategies for practical assessment of animal welfare in various production systems.

117343 Animal Reproduction and Lactational Physiology 15 credits

An in-depth study of aspects of the physiology of reproduction and lactation in monogastric and ruminant animals. The emphasis is placed on applying the understanding of the physiological processes to practical animal systems and will involve practical classes in which technologies related to animal reproduction and milk production are demonstrated. Students will advance their skills in reading and evaluating scientific literature, develop skills in analysing problems and in constructing a logical argument.

117344 Animal Growth and Meat Production 15 credits

Patterns of growth and development of farm animals will be described with emphasis on those characteristics of growth with economic implications for meat production, such as the rate, efficiency and composition of growth. Structural and functional aspects of muscle, bone and fat as they relate to animal well-being as well as carcass and meat quality will be considered. In describing factors that can affect animal growth, carcass composition and meat quality, particular attention will be given to on-farm factors.

117345 Genetics for Livestock Improvement 15 credits

The relative influence of genetic and environmental factors on quantitative traits. Methods of calculating breeding values or indices to exploit genetic variation in quantitative traits. The use of computers to utilise pedigree and performance records. Selection for disease resistance, the use of new reproductive technologies to enhance genetic gain and the potential importance of molecular genetics in livestock improvement. Maternal influences and methods of selecting for maternal components. Crossbreeding and inbreeding as selection tools.

117348 Animal Metabolism 15 credits

A study of animal metabolism at the whole-body level. The emphasis will be on integrative aspects of metabolism, including exploring nutrient and energy flow from the food to organs, tissues and products. Mechanisms controlling body metabolism in general and the intrinsic and extrinsic factors affecting them will be emphasised.

117361 Companion Animal Science 15 credits

This course is an integration of the scientific and theoretical aspects of companion animal science. The main topics covered include the nutrition, behaviour, welfare, breeding and genetics of dogs, cats and horses. The emphasis will be placed on the scientific foundation for the promotion of animal welfare and longevity.

117371 Animal Production 15 credits

The impacts of breeding, nutrition, reproduction and lactation in New Zealand animal production. A modularised course requiring students to select three topics from dairy cattle production, animal, fish & insect protein production, sheep production, pig & poultry production, beef cattle production and the working dog.

117381 Solving Problems in Animal Production 15 credits

The critical evaluation of specific aspects of breeding, nutrition, reproduction, lactation, meat/growth and health on animal production and the design and development of improved production systems, focusing on the underlying science.

117709 Biometrics for the Animal and Nutritional Sciences 15 credits

Study in applied statistics with emphasis on animal and nutritional sciences. Introduction to and extensive use of statistical packages, regression and multiple regressions analysis, analysis of variance of standard experimental designs, covariance analysis and general linear models

117710 Reproduction, Lactation and Fertility 15 credits

An advanced course in the physiology and application of reproduction, lactation and fertility in domestic animal species

117711 Nutrition, Growth and Meat Science 15 credits

An advanced course in the physiology and application of nutrition, growth and meat science in domestic animal species

117765 Genetics and Breeding 15 credits

An advanced course in animal breeding and genetics designed to introduce aspects of breeding value estimation, index selection and maternal effects across herd/flock genetic evaluations, genotype by an environment interaction, major genes, applied molecular genetics, inbreeding, crossbreeding, physiological genetics and genomic selection.

117768 Metabolism and Endocrinology 15 credits

An advanced course in the metabolism of carbohydrate, fat and protein in ruminants and/or non-ruminants. Endocrine control and nutrient flows in various physiological states.

117783 Advanced Studies in Animal Science 15 credits

Advanced studies of major physiological systems and functions in animals and their relevance to animal science. These studies can be undertaken in any of the following topics: nutrition, growth, breeding, genetics, animal welfare and equine science.

117784 Advanced Studies in Animal Science 30 credits

Advanced studies of major physiological systems and functions in animals and their relevance to animal science. These studies can be undertaken in any of the following topics: nutrition, growth, breeding, genetics, animal welfare and equine science.

117785 Advanced Studies in Animal Production 15 credits

Advanced studies of major physiological systems and functions in animals and their relevance to animal production. These studies can be undertaken in any of the following topics: nutrition, growth, breeding, genetics, animal welfare and equine science.

117786 Advanced Studies in Animal Production 30 credits

Advanced studies of major physiological systems and functions in animals and their relevance to animal production. These studies can be undertaken in any of the following topics: nutrition, growth, breeding, genetics, animal welfare and equine science.

117799 Research Report 30 credits**117872 Thesis 90 Credit Part 2 45 credits**

A supervised and guided independent study resulting in a published work.

117873 Thesis 90 Credit Part 1 (30 credits) 30 credits

A supervised and guided independent study resulting in a published work.

117874 Thesis 90 Credit Part 2 (60 credits) 60 credits

A supervised and guided independent study resulting in a published work.

117875 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

117887 Research Report 60 credits**117897 Thesis 120 Credit Part 1 60 credits**

A supervised and guided independent study resulting in a published work.

117898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

117899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

117900 PhD Animal Science 120 credits

118

Veterinary Science**118705 Decision Making with Animal Health Data 15 credits**

This course covers topics related to utilising health and economic data to make decisions around the control of animal health. The focus is on applying the principles of production monitoring, information management and decision-making processes at farm level in a practical way. A broader context is provided of the structure and operation of veterinary services, industry-level process control, and the importance of animal health economics.

118706 Spatial and Temporal Analysis of Epidemiologic Data 15 credits

This course provides students with the basic skills necessary to undertake the analysis of epidemiologic data that is clustered in space and time. Throughout the course students will work with data collected via epidemiologic studies or as part of surveillance and will learn how to visualise spatial and temporal patterns, describe and quantify those spatial and temporal patterns and explain the observed patterns.

118708 Current Topics in Epidemiological Methods and Data Analysis 15 credits

An in-depth view of topics in epidemiology. Students will focus on issues related to the design and management of observational studies and learn one or more multivariable modelling approach for non-linear data.

118710 Advanced Veterinary Practice I 60 credits

An advanced course in a specified discipline of veterinary practice that includes supervised investigation, interpretation, diagnosis and management

of cases. Students will develop a thorough understanding of knowledge within the discipline; the ability to source and critically evaluate existing knowledge to make evidence-based clinical decisions; and the ability to integrate theory with critical reflection of practice.

118711 Advanced Veterinary Practice II 60 credits

An advanced course in a selected discipline of veterinary practice that includes supervised investigation, interpretation, diagnosis and management of complex cases. Students will develop an advanced understanding of knowledge within the discipline; apply advanced diagnostic and technical skills; and critically reflect on their own practice and identify knowledge gaps.

118712 Advanced Studies in Veterinary Practice I 30 credits

An advanced course in a specified discipline of veterinary practice that includes supervised investigation, diagnosis and management of cases within the discipline. Students will develop a thorough knowledge of principles and practice in the relevant discipline, including the ability to make evidence-based clinical decisions.

118713 Advanced Studies in Veterinary Practice II 30 credits

An advanced course in a selected discipline of veterinary practice that includes supervised investigation, diagnosis and management of complex cases. Students will source and critically evaluate existing knowledge to make evidence-based clinical decisions; will integrate theory with critical reflection of practice; and will apply and synthesise advanced knowledge to evaluate and manage complex clinical cases.

118716 Analysis of Epidemiologic Data 30 credits

This course provides students with the basic skills necessary to undertake analysis of data in the health and biosecurity context. Throughout the course students will work with data collected during epidemiological studies (complete with missing data) and will learn how to interpret results in the light of bias, confounding, effect modification and model error.

118726 Veterinary Public Health 60 credits

The application of veterinary science to the promotion of human health. Interrelations between agricultural practices and the environment significant to animal and human health. Food safety including undesirable residues and the HACCP concept. Food-borne diseases, zoonoses and emergence of diseases from animal reservoirs. The application of epidemiological principles to the investigation, prevention and control of diseases.

118751 Canine and Feline Gastroenterology 15 credits

The principles of gastroenterology of dogs and cats for veterinary graduates. Pathophysiology, diagnosis and management of diseases of the alimentary system.

118752 Canine and Feline Endocrinology 15 credits

The principles of endocrinology of dogs and cats for veterinary graduates. Pathophysiology, diagnosis and management of diseases of the endocrine glands.

118753 Canine and Feline Oncology 15 credits

The principles of oncology of dogs and cats for veterinary graduates. Pathophysiology, diagnosis and management of neoplastic disease.

118754 Diagnostic Imaging for Small Animal Veterinarians 15 credits

The principles of diagnostic imaging in small animal practice for veterinary graduates. Principles of radiography and other imaging modalities. Radiologic interpretation of all body systems, primarily of dogs and cats, and integration with case management.

118755 Clinical Pathology in Small Animal Practice 15 credits

The principles of clinical pathology in dogs and cats for veterinary graduates. It includes the indications, application and interpretation of haematological, biochemical, urine, cytological and special testing of dogs and cats.

118756 Canine and Feline Neurology 15 credits

The principles of neurology in dogs and cats for veterinary graduates. Pathophysiology, diagnosis and management of diseases of the nervous system.

118757 Cardiorespiratory Medicine for Small Animal Veterinarians 15 credits

The principles and practice of cardiorespiratory medicine in dogs and cats for veterinary graduates. Pathophysiology, diagnosis and management of cardiac and respiratory disease.

118758 Avian Medicine 15 credits

The principles and practice of avian medicine in companion birds and aviary collections, for veterinarians. Pathophysiology, diagnosis and management of diseases of birds.

118759 Ophthalmology in Small Animal Practice 15 credits

The principles of ophthalmology in dogs and cats for veterinary graduates. Pathophysiology, diagnosis and management of diseases of the eye.

118761 Canine and Feline Emergency Medicine 15 credits

The principles and practice of emergency medicine in dogs and cats for veterinarians. Pathophysiology, diagnosis and management of conditions seen in emergency practice.

118762 Dermatology for Small Animal Veterinarians 15 credits

The principles of dermatology in dogs and cats for veterinarians. Pathophysiology, diagnosis and management of skin diseases.

118763 Canine and Feline Orthopedic Surgery 15 credits

The principles and practice of orthopaedic surgery in dogs and cats for veterinarians. Pathophysiology, diagnosis and management of orthopaedic diseases.

118764 Canine and Feline Soft Tissue Surgery 15 credits

The principles and practice of soft tissue surgery in dogs and cats for veterinarians. Pathophysiology, diagnosis and management of soft tissue diseases.

118771 Advances in Ruminant Nutrition for Veterinarians 15 credits

An advanced course on ruminant nutrition and feeding practices for veterinarians. Principles of microbial digestion in the rumen, absorption and utilisation of nutrients. Practical nutrition for enhancement of animals' performance and health, including critical study of the evaluation of feeds, feed intakes and nutrient requirements. Practical assessments of animal and feed resources; ration formulation. Current developments in ruminant feeding technologies, including genetic modification of feeds and rumen flora.

118772 Calf Medicine, Health and Management 15 credits

An advanced course on specific aspects of calf rearing, health management and medicine for veterinarians. A critical study of the systems and environments utilised in calf rearing, nutrient and health requirements with respect to disease prevention, herd biosecurity, health, welfare and productivity.

118775 Advanced Mastitis Management for the Production Animal Veterinarian 15 credits

An advanced course on mastitis for production animal veterinarians. This course will provide in-depth study of mastitis causing agents and their treatment and control within the herd and at an individual level. It will address the epidemiology of disease, mastitis prevention, herd biosecurity, herd/animal health, welfare and productivity.

118776 Lameness Investigation and Control for Cattle Veterinarians 15 credits

An advanced course on cattle lameness for veterinarians. This course will provide in-depth study of lameness diagnosis, treatment and control within the herd. It will address the epidemiology of disease, lameness prevention, herd biosecurity, welfare and productivity.

118777 Veterinary Clinical Reproduction and Fertility 15 credits

An advanced course on clinical reproduction for veterinarians. Comparative veterinary reproductive anatomy, physiology, and technology across a range of species. In-depth study of reproductive management in a nominated elective species. Use of scientific literature to inform decision making on reproductive issues.

118785 Introduction to Evidence-Based Practice 15 credits

Students will study the principles of veterinary epidemiology to provide them with the skills necessary to critically evaluate the literature for the purposes of evidence-based medicine. Examples and case studies will be drawn from a range of species including production animals, wildlife, companion animals and horses.

118786 Applied Veterinary Epidemiology 15 credits

Students will gain the skills necessary to design an epidemiological study in a clinical setting and investigate an outbreak of disease. Examples and case

studies will be drawn from a range of species including production animals, wildlife, aquatic species, companion animals and horses.

118791 Special Topic 15 credits**118792 Special Topic 30 credits****118793 Special Topic 60 credits****118811 Research Report 60 credits**

A detailed examination of a specific topic within the field of study of the candidate, approved by the Chief Supervisor in advance, which may include aspects of original research, problem investigation, and/or study of pre-existing data or published literature.

118851 Research Report (MVM) (45 credit) 45 credits

A detailed examination of a specific topic within the field of study of the candidate, approved by the course co-ordinator in advance, which may include aspects of original research, problem investigation, and/or study of pre-existing data or published literature.

118852 Research Report (MVM) (60 credit) 60 credits

A detailed examination of a specific topic within the field of study of the candidate, approved by the course co-ordinator in advance, which may include aspects of original research, problem investigation, and/or study of pre-existing data or published literature.

118853 Advanced Profession Practice in Veterinary Science 45 credits

A supervised placement in an approved setting of veterinary practice. Students will observe the work of experts in the selected area of veterinary practice, undertake some work under supervision, and gain experience in using the empirical literature to guide evidence-based decision making and writing reports in the discipline.

118854 Advanced Topics in Epidemiologic Data Analysis 15 credits

The course focuses on advanced quantitative methods used to analyse data from epidemiologic studies.

118897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

118898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

118899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

118900 PhD Veterinary Science 120 credits**119****Agriculture and Horticulture****119006 Foundation Farm and Industry Study 15 credits**

A foundation study of farm inputs and products such as meat, milk and fibre, and the application of farm practical experience, technical data, and industry procedures and practices, to contemporary issues facing farmers. Primarily focused within the farm gate, this course involves individual and group learning and expression.

119101 Farm Production Systems 15 credits

A detailed analysis of whole-farm systems involving a number of field visits. An analytical approach to problem-solving is developed. Field visits to case farms. This course must be passed to qualify for the award of the Diploma in Agriculture

119106 Farm and Industry Study 15 credits

An introductory study of farm inputs and products such as meat, milk and wool, and the application of farm practical experience, technical data, and industry procedures and practices, to contemporary issues facing farmers. Focused both within and beyond the farm gate, this course involves individual and group learning and expression.

119116 Farm Management 15 credits

An introduction to farm management principles and the application of techniques for planning, implementation, and control of, agricultural systems. A study of New Zealand farms as social, economic and business units. Decision-making about land, labour, and capital, in the context of farming uncertainty. Visits to farms provide case-studies for aspects of farm management

119120 Plants for Agriculture and Horticulture 15 credits

An introduction to the agricultural and horticultural species important to New Zealand's economy. Growth and development of agricultural and horticultural plants; their responses to the environment and management, and implications for production. Identification and biology of agricultural and horticultural plants, including weeds, pests and pathogens important to plant production.

119150 Practicum I 0 credits

Industry experience for at least ten consecutive weeks in a public or private business related to the land-based industries. A descriptive report demonstrating satisfactory observational, analytical and reporting skills is required.

119170 Māori Value Systems in Science 15 credits

An introduction to the value systems of Māori, especially as they apply to science, the environment and food products. Topics covered include whakapapa, tikanga, kaitiakitanga, iwi/hapu/whanau structures and their relationships to present-day systems. The impacts of Te Tiriti o Waitangi and selected legislation on Māori and science will also be discussed.

119180 Introduction to Agribusiness 15 credits

An introduction to the organisation, structure and governance of New Zealand agribusiness in a global context. Examines the international and domestic macro environment and its impact on New Zealand agribusiness. Explores New Zealand farm systems within an agribusiness context.

119202 International Agricultural Production Systems 15 credits

Agriculture provides food, fibre, fuel and other goods for people. This course covers the evolution of agriculture, the major agricultural systems in the world, including New Zealand, and case studies of selected agricultural production systems covering arable crops, livestock and horticulture in temperate, arid and tropical climates.

119203 Agriculture and the Environment 15 credits

Throughout the history of agriculture, it has both provided food security and created environmental challenges. This course will examine both contemporary environmental challenges including agricultural greenhouse gases and climate change, water resources and pollution, soil salinization and erosion, and the impact of natural environmental processes on agriculture.

Agriscience**119231 Agricultural and Horticultural Infrastructure 15 credits**

Overview of agricultural and horticultural properties detailing the structures, electricity supply, water systems, site layout and wastewater management.

Agriculture and Horticulture**119250 Practicum II 0 credits**

Industry experience for at least ten consecutive weeks in a public or private business related to the land-based industries. A detailed, investigative report identifying and analysing opportunities, problems, policies and technical and research issues is required.

119258 Agricultural Systems 15 credits

An interdisciplinary study of agricultural systems to describe and analyse the relationships between system components. Analysis of the inter-relationships within agricultural systems, including the sub-systems for primary production, processing, marketing and policy, and the relationships of these systems within their environment.

119270 Policy, Regulation and Government in Primary Industry 15 credits

Legal responsibilities and compliance associated with primary production; obligations under Te Tiriti o Waitangi and examples of legislation including resource management, hazardous substances and new organisms, animal welfare, health and safety, food safety, biosecurity and employment. Central and local government, and industry systems. Implications for owners, managers and employees in the rural sector.

Agriscience**119281 Decision Tools for Primary Industries 15 credits**

Application of decision tools for farm systems analysis at the tactical level. Analytical frameworks to assist decision-making in finance, human resources, production and marketing.

Agriculture and Horticulture**119292 Special Topic 15 credits****119302 Problem Solving in International Agriculture 15 credits**

Case studies on solving agricultural and horticultural problems around the world, including in New Zealand, with an emphasis on complex, interdisciplinary projects. Case studies include agricultural development, and incorporation of advanced technologies and environmental mitigation. Emphasis will be on the application of knowledge of agricultural production systems to problem solving and communication.

119303 Professional Experience in Agriculture 15 credits

The course integrates prior discipline knowledge in agriculture with soft skills required by employers by critically evaluating the objectives and operations of agricultural organisations and reflecting on the experience of working in an agricultural organisation.

Agriscience**119358 Farm Production Systems 15 credits**

An interdisciplinary study of farm systems. Case studies are used to integrate students' knowledge of the whole farm system, to identify strategic choices and evaluate these choices relative to the current farm system.

Agriculture and Horticulture**119373 Integrative Studies 15 credits**

An integrative course designed to emphasise the importance of the broad knowledge base gained in the degree and the value of multidisciplinary teams in addressing the issues and problems of importance to the industries served by the degree. Emphasis will be placed on the application of knowledge to problem-solving, group learning and problem-solving strategies and communication in the context of applied science. Real-world problems will be used.

Agriscience**119381 Decision-Making in Primary Industry 15 credits**

A practical approach to the management of strategy, finance and tactics in primary industry. An exploration, through in-field case studies and business analysis, of planning under uncertainty.

Agricultural and Horticulture Systems Management**119382 Opportunity Analysis in Primary Industry 15 credits**

An in-depth study of opportunities for agricultural/horticultural investments. An exploration, through in-field case studies, of alternative pathways to ownership, on-farm investment analysis and farm borrowing and lending. Relevant legislation affecting agricultural and horticultural businesses.

Agriculture and Horticulture**119392 Special Topic 15 credits****119710 Nutrient Management in Grazed Pasture Systems 30 credits**

An advanced, integrated study of the environmental and management factors influencing the cycling of nutrients in grazed pasture production systems. Contemporary production systems are analysed and strategies devised to maximise the efficiency of nutrient use (including fertiliser recommendations) in pasture and supplementary feed production and animal nutrition. Financial risks associated with farm management strategies that minimise environmental risk are assessed.

119711 Nutrient Management in Arable Systems 15 credits

An advanced integrated course of study on the environmental and management factors, including soils, establishment systems and fertiliser application, influencing the cycling of nutrients in, and loss of nutrients from, arable production systems. Crop growth models. Crop decision support systems for nutrient management and fertiliser recommendations.

119728 Research Methods in Animal, Veterinary and Agricultural Sciences 15 credits

Research methods for students planning to undertake research in animal, veterinary, agricultural, horticultural or applied sciences, with a focus on experimental research designs. Topics include: philosophy of science; research ethics; literature search and review techniques; project development and management; scientific writing; oral presentation skills; vocabulary of statistics; introduction to quantitative data analysis; and completion of a research proposal.

119729 Research Methods 15 credits

Research methods for students whose research focuses on the human-science interface and human applications of science. The course includes foundations of science, ethics, the scientific method, and systems approaches to problem-solving and research; selection of appropriate research methods, including survey methods, case studies, enterprise/project analysis, and modelling; analysis and presentation of research results and communication skills.

119731 Topics in Agricultural Extension and Consultancy 15 credits

This course focuses on extension and consultancy theory and its application in commercial farming and horticulture. The design, implementation and evaluation of extension and consultancy programmes; managing an agricultural consultancy business; codes of practice (ethics); current and emerging extension and consultancy issues. Case studies of local agricultural consultancies.

119752 Advanced Farm and Horticultural Management 15 credits

Studies related to the principles of farm and/or horticultural management using case studies of farm and/or horticultural businesses; risk analysis and management at the strategic, tactical and operational levels; development of business plans; financial management and the application of whole farm planning techniques.

119790 International Food Production Systems 15 credits

Participants will use systems thinking to understand food production systems of New Zealand and the world and the multiple drivers that underpin food production and marketing systems internationally. Field visits to a variety of production systems in New Zealand, interactive engagement with teaching staff and collective learning are used to assist students' learning in the course.

119791 Special Topic 15 credits**119792 Special Topic 15 credits****119797 Special Topic 30 credits****Agriculture/Horticulture Plants****119820 Applied Agriculture Research Report 60 credits**

Candidates will undertake an applied research project within the subject area in which the Master of Agriculture is being completed. A project report must be submitted to and approved by the candidate's supervisor.

Agriculture and Horticulture**119885 Thesis 90 Credit Part 1 45 credits**

A supervised and guided independent study resulting in a published work.

119886 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

119887 Research Report 60 credits**119888 Thesis 90 credits**

A supervised and guided independent study resulting in a published work.

119889 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

119890 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

119891 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

119900 PhD Agriculture and Horticulture 120 credits**120****Plant Biology****120101 Plant Biology 15 credits**

This course is an integrated introductory study of plants. Major themes include: plant form and function (anatomy, morphology, photosynthesis, respiration, transport systems, mineral nutrition); regulation of growth and development, especially in response to the environment; plant diversity (systematics, evolution, life cycles, New Zealand flora); and plants and people (crop domestication, plant breeding and production, Māori plant use).

120201 Diversity of Plants 15 credits

This survey of the plant kingdom covers the evolution, diversity, and use of plants. A comparative approach is taken to study the morphological, anatomical, and reproductive features of major plant groups. Both native New Zealand and important agricultural/horticultural plants are used as examples. Modern principles of taxonomy and systematics are described, especially to address current biodiversity and biosecurity issues.

120217 Plant, Cell and Environment 15 credits

This course examines developmental and physiological responses that enable plants to cope with a changing environment and that occur daily, seasonally and over longer timescales; e.g. global climate change. Major topics include plant responses to light, carbon dioxide levels, mineral nutrition and abiotic and biotic stresses such as drought and pests. Emphasis is on mechanisms by which changes in the environment are perceived, signalling processes that are induced, and cellular and developmental changes that help the plant cope with the changed environment.

120219 Plants and People 15 credits

Plants as sources of food and beverage, medicine, fibres and dyes, with emphasis on their origin, domestication and the role of plant breeding to improve plants for human use. The physiological effects of active plant compounds on the body. The cultural and geographic origins of commercially important plants.

120303 Plant Diversity 15 credits

The evolution of plant lineages has many potential outcomes, ranging from extinction to diversification and speciation. This course explores the processes that influence how lineages evolve and how we investigate and interpret patterns of diversity to better understand plant evolution and speciation. Lectures consist of critical discussion of topics including species concepts, local adaptation and diversification, morphological and molecular evolution, mating systems, and the roles of hybridization and polyploidy in plant evolution and speciation.

120306 Plant Improvement 15 credits

Traditional and modern methods by which plants can be modified to provide new genetic material for use in agriculture, horticulture, forestry and industry. This course links basic and applied science and focuses on how natural and induced genetic variation can be harnessed for human use. Emphasis is on the dramatic progress being made in plant breeding, QTL analysis, marker-assisted selection, tissue culture and recombinant DNA technology. The course includes discussion of environmental, ethical and regulatory issues.

120713 Advanced Topics in Plant Biology 30 credits

The course will involve use of the current literature to critically examine the experimental systems used to advance knowledge in Plant Biology.

120715 Advanced Topics in Evolutionary Genetics 30 credits

The course covers the history of landmark discoveries and progression of theory in genetics over the last century.

120870 Research Report 60 credits**120873 Thesis 90 Credit Part 1 (30 credits) 30 credits**

A supervised and guided independent study resulting in a published work.

120874 Thesis 90 Credit Part 2 (60 credits) 60 credits

A supervised and guided independent study resulting in a published work.

120875 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

120897 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

120898 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work

120899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

120900 PhD Plant Biology **120 credits**

121

Environmental Science

121101 Climate and the Environment **15 credits**

This course delves into urgent issues like climate change and other major environmental challenges that affect natural and built ecosystems today and into the future. This course highlights the interconnected dynamics of social, technological, political, economic, and environmental change. Focusing on critical areas such as greenhouse gas emissions, the sustainability of production and consumption systems, land degradation, loss of biodiversity, soil contamination, water scarcity and pollution it helps students understand the causes and consequences of these problems.

121200 Environmental Monitoring and Field Skills **15 credits**

A practical course focusing on 'hands-on' skills to develop proficiency with important tools, techniques and technologies used to monitor the environment and capture data to explore the dynamics of Earth systems. Analysis, interpretation, and application of field data to real world environmental management scenarios forms an important part of the course.

121210 Environmental Issues **15 credits**

A consideration of major environmental issues that affect, or may affect natural and built ecosystems into the future. Topics include climate change mitigation and adaptation, the 'Ozone Hole', land degradation and soil contamination, increasing water scarcity and pollution, loss of biodiversity and fisheries, sustainability of production and consumption systems, and the sustainability and liveability of major urban centres.

121213 Land and Water Science **15 credits**

How river catchments work and how they are affected by human activity. The environmental effects of land and water management practices, including land use, irrigation, drainage and nutrient loss, on river channels, flows and water quality, framed within an understanding of catchment geomorphology and hydrological processes.

121214 Landscape and Human Ecology **15 credits**

A systems approach to understanding socio-ecological interactions at the landscape level. Content includes fundamental ecological principles, the quantification of ecological services and the importance of recognising the diverse social and cultural considerations that shape socio-ecological systems including Matauranga Māori.

121310 Environmental Solutions **15 credits**

A consideration of technology and innovation that can be used to measure, manage and mitigate environmental risks to soil and water. Theory and practical exercises based on New Zealand case studies equip students with numerical skills necessary to monitor and evaluate environmental quality. A student-led project allows in-depth study of a New Zealand environmental issue of particular relevance to community.

121313 Applied River Management **15 credits**

The course covers the principles and methodology of river resource management. It integrates ecology, hydrology, geomorphology and water quality to understand how river ecosystems function and how they may be managed to maximise societal and environmental benefit.

122

Biochemistry

122102 Biochemistry **15 credits**

An introductory biochemistry course covering the fundamental concepts of protein structure and function as well as metabolism of carbohydrates, lipids and amino acids. The focus will be on energy transactions in a physiological context including glucose homeostasis and muscle metabolism in mammals. A lecture and problem-based tutorial course involving specific case studies will be complemented by a hands-on laboratory course.

122201 The Molecular Cell **15 credits**

This intermediate level course develops molecular and cellular concepts in biology. The relationship between protein structure and activity with cellular structure and processes is explored. Studies include the life-cycle (translation, trafficking, modification and folding), structure and activity of proteins. The course also investigates the characteristics and functions of key cellular components. The learning activities are centred on lectures and lab classes introducing techniques and concepts in molecular cell biology.

122202 The Dynamic Cell **15 credits**

Energy metabolism in higher eukaryotes from the perspective of life on earth and the necessary adaptation of living organisms from an anaerobic to aerobic environment. Carbohydrate, lipid and nitrogen metabolism in the context of health and disease. Integration and regulation of carbohydrate, lipid and amino acid metabolism. A lecture and problem-based tutorial course complemented by a hands-on project-based laboratory course.

122231 Genes and Gene Expression **15 credits**

This course covers fundamentals of molecular biology including nucleic acid structure, DNA replication, repair and transcription, with reference to health and disease. Methods used to study and manipulate genes will be covered and applied in practice. A lecture and problem-based course, complemented by practical laboratory experience.

122301 Advanced Cell Biology **15 credits**

The course explores concepts and methods in advanced molecular cell biology and protein biochemistry. Molecular mechanisms responsible for the signalling and biochemical responses of cells will be discussed with a focus on both cell and protein structure and functions. Advanced studies in protein function, cell signalling and cellular processes are taught in a context of molecular disease mechanisms. The course teaches modern experimental methods in microscopy, cell biology and protein functional analysis.

122303 Gene Regulation **15 credits**

The course explores gene regulation in eukaryotes from nuclear organisation to cytosolic control, with a focus on animals and humans. The molecular mechanisms of transcription within a chromatin environment will be discussed, along with the role of RNA processing and post-transcriptional regulation in gene expression, and their importance to health and disease. A lecture and problem-based tutorial course complemented by a hands-on laboratory project undertaking experimental methods used to study gene expression.

122713 Advanced Topics in Biochemistry **15 credits**

The course will involve use of the current literature to critically examine the experimental systems used to advance knowledge in Biochemistry.

122897 Thesis 120 Credit Part 1 **60 credits**

A supervised and guided independent study resulting in a published work.

122898 Thesis 120 Credit Part 2 **60 credits**

A supervised and guided independent study resulting in a published work.

122899 Thesis **120 credits**

A supervised and guided independent study resulting in a published work.

122900 PhD Biochemistry **120 credits**

Chemistry

123103 Chemistry for Modern Sciences 15 credits

An introductory course in chemistry suitable for students with little previous experience in the subject. The basic concepts of chemistry, including atoms and molecules, the periodic table, bonding, equilibria, chemical reactions, and chemical energetics, are taught with contextual references to everyday life.

123104 Chemistry for Biological Systems 15 credits

Building on basic chemical principles, this course provides the atomic and molecular foundations for understanding chemistry and the life sciences. Starting from the structure of the atom and an understanding of Gibbs energy, it builds a chemical model for bonding, the composition of molecules, non-covalent interactions, chemical equilibria, acids/bases, chemical reactivity, and biological macromolecules. The theory is supported by practical experiments.

123105 Chemistry and the Physical World 15 credits

An examination of how the properties of atoms and molecules determine the properties and behaviour of matter. The transfer of energy that occurs during chemical and physical processes and the rates of these processes are discussed and rationalised using atomic and molecular properties. Techniques for characterising matter and materials are introduced.

123201 Chemical Energetics 15 credits

Molecular processes are inherently random and yet we can meaningfully predict the yield or the rate of a chemical reaction. In this course we discover that this apparent paradox is explained by the idea that although single molecules behave randomly, large numbers of molecules and atoms do behave in a predictable manner. We develop the principles of thermodynamics and kinetics from this idea and apply these principles to physical, chemical, biochemical and industrial processes. The lab course focuses on broadly applicable skills in measurement, analysing and presenting physical chemistry data, understanding sources of uncertainty in physical measurements and written communication skills.

123207 Molecular Chemistry 15 credits

The world is built up from molecules. Viewing systems - from the human body to the newest satellite - as composites of molecules is a powerful approach to understanding the world. In this course we will deconstruct seemingly complex systems into their simpler molecular components. We will understand their structures and develop ways they can be synthesized from the ground up. This is a lab course focussed on making molecules which will build synthetic skills.

123208 Chemical Analysis 15 credits

Determining the structure of matter and how much of it is present is the focus of analytical chemistry. In this course we introduce the chemical and physical principles that underpin modern analytical chemistry methods and illustrate how analytical chemistry plays a key role in fields such as forensic and environmental science. You will obtain hands-on experience with modern analytical instrumentation in the laboratory and use skills in handling chemicals and data analysis to solve problems in analytical chemistry. We develop skills in error analysis and scientific writing.

123271 Molecules to Materials 15 credits

The chemistry of materials under-pins all chemical processing industries. This course facilitates a fundamental understanding of aqueous solutions, organic, inorganic and polymer chemistry relevant to material science, including soft materials such as gels and colloids. The laboratory training develops skills in a range of synthesis, separation and analysis techniques relevant to materials chemistry.

123305 Contemporary Topics in Chemistry 15 credits

We will discuss and analyse the grand challenges and breakthroughs of modern chemistry. This discussion will lead to an understanding of how and why chemistry is central to the most pressing global challenges. Topical questions will vary from year to year. You will learn how to critically evaluate sources of scientific information and present scientific and chemical concepts using different media and to a variety of audiences.

123307 Advanced Inorganic Chemistry 15 credits

This course focuses on the structure, properties and reactivity of inorganic compounds with a particular focus on transition metal complexes. The laboratory training develops expertise in a broad range of experimental techniques that relate to inorganic chemistry.

123308 Advanced Organic Chemistry 15 credits

This course focuses on recent trends and developments in the design and reactivity of organic compounds. It will introduce how a knowledge of organic reactions and mechanisms can be used to synthesise biologically relevant molecules, and will include organic and metal-based catalysis as well as heterocyclic chemistry. The laboratory training develops expertise in a range of organic chemistry experimental techniques.

123310 Advanced Concepts in Organic Chemistry 15 credits

Computational aspects related to organic chemistry. Structure, reactivity, synthesis, retrosynthesis, structure determination by analytical methods. Mechanism of organic reactions and chemistry of heterocyclic and main group elements. An emphasis on the application of organic reactions to engineer molecules of interest in the chemical, biochemical and pharmaceutical fields. Lectures are complemented by an intensive laboratory experience.

123331 Advanced Physical and Computational Chemistry 15 credits

This course applies quantum theory to molecular and atomic structure and spectroscopy. The use of symmetry in chemistry is explicitly treated. Statistical and dynamical theories are used to describe molecular behaviour and reactivity. Computational chemistry methodology is systematically applied to chemical systems. A course of practical work and a spectroscopy project complements the lectures.

123332 Advanced Topics in Chemistry 30 credits

A project in an area of chemistry aimed at preparation for postgraduate research in chemistry. A selection of modules (4 maximum) covering areas of Inorganic, Physical, Environmental, Analytical and Organic chemistry.

123711 Research Methods in Chemistry and Nanoscience 30 credits

Four compulsory modules covering research project development and computational methods in science; two modules selected from: statistical methods for data acquisition/handling, BioNMR, single molecule techniques and polymer physics and/or a relevant topic to be negotiated.

123713 Advanced Chemical Synthesis 30 credits

A selection of modules (6 maximum) covering topics in advanced synthetic chemistry, peptides for biological applications, drug design and delivery, modified nucleic acids as probes in life sciences, activation of small molecules in chemistry and biological chemistry AND/OR a topic to be negotiated with the lecturer.

123870 Research Report 60 credits**123871 Thesis 90 Credit Part 1 45 credits**

A supervised and guided independent study resulting in a published work.

123872 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

123875 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

123897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

123898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work

123899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

123900 PhD Chemistry 120 credits

124

Physics

124100 Introductory Physics 15 credits

An introductory course on phenomena and methods relevant to the study of physics. The use of physics concepts, including conservation laws, to analyse physical systems. Conversion of information between written, algebraic, graphical and diagrammatic forms. Methods for solving appropriate quantitative problems. Practical demonstrations and experiments.

124103 Biophysical Principles 15 credits

Students will develop understanding of biophysical principles including the description of motion, forces, equilibrium, fluids and flow, heat as energy, heat transfer, waves and sound, and the use of spreadsheets. Application of foundational knowledge of mathematical principles to biophysical systems, including the rules of arithmetic, fractions, simple algebra, trigonometry, transcendental functions, SI units and unit conversions, and creating and interpreting graphs. A practical course.

124104 Physics 1A: Mechanics and Thermodynamics 15 credits

This physics course provides foundational knowledge for study in engineering, food technology, and physical sciences. The emphasis is on applying physical principles to problem solving in mechanics, fluid mechanics, and thermodynamics. A practical course.

124105 Physics 1B: Electricity, Waves and Modern Physics 15 credits

This physics course provides foundational knowledge for study in engineering, food technology and physical sciences. The emphasis is on applying physical principles to problems involving electricity, waves (including classical waves and electromagnetic waves), optics, quantum physics, and the application of modern technologies such as lasers, mass spectrometers, and nuclear magnetic resonance. A practical course.

124897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

124898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

124899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

124900 PhD Physics 120 credits

125

Finance

125111 Managing your Personal Finances 15 credits

This course introduces students to key concepts of financial capability, helping individuals to understand how best to manage and protect their financial resources during various life stages and their rights in relation to this.

125115 Client Engagement Skills 30 credits

This course focuses on behavioural finance concepts to understand different types of behavioural biases that may impact an individual's financial decision-making. It explains how emotional intelligence and critical thinking can assist a financial advisor to understand their client's decisions.

125116 Ethics in Financial Advice 30 credits

This course focuses on the ethical and professional obligations of financial advisors through the broad lens of philosophical approaches to ethics; conduct expected in the Financial Advice Code and the Financial Markets Authority.

125143 Essentials of Investment Advice 30 credits

Providing essential knowledge of the principles and practice of the provision of investment advice

125155 Essentials of Insurance Advice - Life, Disability, and Health 30 credits

Providing essential knowledge of the principles and practice of the provision of insurance (life, disability and health) advice

125156 Essentials of Insurance Advice - General 30 credits

Providing essential knowledge of the principles and practice of the provision of insurance (general) advice

125163 Essentials of Residential Property Lending Advice 30 credits

Providing essential knowledge of the principles and practice of the provision of residential property lending advice

125179 Introduction to Financial Advice 30 credits

Providing knowledge of the financial advice industry, including regulatory requirements, and the application of professional practice.

125211 The Financial Planning Process 15 credits

This course introduces students to the theories and processes relating to Financial Planning and Advice.

125220 Financial Institutions and Markets 15 credits

An overview of the operation of institutions, products and markets which make up the financial system and discusses the role of governments, both domestically and internationally, in the management of our financial system.

125230 Business Finance 15 credits

The course provides students with a fundamental knowledge of financial theory and practice. In addition to valuation and capital budgeting, students will study working capital management, capital structure, the cost of capital, dividend policy and ethics in finance.

125241 Introduction to Investments 15 credits

An introduction to the fundamental and practical concepts of the investment process. Investment products, including equity, debt instruments, and derivatives are discussed as well as basic portfolio concepts.

125250 Financial Modelling 15 credits

An examination of the principles of sound financial decision-making with the use of spreadsheets for analysis. Students will use various applications to perform quantitative analysis, assessing risk and return, and asset valuations.

125310 Financial Advice Implementation 15 credits

This capstone course deals with the implementation of the financial planning process, including the formation of a comprehensive financial plan.

125312 Applied Personal Financial Management 15 credits

An examination of the issues and potential solutions pertaining to individual personal financial management decisions.

125320 International Finance 15 credits

This course provides an overview of the theories and institutional environment of international finance. Students will gain insight into exchange rate determinations and instruments available for managing financial risk in a globalised economy.

125330 Advanced Business Finance 15 credits

A study of finance theory in practice, designed to facilitate effective corporate financial decision making.

125340 Investment Analysis 15 credits

The application of analytical techniques to investment decision-making.

125342 Investment Planning 15 credits

The application of investment valuation techniques and the evaluation of portfolio construction, encompassing fixed income and equities from the perspective of a financial planner.

125350 Financial Risk Management 15 credits

This course provides an overview of the theory and practice of financial risk management or hedging. Financial risk exposures can be categorised into three areas: interest rate risk, foreign exchange risk and commodity price risk. The focus will be on the methods of identifying and measuring the impact of these exposures and the appropriate instruments to hedge the firm's exposures.

125351 Personal Risk Management 15 credits

This course provides an overview of personal risk management, and the methods of mitigating potential impact including the role of insurance.

125364 Bank Financial Management 15 credits

An application of finance and economic theory to the financial management and operation of banks globally, from a risk and regulatory perspective.

Banking Management**125365 Retail Banking 15 credits**

A critical analysis of the main elements required for a successful retail banking operation.

Finance**125388 CFA® Programme Track 15 credits**

This course offers a thorough overview of the CFA Level I examination curriculum, including codes of ethics and professional standards, financial statement analysis, economics, and various other investment-related topics.

125700 Managerial Finance 30 credits

A study of the theory of finance with an emphasis on managerial decision making.

125701 Quantitative Methods for Accounting and Finance 15 credits

A study of statistical and econometric techniques allowing students to carry out appropriate empirical research in the areas of accounting and finance.

125702 Financial Management 15 credits

An introduction into the theory and practice of financial management decision making. Students develop and apply financial management techniques to solve business problems.

125710 Derivatives and Risk Management 15 credits

This course considers the roles of financial risk management in reducing risk and/or increasing returns in an organisation. Students will be exposed to derivatives and risk management from both theoretical and empirical perspectives.

125718 Professional Programme Preparation 15 credits

This course provides a comprehensive overview of the CFA level I examination curriculum and the annually updated materials.

125732 Advanced Corporate Finance 30 credits

Advanced Corporate Finance is a course with a quantitative base. It builds a theoretical foundation from which students can consider finance issues. Consideration of corporate financial management, capital markets and long-term financial strategy is undertaken with the objective of making corporate decisions more efficiently.

125740 Advanced Investment Analysis 30 credits

This course provides a comprehensive coverage of advanced theory and practice regarding investments and portfolio management.

125780 Advanced International Finance 30 credits

This course covers advanced topics in international finance, including an understanding of the institutions and evolution of the international financial structure, the foreign exchange market and derivatives. The additional complications of applying financial theory to multinational corporations, international funding, international investing, and capital budgeting are examined.

125785 Research and Analytics in Economics and Finance 30 credits

This course provides foundations for econometrics and data analytics from which students can understand and perform quality empirical research in economics and financial contexts.

125788 Big Data in Finance and Banking 30 credits

A study of big data application in finance and banking through a combination of theory and practice.

125803 Corporate Finance 15 credits

A study of financial management decisions within a corporate setting. Students examine how financial decisions impact on firm value.

125810 Case Studies in Financial Management and Sustainable Finance 30 credits

Using case study analysis, this course encompasses the theory and practice of financial management, financial risk management, the integration of sustainability in finance, and the allocation of capital in the global business setting.

125811 Advanced Risk Analytics 30 credits

This course analyses current theory, practice and governance in risk management process and evaluates their financial implications.

125850 Research Report Part 1 30 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

125851 Research Report Part 2 30 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

125892 Research Report 60 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

125895 Professional Practice 60 credits

Candidates will undertake professional practice within the subject area in which the Master of Management is being completed. Professional Practice may be conducted either individually or in groups and assessment of the outcome of the investigation may be in a variety of ways including written and oral presentations and case studies.

125897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

125898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

125899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

125900 PhD Finance 120 credits**127****Property Studies****127100 Introduction to Property and Real Estate 15 credits**

An introduction to the concepts and principles underlying the property market/industry in New Zealand. This course provides an overview of the regulatory, economics and evaluation framework for users and investors in property and real estate.

127241 Property Market Principles 15 credits

A broad based introduction to property examined from both a New Zealand and international perspective. This course incorporates the use of technology in relation to all aspects of the property market.

127242 Introduction to Property Valuation 15 credits

An introduction to the principles and methods of property valuation.

127245 Introduction to Property Finance and Investment 15 credits

Introduction to property investment analysis, the role of property finance and the evaluation of property financing decisions.

127255 Rural Valuation I 15 credits

An introduction to valuation, examining the duties of a valuer, code of ethics and report writing as well as the principles and methods of valuation and the application of these to the valuation of residential and rural property. The course has a practical orientation containing a substantial fieldwork and case studies component.

127341 Property Management and Development 15 credits

The application of analytical techniques to, and the appraisal of, the management and development of commercial real estate resources.

127342 Applied Property Finance and Investment 15 credits

This capstone course is an applied study of property finance and investment analysis which includes portfolio theory in relation to property.

127343 Applied Property Valuation 15 credits

The application of valuation theory in relation to commercial and industrial property, both vacant and improved, valuation practices.

127356 Rural Valuation 15 credits

Application of the principles, methods and processes of valuation to rural and agribusiness properties.

127378 Property Economics and Planning 15 credits

A study of location theory, planning and the economic dynamics involved in the development of cities, using analysis of property space and asset class.

127700 Real Estate Studies 30 credits

A study of the theory and practice of real estate, valuation and property management.

127702 Sustainable Property Development 15 credits

A study of the theory and practice of sustainable property development.

128

Ergonomics**128300 Human Factors and Ergonomics: Work, Performance, Health and Design 15 credits**

Human Factors and Ergonomics (HFE) is a holistic, practice-based discipline that aims to optimise human-system interactions to enhance well-being, effectiveness, and overall system performance. HFE applies theories, principles, and methods to design systems in diverse environments including work, organisations, products and leisure. This course covers fundamental HFE principles; analytical methods; physical, cognitive and psychosocial capacity and limitations of people.

130

Emergency Services Management**130202 Introduction to Emergency Management 15 credits**

An introduction to principles, theory and practices of emergency management.

130203 Disaster Risk Management 15 credits

A study of the principles and practice of disaster risk management including disaster risk identification and assessment processes, and the use of risk information in decision-making and communication.

130204 Disaster Risk and Emergency Management Internship 15 credits

Internship in disaster risk and emergency management in which students are placed alongside professionals working within domain related organisations in New Zealand.

130301 Incident Command Systems 15 credits

This course introduces the systems used to manage emergencies, including the New Zealand Coordinated Incident Management System and other international variations. Consideration will be given to operational management concepts and tactics for effective incident response.

130701 Natural Hazards 30 credits

A study of natural hazards and their effects. Specific attention will be paid to earthquakes, windstorms, flooding, volcanicity, tsunamis and landslips and their impact on people and the environment. Hazards particularly relevant to New Zealand will be emphasised.

130702 Coping with Disasters 30 credits

Study of the human issues and problems involved in preparing for and coping with disasters. Attitudes towards disaster preparation are studied together with the nature of disasters and their effects on human beings. The organisation and control of human behaviour during disasters will be studied together with

rehabilitation interventions, particularly for the alleviation of stress for those involved.

130705 Emergency Management 30 credits

An examination of the social, psychological, community and organisational aspects of disaster management in New Zealand. Emphasis is on the development and implementation of an all-hazards, comprehensive and integrated approach to emergency management. Selected readings and case studies will be used to facilitate the development of an effective response to social, psychological, community and organisational issues.

130706 Emergency Management in Practice 30 credits

This course studies the practical application of current emergency management theory. The emphasis is on examining a specific topic area, analysing current trends and discussing practices that will enhance reduction, readiness, response and recovery efforts in managing disasters and emergencies.

130707 Professional Inquiry in Emergency Management 30 credits

Analytical inquiry into the impact of a professional practice in an area of emergency management. Provides an opportunity for students to engage in inquiry skills and a critical dialogue to articulate effective and efficient professional practice in their work environment.

130800 Advanced Leadership in Emergency Management 1 30 credits

This course explores the theory and practice of operational and strategic leadership applied in emergencies, including organisational psychology, politics, law, ethics, team leadership, communication and crisis decision making.

130802 Advanced Leadership in Emergency Management 2 30 credits

A further exploration of the theory and practice of operational and strategic leadership applied in emergencies, including a deep examination of key case studies of advanced leadership and critical reflection on leadership practices.

130881 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

130882 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

130883 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

130900 PhD Emergency Management 120 credits

131

Development Studies**131121 Rich World, Poor World 15 credits**

This course introduces students to the field of Development Studies and to some of the Big Issues facing people living in the Global South or 'developing' countries. We talk about the Big Ideas that influence the approaches taken to try and solve these issues and we illustrate these with case-studies from many parts of the world. Key Big Issues include climate change, Food Security and Hunger and Migration/Refugees.

131221 Global Development Issues 15 credits

This interdisciplinary course investigates contemporary global development. This course will explain different approaches to development and will explore a choice of topical themes that highlight problems and some of the strategies involved in addressing global concerns.

131321 Strategies for Sustainable Development 15 credits

A consideration of concepts, processes, practices, and possible strategies for sustainable development at global, national and community levels. Special attention is paid to examples of strategies that seek more sustainable livelihoods.

131701 Rethinking Development 30 credits

An interdisciplinary course that explores and critically reflects on the trajectories of development thought and the contemporary processes of international development. The main areas covered include: the origins and

meaning of development; paradigmatic approaches to development; and contemporary approaches to development practice.

131702 Development Management **30 credits**

An applied course dealing with the processes and methods for the planning, implementation and evaluation of development programmes and projects. The course focuses on the managerial aspects and on the analytical tools that link contemporary policy frameworks and operational practices.

131703 Gender and Development **30 credits**

An examination of the interaction of gender difference, development planning and social change. Selected topics include empowerment and human rights, masculinities, the household, work, education, and health.

131704 Sustainable Development **30 credits**

A course concerned with the concept of sustainable development in all its dimensions (economic, social and environmental), focused on the 17 sustainable development goals (SDGs). Conceptual lenses, including Indigenous understandings of sustainability and the sustainable livelihoods framework, are also discussed.

131706 Globalisation and Development **30 credits**

An examination of three critical themes in globalisation and development: conflict (and post-conflict), migration, and tourism.

131707 Development Research Design **30 credits**

An examination of research methods and ethical issues and their application in development studies.

131708 Development Practicum **30 credits**

Advanced study in development practice, involving 260 hours of professional work in an approved development agency. As an integral part of the course, students will reflect on how this work can be understood in relation to current literature on development theory and practice.

131709 Sustainable Development Goals in Practice **30 credits**

This course provides advanced study in the practice of the Sustainable Development Goals (SDGs), focusing on the application of the SDGs to real-world circumstances. Students will be exposed to diverse approaches, frameworks, and tools for measuring and integrating sustainability in policy making and practice.

131720 Climate Change and Sustainability **30 credits**

The purpose of this course is to provide students with an advanced understanding of the climate change crisis based on the idea of critical hope, drawing from indigenous, natural, and social science theories, knowledges and frameworks. Students will critically engage and reflect on the ways in which the Sustainable Development Goals represent and attempt to mitigate Climate Change. In particular, this course explores the effects of climate change on Māori and Pacific peoples, and using real-world examples examines how indigenous knowledges, approaches and practices are shaping responses in these communities.

131721 Global and Local Responses to Climate Change **30 credits**

The purpose of this course is to engage students in critical explorations of climate change mitigation, adaptation and resilience. In particular, we will examine the complex relationship between global worldviews, state-led or professional practices and, on the other hand, local or Indigenous worldviews and community-based or alternative livelihood practices responding to climate change. Drawing from a critical hope perspective, students will determine effective policy and practice responses to climate change in specific contexts. The course also investigates global and local climate change funding mechanisms, with specific focus on Aotearoa and the Pacific.

131810 Sustainable Development Goals Practicum **60 credits**

Advanced study in the application of the Sustainable Development Goals, involving 320 hours of professional work in an approved agency. As an integral part of the course, students will critically analyse how this work can be understood in relation to current literature on the SDGs and sustainable development.

131816 Thesis 120 Credit Part 1 **60 credits**

A supervised and guided independent study resulting in a published work.

131817 Thesis 120 Credit Part 2 **60 credits**

A supervised and guided independent study resulting in a published work.

131897 Research Report International Development (60) **60 credits**

A supervised scholarly research report in International Development.

131899 Thesis **120 credits**

A supervised and guided independent study resulting in a published work.

131900 PhD Development Studies **120 credits**

132

Resource and Environmental Planning

132101 Introduction to Professional Planning **15 credits**

This course is an introduction to professional planning, and provides a foundation to the development of a contemporary professional identity. It introduces students to the key ideas and individuals involved in the evolution of the rationale and origins of planning. The course is taught through reference to planning as conceived and practiced in New Zealand and internationally.

132102 Introduction to Planning Analytics **15 credits**

This course introduces the information and techniques for analytical practice in professional planning.

132111 Oranga Taiao, Oranga Tangata: Planning and the Environment **15 credits**

A critical, Māori-centred introduction to environmental planning that emphasises protecting the environment for future generations.

132112 Planning for Sustainable Development **15 credits**

The multi-dimensional and multi-disciplinary nature of planning is explored with reference to the challenge of sustainable development and the application of planning principles to real-world issues.

132212 Professional Practice I **15 credits**

The institutional, professional and legal settings for urban and environmental planning in New Zealand. Topics will include policy and plan development, implementation at different levels of government and the role of tangata whenua. Lectures are complemented by workshop exercises.

132213 Policy Analysis and Evaluation **15 credits**

This course examines the theory and principles of policy analysis and evaluation in the context of planning and develops skills in fundamental qualitative and quantitative methods.

132217 Planning Hazard-Resilient Communities **15 credits**

An introduction to the role of planning in building sustainable and disaster resilient communities through the use of various processes and tools to assess hazard vulnerability, reduce hazard risks, improve disaster readiness, develop effective response capabilities and facilitate recovery.

132221 Planning Studies **15 credits**

An introduction for non-planners to planning and practice in the New Zealand urban, rural and natural resource environment, including an introduction to the principles of the Resource Management Act 1991 and its administration.

132304 Tūhono Taiao: Foundation of Māori Planning **15 credits**

This course introduces students to the Māori Planning world. Students will learn and apply Māori concepts, processes and practices, and critically explore the relationship between Māori and (post)colonial Planning to equip themselves to work effectively with Māori communities on Planning issues.

132305 Natural Resource Policy and Planning **15 credits**

An interdisciplinary approach to the cultural, philosophical, legal, institutional and practical issues involved in the strategic planning and management of New Zealand's natural heritage, including analysis of appropriate New Zealand and international case-studies.

132311 Planning Theory **15 credits**

A critical study of the philosophical and theoretical foundations of planning.

132312 Environmental and Planning Law **15 credits**

An introduction to New Zealand Environmental Planning law with a specific focus on the Resource Management Act 1991 and the legislative, judicial and administrative aspects of the New Zealand legal system as they relate

to environmental law and the planning process. The place of law in the sustainability debate, property rights and legal aspects of the Treaty of Waitangi are covered.

132314 Transport and Urban Planning **15 credits**

People-centred approaches to transport and urban planning. A critical analysis of the determinants of urban planning and transport policies and procedures at national, regional and local levels in the context of sustainable urban development for hapori (communities).

132318 Collaborative Planning, Communities and Public Conflict **15 credits**

Advanced study of collaborative community planning, with a particular focus on the theory and practice of public participation and conflict resolution.

132403 Planning Project **30 credits**

A planning study of an approved topic. Emphasis is on locating the study within an accepted planning paradigm or process; problem definition based on theory and precedent; an appreciation of practice issues; researching and analysing relevant information; and producing a solution to the problem. Findings are presented in a seminar and planning report. Collaboration with academic staff. Tutorials cover presentation skills.

132412 Professional Practice II **15 credits**

The knowledge and skills required by the professional planner in practice. The course makes use of workshop sessions and other forms of interactive teaching to explore current practice issues, including plan and policy development for urban and environmental issues, consultation, environmental education, mediation, resource consents and the role of the expert witness.

132414 Urban Planning and Design **15 credits**

Application of the theory and design of development planning to modern cities. The institutional and disciplinary contexts and constraints within which development plans are formulated. Case studies and fieldwork, together with practical studios covering analytical methods and design. Relationship between transport, urban form and urban design.

132415 Environmental Planning **15 credits**

Sustainable natural resource development approaches and debates are considered within the context of integrated natural resource planning. The course explores and applies planning theories and methods to a selected natural resource problem or issue in New Zealand. Field work as part of project research.

132419 Professional Practice Studio **15 credits**

A practical context for the integration and application of knowledge to contemporary planning practice and investigation and resolution of current issues. Students' understanding of current planning debates and the role of planning as a profession is extended through participation in debate with current protagonists of different points of view and group work to resolve and defend a position.

132729 Mana Taiao: Advanced Māori Planning **30 credits**

Students will establish an advanced understanding of Māori planning by exploring key Māori planning concepts in relation to the environment and relevant planning situations.

132730 Policy Analysis and Evaluation Techniques **30 credits**

Analytical techniques used in planning. Evaluation methods, impact assessment, forecasting and scenario methods, use of performance indicators, soft system approaches and natural resource accounting. Techniques are illustrated by case studies and practised in computer-based exercises.

132731 Planning Law **30 credits**

The Resource Management Act 1991, and the New Zealand legal system as it relates to environmental law and the planning process.

132732 Planning Theory **30 credits**

The philosophical and theoretic foundations of planning and the principles of urban design are identified and analysed using studios and seminars. Business, other disciplines and indigenous approaches to environmental planning challenge traditional views about 'public interest'. The role of planners in collaborative and communicative approaches to urban and environmental planning is identified, along with the effect of jargon in communication. The future of planning, including changes to codes of ethics and practice given a global focus on sustainable management is discussed.

132734 Urban Planning and Development **30 credits**

Different theoretical and practical approaches to urban planning and development, and consequences for the urban landscape, infrastructure, economy and services

132735 Natural Resource Policy and Planning **30 credits**

Natural resource planning principles and practice. Application of the concept of sustainable development to the management of biophysical resources and systems.

132736 Professional Practice **30 credits**

Development of the knowledge and skills required by the professional planner in practice. The course focuses on a range of issues in current planning practice and examines a variety of techniques that might be used to address those issues. Interactive teaching techniques are combined with lectures.

132741 Long-Term Community Planning **30 credits**

An examination of the theoretical and empirical aspects of long-term community planning and exploration of evolving good practice.

132742 Planning History: From Town Planning to Resource Management **30 credits**

An advanced exploration of the historical development of planning as a discipline and profession in New Zealand.

132751 Natural Hazards and Resilient Communities **30 credits**

A study of natural hazards and the role of planning in building sustainable and disaster resilient communities. Develop and apply planning processes and tools to assess hazard vulnerability, reduce hazard risks, improve disaster readiness, develop effective response capabilities, and facilitate recovery.

132815 Thesis 120 Credit Part 1 **60 credits**

A supervised and guided independent study resulting in a published work.

132816 Thesis 120 Credit Part 2 **60 credits**

A supervised and guided independent study resulting in a published work.

132890 Professional Inquiry in Planning **60 credits**

An advanced exploration of planning-based research methods and their application to independent research and analysis within a planning context.

132893 Thesis 90 Credit Part 1 **45 credits**

A supervised and guided independent study resulting in a published work.

132894 Thesis 90 Credit Part 2 **45 credits**

A supervised and guided independent study resulting in a published work.

132895 Research Report (30) **30 credits**

132897 Thesis **90 credits**

A supervised and guided independent study resulting in a published work.

132899 Thesis **120 credits**

A supervised and guided independent study resulting in a published work.

132900 PhD Resource and Environmental Planning **120 credits**

133

Music

133152 Music Media 1 **15 credits**

This course explores and develops creative and technical knowledge of industry standard content production tools and environments used in the production of music related media. Students explore basic music media analysis and apply theoretical concepts to the production of online music and video content.

133153 Music Project 1 **30 credits**

In this course students apply creative and practical skills to develop live experiences and works for the music industry. As well as develop technical expertise, students will explore social, cultural and economic trends associated within the production and dissemination of music in New Zealand and internationally. Multidisciplinary teams will apply creative narrative

skills to develop, manage, produce and iterate musical content, technical production, and promotion.

133154 Music, People, Places 15 credits

An introduction to the people, places, and scholarship of the contemporary music industries. Through the analysis of various issues, trends, and cultural and social contexts, this course supports and encourages students to critically explore the challenges and opportunities of local and global music industries, building awareness of the contemporary commercial music landscape.

133167 Music Entrepreneurship 1 15 credits

In this course students are introduced to the various aspects of the music industry from a New Zealand perspective. Students gain a basic understanding of how to develop and manage music industry projects in a range of settings.

133168 Music Artist Development 15 credits

In this course students will be introduced to the concept of artist development from the perspective of management, record labels and music publishers, including their role in discovering, aligning and project-managing artists. Students will also examine these concepts in relation to content and asset creation, digital music distribution, considering issues of quality and product development practices and strategy in New Zealand and internationally.

133175 Music Practice 1 15 credits

In this course students engage in the development of their musical practice. Through a variety of instrument specific and mixed ensemble groups, students will be supported to achieve technical and artistic skills. Musical materials will be appropriate to a range of popular music practices.

133176 Music Production and Composition 1 15 credits

In this course students are introduced to production and composition techniques used in the creation of popular music. Students apply songwriting and production techniques as they gain practical knowledge of using DAWs (Digital Audio Workstations) and creative methodologies for commercial and experimental outcomes.

133178 Introduction to Ableton Live 15 credits

Students will learn techniques for music production on the Ableton Live digital audio workstation and relevant music technologies. Students will gain basic technical and theoretical skills in music production via Ableton Live, as well as practical understanding of how Ableton Live is used in a range of musical applications and contexts.

133179 Vocal Performance and Production 15 credits

Learn the fundamentals of vocal techniques and production skills relevant to a broad range of styles. Students explore the basic anatomy of the voice, vocal health, and live skills alongside studio techniques and etiquette. The course does not require an audition or existing vocal training, and comprises lectures as well as practical group-based vocal and production workshops.

133180 Professional Cultures in Commercial Music 1 15 credits

An introduction to the music industry and environment, with specific emphasis on culture, ethics, learning, and positionality.

133185 Music and Sound Engineering 1 15 credits

In this course students gain a theoretical understanding of the key concepts, techniques and principles of sound. Technical and practical knowledge of sound are applied in studio and live environments to recording and mixing. Practical applications include analogue and digital signal processing, microphone workings and placement, monitoring, and planning and operating live music systems.

133186 Musical Interface and Interaction 1 15 credits

In this course students are introduced to design and representation techniques for musical interaction. Students develop an understanding of how performers and consumers interact with a range of music hardware and software, and apply this knowledge to design and develop new musical instruments, controllers, web and mobile music interfaces and experiences.

133190 Creative Arts Special Topic 1A 15 credits

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

133

Music

133191 Contemporary Music Project 1A 15 credits

Students will be introduced to producing a creative work that develops an understanding of creative, technical and conceptual approaches relevant to music.

133192 Contemporary Music Project 1B 15 credits

Students will be introduced to producing a creative work that develops an understanding of creative, technical and conceptual approaches relevant to music.

133253 Music Project 2 30 credits

In this course students apply technical skills and new creative approaches for the development of strategic, sophisticated and unique experiences and works in the music industry. In addition to developing new technical skills, students will apply and critique social, cultural and economic roles and trends associated with the dissemination of unique musical experiences through their creative practice. Multidisciplinary teams will explore innovative creative narrative and communication skills to develop, manage, produce, and iterate musical content, technical production and promotion.

133256 Music Media 2 15 credits

This course explores and applies technical and creative knowledge of industry standard content development tools and environments used in the production of music related media. Students explore advanced music media analysis tools and apply theoretical concepts, via a range of new and emerging technologies, to the production of interdisciplinary music, video, and multi-media content.

133257 Music and Ethics 15 credits

Students will analyse a range of philosophical and critical perspectives on the ethics, social roles, and cultural responsibilities of music and its associated communities. Through exploring theoretical positions to develop tools for the analysis of their own practices, students develop a robust critical understanding of the intersections of music, ethical conduct, and professional practice as these inform their own positionality within creative communities.

133260 Music Audience Development 15 credits

In this course students will be introduced to the concept of audience development from the perspective of promotion companies, record labels and music management. Students will examine the music industry in relation to its audience by exploring the marketing and promoting of artists, music brands and other music related content. The course will also examine these concepts as applied to traditional media, digital music marketing and analytics, considering issues of quality and amplification strategies in New Zealand and internationally.

133267 Music Entrepreneurship 2 15 credits

Students explore how to commercialise products and services in the music industries. Students will be taken through the processes involved in bringing these products and services to market, such as identifying a target audience, promotions, pricing and release strategies.

133275 Music Practice 2 15 credits

In this course students engage in intermediate level study of their musical practice. Through a combination of instrument specific and mixed ensemble groups students are supported to gain a professional level of technical and artistic skill. Musical materials will be appropriate to various musical disciplines representing a wide range of popular genres.

133276 Music Production and Composition 2 15 credits

In this course students further develop production and composition techniques to support linear and non-linear musical outcomes. Students compose, arrange and record original sound and music works using a range of tools, technologies, systems, architectures and technical frameworks used for various media platforms.

133277 Electronic Music 15 credits

In this course students develop a knowledge and understanding of the techniques used in the production and performance of electronic music, including synthesis, and the use of relevant software and analogue and digital hardware. Students are supported in the development of commercial and experimental outcomes via practical, creative and technical approaches.

133280 Professional Cultures in Commercial Music 2 15 credits

A further orientation to the music industry and environment, with specific emphasis on working with and within communities, and practicing within the context of Te Tiriti O Waitangi.

133281 Musical Interface and Interaction 2 15 credits

In this course students gain practical experiences working with physical computing and DSP to develop a range of new music technologies. Students are also supported in practical workshops to interface with a range of input and output devices with microcontrollers, to develop creative ideas and designs into working prototypes. Students combine software development with hardware and electronics and rapid prototyping tools.

133287 Applied Lighting and Visuals for Music 15 credits

In this course students develop advanced skills in lighting and audio-visual technologies for a broad range of creative musical applications. Students apply a theoretical understanding of the relationship between sound and image via the creative lighting and interactive visual technologies. Students are supported in the development of commercial and experimental audiovisual outcomes.

133288 Music and Sound Engineering 2 15 credits

In this course students extend their theoretical knowledge and understanding of the principals of sound and recording technologies and develop their technical and practical knowledge in studio techniques. Students develop recording skills in digital multi-track recording, complex microphone techniques, as well as skills in pre-production and post-production.

Creative Arts**133290 Creative Arts Special Topic 2A 15 credits**

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

133291 Creative Arts Special Topic 2B 15 credits

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

Music**133292 Contemporary Music Project 2B 15 credits**

Students will produce an applied creative work that develops an understanding of creative, technical and conceptual approaches relevant to music.

133350 Major Project Pre-Production 15 credits

In this course students generate and evaluate innovative concepts for a music major project and carry out detailed investigation into planning and resourcing requirements along with analysis of cultural, social and economic values of the proposed project. Students work individually and as a team in and across major specialisms to agree the scope and roles of the proposed project.

133355 Music, Politics, Economies 15 credits

Students explore theoretical approaches to music's intersections with politics and economics to inform an advanced understanding of music as a cultural industry. Students employ strategies of critical reflection, collaboration, and praxis to analyse their situatedness within the social, legal, and industrial landscapes of the contemporary music industries, and engage with the symbiotic relationship between politics and the economy as it shapes their own experiences and professional outlooks.

133356 Graduate Portfolio Development 15 credits

In this course students prepare for progression to postgraduate study or transition to industry in the development of an online portfolio managing processes advantageous to their graduate progression. Students also develop creative and organisational approaches to devising a range of strategies in developing professional networks and progression opportunities.

133360 Music Business Development 15 credits

In this course students will explore a number of key concepts and debates concerning music copyright, publishing, metadata, business structure, cashflow and finance. Students will gain an applied understanding of music rights, ownership, exploitation and monetisation. The course explores a range of contemporary challenges currently facing the music industry in New

Zealand and internationally, and examines new and emerging music industry models.

133365 Music Entrepreneurship 3 15 credits

In this course students engage with the music industries via supervised real-world projects.

133368 Music Industry Major Project 30 credits

In this course students realise an ambitious major project by means of self-directed study under academic supervision and professional mentorship appropriate to their music industry major specialism. Students are required to work individually and in teams in and across majors displaying high levels of organisation demonstrating the culmination of creative, technical, critical and professional skills gained throughout the degree.

133375 Music Practice 3 15 credits

In this course students engage in advanced study of their musical practice. Through a combination of instrument specific and mixed ensemble groups, students are supported in achieving an advanced level of technical and artistic skill. Musical materials will be delivered and appropriate to the students musical discipline and chosen genre(s).

133376 Music Production and Composition 3 15 credits

In this course students develop musical understandings beyond conventional popular music forms. Students gain theoretical and critical concepts and techniques key to process and experimentation notating musical ideas through a diverse range of graphic and natural scores. Students extend their musical awareness by actively listening and responding in small improvisation groups supported by seminar discussions.

133378 Music Practice Major Project 30 credits

In this course students work to produce and realise an ambitious major project by means of self-directed study under academic supervision and professional mentorship appropriate to their music practice major specialism. Students are required to work individually and in teams in and across majors displaying high levels of organisation, demonstrating and applying the culmination of technical, creative, critical and professional skills gained throughout the degree.

133380 Professional Cultures in Commercial Music 3 15 credits

Develop skills and knowledge for a future career in commercial music. Students will be supported in developing professionalism within the context of the music industry.

133381 Musical Interface and Interaction 3 15 credits

In this course students extend their theoretical and technical knowledge of working with electronics and software programming to develop advanced new music technologies. Students are supported in practical development workshops to transform their creative ideas into prototype products.

133388 Music Technology Major Project 30 credits

In this course students realise an ambitious major project by means of self-directed study under academic supervision and professional mentorship appropriate to their music technology major specialism. Students are required to work individually and in teams in and across majors displaying high levels of organisation demonstrating the culmination of creative, technical, critical and professional skills gained throughout the degree.

133389 Advanced Sound and Music Technologies 15 credits

In this course students develop skills in advanced sound and music technologies that relate to both studio and live performance settings. Students explore the creative potentials of advanced industry standard hardware and software by applying practical and theoretical skills in a range of relevant musical contexts. Both commercial and experimental applications are explored via inter-disciplinary group projects.

Creative Arts**133390 Creative Arts Special Topic 3A 15 credits**

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

133391 Creative Arts Special Topic 3B 15 credits

Students will produce an advanced creative work that develops an understanding of creative, technical and conceptual approaches.

Music

133701 Prototyping and Development for Advanced Music Projects **30 credits**

Students undertake research toward developing a project relevant to their creative practice. Students learn techniques to produce an early prototype, synopsis, or equivalent concept. This culminates in the preparation of a proposal for their major projects.

133702 Critical Frameworks for Music **15 credits**

Students become competent in situating their work within research methodologies and principles to support their development as critically-informed creative practitioners. Students learn to frame and present their creative practice as research via the development of critical reflexive and analytical skills, and engage in the development of a research proposal for their project.

133703 Contemporary Music Project **15 credits**

Engagement with new thinking in contemporary music research through a specific lecturer-led project.

133803 Advanced Music Research Project **60 credits**

In this course students will undertake research to develop a creative work in music. Students will be guided through a series of seminars and supervised sessions to develop, document and disseminate their research.

133811 Commercial Music 120 credit Thesis Part 1 **60 credits**

Preparation of a thesis consisting of an advanced Commercial Music-led research project and an exegetical component to satisfy the requirements of the Master of Commercial Music qualification.

133812 Commercial Music 120 credit Thesis Part 2 **60 credits**

Continuing preparation of a thesis consisting of an advanced Commercial Music-led research project and an exegetical component to satisfy the requirements of the Master of Commercial Music qualification.

133882 Thesis 120 Credit Part 1 **60 credits**

Development of a research project which includes preparation for, and delivery of a performance. The research and performance components are to be mutually supportive in content.

133883 Thesis 120 Credit Part 2 **60 credits**

Development of a research project which includes preparation for, and delivery of a performance. The research and performance components are to be mutually supportive in content.

133900 PhD Music **120 credits**

134

Philosophy

134101 Knowledge and Reality **15 credits**

An introduction to questions about existence, perception and the mind.

134102 Great Thinkers **15 credits**

This course examines the ideas of some of the 'greats' in Western philosophy, including Socrates, Plato, Descartes, Mill and many others.

134104 Practical Ethics **15 credits**

An examination of ethical issues that arise in everyday life.

134105 Philosophy of Religion: God, Freedom and Evil **15 credits**

An introduction to selected topics from philosophy of religion.

134106 Justice and Equality **15 credits**

An introduction to central issues in political and social philosophy with a focus on theories of justice and equality.

134201 Philosophy of Mind, Consciousness and Cognition **15 credits**

An investigation of many philosophical questions concerning minds, consciousness and language.

134203 Ethics **15 credits**

This course examines the theories that underpin our ethical thinking, developing an understanding of the nature of ethical thinking in general, and the advantages and disadvantages of major ethical theories.

134204 Philosophy of Art and Music **15 credits**

An examination of topics in metaphysics, epistemology, logic, and ethics which arise in aesthetics and the philosophy of art.

134205 Logic **15 credits**

An introduction to modern formal logic using propositional logic and first-order predicate logic. Formal logic provides an important link between the humanities and maths and sciences, particularly computer and information sciences.

134207 Rights and Reconciliation **15 credits**

A study of themes from international political and social philosophy with a focus on the moral status of state boundaries and the moral status of war.

134213 Resistance, Rebellion and Revolution **15 credits**

A philosophical examination of when disagreement with, and opposition to, governmental authority is justified. Using the tools of political philosophy and assessing real-world cases, we discuss the nature, demands, and limits of various types of insubordinate political activity, including (but not limited to) conscientious objection, civil disobedience, secession, and revolution.

134214 Knowledge as a Social Phenomenon **15 credits**

A philosophical examination of the way our social environment influences how we can come to know about the world.

134216 Modern Philosophy **15 credits**

This course will investigate metaphysical and epistemological views of the 17th - 18th centuries, focussing on Descartes, Leibniz, Locke, Berkeley and Hume. It will pay particular attention to early modern notions of causation.

134218 Environmental Philosophy **15 credits**

This course uses philosophy to explore contemporary environmental issues, such as whether our concern for environmental well-being can be adequately grounded in a concern for human well-being, and responses to global conversations around sustainability and 'the rights of nature'.

134220 Business and Professional Ethics **15 credits**

An examination of the practice of ethical reasoning with special concern for issues that arise in business and professions.

134221 Great Asian Thinkers **15 credits**

A detailed investigation and analysis of the major philosophical systems which have developed within East Asia since the first millennium Before Common Era.

134305 Advanced Ethics **15 credits**

The course will investigate issues to do with moral psychology, practical reason, moral language, and moral ontology.

134308 Philosophy of Science **15 credits**

An investigation of fact and theory, explanation and discovery, and of modern attempts to improve on naïve empiricist accounts of science.

134309 Ancient Philosophy **15 credits**

An examination of ancient philosophies, particularly those of Socrates, Plato and Aristotle.

134311 Global Justice **15 credits**

Exploring contemporary philosophical issues of justice as they arise within and between communities globally, including indigenous philosophies and communities.

134317 Philosophical Investigations **15 credits**

A consideration of some of the most influential philosophers from Kant to the present.

134703 Ethics of War and Peace **30 credits**

Topics to be discussed include: the nature of moral reasoning, the ethics of killing in self-defence, just war theory, the ethics of nuclear deterrence, holy wars, war crimes and collective responsibility, non-violent resistance, and the ethics of pacifism.

134710 Philosophical Research 30 credits

A study of key issues in the practice of philosophical research and development of a philosophical research project.

134740 Advanced Study of Philosophical Topics 30 credits

An in-depth study of selected philosophical topics at an advanced level from epistemology, metaphysics, theories of mind, or value theory.

134750 Advanced Study of Philosophical Texts 30 credits

A detailed examination of selected philosophical texts at an advanced level.

134760 Advanced Philosophical Inquiry 30 credits

This course will provide an opportunity for graduate students to engage in an advanced course of study in an area of current philosophical research.

134798 Research Report (30) 30 credits

A supervised and guided independent study.

134799 Research Report (60) 60 credits

A supervised and guided independent study.

134816 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

134817 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

134873 Research Report Philosophy (60) 60 credits

A supervised and guided independent study.

134881 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

134882 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

134883 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

134899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

134900 PhD Philosophy 120 credits**137****Banking Management****137900 PhD Banking 120 credits****138****Agricultural Engineering****138106 Agricultural Engineering 15 credits**

A study of basic engineering principles as they apply to design and operation of agricultural buildings and structures, farm water, refrigeration and heating, fencing and subdivision, waste management; the utilisation of modern technologies in agriculture; and the Resource Management Act and how that affects agricultural businesses.

138255 Applied Engineering in Agriculture and Horticulture Systems 15 credits

Engineering principles underpinning the systems used in the growing, harvest and post-harvest treatment of agricultural and horticultural products. Emphasis is placed on deriving the system performance specification following consideration of capacity, product quality and safety, and ecological requirements.

138301 Precision Agriculture Technologies 15 credits

Knowledge of remote and proximal sensing, and precision livestock techniques to provide information to mitigate environmental impacts under intensive farm production systems. Consideration of issues of resource use,

optimisation of farm production and environmental performance of primary industries.

138900 PhD Agricultural/Horticultural Engineering 120 credits**139****English****139104 Drama in Performance 15 credits**

An exploration of three plays in performance. Students will study theories and conventions of performance and will participate in theatrical presentations. No previous experience of theatre is required.

139109 Prize-Winning Fiction 15 credits

A study of short stories, novellas and novels from the last 50 years emphasising the varieties of award-winning fiction.

139111 Podcasting: Producing Audio Stories 15 credits

An introduction to the genre of audio storytelling with podcasts. Students will analyse the storytelling techniques employed in the narrative nonfiction podcast genre and use these techniques in the production of their own podcast episode.

139123 Creative Writing I 15 credits

An exploration of the processes involved in writing poetry and short stories. Students learn the fundamental elements of craft, such as metaphor, structure and plot, through the close reading of published poetry and fiction, through their own practice as creative writers, and through providing and receiving workshop feedback.

139133 Creative Communication 15 credits

An introduction to the dynamics involved in creative communication. Students explore creative communication through work in, and analysis of, three creative forms: creative writing, theatre and digital media production.

139139 Introduction to English Literature 15 credits

An introduction to the nature and functions of literary texts and the ways in which they are invested with meaning, with a focus on the skills necessary for reading and writing critically about them.

139142 Imaginary Worlds: Science Fiction and Fantasy 15 credits

An examination of selected science fiction and fantasy texts, emphasising their relationship to changing cultural contexts and the ways different storytelling media mould narratives.

139202 Romantic Writing: Self and Nature 15 credits

A study of the relationship between self and nature as explored in texts by British writers of the period 1780-1830.

139209 Speaking: Theory and Practice 15 credits

A study of the theoretical and practical aspects of public speaking. Attention will be paid to building a rapport with an audience, to the preparation of material for spoken delivery and to the technical elements of voice production.

139211 Shakespeare 15 credits

A study of selected dramatic works by William Shakespeare, taking a thematic overview across a variety of dramatic genres and considering the plays in their original contexts as well as significant contemporary interpretations.

139220 Theatre for Change 15 credits

An applied introduction to the varied ways in which theatre is used for social and personal change.

139223 Creative Processes 15 credits

An investigation of human creativity that involves the study of creative practice and the making of original works of performance, film and writing.

139224 Making Plays for Theatre 15 credits

Students will receive a grounding in the skills of writing experimental theatre and an opportunity to employ these skills in the creation of original scripts.

- 139225 Writing for Children** **15 credits**
An intermediate-level introduction to the craft of writing targeted at 'middle readers' – roughly 9-13 years – across a variety of forms.
- 139229 Writing Poetry** **15 credits**
A creative writing course in which students develop and advance poetry skills within the major modes of lyric poetry and within the context of a more advanced engagement with fundamental elements of craft. In addition to reading poetry and critical essays on the genre, students will write original poetry and critically review their own work and the work of peers.
- 139231 Health Writing: Theory and Practice** **15 credits**
An introduction to the theory and practice of writing on health and illness. It includes intensive practice in composing for diverse health genres and publications and in analysing the ways consumers obtain and process information about health developments and controversies.
- 139232 Crime Story: Detection as a Narrative Genre** **15 credits**
A study of the fundamental elements of crime stories and the social significance of crime as a narrative genre in relation to questions of social order, law and justice.
- 139239 Literary Landmarks: Words that Changed the World** **15 credits**
An introduction to reading, thinking, and writing about literature from the past four centuries, with a focus on the way that literary texts reflect and engage with the historical, social, political and cultural contexts in which they were written.
- 139244 Writing for the Public** **15 credits**
A course in writing non-fiction genres for the public, informed by a broad historical understanding of the emergence of the public sphere and its current reshaping in the digital age. Students apply rhetorical theory and theories of argument in their own writing and in analysing works by selected public intellectuals.
- 139253 American Literature** **15 credits**
An introduction to American literature, focusing on key novels, short stories and poems from the Romantic period through to the postmodern, and their relation to their historical and cultural contexts.
- 139255 Critical Periods in Aotearoa New Zealand Literature** **15 credits**
An introduction to New Zealand's literary history, focusing on important novels, short stories and poems in relation to their social and political contexts.
- 139270 Young Adult Fiction** **15 credits**
A study of young adult fiction and its reception. Focussing on classic and contemporary examples, the course explores the definition of the genre and its characteristic concerns, with a focus on case studies of popular and controversial texts.
- 139280 Creative Writing II: Creative Nonfiction** **15 credits**
An intermediate-level introduction to the craft of nonfiction writing in a variety of genres, with a particular focus on the application of techniques usually associated with fiction and poetry to nonfiction material.
- 139285 Fiction Writing** **15 credits**
An intermediate-level study of the craft of fiction, investigating a range of forms by means of creative production, workshoping and peer review.
- 139303 Modern Drama** **15 credits**
A study of innovative modern plays, by means of investigative workshops, theatrical performances, lecture/demonstrations and seminar presentations.
- 139305 Twentieth Century Literature** **15 credits**
A study of a variety of twentieth-century fiction and poetry. Emphasis will be given to aspects of literary modernism and postmodernism in order to contextualise the literary works.
- 139306 Writing Shakespeare's England** **15 credits**
An advanced exploration of the Early Modern poetry and drama of Shakespeare's contemporaries, focusing on key themes, prominent genres, and the differing contexts of the royal court and the new world of the empowered citizen.
- 139307 Territory, Modernity, and Victorian Literature** **15 credits**
An advanced introduction to Victorian literature, highlighting the engagement by nineteenth century writers with questions of liberalism, democratisation, and the expansion of the British empire.
- 139309 Eco-fictions and Non-fictions** **15 credits**
A study of the relationships between creative writing and ecological concerns, covering a range of contemporary forms from eco-fictions, nonfictions, or poetry, to nature writing, to animal stories. It engages students in the workshoped production of original creative work.
- 139320 Theatre in Production** **15 credits**
This course studies theatre as an expressive art, with a focus on processes of adaptation, particularly the creation of new texts from old. It combines critical and practical research, including the presentation of a developed stage work, to examine how design, music and acting generate meaning in the performance of a text.
- 139323 Script Writing** **15 credits**
An in-depth study of the skills, formats, technique and terminology of professional script writing, with emphasis on the adaptation of traditional approaches across the diversity of contemporary media.
- 139325 The Gothic Imagination** **15 credits**
A study of the term 'Gothic' in literature and film, relating the enduring Gothic themes of fantasy, the unconscious and death to contemporary literary and social debates.
- 139326 Travel Writing** **15 credits**
A study of travel writing, involving both critical and ideological analysis and creative writing developed from the students' own field work.
- 139329 Advanced Fiction Writing** **15 credits**
An exploration of the poetics and politics of experimentation and subversion in contemporary fiction and metafiction including analysis of the work (both creative and critical) of major practitioners, theorists and original student compositions.
- 139333 Creativity in the Community** **15 credits**
The course provides an applied service learning project in the disciplines of expressive arts and media studies. Working collaboratively, students apply skills in theatre, performance, film-making, creative writing, media practice or mixed media to developing a creative response to a social issue or community need.
- 139340 The Publishing Project** **15 credits**
In this course, students study and experience the principles, processes and practice of publishing, through the co-production of an online publication. Key concepts include teamwork, co-production, theme selection, peer review, production scheduling, source selection, and online publishing.
- 139352 Postcolonial Literature** **15 credits**
A study of late-nineteenth and twentieth century novels in English, from diverse cultures, paying special attention to the ways in which these address the consequences of European colonisation. Recent postcolonial theory will provide a frame for textual analysis.
- 139362 Oceanic Literatures of Aotearoa: Ngā Tuhinga Kōrero o te Moana nui a Kiwa** **15 credits**
A study of contemporary Oceanic (Māori and Pasifika) literature in English contextualised in relation to customary and pre-colonial Oceanic literatures, narratives, and storytelling methods.
- 139376 Sexual/Textual Politics** **15 credits**
A study of patriarchal society and gender identity in selected literary texts.
- 139380 Creative Writing III: Starting Your Manuscript** **15 credits**
An advanced study of the process of writing that consolidates knowledge of creative writing craft, expands understanding of genre, and analyses aesthetic and/or cultural aspects of published manuscripts across genres. The first portion of an envisioned full-length creative manuscript will be drafted with an emphasis on the critical evaluation of its aesthetic and/or cultural implications.
- 139703 Critical and Creative Research** **30 credits**
An introduction to practices of research with creative texts. Students will learn practical techniques for planning and producing research in critical and/

or creative modes. Fostering a critical voice and debating the cultural and social value of aesthetic communication will be integral to the course.

139710 Rhetoric, Composition and the Teaching of Writing 30 credits

An advanced introduction to rhetoric and composition as a framework for writing research and writing instruction.

139724 Literary Revolutions: Romantic and Victorian Literature 30 credits

A study of literary culture in Britain and the Pacific during the Romantic and Victorian periods. This course explores relationships between poetry, novels, travel writing and political treatises in the period, focusing on the distinctive nature of literary engagements with contemporary social and political upheavals.

139728 Early Modern Drama: Form and Performance 30 credits

An advanced study of the drama of Early Modern England and the significant social, artistic, political and religious forces that shaped it. The course will examine plays by Shakespeare and his contemporaries, investigating their material and cultural contexts using critical approaches that highlight questions of dramatic production and reception.

139749 Writing Science 30 credits

An in-depth exploration of the practical skills needed to write for disciplinary academic and/or public audiences. Particular emphasis will be placed on the rhetorical context of science, audience analysis, literacy expertise, reading science, and narrative use of data and analogies when writing in a public or professional context. Students may focus their assignments on writing for disciplinary and/or public audiences.

139750 Contemporary New Zealand Writers in an International Context 30 credits

An advanced exploration of contemporary New Zealand fiction and poetry and its relationship to international aesthetic practices, in the context of globalisation and postcoloniality.

139758 Postcolonial Theory and Writing 30 credits

An advanced introduction to theories of postcolonial ethics and identity, and their relationship to selected works of literature from a range of postcolonial contexts.

139763 Community Theatre 30 credits

What role does theatre have in the community? Is there a valid place for community theatre in a secular society? If so, what stories need to be told through theatre? How might we tell them? The exploration of these questions will involve, initially, the examination of a range of historical and contemporary models of community theatre. Students will then engage in exploratory workshops, in community research, writing, rehearsals and theatrical performance.

139764 Theatre for Innovation and Communication 30 credits

An advanced, practical exploration of theatrical improvisation techniques in relation to enhancing creativity, innovation, leadership, teamwork, and communication performance, with an emphasis on the application of theatrical techniques to communication and innovation challenges.

139765 Creative Writing Workshop 30 credits

An advanced study and practice of creative writing in its myriad contemporary forms.

139799 Research Report (30) 30 credits

A supervised and guided independent study.

139816 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

139817 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

139850 Thesis 120 credits

The supervised undertaking of an original piece of research into expressive arts.

139851 Thesis 120 Credit Part 1 60 credits

The supervised undertaking of an original piece of research into expressive arts.

139852 Thesis 120 Credit Part 2 60 credits

The supervised undertaking of an original piece of research into expressive arts.

139855 Master of Communication Research Project 60 credits

An applied research project involving the critical evaluation and application of selected research methodologies to address communication-related challenges.

139860 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

139861 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

139862 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

139873 Research Report English (60) 60 credits

A supervised and guided independent study.

139881 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

139882 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

139883 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

139899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

139900 PhD English 120 credits

139901 PhD Creative Writing 120 credits

141

Food Technology

141127 Dairy Processing 15 credits

141140 Dairy Chemistry 15 credits

An introduction to milk composition, the underlying chemistry of milk constituents and their properties in dairy ingredients and products. The effects of processing on the chemical properties of milk components, including deleterious reactions impacting milk quality will also be considered.

141141 Dairy Engineering 15 credits

An introduction to the key engineering fundamentals relating to the manufacture of dairy ingredients and food products, providing an exploration of thermal, mechanical and energetic principles involved in the handling of milk streams, and the application of these as part of process design and plant operation.

141144 Dairy Processing 15 credits

An introduction to the processing principles underpinning the handling and treatment of milk, and with particular consideration of the design and specifications of the main processing systems and their integration as part of dairy ingredient and food manufacture.

141211 Food Product Development Principles 15 credits

The development of new and improved products is a key role of most practising food technologists. This course provides the structured process and tools required for successful product development in the context of an applied project.

141212 Food Manufacturing Principles 15 credits

The design, development and on-going operation of manufacturing processes is central to the daily activities of most food technologists. This course explores the key variables that impact the design, development and operation of food manufacturing processes within the context of an applied project.

141240 Dairy Processing Technology**15 credits**

An evaluation of the types and roles of processing unit operations as utilised in dairy manufacture. Aspects of equipment design and application of thermal and mechanical treatment in the processing of liquid milk, ingredient, and product streams will be reviewed. Consideration will be given towards the control and optimisation of process variables along with the integration of process flows in the manufacture of dairy ingredients.

141241 Dairy Engineering**15 credits**

A study into the underlying engineering fields and technologies that form the basis of dairy processing and plant operations. Specific consideration will be given to the derivation, calculation and measurement of energetic, thermal, and mechanical principles as applied in the design and operation of dairy manufacturing systems.

141242 Dairy Microbiology and Food Safety**15 credits**

An introduction to the role of microbiology in the handling of milk streams and the manufacture of dairy materials. The course will provide an exploration of the classification and identification of bacteria, their reproduction and growth; pathogens and food poisoning micro-organisms; bacteriology of milk and milk products; thermal processes for controlling micro-organisms and the application cleaning-in-place technology.

141243 Dairy Ingredient Technology**15 credits**

This course continues the study of the key processing operations and handling of milk streams in the specific production of dairy ingredients systems, i.e. milk and protein powders and anhydrous milk fat. Emphasis will be given to the design and manufacture of functional ingredient systems, as well as the optimisation of processing operations for ensuring requisite quality and safety of dairy ingredients.

141245 Dairy Product Technology**15 credits**

An immersive study of the manufacture of dairy food products, including butter, UHT creams, yogurt, cream cheese and ice cream. Emphasis will be given to the role of formulation-process interactions in defining product properties, notably the functional role of dairy ingredients in related foods. Practical considerations for the characterisation of dairy foods in determining quality, safety and shelf life will also be explored.

141246 Cheese and Whey Technology and Manufacturing**15 credits**

An introduction to the industrial manufacture of cheese, including the transformations of raw materials through processing, microbiological and biochemical transformations and their impact on product quality and properties. The role of technologies associated with the manufacture of whey and other cheese byproducts will also be explored.

141247 Dairy Manufacturing Principles**15 credits**

A project-based course: students will apply their accrued knowledge of dairy technology to undertake an industry relevant technical project. Students will be required to define project objectives, evaluate relevant supporting literature, implement and execute an experimental plan and analyse findings in provision of appropriate recommendations and conclusions.

141311 Food Microbiology and Safety**15 credits**

A project-based course aimed at providing the skills and knowledge to select appropriate food processing, storage and testing methods necessary to understand the growth and control of microorganisms to ensure food safety and quality. Specific components of food analysis and risk assessment will be applied to develop analytical and problem solving skills in an industry relevant scenario.

141312 Food Characterisation**15 credits**

A project-based course developing the selection and utilisation of food characterisation methodologies in assessment of food/ingredient function, quality and stability. The course will focus on instrumental and sensory methods of assessing structure, appearance, flavour and texture of a variety of food products. Assessment and characterisation tools will be used to develop analytical and problem solving skills in industry relevant scenarios.

141320 Dairy Chemistry**15 credits**

A study in the properties of milk, its biological function and chemical composition. The structure and assembly of milk protein, lactose and lipids from molecules to materials will be investigated. The relationship between dairy composition, application and product performance will also be established.

141321 Dairy Ingredient Technology**15 credits**

An immersive investigation into the manufacturing operations applied in the production of dairy ingredients, focussing on dairy powders (milk, protein and lactose) and milkfat. The role of processing technologies and their integration in transitioning liquid milk streams to commodity materials will be explored. The relationship between process control and ingredient performance will be established, as well as the application of methodologies for determining ingredient quality and properties.

141322 Dairy Product Technology**15 credits**

A detailed study of the processing pathways and compositional requirements as applied to the manufacture of select dairy foods. The assembly of ingredients via processing into food structures and the relationship of these to material and functional properties will be demonstrated as part of the production and evaluation of commercially relevant dairy products. Methodologies for determining the impact of process-formulation design on product properties and performance will be applied as part of product characterisation.

141323 Cheese and Whey Technology**15 credits**

An evaluation of the manufacturing principles applied in the industrial production of cheese and derivative products. Includes the process flows involved in the separation and utilisation of whey as part of the cheese processing stream. Relationships between milk composition, process conditions and cheese type will be established. Within this context, the development of cheese structure as an outcome of microbial and enzymatic transformations will be determined and related to material and functional properties.

141324 Dairy Manufacturing Principles**15 credits**

An analysis of generic manufacturing tools that apply to all aspects of dairy production. These will include the basic principles of HACCP analysis and its implementation within operational settings; a practical analysis of environmental planning management as part of dairy production; and an overview of continuous improvement systems and methodologies used as part of quality assurance within industrial manufacturing settings.

141358 Nutrition and Food Choice**15 credits**

Nutrient recommendations, nutrition and disease, New Zealand diet, functional foods, food choice, ethical and legal aspects of the food industry response in relation to nutrition claims and concerns.

141362 Food Formulation Technology**15 credits**

A study of the physico-chemical properties of food ingredients and their interactions in food systems. Selection of suitable ingredients in food formulations, in particular, stabilisers, thickeners, gelling agents and emulsifiers. Understanding of the destabilisation mechanisms of complex food systems in relation to the ingredients used. A practical course.

141395 Food Chemistry**15 credits**

A practical approach to the physical, chemical, biochemical and functional properties of major and minor food constituents (water, proteins, carbohydrates, lipids, vitamins, minerals, pigments, flavours, toxins) and food groups (dairy, meat, eggs and plants). Chemical and biochemical reactions causing deterioration in foods and some methods of control. A laboratory course.

141708 Food Packaging, Preservation and Storage**15 credits**

Application of a multi-disciplinary approach drawing from microbiology, chemistry, reaction kinetics, process engineering and packaging technology to the development, evaluation and optimisation of preservation processes, packaging technologies, and storage and supply chain systems for fresh and manufactured food products.

141709 Emerging Technologies for the Food Industry**15 credits**

In depth case-studies of the principles and modelling of novel food processes, including an appraisal of the advantages and disadvantages compared with established processes. New developments in the preservation of foods, the structuring of foods, the separation of food materials and packaging, storage and handling of foods can be studied.

141710 Food Packaging Engineering and Legislation**15 credits**

The properties of packaging materials and requirements of labelling/legislation and the implications of choice on product shelf life, integration with processing, transport, traceability and information systems, and impact on consumer interaction with the product, sustainability and product cost are explored as part of this course.

141712 Strategic Food Product Development 15 credits

This course provides a strategic overview of the food product development process from the initial new product strategy and its influence on identification of product opportunities through to the actual launch of the finished food product and its influence on the launch strategies and tactics adopted by a company.

141715 Food Ingredient Functionality 15 credits

A course based on the physico-chemical properties of food ingredients impacting on the: (i) stability and sensory properties (technofunctionality) and (ii) health properties (biofunctionality) of foods. A good understanding of the food destabilization mechanisms, and how to control key food reactions, will be gained. Special emphasis will be given to dairy products (dispersions, emulsions, foams and gel systems).

141720 Advanced Food Quality 30 credits

Critical reviews, case studies, advanced study and/or research into selected aspects of food quality.

141723 Industrial Systems Improvement 15 credits

This course covers: innovation and operations management within food industry production and supply chain systems; design, planning, control and continuous improvement of processes in industrial systems; methods and measures for quality control and daily decision-making in food and related businesses; and leadership and management of teams in the workplace.

141724 Food Quality Safety and Innovation 15 credits

This course will cover risk assessment and management techniques that can be applied to any sector of the food industry, important in the development of a new food product to ensure the development of safe foods of high quality and appropriate cost. The legal and commercial justification for ingredients, preservation, processing, packaging and distribution technologies will be taught.

141725 Food Business Innovation 15 credits

This course will comprise a series of case studies and business simulations of entire food value chains emphasising ingredient and FMCG information flows, the nature and mechanisms of FMCG retail channels and command of shelf space. Strategies will be designed for coping with sector dynamics and changing regulatory constraints for innovation dominated by technical or by business process change.

141744 Dairy Science, Technology and Engineering 15 credits

Specialised aspects of dairy chemistry, microbiology, process technology, engineering. Project and plant management. Product evaluation, product and process development. Dairy industry structure, strategy, organisation and function. Legislation and safety. A practical course.

141746 Dairy Products Technology 30 credits

Case studies in which the technology and control of the manufacture of appropriate dairy ingredients and products such as cheese, butter, milk powder, casein and whey protein are examined. A practical course.

141749 Food Engineering Research Project 30 credits

Students apply their problem-solving skills and accumulated knowledge to a specific Food Engineering research problem. This is an individual, scholarly research project conducted under academic supervision. Projects are either sourced from industry or are related to ongoing research and development activities at the university.

141751 Dairy Products Technical Projects 30 credits

Acquirement and utilisation of specialised technical knowledge, research skills and competencies through the undertaking of projects pertaining to the investigation and critical analysis of dairy industry structure and its products and processes. A practical course.

141755 Added-Value Processing of Food Products 15 credits

A study of the latest manufacturing techniques applied to the food industry and their role in satisfying current and future needs for food manufacturers and consumers. A course designed to integrate food science, process engineering, microbiology and food safety into today's food manufacturing environment with processing practices in order to offer novel methods to formulate foods and assure safety and quality.

141759 Food Technology Project 30 credits

An original investigation of a food industry problem or opportunity. The student works under academic supervision within an industrial research brief

and learns from practice, systematic skills in problem analysis, research and communication. Consideration of ethical, legal and social environments. This major project integrates knowledge the student has already acquired.

141772 Innovative Food Design and Development 30 credits

Students will commercialise an innovative food product from idea generation through to the business case for full-scale manufacture. The emphasis is on following a formal, systematic process that utilizes both qualitative and quantitative analysis techniques, within a realistic commercial context. Critical evaluation of the product development outcome and process from commercial, technical, and professional perspectives is an important component.

141791 Advanced Food Technology 15 credits

An integrative study of food systems. Individual and group problem-based learning is used to understand political, economic, societal and technological forces shaping the global food industry. Additional aspects of the course focus on interactive project-based activities aimed at honing market awareness, product development and food production skills and competencies. Proficiency in the selection and application of appropriate tools and methodologies for quality assurance and evaluation will also be developed.

141794 Special Topic 15 credits**141797 Food Engineering Design 30 credits**

Students will design an innovative factory-scale food manufacturing process based on a product specification. The emphasis is on following a formal, systematic methodology that makes appropriate use of both mathematical modelling and empirical data, within a realistic commercial context. Critical evaluation of the design outcome and process from commercial, technical, and professional perspectives is an important component.

141803 Research Report: Food 60 credits

Research in a defined area of Food Science, Technology or Engineering.

141805 Thesis 120 credits

Research in a defined area of Food Science, Technology or Engineering.

141806 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

141807 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

141848 Dairy Science and Technology Research Project 45 credits

An original research project that encourages integration of knowledge and practice of skills gained in the other courses. A rigorous scientific investigation applied to delivering technical solutions to industry defined objectives.

141900 PhD Food Technology 120 credits**142****Process and Environmental Technology****142018 Practicum I 0 credits**

A written report on a period of practical work demonstrating an understanding of industry structure and also the legislative elements that affect the meat industry.

142019 Practicum II 0 credits

A written report on a period of practical work experience demonstrating an understanding of process technology in the meat industry and its application.

144**Public Policy****144900 PhD Public Policy 120 credits**

Geography

145111 Society, Environment and Place 15 credits

An introduction to the diversity of human geography focusing on themes such as state and economy; geography of consumption; identity and exclusion; agrifood; migration; geographies of the lifecourse.

145120 Geographies of Aotearoa/New Zealand 15 credits

An introduction to the changing social and environmental geographies of Aotearoa New Zealand. Highlighting the spatial outcomes of local, national and global processes, the course will cover themes such as the spatial distribution of climate change effects, the diverse social and physical landscapes of Aotearoa, and local and regional economies. Key geographical concepts – place, space, flows and connections – will be introduced and drawn on to deepen understanding of the ways in which the landscapes of Aotearoa – as integrated human and physical environments – have changed, and continue to change. A decolonial lens – meaning one that honours Te Tiriti relationships and obligations, and explicitly contests the ongoing impacts and legacies of Aotearoa's colonial history in terms of society, landscapes and knowledge construction – will help illuminate the contemporary challenges facing the diverse peoples and landscapes of Aotearoa.

145202 Working With Geographic Data 15 credits

An exploration of techniques for the collection, interpretation, analysis and representation of social and environmental geographic data using geographic information systems (GIS).

145203 Geographies of Inequality 15 credits

This course will consider how economic and social inequality is reproduced across space.

145213 Resource Conservation and Sustainability 15 credits

Various distinctly geographical approaches to resource conservation are discussed. Topics include: environmental change, human impact, renewable and non-renewable resource conservation, and the role of the state.

145214 Social Change and Environment 15 credits

Exploration of the theme of social change and environment with reference to world systems and imperialism studied from a historical geography perspective and focusing on New Zealand.

145216 Urban Environments 15 credits

An examination of aspects of the social, economic and political geographies of urban life, drawing upon various approaches in Human Geography.

145300 Cartography and Data Visualisation 15 credits

A course in geographic information systems (GIS) focusing on the use of digital geospatial information for cartographic presentation and data visualisation.

145301 Research Practice in Human Geography 15 credits

An introduction to theoretical approaches in human geography, research design and qualitative methodology and techniques. There is a compulsory fieldwork component.

145311 Geographies of Globalisation 15 credits

The course explores processes of globalisation emphasising spaces and agents of global change, and global-local connections across a variety of topics.

145318 Geopolitics 15 credits

An advanced study of geopolitics, emphasising geographical processes across a variety of topics.

145707 Economic Geography 30 credits

Several themes are examined in relation to the geography of advanced capitalism at global, national and intra-urban scales. Within this broad framework students are encouraged to develop personalised courses of study which reflect their individual interests.

145710 Consumption and Place 30 credits

This course explores consumption processes, practices and places. Using a number of themes it encourages students to engage with relationships between

production and consumption, cultural and economic change, and matters of identity and ethics.

145711 Foundations in Human Geography 30 credits

An advanced exploration of the history of geographical thought, critically assessing key debates that have shaped the field and examining geographical theory and methodology.

145712 Frontiers in Human Geography 30 credits

An advanced examination and exploration of contemporary issues and debates in human geography.

145739 GIS Principles and Applications 30 credits

A conceptual and operational understanding of Geographic Information Systems (GIS). This course provides a postgraduate-level introduction to fundamentals of spatial data creation, manipulation, management, visualisation and analysis.

145740 GIS Programming and Practice 30 credits

This course focuses on principles and practices of programming within the GIS context. Issues in GIS project design and implementation are addressed.

145790 Applied Geography Project 15 credits

Engagement in a self-directed geography project with supervision.

145799 Research Report (30) 30 credits

145870 Research Report 60 credits

145871 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

145872 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work

145873 Research Report Geography (60) 60 credits

145875 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

145881 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

145882 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

145883 Thesis 90 credits

A supervised and guided independent study resulting in a published work

145897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

145898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

145899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

145900 PhD Geography 120 credits

Social Anthropology

146101 Understanding Cultural Difference 15 credits

An introduction to key contemporary topics and concepts in the discipline.

146102 Endangered Cultures 15 credits

An introduction to the impact of modern civilization on indigenous peoples based on ethnographic case studies and historical analysis.

146201 Making the Self 15 credits

An exploration of how concepts of the self, person, and individual vary across cultures.

146202 Migration and Belonging	15 credits	146817 Thesis 120 Credit Part 2	60 credits
An anthropological study of how increasingly rapid mobility impacts socially and culturally on communities and individuals.		A supervised and guided independent study resulting in a published work.	
146203 Religion, Nature and Sustainability	15 credits	146873 Research Report (60 credits)	60 credits
An anthropological study of a range of religions, understandings of nature, and practices of sustainability.		A supervised and guided independent study resulting in a report.	
146204 Following the Monsoon	15 credits	146881 Thesis 90 Credit Part 1	45 credits
An introduction to the contemporary anthropology of Monsoon Asia, with an emphasis on environmental factors		A supervised and guided independent study resulting in a thesis.	
146205 Environmental Anthropology	15 credits	146882 Thesis 90 Credit Part 2	45 credits
An exploration of contemporary approaches in environmental anthropology.		A supervised and guided independent study resulting in a thesis.	
146209 Food and Eating	15 credits	146883 Thesis	90 credits
This course explores the food chain, from production, through consumption, to exchange. It considers the ways in which food is implicated in the reproduction of identities and inequalities.		A supervised and guided independent study resulting in a thesis.	
146210 Anthropology of Ritual, Religion, and Witchcraft	15 credits	146899 Thesis	120 credits
A cross-cultural study of selected topics in the anthropology of ritual and religion including rites of passage, witchcraft, sorcery, myth, magic, spirits, death, symbols, ancestors, altered states of consciousness, and shamanism.		A supervised and guided independent study resulting in a published work.	
146211 Systems of Healing	15 credits	146900 PhD Social Anthropology	120 credits
A study of the variety of ways that people throughout the world address the problems of illness.			
146300 Anthropological Enquiry	15 credits		
A critical exploration of the role of theory in anthropology, key theoretical frameworks and the practice of theorising ethnography.			
146301 Practicing Fieldwork	15 credits		
An experiential course including practical exercises, designed to provide students with knowledge and skills to conduct anthropological fieldwork in a local context using a range of ethnographic methods.			
146308 Taking Anthropology to the World	15 credits		
This course aims to workshop and assemble a professional portfolio applying anthropological knowledge and skills to respond to real world/topical issues, local and global.			
146309 The Ethnography of Aotearoa New Zealand	15 credits		
This course critically explores the ethnography of Aotearoa New Zealand. It considers ethnography as a way of “knowing” Aotearoa New Zealand and what that means for how Aotearoa New Zealand is analysed and represented.			
146310 Science, Culture, and Politics	15 credits		
Cross cultural understandings of how scientific ways of ‘knowing’ operate [politically] in the world.			
146701 Contemporary Approaches in Anthropological Theory	30 credits		
A study of current theoretical issues and debates in social anthropology.			
146703 The Practice of Anthropology	30 credits		
A study of the methodological and ethical dimensions of anthropological research.			
146707 Reading and Writing Ethnography	30 credits		
Students in this course will examine contemporary exemplary ethnographies and develop their own ethnographic writing practices.			
146708 Anthropology Today: Current Issues	30 credits		
Based on a close reading of an issue of a contemporary social anthropology journal, students in this course will explore current issues, topics and debates in social anthropology.			
146798 Research Report (60)	60 credits		
146799 Research Report (30)	30 credits		
146816 Thesis 120 Credit Part 1	60 credits		
A supervised and guided independent study resulting in a published work.			

147

Rehabilitation Studies

147101 Rehabilitation Studies	15 credits
An introduction to the principles and practices of rehabilitation. The processes of rehabilitation are explored with particular reference to the International Classification of Functioning, Disability and Health (ICF). Emphasis is placed on exploring a person-centred approach to rehabilitation.	
147102 Whakapiri: Engagement in Mental Health and Addiction Work	15 credits
The course provides an introduction to mental health and addiction with a focus on Aotearoa New Zealand. Attention is given to the social context of mental health and wellbeing. Students are introduced to mental health as a human right, processes of engagement and brief intervention in mental health and addiction work.	
147201 Issues in Rehabilitation	15 credits
A study of major issues related to rehabilitation processes and practices. Students will examine rehabilitation in relation to personal, social and environmental factors and be introduced to terms, concepts and models related to disability, age, gender, culture, legal and political contexts, family and society, advocacy and inclusion.	
147202 Mental Health Promotion	15 credits
The course covers the rationale and principles of promoting mental health in Aotearoa New Zealand and globally. Attention is given to key concepts and frameworks underpinning this area of practice.	
147204 Whakamahi: Introduction to Mental Health and Addiction Placement	15 credits
A 50-hour supervised placement in a mental health and addiction service, with a focus on understanding and illustrating the Foundation (Essential) Competencies outlined in the Drug and Alcohol Practitioners Association of Aotearoa New Zealand (DAPAAANZ) Addiction Intervention Competency Framework.	
147302 Alcohol, Other Drugs and Addiction	15 credits
A focus on alcohol, other drug use and addiction in Aotearoa New Zealand, emphasising harm reduction and health promotion as intervention tools. Students will develop a critical understanding of the aetiology and epidemiology of drug use and addiction, the co-existence of conditions with addictions, and effective legal, public policy and treatment responses to reducing harm.	
147303 Case Management and Rehabilitation Counselling	15 credits
An investigation of the major theories, frameworks, support systems and practices employed in rehabilitation counselling, case management, and vocational rehabilitation. Emphasis is placed on assessment, vocational and avocational rehabilitation, and interprofessional practice.	

Health

147304 Health Services Navigation **15 credits**

A critical examination of health services navigation and the role of navigators/connectors within complex health services systems.

Rehabilitation Studies

147305 Whakamana: Change Agency in Mental Health and Addiction **15 credits**

Principles underpinning mental health and addiction work in Aotearoa New Zealand are applied through the whakapiri, whakamārama, whakamana framework to enable students to become agents of social inclusion, moving their work beyond knowledge to empowerment, action and sustainability. Students integrate and apply collaborative and reflective practice, critical thinking, coordinated responses, and mana-enhancing approaches to work with tangata whai ora, whānau and communities.

Health

147317 Disability in Society **15 credits**

This course examines the social and political context in which disability is created in contemporary society. Topics covered include models of disability, the disability industry, the disability rights movement, the body, cultural and media representations and the politics of disablement.

Rehabilitation Studies

147817 Thesis 120 Credit Part 2 **60 credits**

A supervised and guided independent study resulting in a published work.

148

History

148116 The Medieval World and its Legacy **15 credits**

An introductory survey course on the history of Medieval Europe examining the development and long term influence of its political institutions, society and culture.

148141 A History of New Zealand's Peoples **15 credits**

This course explores the historical background of the different migrant communities which have made up New Zealand society and their relationships with each other. Students will consider the different experiences and perspectives of iwi, English, Scots, Welsh and Irish migrants and those from Europe and Asia arriving before the 1980s, and of new migrants since that time.

148142 The American Century **15 credits**

This course explores the political, economic and cultural influence of the US on world history from the presidencies of Teddy Roosevelt to George W. Bush, as the United States emerged from two world wars and the Cold War as the globe's dominant political, economic, cultural and military power.

148143 The Past as Entertainment: History Through Movies, Mini-series and Games **15 credits**

The ways in which popular culture shapes our understanding of the past are examined through recent movies, mini-series and games. The course explores the different ways historians and the makers of popular cultures interpret the past.

148217 Victoria's World **15 credits**

A study of the economic, social and cultural history of Britain and its empire from about 1830 to World War I.

148218 The Vikings **15 credits**

A study of Viking contacts in Europe during the 8th-11th centuries, with a focus on the political, economic, social and religious contexts of the migrations to and settlements in the north-eastern Atlantic (France, England, Ireland, Scotland and Iceland).

148220 The Second World War **15 credits**

A survey of the Second World War which is both thematic and chronological.

148221 The Black Death and Other Plagues, 1300-1700 **15 credits**

A study of epidemic disease and its effects in medieval and early modern Europe.

148241 Revolution, Rights and the Atlantic World **15 credits**

This course explores issues of civic and political rights in the Revolutionary Era, 1763-1848.

148242 The Age of Chivalry and Crusades **15 credits**

A study of the cultural, political, and religious dimensions of crusading and chivalry, and their impact on medieval Christian-Jewish-Muslim relations.

148243 The Sixties: Sex and Drugs and Rock and Roll? **15 credits**

This course assesses 'myths and legends' that surround the 1960s; most notably the ideas that the decade witnessed a fundamental shift in social and moral attitudes, witnessed a youth rebellion and ushered in a 'permissive society'. The course will place the origin and legacy of these changes within the larger context of twentieth century history.

148244 The Great War 1914-1918: a Military and Social History **15 credits**

This course examines the social and military history of the First World War. It focuses on the tactics and technology used during the conflict and on the war's impact on society, culture, politics and economics.

148245 Māori and Colonisation **15 credits**

A study of Māori efforts to retain and enhance tino rangatiratanga and mana motuhake since colonisation.

148246 Iwi History **15 credits**

A study of iwi histories, their sources, role in maintaining tribal identity and well-being and use before the Waitangi Tribunal and in Treaty Settlements.

148248 Reformers, Radicals & Revolutionaries: Protest in New Zealand **15 credits**

This course explores protest in New Zealand from 1900 until the present. It examines the role of protest in challenging New Zealand's prevailing values, political elites and policies.

148308 New Zealand Military History: 1899 to 2001 **15 credits**

An investigation of New Zealand's military history in the period 1899 to 2001. The various wars and conflicts are examined in detail as is their impact on New Zealand's politics, society and culture.

148309 The New Zealand Wars **15 credits**

A study of the New Zealand Wars, focusing on the causes, campaigns, historiographical interpretations and consequences, including the investigations of the Waitangi Tribunal and Treaty Settlements.

148310 The Tudors and the Reformation **15 credits**

A study of religious, political and cultural issues related to the Tudor administrations and the Reformation of the English Church during the sixteenth century.

148316 New Zealand Between the Wars **15 credits**

A study of developments in the period between the two World Wars.

148333 The Napoleonic Wars **15 credits**

An analysis of the Napoleonic Wars, 1799-1815, and their impact on politics and society.

148334 Sports History **15 credits**

An analysis of the relationship between sport and society, commencing with the development of sport in Britain during the second half of the nineteenth century, with particular reference to sport and empire, women in sport and commercialism and nationalism in sport.

148339 Court Culture in Late Medieval Europe **15 credits**

The course examines the power, splendour and art of European courts in the Northern Renaissance, focusing on the most splendid of them all: the court of the dukes of Burgundy and its urban context.

148720 Advanced Historiography **30 credits**

An examination of the relationship between ideas about the nature and meaning of history and the writing of history. The course concentrates on groups of historians who have propounded a philosophy of history and have been practitioners of the historian's art.

148730 Advanced Historical Methodology **30 credits**
A study of the theory and practice of historical research methodology.

148799 Research Report (60) **60 credits**
A supervised and guided independent study.

148816 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

148817 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work.

148899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

148900 PhD History **120 credits**

149

Defence and Strategic Studies

149160 Introduction to Military Technology **15 credits**
This course is an examination of the essential elements of military technology and their impact upon warfare.

150

Māori Studies

150001 Foundation Māori Culture **15 credits**
An introduction to the significance of Māori culture, including the principles and implications of biculturalism and Te Tiriti o Waitangi.

150103 Nau mai e noho: Engaging with Māori **15 credits**
This course will equip students with a range of skills to engage with Māori communities including common expressions in te reo, an understanding of key traditional concepts, customary practices (tikanga), the importance of the Treaty of Waitangi and the nature and structure of Māori social and political organisations.

150106 Nga Hanga Whakairo: Traditional Māori Visual Art **15 credits**
An introduction to the scope of Māori art with a view to recognising traditional elementary forms and their significance. Social and cultural dimensions will be considered and Māori art forms from pre-contact times to the present will be examined within the context of a dynamic and changing society.

150107 Mata Puare: Studio IA **30 credits**
An exploration of the principles and elements of design and their application within two-dimensional contexts. The cultural significance of Māori design processes will be examined in order to understand interrelationships between form and content.

150108 Mata Puare: Studio IB **45 credits**
An exploration of the principles and elements of design and their application within three-dimensional contexts. The cultural significance of Māori design processes will be examined in order to understand interrelationships between form and content.

150112 Hauora Tangata: Foundations of Māori Health **15 credits**
An introduction to understanding Māori health within Aotearoa/New Zealand.

150114 He Tirohanga Taketake: Māori Perspectives **15 credits**
An analysis of Māori knowledge, custom and economic foundations. Customary lifestyles will be examined within a context of ritual, philosophy, technology, economic principles, and social organisation in order to understand Māori culture.

150201 Te Kawenata o Waitangi: The Treaty of Waitangi in New Zealand Society **15 credits**
A study of the Treaty of Waitangi background, texts, principles, and application to contemporary New Zealand. There is a particular focus on land, legislation, court decisions, social policies, the environment, constitutional

matters, claims to the Waitangi Tribunal and Treaty settlements. Differing perspectives of hapū/iwi/Māori and the Crown, as well as opportunities for resolution, are explored.

150202 Mauri ora: Māori Wellbeing and Vitality **15 credits**
Cultural understandings of health form the basis for an exploration of cultural, biological, social, economic, environmental and political interactions and their impacts on Māori health.

150204 Mana Māori: Māori and Politics **15 credits**
The study of the nature of Māori politics and political self-determination in contemporary Aotearoa New Zealand. It will explore the avenues through which Māori have sought to realise their political aspirations, particularly in relation to national political institutions, and theoretical perspectives that can assist in the analysis and strategic development of Māori political self-determination.

150205 Kura Mai Tawhiti: Māori Knowledge **15 credits**
An examination of heritage and contemporary Māori knowledges exploring the origins and relevance of traditional belief systems and the contemporary cultural-political contexts of mātauranga paradigms in areas such as research, education, justice, science, business, social development and the environment.

150206 Nga Momo Whakairo: Contemporary Māori Visual Art **15 credits**
An interpretation of the design structures that constitute Māori art from a bicultural perspective together with an examination of the factors that determine stylistic change.

150207 Mata Oho: Studio IIA **30 credits**
An examination of the significance of Māori visual culture with a view to understanding the interrelationships between form and function within 'traditional' and 'contemporary' contexts. Advanced development of media and processes within two-dimensional frameworks.

150208 Mata Oho: Studio IIB **45 credits**
An examination of the significance of Māori visual culture with a view to understanding the interrelationships between form and function within 'traditional' and 'contemporary' contexts. Advanced development of media and processes within three-dimensional frameworks.

150235 Whakamārama: Approaches to Māori Mental Health and Addiction **15 credits**
Principles underpinning Māori mental health and addiction work in Aotearoa New Zealand will be applied in the development of a social inclusion approach to mental health and addiction work across the life-course and in a range of settings. A hauora approach is used to focus on engagement, prevention, and early intervention with tangata whai ora, whānau and communities.

150301 Te Mana Te Kawanatanga: Māori Policy and the State **15 credits**
Recent policies, legislation and judicial outcomes that impact on Māori people are examined as well as interaction between Māori and the State in formulating policies for Māori. A framework for analysis derived from Māori perspectives serves as a basis for understanding policy development and is applied to specific policy areas including Māori land, broadcasting, fishing, employment, health, the environment and Treaty settlements.

150302 Whānau ora: Principles of Flourishing Whānau **15 credits**
Approaches for the advancement of Māori health will be reviewed with a particular focus on health promotion, whānau ora and the link between Māori health initiatives and positive Māori development.

150303 Mana Wahine: Māori Women **15 credits**
A theory and research based examination of issues that concern Māori women in all contexts, including the roles that Māori women assume both within a Māori social framework and beyond. Theories of mana wahine and the ways mana is maintained, enhanced or lessened will be examined.

150304 Te Ao Hurihuri: Contemporary Māori Issues **15 credits**
A critical examination of contemporary Māori cultural, political and human rights issues through colonisation to present day renaissance of Māori and indigenous peoples.

150307 Mata: Studio IIIA 30 credits

Advanced development of 150.207 in selected areas. An approved, individually conceived programme with content related to personal strengths and interests within two-dimensional frameworks.

150308 Mata: Studio IIIB 60 credits

Advanced development of 150.208 in selected areas. An approved, individually conceived programme with content related to personal strengths and interests within three-dimensional frameworks.

150407 Matatau: Studio IVA 60 credits

Advanced conceptual development of 150.307 in selected areas. An approved individually conceived programme with content related to personal strengths and interests within two-dimensional frameworks.

150408 Matatau: Studio IVB 60 credits

Advanced conceptual development of 150.308 in selected areas. An approved individually conceived programme with content related to personal strengths and interests within three-dimensional frameworks.

150701 Tino Rangatiranga: Strategic Māori Development 30 credits

Strategies for Māori advancement are examined within a Māori development framework. Barriers to development and the facilitation of positive development are explored using criteria relevant to indigenous self-determination. There is a focus on land, fisheries, social policy, health, Treaty settlements and opportunities for positive development.

150702 Pae Ora: Māori Health Advancement 30 credits

Strategies for the advancement of Māori health will be explored with a particular focus on health planning, national Māori health related strategies, health funding, the delivery of health services, and the link between Māori health strategies and positive Māori development.

150707 Te Tataitanga Matatau: Advanced Studio Practice 90 credits

An individually designed programme of advanced studio practice in Māori or indigenous visual culture development, with content related to personal strengths and interests.

150710 Te Reo Whakawhitihiti: The Language of Everyday Communication 30 credits

A focus on the use of Māori language at home, in the workplace, in social situations, in sport and recreation. Students will be encouraged to express ideas and opinions in Māori with confidence and to incorporate new words into the vocabulary as indicated. The significance of local idiom will be an important part of the course.

150711 Te Tau-Ihu o te Reo: Advanced Māori Literature 30 credits

Tuatahi he ako i te taumata momo reo, te kawa o tātau marae pēnei i te tangihanga, whakataukī, pepeha, kōrero pūrākau, waiata tawhito. Tuarua he kaupapa mai i te rēanga poropiti Māori o ērā atu rau tau. Ka tātaritia hoki ngā kōrero mo tērā poropiti a Te Kooti Ārikirangi Te Tūruki i ahu mai ai ngā kaupapa maha e pā ana ki te mana motuhake. Tuatoru kā tātaritia ngā kōrero e pā ana ki tēnei kaupapa hohonu, e taukapo ai ōnā kaupapa ko te poroporoaki tēnā. This course explores language forms used in marae procedure, and language associated with tangihanga, whakataukī, pepeha, kōrero pūrākau, waiata tawhito. In addition the prophecies and aspirations of Te Kooti Ārikirangi Te Tūruki are explored. There is also an examination of the oral narrative and written literature associated with poroporoaki.

150713 Te Reo o te Ao Whanui: Māori as an Official Language 30 credits

The use of Māori language in specialised areas and in sectors such as health, education, justice and commerce will be explored. Students will be required to demonstrate high levels of written and oral competence in one or two specialist areas, to undertake translations of contemporary technical documents as well as the compilation of an extended glossary.

150714 Ta Te Māori Rangahau Korero: Māori Research Methodologies 30 credits

An examination of methodologies appropriate for research within Māori communities, iwi, hapu and whanau. Emphasis will be placed on accessing relevant information held in public repositories, on the internet and on computerised databases. The identification of frameworks for research in Māori contexts, ethical issues, and research design form important aspects of the course.

150715 Taonga Tuku Iho: Heritage Aotearoa 30 credits

An examination of the dynamics of Māori culture and custom as part of the Aotearoa/New Zealand heritage. Particular emphasis is placed on the significance of land, language, oral tradition, the marae, art, and the Treaty of Waitangi, as well as an examination of the role of government in heritage through a study of legislation, policy and programmes. Case studies will focus on conservation, maintenance, sustainability and revitalisation.

150720 Rangahau Whakairo: Pre-thesis Practicum 120 credits

An individually supervised and approved study involving Māori or indigenous visual culture to realise an individually conceived body of work. The constitution of the pre-thesis studio will consist of a catalogue of works presented for exhibition together with a presentation of ideas both in situ and through a formal public presentation.

150725 Rangahau Whakairo: Pre-Thesis Practicum (Part I) 60 credits**150726 Rangahau Whakairo: Pre-Thesis Practicum (Part II) 60 credits****150731 Te Reo o Te Akomanga: Language of the Classroom 30 credits**

He tatari, he whakahangai i ta te Māori titiro ki nga paearu mahi katoa mo te ao matauranga me Te Aho Matua e whai mahi ai i roto i nga Kura hei kaiako, ara, e taea ai e nga tauria. A critical analysis and application of Māori perspectives applied to performance criteria in the education context and Te Aho Matua that are essential for teaching within kura kaupapa Māori.

150732 Te Uiui ā Akomanga: Inquiry-Based Approaches in Kura Kaupapa Māori 30 credits

Ko nga rautaki pakirehua Kaupapa Māori me nga iwi taketake e tiroiro ana ki nga wero e puta mai ana i te mahi whakaako ki nga Kura Kaupapa Māori. Māori and global indigenous inquiry methods that address existing or emerging challenges of teaching practice in Kura Kaupapa Māori learning environments

150733 Te Marautanga o Te Aho Matua: The Kura Kaupapa Māori Curriculum 30 credits

He whakataki me te tatari i nga paearu ngaio o Te Marautanga o Te Aho Matua me te mahi i nga wahanga ako, a, nga anga aromatawai hoki ki ta te kura tirohanga whanui no roto mai i nga Kura Kaupapa Māori. An introduction to and analysis of the professional requirements of Te Marautanga o Te Aho Matua and the application of learning areas, and assessment frameworks to a whole school curriculum approach within Kura Kaupapa Māori.

150734 Tō Te Kura Kawa: Pedagogy and Practice in Kura Kaupapa Māori 30 credits

He ata tiroiro me te whakamahi i nga ahua akoranga o Te Aho Matua me Te Marautanga o Te Aho Matua ki roto ki nga Kura Kaupapa Māori. An examination and application of Te Aho Matua pedagogies and Te Marautanga o Te Aho Matua curriculum within Kura Kaupapa Māori settings.

150799 Research Report (30) 30 credits**150809 Te Wahapu Matatau (Matau): Advanced Studio Practice 90 credits**

An individually designed programme of advanced studio practice in Māori or indigenous visual culture development, with content related to personal strengths and interests.

150816 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

150817 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

150821 Nga Miro Whakaaturanga: Thesis Practicum 120 credits

An individually supervised and approved study involving research into Māori or indigenous visual culture to realise an individually conceived body of work that allows for the design and/or coordination of an exhibition, together with an exhibition report that resolves research and practice, or a database that contextualises the body of work within the student's personal oeuvre.

150825 Nga Miro Whakaaturanga Thesis Practicum 120 Cr Pt1 60 credits

A supervised and guided independent study resulting in a published work.

150826 Nga Miro Whakaaturanga Thesis Practicum 120 Cr Pt2**60 credits**

A supervised and guided independent study resulting in a published work.

150873 Research Report Māori Studies (60)**60 credits****150881 Thesis 90 Credit Part 1****45 credits**

A supervised and guided independent study resulting in a published work.

150882 Thesis 90 Credit Part 2**45 credits**

A supervised and guided independent study resulting in a published work.

150883 Thesis**90 credits**

A supervised and guided independent study resulting in a published work.

150899 Thesis**120 credits**

A supervised and guided independent study resulting in a published work.

150900 PhD Māori Studies**120 credits****151****Nutritional Science****151131 Introduction to Food and Nutrition****15 credits**

An examination of the effect of social, cultural and psychological factors on food habits; a brief study of the composition of foodstuffs and the basic principles of human nutrition. Emphasis will be given to topics of current interest.

151231 Science of Food**15 credits**

Chemical composition and physical properties of food. Modification of nutrient content of foods due to formulation, processing and preparation. Food regulation and food safety.

151232 Nutrition and Metabolism**15 credits**

Physiological function and metabolic fate of carbohydrates, lipids and proteins and their involvement in meeting energy needs for maintenance, growth and performance. Nutritional and physiological functions of vitamins, minerals, water and electrolytes in humans. The pharmacological role of specific micronutrients. Physical and biochemical measurements of nutritional status of populations and individuals; including assessment of body composition and dietary intake.

151331 Maternal and Child Nutrition**15 credits**

Nutrient functions, requirements and partitioning during pregnancy, lactation, infancy, childhood and adolescence: determination of nutritional requirements; assessment of normal growth and body composition; evaluation of food and nutritional issues.

151332 Nutrition for Sport and Performance**15 credits**

Nutritional aspects of exercise physiology and metabolism. Nutritional principles for enhancing performance in recreational and elite athletes Food and nutrition for specific sporting codes and specific groups (e.g. children, adolescent athletes, female athletes, elite athletes). Assessment of nutritional status of athletes.

151333 Adult Nutrition and Positive Ageing**15 credits**

Review of current literature and research on nutrient needs and factors affecting nutritional status of adults and the elderly. The role of nutrition in causing and preventing degenerative diseases. The nutritional, physiological, metabolic and sociological determinants of obesity.

151334 Nutrition Communication and Promotion**15 credits**

The impact of food policy, marketing and nutrition promotion on behavioural aspects of food choice. Nutrition communication and health promotion measures to influence nutritional status will be covered, including models of food choice. Examples will be drawn from health promotion initiatives in New Zealand, related to a range of socio-cultural groups. Food insecurity and food politics will also be included.

151717 Selected Topics in Public Health Nutrition**15 credits**

Public health nutrition is the promotion of good health through the prevention of nutrition-related illness in the population. This course will examine a

selection of nutrition-related public health problems and describe how research-based evidence is used to develop effective promotion strategies.

151741 Research Methods and Statistics for Dietetics**15 credits**

Quantitative and qualitative research design, methods, approaches including statistical analysis in human nutrition and dietetics as applicable in a variety of groups and settings. Topics will include epidemiological and ethnographic approaches, assessment of food, nutrient and energy intakes, energy expenditure, body composition, biomarkers, eating habits, food behaviour, and dietary practices.

151742 Nutrients for Health and Disease**15 credits**

Investigate relationships between nutrient intakes and health status, using an evidence-based approach to enable substantiation of recommendations. Critical examination of legal, ethical and scientific principles of dietitian prescribing practice pertaining to special foods, nutrients and supplements. Students will develop competence within the dietitian prescriber scope.

151743 Foodservice Management**15 credits**

An introduction to the operational aspects of food service systems, principles of management and their application to food service to optimise nutrition, health and well-being. Students will develop practical skills within various food service systems as well as managerial skills to optimise service quality.

151744 Medical Nutrition Therapy 1**15 credits**

A focus on medical nutrition therapy to improve the nutritional status / well-being of individuals and groups within clinical, community or public health settings. Forming the foundation for safe and effective practice within the core dietetic practice context of medical nutrition therapy, investigating all aspects of nutrition-related diseases – from aetiology to therapy.

151745 Medical Nutrition Therapy 2**15 credits**

Building on the content of Medical Nutrition Therapy 1, this course focuses on medical nutrition therapy to improve the nutritional status / well-being of individuals and groups within clinical, community or public health settings. It will form the foundation for safe and effective practice within the core dietetic practice context of medical nutrition therapy, investigating all aspects of nutrition-related diseases – from aetiology to therapy.

151746 Communications in Dietetic Practice**15 credits**

This course introduces the theory and practice of communication approaches and strategies in the professional work environment, emphasising successful communication in a range of contexts including individual counselling, small group education, community consultation, within a management or media perspective, and presentation to any audience. Communication management and learning theory and skills will be examined and applied through practical examples and assessment tasks.

151750 Professional Dietetic Practice**45 credits**

This course comprises the total extent of professional dietetic practice to acquire practical training and experience within the three domains of dietetic practice as specified by the professional accrediting body. Experienced practitioners will supervise students in a variety of settings including hospitals, community health centres, industry and public health services where their skills and competencies will be developed in a range of areas.

151870 Research Report**60 credits****151871 Thesis 90 Credit Part 1****45 credits**

A supervised and guided independent study resulting in a published work.

151872 Thesis 90 Credit Part 2**45 credits**

A supervised and guided independent study resulting in a published work.

151875 Thesis**90 credits**

A supervised and guided independent study resulting in a published work.

151891 Thesis 90 Credit Part 1**45 credits**

A supervised and guided independent study resulting in a published work.

151892 Thesis 90 Credit Part 2**45 credits**

A supervised and guided independent study resulting in a published work.

151895 Thesis**90 credits**

A supervised and guided independent study resulting in a published work.

151897 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

151898 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work

151899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

151901 PhD Nutritional Science **120 credits**

152

Management

152133 Sport Facility Management **15 credits**
An introduction to the management and administrative aspects of sport facilities.

152203 Business and Society **15 credits**
A study of the interplay of business and society in the context of business development and contemporary business practice.

152230 Entrepreneurship **15 credits**
An introduction to entrepreneurship and its application to new ventures as well as to existing small businesses.

152232 Small Business Management **15 credits**
This course develops competencies relevant to operating small and medium sized enterprises. The focus is on critical skills, ethical awareness and the concepts needed by today's small business owners, and introduces specialist topics in enterprise development.

152233 Fundamentals of Entrepreneurship and Innovation **15 credits**
This introductory course develops understanding of the key concepts in entrepreneurship and innovation.

152234 Business Model Innovation **15 credits**
Describe the importance of context and value creation when designing and validating business models.

152236 Sport Business **15 credits**
This course explores the theories, concepts and practices relating to strategic management, governance, organisational behaviour, and human resource management in sport organisations.

152237 Sport Event Management **15 credits**
This course examines specific management aspects of sport events.

152238 Professional Development for the Sport Industry **15 credits**
A preparation for the Sport Practicum through field experience and critical reflection.

152250 Managing Organisations **15 credits**
An analysis of the management of organisations emphasising themes relating to people, process and structure.

152252 Project Management **15 credits**
An introduction to the theory and methods employed in project management.

152261 International Business **15 credits**
A study of business and management from an international perspective. This course provides an introduction to the conduct of business in the global environment by exploring different forms of international business activity in the context of regionalism and globalism.

152264 International Supply Chain Management **15 credits**
An introduction to the applied aspects of supply chain management in international business.

152270 Māori Management **15 credits**
Māori Management is designed for people who have a responsibility for undertaking management activities related to Māori business development and commercial activities. It examines the history and structure of Māori

organisations, contemporary management structures and the impact of associated government policies and legislation.

152271 Sport Entertainment Management **15 credits**
An examination of contemporary innovations and technologies shaping and impacting upon the management of global sport entertainment industries.

152304 Managing Services **15 credits**
Examines theories and issues relating to the place of services in the economy.

152325 Designing and Developing Organisations **15 credits**
A theoretical and practical introduction to organisational designs and development processes.

152330 Enterprise Development **15 credits**
An examination of issues relating to entrepreneurship and management in the start-up, survival and development of enterprises. Emphasis is placed on the use of the case study approach from the perspective of the manager or consultant.

152331 Scaling and Growth **15 credits**
Develops understanding of key areas that are critical for the sustainable growth of an organisation, by exploring the key challenges of scaling and growth.

152336 Leadership Practice **15 credits**
A critical analysis of the theory and practice of leadership relevant to public and private organisations and the development of ethical leadership and citizenship in a variety of socio-cultural contexts.

152337 New Venture Development **15 credits**
A project based course in which students explore and develop a value-creation project in relation to a specific context of their choice.

152338 Cultural Perspectives on Entrepreneurship **15 credits**
An examination of interconnections between entrepreneurship, culture and diversity, including social identities such as gender, ethnicity and indigeneity, age, religion, and sexual identity. Students will consider how these aspects shape entrepreneurial thinking and practice, with particular emphasis on the experiences of Māori in Aotearoa NZ.

152350 Strategic Management and Governance **15 credits**
An examination of strategic management concepts, the tools and techniques of strategic analysis, and issues associated with governance including business ethics.

152355 Sustainability Issues, Challenges and Responses **15 credits**
An examination of sustainability issues and challenges, how they relate to the business community, and the implications of sustainability for business policy and management.

152366 Operational Management of International Business **15 credits**
Managing the operational effectiveness of the enterprise conducting business in international markets including international supply chain, quality, and distribution management.

152393 Managing Conflict **15 credits**
A theoretical and applied examination of the nature and management of conflict in diverse settings. This course is suitable for anyone interested in working in or with organisations, employees, groups or teams, projects, or contracts.

152399 Integrative Management **15 credits**
A collaborative capstone course that requires students to demonstrate the ability to apply theory and practice to complex organisational problems.

152700 Organisation and Management **30 credits**
A study of the theories of management and their application within organisations.

152702 Advanced Strategic Management **30 credits**
An advanced study of the systems and techniques of strategic planning, policy formulation and implementation.

152704 Business and Sustainability **30 credits**
An analysis of the relationships between the business community, the natural environment, and social and environmental sustainability. The course

examines global debates on social and environmental issues, introduces theories of sustainability, and considers the implications of sustainability for business policy and management.

152707 Leading and Changing Organisations 30 credits

A study of the practices, methods and frameworks for leading and changing organisations.

152724 Advanced Services Management 30 credits

Focusing on the theory and principles of services management, this course critically reviews current services management research and analyses the issues for managers in adopting a service logic for their organisations.

152725 Building Export and Import Businesses 30 credits

Focuses on the first stage of international expansion by providing an introduction to the knowledge and skills required for managing import and export businesses and conducting international trade.

152726 Growing Multinational Enterprises 30 credits

Focuses on strategies and implementation challenges of foreign direct investment projects.

152727 Managing Multinational Enterprises 30 credits

An examination of management challenges commonly faced by firms that have already expanded internationally, addressing four different levels of internal organisational analysis: the individual, the cross-cultural project team, organisational units such as subsidiaries, and the relationship between the multinational organisation and its host country societies.

152728 Corporate Citizenship and Responsibility 30 credits

An advanced critique of the concepts of corporate social responsibility (CSR), business ethics, stakeholder management, and their implications for the management of business organisations.

152730 Advanced Contemporary Issues in Sustainability 30 credits

Students will critique the business case for sustainability and develop holistic sustainability strategies to address contemporary economic, ethical, environmental, and social concerns for business, including those relating to sustainable supply chain management, sustainable operations management, the UN Sustainable Development Goals, and ethical trade.

152742 Health Systems Management 30 credits

The health care systems of New Zealand and selected nations are compared and critically analysed from a management perspective.

Health

152743 Health Law and Policy 30 credits

The interrelationship between health law and health policy is examined with an emphasis on practical health care dilemmas.

Management

152746 Contemporary Issues in Health Service Management 30 credits

Issues relevant to the efficient and effective delivery of health services are identified and examined.

152747 Local Governance: Context, Structure and Finance 30 credits

An examination of the attributes of public administration and finance, specifically addressing the concerns of local government. These attributes include: the historic position of local government, the scope, scale and role of local government in society, and the funding regime underpinning local government in New Zealand.

152752 Project Management 30 credits

A comprehensive study of the theory and methods employed in project management.

152771 Management in Organisations 15 credits

The application of modern management in business organisations.

152781 Advanced Research Methods in Business 30 credits

Research approaches to management and organisation theory. Includes reading and designing research in these areas up to the preparation of research proposals.

152800 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

152801 Thesis 90 credits

An original piece of work that focuses on a significant issue in the Management discipline. Candidates will demonstrate an ability to formulate research questions and clearly answer them through the effective design of an investigation and the presentation of the research findings in a manner that is acceptable in the academic community.

152802 Thesis 90 Credit Part 1 45 credits

An original piece of work that focuses on a significant issue in the Management discipline. Candidates will demonstrate an ability to formulate research questions and clearly answer them through the effective design of an investigation and the presentation of the research findings in a manner that is acceptable in the academic community.

152803 Thesis 90 Credit Part 2 45 credits

An original piece of work that focuses on a significant issue in the Management discipline. Candidates will demonstrate an ability to formulate research questions and clearly answer them through the effective design of an investigation and the presentation of the research findings in a manner that is acceptable in the academic community.

152804 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

152805 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

152894 Professional Practice 60 credits

Candidates will undertake a professional action investigation within the subject area in which the Master of Management is being completed. Investigations may be conducted either individually or in groups and assessment of the outcome of the investigation may be in a variety of ways including written and oral presentations.

152896 Research Report 60 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

152900 PhD Management 120 credits

153

Dispute Resolution

153200 Introduction to Dispute Resolution 15 credits

An introduction to the modes of dispute resolution including negotiation, mediation and arbitration and the relevant law.

153310 Arbitration Practicum 15 credits

A practical residential course on practice, procedure and award writing.

153707 Theory of Conflict 30 credits

The theory of conflict and its application to dispute resolution.

154

Media Studies

154101 Media and Society 15 credits

An introduction to theories of the media and communications. Particular attention will be paid to the concepts of representation and audience, the political economy of media products, and the social and cultural context in which they occur.

154202 Advertising and Consumer Society 15 credits

A study of the form and function of advertising in the context of consumer society, with particular emphasis on the conflict between advertising as a form of corporate manipulation and as a form of creative expression. Critical theories will be used to explore the role of advertising in relation to consumerism, capitalism, branding, art and agency.

154203 Popular Culture and the Media 15 credits

A survey of cultural theories and debates in relation to modern mass media. A number of issues such as identity, representation and cultural politics will be considered in their historical contexts and in relation to a variety of texts from popular culture and the media.

154204 Digital Media Production I 15 credits

An advanced introduction to producing digital media. This course uses hands-on, experiential learning to introduce techniques, concepts and processes for producing photography and video using industry standard hardware and software.

154208 Screen Media 15 credits

An exploration of the formal and textual features of film and television, and their relation to technological change, with an emphasis on how film and television have both shaped and been transformed by digital media.

154224 Documentary (Non-Fiction) Film 15 credits

A study of the genre of documentary (non-fiction) film. The course will provide students with a critical awareness of the theory, history and various forms relevant to the genre. Students will plan and produce short documentary films. NOTE: Students require access to their own video camera and editing facilities.

154250 Digital Media: Theory and Practice 15 credits

An exploration of the social, cultural, economic and technological transformations brought about by contemporary digital and networked media. Students will develop critical digital media literacies and learn to produce digital media.

154301 Culture, Power and the Media 15 credits

An advanced study of theoretical approaches to the study of media and popular culture, with particular emphasis on how media are involved in the contestation, negotiation and maintenance of power relations.

154302 Gender and Race in the Media 15 credits

A critical study of gender, race and ethnicity in the media, considered from a variety of theoretical approaches.

154303 Hollywood Cinema 15 credits

An examination of how the formal, socio-cultural, and technological characteristics of Hollywood Cinema have intersected with its industrial conditions across history.

154304 Digital Media Production II 15 credits

The further development of skills and abilities in a chosen media area with particular emphasis upon the production of a major media project.

154311 Social Media and Digital Cultures 15 credits

This course explores how social media shapes identities, social relationships, work, politics and societies. From fake news to social media influencers, this course examines how digital technologies play a key role in shaping everyday life in the twenty-first century.

154313 Global Media Cultures 15 credits

New media technologies and global patterns of media distribution have produced complex, emergent practices of transnational community formation, text-sharing and collaborative media production. This course examines these practices in relation to the maintenance and negotiation of cultural identity in the contemporary world.

154701 Modern and Postmodern Visual Cultures 30 credits

An introduction to the key critical debates and cultural practices that have defined the response to modern mass media and their major ideological formations. Particular emphasis is placed on avant-garde notions of montage and their continuing influence on postmodern media theory and practice.

154702 Advanced Film Studies 30 credits

This course engages students with a variety of critical and theoretical approaches to cinema, mapping their development across history and examining their usefulness in understanding the social, cultural, economic, political and aesthetic significance of film.

154704 Researching Media and Cultural Studies 30 credits

An introduction to theoretical frameworks and research designs and methods in Media Studies and Cultural Studies and to various issues that arise in the

conduct of research. Students preparing to undertake research-based theses or projects will receive assistance in the preparation of their proposals.

154707 The World of Noir 30 credits

A study of the historical phenomenon of film noir, along with the related genre of the noir novel. The emphasis will be on classical film noir but more recent texts will also be examined. A variety of critical and theoretical approaches will be used.

154708 Modern Fiction, Popular Culture and the Media 30 credits

An examination of major developments in approaches to fiction in the twentieth century, focusing on modern and postmodern trends, and on how these have impacted on the rise and alleged decline of distinctions between elite art and popular culture. Texts for analysis are selected from both literature and film and include examples of canonical as well as popular fiction.

154709 Technology and Cultural Change 30 credits

This course examines the role of technology in producing and transforming contemporary culture. Through the investigation of key theorists, particular attention is given to the pivotal role technology plays in shaping space, time, and experience.

154721 The Communication Field 30 credits

This course provides an advanced-level overview of the communication discipline, its history, key concepts, competing traditions, and noted scholars. Critical, creative and organisational theories and concepts from a broad communication studies body of knowledge are historicised, compared, and critically evaluated. Throughout the course, communication knowledge is applied to illuminate communication questions from media, industry and society.

154747 Media Practice and Global Culture 30 credits

This course examines the critical context of contemporary media practice, exploring how media texts, technologies, and institutions respond to and produce processes of globalisation. Students will focus on the use of digital and mobile media technologies, and consciously negotiate decisions regarding the cultural, social, political, economic, ethical and environmental implications of their own media production, distribution and consumption.

154797 Research Report (60) 60 credits**154798 Research Report (30) 30 credits**

A supervised and guided independent study.

154816 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

154817 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

154850 Thesis 120 credits

The supervised undertaking of an original piece of research into Media Studies.

154851 Thesis 120 Credit Part 1 60 credits

The supervised undertaking of an original piece of research into Media Studies.

154852 Thesis 120 Credit Part 2 60 credits

The supervised undertaking of an original piece of research into Media Studies.

154855 Master of Communication Research Project 60 credits

An applied research project involving the critical evaluation and application of selected research methodologies to address communication-related challenges.

154873 Research Report Media Studies (60) 60 credits

A supervised and guided independent study.

154882 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

154883 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

154899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

154900 PhD Media Studies **120 credits**

155

Business Law

155201 Law of Property **15 credits**
The law relating to the transfer and ownership of and other dealings in real property.

155202 Essentials of Law **15 credits**
Introduction to the New Zealand legal system, legal interpretation and substantive law.

155203 Law of Business Organisations **15 credits**
General principles of law relating to companies and partnerships.

155210 Commercial Law **15 credits**
Legal obligations and responsibilities that may arise when conducting business activities.

Management

155301 Employment Law **15 credits**
This course examines the law governing the employment relationship in New Zealand.

Business Law

155771 Law of Business **15 credits**
The legal system and the law of business organisations and its relevance to the accounting and finance profession.

156

Marketing

156231 Strategic Marketing Management **15 credits**
A study of the decisions required to allocate and manage marketing resources in a competitive business environment.

156232 Consumer Behaviour **15 credits**
A study of the theory and practice of changing consumer behaviour through marketing programmes. The course critically evaluates traditional cognitive models of consumer behaviour and alternative behaviourist approaches.

156233 Marketing Research **15 credits**
A study of the collection, analysis and interpretation of marketing information for the purpose of managerial decision-making.

156235 Social Media and Digital Marketing **15 credits**
A study of the impact, application and evaluation of new digital media marketing strategies and techniques.

156237 Marketing Communication and Advertising **15 credits**
A study of advertising and other forms of marketing communication, including key theories of marketing communication, elements of the communication mix, and effective campaign design.

156334 Marketing Consultancy Project **15 credits**
A client driven marketing planning course that integrates marketing concepts and methods across the curriculum.

156338 International Marketing **15 credits**
A critical examination of issues in international marketing and their relevance to business and society.

156339 Omni-Channel Retail Marketing **15 credits**
A critical examination of marketing in an omni-channel retail environment.

156340 Customer Intelligence **15 credits**
This course teaches methods to convert organisations' large data sets about customers, competitors, channel partners and their own activities into information for improved marketing decision making.

156341 Branding **15 credits**
A critical examination of brands and issues in branding and their relevance to business and society.

156700 Essentials of Marketing **30 credits**
An introduction to the theory and practice of marketing. This course assumes no previous background in marketing.

156742 Advanced Consumer Behaviour **30 credits**
A study of the changing nature of consumer behaviour in a dynamic environment. Psychological, sociological and individual factors are investigated with reference to how they affect consumer behaviour. How the study of consumer behaviour is used by academics, practitioners and policymakers is explained.

156756 Digital Marketing **30 credits**
A study of theories and practical applications of digital marketing tools.

156757 Marketing Strategy **30 credits**
A study of theories and practical applications of marketing strategy across different contexts.

156758 Marketing for Social Change **30 credits**
A detailed study of the social marketing approach used to develop activities aimed at changing or maintaining people's behaviour for the benefit of individuals and society as a whole. The course examines questions about marketing and society; these issues include a consideration of how 'socially desirable' behaviours are marketed; how regulations affect marketing decision making; and how ethical issues can influence marketing decisions.

156761 Customer Insights **30 credits**
A range of analytical techniques will be implemented using real-world data. Emphasis is also given to effective presentation of insights to a non-technical audience.

156762 Return on Marketing Investment **30 credits**
The development of computer skills for the empirical analysis of the return of marketing investments on sales and profits, for the purpose of supporting marketing decision making. The coverage includes a wide variety of econometric methods, statistical programming approaches, types of marketing investments, and the reporting of the results.

156799 Research Report **30 credits**

156800 MPhil Marketing **120 credits**

156850 Thesis **120 credits**
The supervised undertaking of an original piece of research in marketing communication.

156855 Master of Communication Research Project **60 credits**
An applied research project involving the critical evaluation and application of selected research methodologies to address communication-related challenges.

156893 Research Report **60 credits**
Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

156894 Professional Practice **60 credits**
Candidates will undertake professional practice within the subject area in which the Master of Management is being completed. Professional Practice may be conducted either individually or in groups and assessment of the outcome of the investigation may be in a variety of ways including written and oral presentations and case studies.

156897 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

156898 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work.

156899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

156900 PhD Marketing **120 credits**

157

Information Systems

157151 Living and Working with Technology **15 credits**
An introductory study of the roles and applications of information systems in organisations and society.

157216 Management, Analytics and Decision Making **15 credits**
Introduction to techniques and issues involved in using data to support organisational decision making.

157240 Social Media Networks for Business **15 credits**
Students will be introduced to using social media for business success and will examine current issues in the rapidly developing area of social media using a socio-technical approach.

157241 Technology Trends for Organisations **15 credits**
A comprehensive study of major technology trends and organisational contexts within which information systems are developed and used from user, manager, organisational and societal perspectives.

157340 Organisational Knowledge Management **15 credits**
An examination of the role of information systems in creating business value in a knowledge economy.

157350 Technology Governance and Risk Management **15 credits**
Designing and managing technology-based solutions for realising organisational strategy.

157394 Managing Technology Projects and Programmes **15 credits**
Agile project management and design thinking as methodologies for implementing technology projects and programmes.

157701 Health Information Management **30 credits**
A study of the management of information and information systems relevant to the planning and delivery of high-quality healthcare.

157733 Health Information Systems **15 credits**
A study of the existing and potential applications of information systems that can be used to support the delivery and management of healthcare.

157748 Advanced Management, Analytics, and Decision Making **30 credits**
A comprehensive study of the techniques and issues involved in using data to support organisational decision making.

157749 Technology Innovation Management **30 credits**
Initiate and develop innovative opportunities within the technology sector.

157900 PhD Information Systems **120 credits**

158

Information Technology

158100 Information Technology Principles **15 credits**
This course introduces students to concepts and theories in preparation of advanced Information Technology (IT) courses. Students gain foundations in programming, non-relational databases, user interface design, system analysis and testing, along with the impact of IT on society. Hands-on explorations form an important component of this course.

158120 Web-based IT Fundamentals **15 credits**
In this course, students study how key information technology components combine to form complex information technology solutions. This includes analysis and experimentation with relational databases, web technologies, programming and networking.

158222 Data Wrangling and Machine Learning **15 credits**
An introduction to the data science workflow involving the acquisition, processing, transformation and integration of data from disparate sources having inherently different data structures, from which actionable insights can be extracted. Entry-level machine learning and statistical techniques for analysing and extracting knowledge from data will be covered. Particular emphasis will be placed on attaining competency in using a high-level programming language for conducting data-driven problem solving and appreciating the necessary agility such tools afford.

158225 Systems Analysis and Modelling **15 credits**
A study of methods used to capture, analyse and model system requirements. Students will acquire practical skills through case study work utilising techniques and software tools used by industry.

158235 Networks, Security and Privacy **15 credits**
A study of the basic principles of digital communications, Internet technologies, communications software, local area network design, client-server system design, middleware and available wide-area network services from the viewpoint of a software engineer/designer developing networked information systems.

158244 Software Quality Assurance and Testing **15 credits**
A discussion of testing concepts and techniques that can be applied to all software projects. This course explores a selection of topics relevant to the design and implementation of test plans in software including web-based applications. The course also looks at activity design to ensure that the project conforms to stakeholder expectations. This course will be of assistance to students who would like to become a Certified Tester through International Software Testing Qualifications Board (ISQTB) foundation level exams.

158258 Web Development **15 credits**
An introduction to web-based application development. Students will gain practical experience in the use of modern techniques relevant to the design and development of web-based systems.

158326 Software Construction **15 credits**
An advanced study of methods used to model, design, build and test robust software artefacts. The course provides an in-depth study of multiple techniques to support software design and implementation. It takes a practical approach using current methods and tools.

158333 Applied Machine Learning and Big Data Processing **15 credits**
An in-depth exploration of methods for developing intuition and insights about data that enables effective problem formulation and its solution through data-driven methods. A broad range of advanced machine learning and data mining algorithms will be used to build predictive models from real-world contexts. A particular emphasis will be on developing data-products, rapid prototyping and effectively communicating their value through visual storytelling and interpretable summaries. Practical skills for processing large datasets will be taught.

158335 The Internet of Things and Cloud Computing **15 credits**
This course involves participants in solving problems whose solutions require active, sensing and connected “things” augmented with Cloud Computing capabilities. Students will design and implement things that participate in the Internet of Things (IoT) and Cloud Computing environments.

158337 Database Development **15 credits**
A study of enterprise data models, including how data storage and retrieval methods have changed over time. Modern techniques for handling relational and non-relational data and their implications in transactional and analytical processing are evaluated. Students will gain practical skills in designing, creating and querying databases using database management systems.

158345 Professionalism in the Information Sciences **15 credits**
This course provides an advanced study of social and professional issues in the information sciences. It will involve the exploration, through appropriate resources, of issues relevant to practitioners, including ethics, legal issues, communication, teamwork and professional contexts.

158359 User Experience Design **15 credits**
The course will move from conceptual analysis to the design, prototyping and implementation and evaluation of user interfaces. It will emphasise development processes that result in interfaces that provide a superior user experience. Examples of real-life interfaces, from sources such as desktop,

multimedia, web, novel, and mobile technologies will be used. There will be a significant practical work component.

158383 Information Technology Project 15 credits

Based on an initial project specification, students work individually or in groups on carrying out an information technology project. This includes understanding the project context, selecting appropriate methods and approaches, constructing the project artifacts, and reporting on project outcomes.

158736 Advanced Machine Learning 15 credits

A review of advanced machine learning algorithms that use deep learning to extract knowledge from enterprise data. The course includes a practical component in which students adapt and apply deep learning algorithms to practical data sets.

158738 Implementation and Management of Systems Security 15 credits

Security and privacy are important features of information systems, in particular with the case of free access, as in Web-based services or E-commerce systems. The goal is to restrict the access of information to legitimate users only. For this purpose techniques from cryptography and information theory have to be studied.

158739 Data Mastery: Scripting, Databases and Data Privacy 15 credits

An introduction to the field of analytics, including the process of identifying an analytics problem in context, identifying sources and acquiring data, preparing data for analysis to address the problem. Emphasis is placed on developing programming skills relevant for data processing and data retrieval from databases. Special attention is given to privacy, security and ethical considerations surrounding data, and to communication of results.

158740 Location Systems: Spatial Databases, Tools and Applications 15 credits

This course will develop knowledge and skills in the use of geographic information science in an interdisciplinary context. Students will learn how to work with clients to identify requirements, model and collect data and create a location-based web application. A range of areas and a variety of different uses of geographic information will be covered using open source tools. An interdisciplinary group project will form part of the course.

158741 Location Data: Mapping, Analysis and Visualisation 15 credits

This course will develop knowledge and skills in the processing, analysis and visualisation of data that has a location on the earth. Location data is more and more readily available, and students will learn how to transform and integrate data from multiple sources, consider the impact of data uncertainty and privacy, and perform appropriate analysis for environmental, social and economic applications. Different data collection methods will be discussed, and a range of open source tools will be used.

158750 Information Sciences Research Methods 15 credits

A study of information science research, its methods, practices, social context and relationships to other fields of study. Research skills including research design, literature evaluation, data collection, data analysis and publication are practised in this course.

158751 Object-Oriented Software Development - Theory and Practice 15 credits

A study of the object-oriented paradigm applied to software development and database design. The course includes practical work with an object-oriented analysis and design method, a UML CASE tool and an object-oriented programming language.

158753 Software Development Paradigms 15 credits

The course investigates the concept and practice of software development methodologies. It examines the commercial pressures which promote methodologies such as Agile and the theoretical frameworks which underpin a desirable methodology. Practical assignments will use appropriate software environments.

158755 Data Science - Making Sense of Data 15 credits

A study of the science of drawing knowledge and insights from data, including the concepts and techniques of data mining, machine learning and natural language processing. The course covers both theoretical and practical aspects using a range of software tools and algorithms.

158757 User Interface Design and Evaluation 15 credits

Focuses on the design and evaluation of human-computer interfaces (HCI) for computerised information systems covering: task analysis, the process of design, the use of rapid prototyping in HCI design, and formative and summative usability testing, as well as the integration of user interface design techniques into the SDLC. The approach is hands-on.

158762 Software Quality and Reliability 15 credits

An advanced study of software quality assurance and reliability analysis techniques used in Information Technology projects. The course provides an in-depth study of software validation and verification strategies using appropriate methods, metrics and models. Current tools and practices will be applied to representative software systems.

158780 Information Technology Project Part 1 15 credits

An in-depth study of Information Technology research, exploring both research methods and project execution. This course provides a practical approach to the principles and practices of academic research, and incorporates a full execution of the preliminary parts of a project life cycle, including the proposal, literature review, methodology and pilot study.

158781 Information Technology Project Part 2 15 credits

A continuing study of information sciences research, exploring both research methods and project execution. This course provides a practical approach to the principles and practices of academic research, and incorporates a full execution of the latter parts of a project life cycle, including the research practicum, analysis of results and reporting of conclusions.

158888 Information Technology Professional Project 60 credits

Candidates will undertake a practical and/or research IT project including some or all of the following: requirements engineering, product modeling, user interface design and evaluation, systems security, software testing, and quality assurance. This may be conducted either individually or in groups and assessment may be in a variety of ways including written and oral presentations and software demonstrations.

158897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

158898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

158899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

158900 PhD Information Technology 120 credits

159

Computer Science

159100 Programming for Engineering and Technology 15 credits

This course provides an introduction to computer programming for Technology and Engineering disciplines. The language is C++ which is a "real world" language heavily used in games, real-time applications and the control of devices. The course guides students through all the steps needed to write, compile and debug simple C++ programs with lots of practical examples. No previous programming experience is required.

159101 Applied Programming 15 credits

The focus of this course is on problem solving and the design of logical and efficient programming solutions. It is an applied course with an emphasis on software construction using basic algorithmic methods and simple data structures. The course introduces the C++ programming language and is an essential preparation for advanced programming courses.

159102 Computer Science and Programming 15 credits

This course advances the programming knowledge to include abstract data types, recursion, pointers, and the foundations of object-oriented programming. Foundational Computer Science topics are also covered including bits, bytes, two's complement arithmetic, gates, logic circuits and an introduction to assembler programming.

159201 Algorithms and Data Structures 15 credits

An introduction to the analysis and implementation of algorithms and data structures including linear data structures, trees, graphs, hash tables, searching algorithms, sorting algorithms, optimisation problems and complexity analysis. The course includes a significant practical component covering the implementation and application of important data structures and algorithms.

159234 Object-Oriented Programming 15 credits

An introduction to the principles of object-oriented programming. It covers both object-oriented programming techniques and their application to program design including classes, objects and objects lifecycle, abstraction, encapsulation, inheritance, polymorphism and generic programming, as well as some advanced programming features. The course includes a significant practical component involving designing and implementing object-oriented programs in Java.

159235 Programming for Computer Graphics 15 credits

An introduction to the programming principles, methods and techniques of computer graphics. The course covers general graphics methods and techniques, graphics transformations, drawing algorithms, 3D rendering and animation. These are implemented using basic approaches as well as modern shader-based pipelines.

159236 Embedded Programming 15 credits

A study of embedded programming using low-level programming languages. The course covers the hardware architecture of an embedded system and the techniques needed to write programs for simple peripherals such as switches, LEDs, timers and accelerometers.

159251 Software Engineering Design and Construction 15 credits

A study of techniques, methods and tools used to design and construct high-quality software systems.

159261 Games Programming 15 credits

An exploration of a range of essential topics for implementing computer games including fundamental computer graphics, games software architecture and game physics systems. The course contains a significant practical computer lab component where students are guided through the games development process.

159270 Hardware-Oriented Computing 15 credits

A study of programming in a hardware-oriented language such as C and the construction of object-oriented software solutions using C++. The course has a practical focus based on concepts such as pointers, memory allocation, objects, classes, operator overloading, inheritance, and polymorphism. It addresses techniques such as structuring programs, software testing and debugging techniques, and the use of microcontrollers.

159272 Programming Language Paradigms 15 credits

An introduction to different programming paradigms with a focus on the functional paradigm – lists, recursion, lazy-evaluation, higher-order functions, currying and lambda expressions. The course includes a significant practical component designing and implementing functional solutions to problems using both pure and multi-paradigm languages.

159302 Artificial Intelligence 15 credits

An advanced study of the principles and techniques used in developing Artificial Intelligence applications. The course includes the implementation and application of a range of AI methods including state-space representation and search, knowledge representation, constraint satisfaction, game playing, logic systems and machine learning.

159333 Programming Project 15 credits

A capstone programming project for students in their final year of study. Students will develop a piece of software or conduct a research project under the supervision of an academic staff member. Students must produce a written technical report and give an oral presentation demonstrating their work.

159336 Mobile Application Development 15 credits

The course covers many practical aspects of designing, creating, testing and publishing mobile applications. Students will develop mobile applications using a real software development toolkit and have the option of publishing their applications to an app marketplace.

159341 Programming Languages, Algorithms and Concurrency 15 credits

Advanced study in models of computation, programming languages and algorithms with a specific focus on concurrent programming. The course includes models of computation, programming language paradigms, programming language design, algorithm analysis, processes, threads, synchronisation and parallel programming.

159342 Operating Systems and Networks 15 credits

A detailed study of operating systems and network communication protocols. The course covers the technologies that underpin modern computer systems including the architecture of operating systems and their structures and methods along with computer network design, protocols and associated technologies.

159352 Advanced Web Development 15 credits

A study of the programming and scripting languages, frameworks and tools used to develop web and distributed applications with a consideration of the security issues involved in these technologies.

159356 Software Engineering Capstone Project 15 credits

Management of the software engineering process. A group project will form a significant component of this course.

159361 Advanced Games Programming 15 credits

This course continues the study of games programming by exploring the development of computer games using a modern game engine. The development of games and specific game systems within a modern architecture are covered with a significant practical component.

159391 Special Topic 15 credits**159392 Special Topic 15 credits****159709 Computer Graphics 15 credits**

Graphics devices. Interactive graphics systems. Drawing algorithms. Lines and polygons. Curves and surfaces. Representation of 3-D objects. Perspective. Techniques for visual realism. The course will include practical programming work.

159731 Studies in Computer Vision 15 credits

Selected advanced topics including: low level digital image processing, 2D/3D image processing, image transforms, pattern recognition.

159732 Studies in Computer Programming 15 credits

Selected advanced topics including: programming paradigms; procedure; functional; declarative; object-oriented; compiler techniques.

159735 Studies in Parallel and Distributed Systems 15 credits

Selected advanced topics including: Parallel computing; network security; client-server computing; compression; web applications; wireless and mobile computing.

159736 Studies in Operating Systems and Architecture 15 credits

Selected advanced topics including: Concurrency; scheduling; API programming; real-time and embedded systems; fault tolerance; computer architecture; HDLs.

159738 Special Topic 15 credits**159739 Special Topic 15 credits****159740 Studies in Intelligent Systems 15 credits**

Selected advanced topics including: knowledge-based systems; AI; agents; natural language processing; search and constraint satisfaction.

159794 Project 15 credits**159795 Project 15 credits****159870 Research Report 60 credits****159871 Thesis 90 Credit Part 1 45 credits**

A supervised and guided independent study resulting in a published work.

159872 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

159875 Thesis **90 credits**
A supervised and guided independent study resulting in a published work.

159888 Computer Science Professional Project **60 credits**
Candidates will undertake a practical and/or research project including the design and production of a significant software application. This may be conducted either individually or in groups and assessment may be in a variety of ways including written and oral presentations and software demonstrations.

159897 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

159898 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work.

159899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

159900 PhD Computer Science **120 credits**

160

Mathematics

160101 Calculus **15 credits**
A course focusing on the fundamental techniques and applications of calculus including differentiation and integration of functions of one real variable, differential equations, numerical methods, and an introduction to power series with applications to mathematical models. 160.101, alongside 160.102, forms a foundation for further study in mathematics. It is essential for students intending to study Mathematics, Physics, Food Technology or Engineering, or for anyone who wants a strong mathematical component to their degree.

160102 Algebra **15 credits**
A course focusing on the fundamental techniques and applications of linear algebra including vector and matrix algebra, vector representation of lines and planes, projections, Gaussian elimination, eigenvectors and complex numbers. 160.102, alongside 160.101, forms a foundation for further study in mathematics. It is essential for students intending to study Mathematics, Physics, Food Technology or Engineering, or for anyone who wants a strong mathematical component to their degree.

160104 Introductory Mathematics for Science **15 credits**
An introductory course focusing on the development of mathematical problem solving skills in science contexts. The use of number, algebra, trigonometry, and curve sketching will be employed in different situations to solve problems and interpret results.

160105 Methods of Mathematics **15 credits**
An introductory course designed to increase the confidence of students in handling mathematical concepts and skills. Content includes algebraic skills, functions and graphs, and an introduction to calculus.

160203 Multivariable Calculus **15 credits**
The techniques of 100-level calculus are applied and extended in the study of infinite series, vector-valued functions and functions of two or more variables. Topics include convergence of power series, partial derivatives, double and triple integrals with applications to surface area and volumes, line and surface integrals.

160204 Differential Equations I **15 credits**
An intermediate level course in the analytical and numerical study of ordinary differential equations, with an emphasis on their applications to the real world. Exact solution methods for ordinary differential equations. Systems of differential equations, matrix methods, phase plane techniques. Applications of differential equations. Numerical methods for differential equations.

160211 Linear Algebra **15 credits**
Vector spaces, linear transformation, matrix representation, inner product spaces, isometries, least squares, generalised inverse, eigen theory, quadratic forms, norms, numerical methods.

160212 Discrete Mathematics **15 credits**
Sets, logic, mathematical induction, functions and equivalence relations. Partial orderings, algebraic structures and morphisms. Error correcting codes and public key cryptography. Graph theory.

160301 Real and Complex Analysis **15 credits**
Real analysis: inequalities, the continuum property, induction, sequences, functions and limits, continuity, contraction mappings and fixed points, differentiation, mean value theorems and Taylor's theorem. Complex analysis: geometry in the complex plane, limits and continuity, holomorphic functions, line integrals, Cauchy's theorem and some elementary consequences, singularities and Laurent's theorem, the calculus of residues and some applications.

160302 Modern Algebra **15 credits**
Group theory - basic properties, permutation groups, finite Abelian groups, cosets, normal subgroups, homomorphism theorems, representation. Ring theory - integral domains and fields, ideals, homomorphism theorems, factorisation, extension fields.

160314 Combinatorics **15 credits**
Permutations and combinations, binomial coefficients, the inclusion-exclusion principle, generating functions, recurrence relations, Polya's theorem, topics in graph theory.

160318 Differential Equations II **15 credits**
An advanced course in the analytical and numerical study of ordinary and partial differential equations, building on techniques developed in Differential Equations I. Ordinary differential equations: power series and Frobenius series solutions, special functions, Fourier series, Sturm-Liouville problems, qualitative analysis of nonlinear systems. Partial differential equations: classification of second-order equations, separation of variables, Fourier transforms, explicit and implicit numerical schemes.

160320 Mathematics in Education **15 credits**
A discussion of the fundamental questions in mathematics education concerning the nature of mathematics and the purposes of teaching mathematics.

160871 Thesis 90 Credit Part 1 **45 credits**
A supervised and guided independent study resulting in a published work.

160872 Thesis 90 Credit Part 2 **45 credits**
A supervised and guided independent study resulting in a published work.

160875 Thesis **90 credits**
A supervised and guided independent study resulting in a published work.

160897 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

160898 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work

160899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

160900 PhD Mathematics **120 credits**

161

Statistics

161101 Statistics for Business **15 credits**
An introduction to the presentation, analysis and interpretation of quantitative data. Topics include the construction of charts and summary statistics, probability, sampling, hypothesis testing, regression, time series analysis and quality management.

161111 Applied Statistics **15 credits**
Statistical literacy, the ability to understand and reason with statistics and data, is becoming increasingly important as our world becomes more and more data-rich. This course focuses on developing statistical literacy in real-world contexts. We teach students to use software (Excel and RStudio) to summarise, display and analyse data. We explore data collection techniques

including sampling methods and experimental design. We introduce statistical inference methods (confidence intervals, hypothesis testing and regression) with an emphasis on communicating results in context.

161122 Statistics **15 credits**

Statistical literacy and data collection. Descriptive statistics and the interpretation of data, probability, random variables and probability distributions, sampling and estimation, hypothesis testing, correlation and regression, use of R software.

161140 Agri-Statistics **15 credits**

An introduction to statistics in an agricultural context, including the presentation, analysis and interpretation of quantitative data.

161222 Design and Analysis of Experiments **15 credits**

The planning, conduct and analysis of scientific experiments, using examples from chemical, biological, genomic, and engineering sciences. Manipulation and visualisation of experimental data; advantages and disadvantages of various designs; coping with missing data and practical constraints. Introduction to design techniques and concepts including randomisation, blocking, structured treatments, balance and orthogonality, crossed and nested effects, pseudo-replication.

161250 Data Analysis **15 credits**

Biology, psychology, and other sciences require statistical methods for analysing and visualising data. This course is designed to be accessible to students from any discipline, first building a deeper understanding of fundamental statistical concepts, then teaching a range of practical approaches for exploring statistical relationships, testing hypotheses, evaluating models, and presenting conclusions.

161251 Regression Modelling **15 credits**

Common data analysis and regression techniques for application in science, business and social science. Topics include simple and multiple regression; linear models with categorical explanatory variables; model diagnostics; inference for linear models; polynomial regression; models for time dependence; methods for variable selection; non-linear and weighted regression.

161304 Statistical Modelling **15 credits**

This course covers the ideas underlying statistical modelling, its implementation through computational methods, and links to practical applications. Topics include probability and random variables, models for discrete and continuous data, model selection, model fitting and goodness of fit, model inference, and introduction to stochastic processes.

161323 Multivariate Analysis **15 credits**

This course teaches methods to understand patterns and structures inherent in data sets containing many variables. The fundamentals of data visualisation, clustering, and dimension reduction with examples taken from a range of applications.

161324 Data Mining **15 credits**

A practical approach to data mining with large volumes of complex data; prepare, cleanse and visualise data; supervised and unsupervised modelling; ensemble and bundling techniques; use of leading software tools.

161331 Biostatistics **15 credits**

Sciences such as biology and medicine yield data that require a wide range of statistical techniques, including standard linear models and their extensions. Case studies are used to demonstrate topics such as nonlinear regression, linear models for binary and count data, and mixed effects models. Emphasis is placed on application of appropriate statistical techniques through extensive use of statistical software.

161380 Statistical Analysis Project **15 credits**

The course provides an opportunity for students to gain statistical research experience. Working with an academic staff member, students will develop a short research proposal, carry out the proposed research, and present their findings in an agreed manner.

161390 Special Topic **15 credits**

161391 Special Topic **15 credits**

161704 Bayesian Statistics **15 credits**

Introduction to the Bayesian paradigm. Markov Chain Monte Carlo estimation using WinBUGS. Comparison with frequentist statistics. Noninformative and improper priors. Inference and model selection. Linear and generalized linear models. Hierarchical Bayes.

161705 Advanced Statistical Inference **15 credits**

Properties of estimators: unbiasedness, consistency, efficiency and sufficiency. Methods of estimation with particular emphasis given to the method of maximum likelihood. Hypothesis testing and interval estimation. Nonparametric tests. Computationally intensive methods such as numerical likelihood estimation and Monte Carlo inference. Resampling methods.

161709 Topic in Statistical Theory **15 credits**

A topic in the theory of statistics, such as probability theory, Bayesian statistical theory, statistical decision theory, martingales and stochastic integrals.

161725 Statistical Quality Control **15 credits**

Revision of statistical process control procedures, evaluation of control chart performance and statistical design of charts, control of high quality process, multivariate process control, new process capability indices, statistical intervals. Industrial experimentation topics, evolutionary operation, analysis of means (ANOM) etc. Revision of acceptance sampling, continuous and special purpose sampling plans. Use of statistical packages.

161743 Statistical Reliability and Survival Analysis **15 credits**

Lifetime data occur in a wide variety of contexts: medical, demographic, industrial, economic. This course gives an introduction to the theory and practice of analysing lifetime data, commonly called survival analysis in medical contexts and reliability analysis in engineering.

161744 Statistical Genetics **15 credits**

Statistical methods for biological sequence analysis, analysis of gene expression data, and inference of biological networks. Applications will also be described in evolution and population genetics.

161762 Multivariate Analysis for Big Data **15 credits**

Research methods suitable for the analysis of big datasets containing many variables. The fundamentals of data visualisation, customer segmentation, factor analysis and latent class analysis with examples taken from business and health fields. Emphasis will be placed on achieving a conceptual understanding of the methods in order to implement and interpret the outcomes of multivariate analyses.

161770 Statistical Consulting **15 credits**

Students are given the opportunity to serve as a consultancy intern with close supervision of staff involved in consultancy activities. Instruction and experience in consultant/client interaction, communication skills, statistical practice, statistical computation and technical writing.

161777 Practical Data Mining **15 credits**

A practical approach to data mining with large volumes of complex data; prepare, cleanse and explore data; supervised and unsupervised modelling with association rules and market basket analysis, decision trees, multi-layer neural networks, k-nearest neighbours, k-means clustering and self-organising maps, ensemble and bundling techniques, text mining; use of leading software tools; business examples and research literature.

161871 Thesis 90 Credit Part 1 **45 credits**

A supervised and guided independent study resulting in a published work.

161872 Thesis 90 Credit Part 2 **45 credits**

A supervised and guided independent study resulting in a published work.

161875 Thesis **90 credits**

A supervised and guided independent study resulting in a published work.

161893 Research Report **60 credits**

161897 Thesis 120 Credit Part 1 **60 credits**

A supervised and guided independent study resulting in a published work.

161898 Thesis 120 Credit Part 2 **60 credits**

A supervised and guided independent study resulting in a published work.

161899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

161900 PhD Statistics **120 credits**
Each project is an individualistic effort on the part of the student in collaboration with a supervisor. The type of project and the work to be carried out will be decided jointly by the student and the supervisor.

162

Biology

162101 Cell Biology **15 credits**
An introduction to the cellular basis of life. Spanning eukaryotic and prokaryotic cells; cellular structure and function; core biochemical components; mechanisms for generating genetic diversity; the flow of information within cells and between generations; gene expression; and a survey of the landscape of modern genomics, this course provides the conceptual foundation for subsequent courses on molecules, cells and organisms.

162103 Introductory Biology **15 credits**
An introductory course in biology suitable for students with little previous experience in the subject. Topics include: the diversity of life; cells as the basic unit of life; form and function of cells, microbes, animals and plants; DNA and molecular genetics; classical genetics; evolution and ecology.

162211 Biology and Genetics of Microorganisms **15 credits**
Structure and metabolism of bacteria and their relation to the environment. Bacterial genetics. Eukaryote microbes - structure, physiology and genetics. Life cycle of viruses. Practical training in the manipulation of micro-organisms.

162221 Immunology **15 credits**
The course explores the cell types involved in the mammalian immune system. It allows students to learn about the principles of immunology including innate immunity, cell and antibody mediated immunity, the major histocompatibility complex, transplantation immunology, hypersensitivities, immunodeficiency and autoimmunity. The course provides an introduction to vaccines, clinical immunology and immunological laboratory tests.

162301 Medical Microbiology **15 credits**
Some major bacterial pathogens of humans in terms of the organisms, their habitats, modes of transmission, disease patterns and laboratory diagnosis. The structure, classification, propagation, assay and transmission of some of the major viruses of humans. Immunity to viruses and the laboratory diagnosis of viral infections.

162304 Applied and Environmental Microbiology **15 credits**
Actions and interactions of micro-organisms in soil, water, air, food, and the animal and human gut; consequences and applications of microbial colonisation processes.

162704 Current Topics in Microbiology **30 credits**
Current topics in microbiology covering topics in pathogenicity, biofilms, host interactions and industrial applications.

162720 Current Concepts in Molecular Life Sciences **30 credits**
A modular course in which students will critically examine experimental and computational approaches used to advance knowledge in their fields of choice ranging from Plant Science, Microbiology, to Molecular and Cell Biology, Genetics and/or Biochemistry.

162760 Research Methods and Communication in the Biosciences **30 credits**
A directed course in research methodology and communication in biosciences. Assignments may include a research proposal, a literature review, scientific writing for a journal and a formal seminar presentation.

162762 Grant Writing and Oral Communication in Biosciences **15 credits**
A directed course in applying for funding and oral communication in biosciences. Assignments may include a research proposal and a formal seminar presentation.

162870 Research Report **60 credits**

162871 Thesis 90 Credit Part 1 **45 credits**
A supervised and guided independent study resulting in a published work.

162872 Thesis 90 Credit Part 2 **45 credits**
A supervised and guided independent study resulting in a published work

162875 Thesis **90 credits**
A supervised and guided independent study resulting in a published work.

162897 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

162898 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work.

162899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

162900 PhD Microbiology & Genetics **120 credits**

167

Museum Studies

167742 Collection Management **30 credits**
An examination of the following areas of museological theory and practice: material culture; recent research into private collecting; preventive conservation; collection management policy and practice; contemporary collection management issues including collection rationalisation, contemporary collecting, and the changing roles of curators and collection managers.

167743 Museum Management **30 credits**
An examination of museum organisation, governance, policy development, strategic planning, marketing, financial management, project management and personnel management. Practical skills in budgeting, grant writing, reports and presentations will be taught.

167744 Museums and the Public **30 credits**
An examination of the philosophy, strategies and practical processes of effectively interpreting and communicating museum programmes for a variety of audiences.

167816 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

167817 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work.

167881 Thesis 90 Credit Part 1 **45 credits**
A supervised and guided independent study resulting in a published work.

167882 Thesis 90 Credit Part 2 **45 credits**
A supervised and guided independent study resulting in a published work.

167883 Thesis **90 credits**
A supervised and guided independent study resulting in a published work.

167896 Research Report Museum Studies (60) **60 credits**
Students intending to enrol in this course should write to the programme coordinator of Museum Studies at the earliest opportunity. A dissertation proposal must be submitted by 1 April in the year of enrolment and approved by the Museum Studies Research Committee. A dissertation of not more than 20,000 words must be submitted by 10 October in the year of enrolment.

167899 Thesis **120 credits**
Any student planning to enrol in the MA Thesis should advise the programme coordinator of Museum Studies in writing in the year before enrolment. A local supervisor may also be arranged. Students may enrol part-time and complete the thesis over two years. A thesis of approximately 30,000 words will be submitted. A thesis proposal must be submitted before 1 April in the year of enrolment and approved by the Museum Studies Research Committee.

Selection of a thesis supervisor should be discussed with the programme coordinator of Museum Studies.

167900 PhD Museum Studies 120 credits

168

Nursing

168171 Professional Nursing I 15 credits

A focus on professional identity and the context of nursing in Aotearoa New Zealand.

168172 Nursing Practice I: Foundations of Care 15 credits

An introduction to the experience and reflection on beginning knowledge, skills and attributes within simulated nursing settings.

168173 Nursing Practice II: Foundations of Practice 30 credits

Further development of the experience and reflection on knowledge, skills and attributes within simulated and placement settings.

168271 Professional Nursing II 15 credits

Explore in more depth an emerging professional identity and the complexities of the nursing context in Aotearoa New Zealand.

168273 Evidence-based Nursing Practice 15 credits

An exploration of the relevance and impact of evidence-based nursing on practice.

168274 Nursing Practice III: Integrated Care Part A 30 credits

Learners will experience and reflect on integrated knowledge, skills and attributes within simulated and multiple placement settings with a focus on mental health and long-term conditions.

168275 Nursing Practice III: Integrated Care Part B 30 credits

Learners will experience and reflect on integrated knowledge, skills and attributes within simulated and multiple placement settings with a focus on community health nursing.

168371 Professional Nursing III 15 credits

Advancement of a developing nursing professional identity within the complexities of the global community.

168372 Nursing Practice IV: Acute Care 45 credits

An advanced experience and reflection on knowledge, skills and attributes focused on acute care to care for individuals and whānau within simulated and multiple placement settings.

168373 Preparing for Professional Excellence 15 credits

An opportunity for students to consolidate learning from practice and theory to further their professional identity, sense of agency and contribution to the global nursing community.

168374 Nursing Practice V: Pre-Graduate 45 credits

Students begin the transition to registered nurse practice and meet Nursing Council of New Zealand competencies.

168702 Issues in Nursing 30 credits

Topics relevant to study and/or research into selected aspects of Nursing are investigated.

168703 Managing Long Term Conditions 30 credits

The multidimensional aspects of managing long term conditions within contemporary society, including self-management and models of chronic care, are examined and applied to improve health service delivery, and optimise health and independence.

168709 Contemporary Approaches to Clinical Teaching and Learning 30 credits

An examination of a range of theoretical perspectives and sociomaterial and sociocultural aspects influencing clinical teaching and learning. Sociomaterial and sociocultural perspectives recognise that learning is influenced by the context, by human and non-human aspects, and by the variety of interactions occurring in the learning space. Alternative approaches to the design, delivery, and assessment of practice-based education are explored.

168711 Health Research Design and Method 30 credits

Philosophical, ethical and methodological issues in relation to health research are examined. Selected quantitative and qualitative methods are explored in depth, in preparation for developing a research proposal for a thesis, or research project.

168712 Pain Management 30 credits

The multidimensional aspects of pain management including physiological and psychological components are examined. This knowledge is applied to refine nursing interventions in order to manage the pain experienced by people with acute or chronic ill-health conditions and those receiving palliative care.

Health

168713 Evidence-Based Practice 30 credits

Evidence based practice (EBP) is an approach to problem solving and service provision based on the integration of "best evidence" with expert opinion and client/consumer perspectives. Students will develop EBP skills needed to critically evaluate information available from research findings, professional consensus statements and other sources of information, as well as communicating the results.

Nursing

168714 Assessment and Clinical Decision-Making in Mental Health 30 credits

This practical course advances students' comprehensive assessment, formulation, clinical decision making, and treatment planning abilities in a range of clinical settings within mental health nursing. Emphasis is placed on trauma-responsive and culturally affirming practices alongside evidence-based tools, frameworks, and approaches.

168717 Applied Ethics for Professional Practice 30 credits

Critique of a range of philosophical approaches and practical ethical decision-making frameworks, focussed on practice application across diverse nursing roles. Particular attention is brought to nurses' role as moral agents in 'everyday' practice. Significant themes include social justice; links between biculturalism, cultural safety and ethics; and the ethical implications of the socio-political context of contemporary healthcare.

168719 Clinical Specialty: Older Persons' Health 30 credits

Selected modules related to providing a health service to older people are offered. The specialist knowledge base and skills for working in a variety of older persons' health settings will be critically examined and their application in particular practice contexts explored.

168720 Psychological Interventions in Mental Health 30 credits

This practical course enhances students' clinical nursing practice through the teaching of advanced treatment planning and evidence-based mental health interventions. Key concepts and skills are drawn from psychological interventions such as Motivational Interviewing, Cognitive Behavioural Therapy (CBT), Dialectical Behavioural Therapy (DBT), and Acceptance and Commitment Therapy (ACT). Emphasis is also placed on reflective practice and clinician self-care.

168721 Kawa Whakaruruhau: Cultural Safety in Clinical Practice 30 credits

Kawa Whakaruruhau - cultural safety is essential to improving health outcomes for Māori and other populations. This course aims to explore cultural systems and improve care through developing practitioner awareness of difference, decolonising, considering power relationships and barriers to clinical effectiveness. Practitioners can act to overcome racism within the structures, policies, and practices of their organisations and the health system.

168722 Wound Management 30 credits

The multidimensional aspects of wound management including physiological, pathophysiological and psychological components are examined and applied in the clinical practice setting.

168724 Primary Health Care in Practice 30 credits

Primary health care is central to improving equity. This course critiques the primary health care system and clinical practice on a continuum from health promotion and disease prevention to treatment, rehabilitation, and palliative care. By prioritising equity and complying with guarantees of Te Tiriti o Waitangi health professionals can achieve equitable health outcomes for Māori and other underserved populations.

168728 Assessment and Clinical Decision-Making	30 credits	168748 Complex Partnerships II [Transition to Practice]	30 credits
Development of advanced nursing practice knowledge and skills and comprehensive holistic health assessment and clinical decision-making.		An extended practicum experience designed to consolidate theory and practice and support working realities for a novice nurse in a clinical setting.	
168731 Leadership in Nursing	30 credits	168750 Registered Nurse Prescribing Practicum	30 credits
Leadership in professional practice is explored within the broader context of health care. The course critically examines the political, legislative, economic, ethical and cultural issues influencing nursing leadership and the provision of health services within particular scopes of practice.		A supervised placement in an approved setting in which assessment, clinical decision-making and prescribing is undertaken in accordance with the Nursing Council of New Zealand competencies for registered nurse prescribing practice.	
168733 Physiology and Pathophysiology	30 credits	168796 Health and Well-being of Children and Young People	30 credits
Translational and clinically relevant physiological and pathophysiological concepts as they apply to nursing practice are examined. Selected signs/symptoms are considered in terms of physiological processes at biochemical, cellular and functional levels. The emphasis is on normal physiological processes and their possible subsequent development to pathophysiological phenomena.		A course designed to equip nurses with knowledge and skills to address the inequities in health that children and young people face on an individual level, nationally and internationally, and to understand the significance of the Sustainable Development Goals (SDGs) for future generations.	
168734 Clinical Pharmacology	30 credits	168802 Advanced Topics in Nursing	30 credits
Pharmacology topics relevant to advanced nursing practice are critically examined. These include pharmaceuticals, pharmacodynamics, pharmacokinetics and a range of pharmacotherapeutic topics.		Critical reviews, complex case studies, advanced study and/or research into selected aspects of Nursing.	
168736 Advanced Critical Care Nursing	30 credits	168816 Thesis 120 Credit Part 1	60 credits
This course is designed for experienced critical care nurses seeking to enhance their knowledge and skills in the field of critical care. This course critically examines advanced concepts, evidence-based practices, and complex scenarios encountered in critical care settings. Students will develop a deeper understanding of critical care management, advanced nursing interventions, and leadership in complex environments.		A supervised and guided independent study resulting in a published work.	
168737 Foundations in Critical Care Nursing	30 credits	168817 Thesis 120 Credit Part 2	60 credits
This course provides a foundation of theoretical knowledge about critical care nursing. Principles, concepts, and practices of critical care nursing will be examined to prepare students in the provision of comprehensive care to critically ill patients. Trauma-informed care underpins nursing practice for this course, which recognises the individuality of each patient's experience, promoting a holistic approach to care. Trauma-informed care and Tiriti-led care share common ground in their emphasis on cultural competence, partnership, empowerment, and addressing disparities.		A supervised and guided independent study resulting in a published work.	
168740 Critical Knowledge for Nursing (Bioscience)	15 credits	168820 Scholarship for Clinical Practice	15 credits
An exploration of physiology including an overview of basic function of cells, tissues organs and their role in the human body to maintain homeostasis.		Scholarship through evidence-based practice is examined as a conscientious, problem-solving approach to nursing that incorporates the best evidence from peer reviewed research, patient values and preferences, and a clinician's expertise in making decisions about a patient's care.	
168742 Fundamental Partnerships I	30 credits	168821 Leadership in Nursing Practice Project	30 credits
Introduction into the fundamentals of care framework (evidence-based nursing framework) as a platform to partner with individuals and whānau to promote wellness in nursing relationships. A practicum is included to gain nursing experience in the context of human wellness.		An in-depth, evidence-based exploration of the potential for change in practice in the clinical environment.	
168743 Fundamental Partnerships II	30 credits	168860 Prescribing and Advanced Practice for Nurse Practitioners	60 credits
An exploration of the fundamentals of care (evidence-based nursing framework) as it relates to altered health status using a body systems approach. A practicum is included to gain nursing experience in the context of long-term conditions and primary health.		A supervised practicum in an approved setting in which assessment, clinical decision-making and prescribing is undertaken in accordance with the Nursing Council of New Zealand competencies for nurse practitioners.	
168744 Professional Issues	15 credits	168861 Clinical Project for Nurses	60 credits
Introduction to the professional discipline of nursing including the regulatory, legal and ethical dimensions of practice.		The clinical project requires the student to negotiate, plan and implement a project in a clinical setting that meets an identified need related to leading change, quality processes, education or praxis. The project will be guided by an appropriate theoretical perspective and includes a critical review of relevant literature that informs the project purpose and outcomes.	
168745 E-Health and Technology in Nursing	15 credits	168890 Research Report	60 credits
Critical evaluation of the desired and unseen effects of technology in nursing including the status of technology and its role in creating an information-literate nursing workforce.		A supervised and guided independent research project.	
168746 Social Justice and Citizenship	15 credits	168896 Thesis 90 Credit Part 1	45 credits
Critical consideration of our individual and collective response to vulnerable and marginalised populations to lead in the reduction of health inequity and promote wellbeing.		A supervised and guided independent study resulting in a published work.	
168747 Complex Partnerships I	45 credits	168897 Thesis 90 Credit Part 2	45 credits
Nursing practice is examined in relation to caring for people and their whānau experiencing acute distress, illness or trauma across the age continuum. A practicum is included to gain experience and apply nursing knowledge, skills and attributes in the acute care context.		A supervised and guided independent study resulting in a published work.

172

Linguistics

172131 Language and Communication **15 credits**
An introduction to language with particular emphasis on spoken communication.

172133 Introduction to Language Studies **15 credits**
Introductory skills of analysing language, at the level of discourse, morphology, syntax, semantics and phonology.

172231 Linguistics for Speech Therapists **15 credits**
This course examines the morphology, grammar and discourse structure of spoken language with an emphasis on speech therapy

172232 Language and Society in New Zealand **15 credits**
An introduction to sociolinguistics with particular reference to New Zealand: focussing on language and social interaction, regional and social variation in language use, bilingualism and the status of minority languages, and the sociolinguistics of te Reo Māori.

172233 Language Learning Processes **15 credits**
An introduction to approaches and theories in applied linguistics with particular focus on language learning processes.

172234 Phonetics **15 credits**
A study of the sounds of language and an introduction to the acoustic analysis of speech.

172235 Linguistic Analysis of the English Language **15 credits**
An introductory course in linguistic analysis of the English language covering the fundamental concepts of morphology, phonetics, phonology, and syntax.

172236 Forensic Linguistics **15 credits**
An introduction to the study of forensic linguistics, focussing on a variety of business and legal contexts and related ethical issues.

172237 Language, Discourse and Power **15 credits**
An introduction to critical discourse analysis, exploring how language is used in the reproduction of social inequalities.

172239 Language and Culture **15 credits**
An examination of the interrelationship between/of language and culture through a study of various elements of language, language use and language acquisition in a wide range of cultural contexts.

172330 Sounds and Structures **15 credits**
Introduces theoretical approaches to phonology and syntactic/grammatical structures and their interfaces.

172333 Discourse and Institutions **15 credits**
A critical examination of public and private-sphere discourses in institutional contexts through linguistic theories and methods.

172335 Language and Identity **15 credits**
An advanced sociolinguistic study of how language is used to represent and construct aspects of identity relevant to particular social interactions, including the individual's ability to negotiate multiple forms of identity and belonging.

172336 Languages of the Pacific **15 credits**
An examination of the three major language subgroups spoken in the Pacific, focussing on their formal elements, the relationship between language and society, and the linguistic consequences of the encounter between Pacific peoples and speakers of non-Pacific languages.

172337 Historical and Comparative Linguistics **15 credits**
An advanced study of historical language change and language relationships. The course examines reasons for and types of language change, and methods for reconstructing earlier language forms.

172338 Language, Diversity and Mediated Communication **15 credits**
An examination of one-to-many communication in the Web and mediated contexts, focussing on globalised and transcultural communication of linguistic perspectives.

172372 Diverse Contexts of Language Learning **15 credits**
An examination of the cultural and linguistic diversity that exists within language learners and teachers and recognising its interrelationship with ideologies and contextual factors.

172373 Language Curriculum and Materials **15 credits**
A study of principles of curriculum design and resource development in face-to-face and digitally facilitated learning environments.

172375 Language Assessment and Professional Development **15 credits**
An introduction to assessing learners of English as an additional language and critical reflection on professional development pathways.

172712 Multimodal Discourse Analysis **30 credits**
This course examines communication as a multimodal phenomenon, assessing space and time as key variables in the production of written and spoken utterances.

172713 Language and Communication in Late Modernity **30 credits**
This course examines the linguistic construction of some key themes that have emerged in late modernity such as globalising panic, emotions and the imperative to feel, the discursive construction of the body, discourse and the late modernity.

172799 Research Report **30 credits**
The supervised undertaking of an original piece of research into discourse and communication from a linguistic perspective.

172850 Thesis **120 credits**
The supervised undertaking of an original piece of research into discourse and communication from a linguistics perspective.

172851 Thesis 120 Credit Part 1 60 credits

The supervised undertaking of an original piece of research into discourse and communication from a linguistics perspective.

172852 Thesis 120 Credit Part 2 60 credits

The supervised undertaking of an original piece of research into discourse and communication from a linguistics perspective.

172855 Master of Communication Research Project 60 credits

An applied research project involving the critical evaluation and application of selected research methodologies to address communication-related challenges.

172899 Thesis 120 credits**172900 PhD Linguistics 120 credits****175****Psychology****175101 Psychology as a Social Science 15 credits**

An introduction to psychology as the scientific study of human behaviour, with emphasis on individual differences and social influences. The course aims to develop an awareness of the issues, terminology, methods and techniques involved in the study of human behaviour.

175102 Psychology as a Natural Science 15 credits

An introduction to methods and findings from the scientific study of psychology and its application to everyday human behaviour. Examination of basic behavioural, perceptual and cognitive processes and how these are influenced by biological mechanisms and cultural context.

175103 Introduction to Indigenous Psychologies 15 credits

The course provides foundational content of indigenous psychologies, including the rationale for their inclusion in the discipline of Western Psychology, as well as overviewing their application across multiple domains (e.g., health, education, social, policy, etc) in Aotearoa New Zealand specifically, and more generally in other cultural contexts across the globe.

175201 Social Psychology 15 credits

A survey of contemporary experimental social psychology. Against this backdrop critical perspectives are introduced with particular emphasis on the practice of discursive psychology in the New Zealand context.

175203 Introduction to Psychological Research 15 credits

An introduction to methods commonly used in psychological research with particular emphasis on measurement, study designs, data analysis, and communicating research results.

175205 Brain and Behaviour 15 credits

An introduction to basic biological processes underpinning behaviour and what happens when these processes are disrupted. Students will develop critical thinking and effective communication skills (both verbal and written) in relation to biological psychology.

175206 Memory and Cognition 15 credits

The central goal of the course is to consider how knowledge is represented and processed in the brain. Students will be introduced to the mental processes involved in thinking and knowing, studied within a converging methods framework that includes evidence from experimental psychology, neuroscience, neuropsychology, and cognitive science.

175210 Ngā Tirohanga Rua o te Taha Hinengaro: Bicultural Perspectives in Psychology 15 credits

This course engages with the concept of culture, and its relevance and importance in a bicultural country such as Aotearoa. The interplay between non-Western cultural perspectives and the dominant form of psychology situated within a predominantly Western scientific paradigm, is explored. Indigenous perspectives in general and Māori worldviews specifically, are examined within and juxtaposed to, the discipline of psychology.

175301 Community Psychology 15 credits

Community psychology focuses on people within the contexts of social settings and systems, that is, in ecological relationships with social and

physical environments. Conceptual frameworks, the roles of research and practice, and specific intervention strategies developed and used by community psychologists will be among topics considered.

175302 Introduction to Clinical Psychology 15 credits

This course provides an introduction to clinical psychology and mental distress, with an emphasis on current thinking and research in the field. The course examines: the core concepts in defining and classifying mental distress; some of the major psychological disorders across the lifespan; empirically supported approaches to explaining mental distress; and treatments aimed at supporting people towards recovery.

175303 The Practice of Psychological Research 15 credits

Study of the practice of psychological research. Students undertake a range of exercises and class projects to develop practical research skills.

175304 The Psychology of Security 15 credits

An exploration of how psychology can be utilised to improve our understanding of, and responses to, the various security challenges posed by the contemporary environment.

175306 Assessment of Individual Differences 15 credits

Study of the basic concepts of psychological testing within the broad context of the assessment of individual and group differences. Examination of the rationale behind testing and its application to a wide range of assessment situations.

175309 Forensic Psychology 15 credits

The focus of this course is to study the issues and controversies in contemporary relationships between psychology and law. The diversity of the field of forensic practice is reflected in the topics covered, and the themes of violence and justice are used to represent the multidisciplinary influences at the nexus of psychology and law within mental health and legal systems.

175311 Psychology of Women 15 credits

A theory and research-based examination of the Psychology of Women as a sub-discipline with particular focus on how research in the field challenges gender biases and social assumptions. The history of the field is illustrated by classic and contemporary examples of research methodologies suitable for critical studies of sexuality, mothering and gender-based violence.

175313 Gender and Violence 15 credits

A critical, research-based examination of the forms and prevalence of gendered violence, and an examination of selected legislation and intervention practices advocated for reducing and eliminating gendered violence in Aotearoa New Zealand.

175314 Advanced Indigenous Psychologies 15 credits

The course provides advanced content of indigenous psychologies, including their specific application in the theory, research and practice of psychology across multiple domains (e.g., health, education, social, policy, etc) in Aotearoa New Zealand specifically, and more generally in other cultural contexts across the globe.

175316 Evolution, Culture and Mind 15 credits

An evolutionary approach to viewing humans as a species socialized into meaning-making, focusing on biological, cultural, and evolutionary bases of human behaviour, and on applying different approaches to culture to understand the self, and the functioning of societies and culture.

175317 Health Psychology 15 credits

This course consists of an introduction to and critique of general theories and models that have been used to understand, describe, predict and change behaviours related to health and illness and health promotion. It has a strong focus on the application of health psychology in the New Zealand context.

175318 Conducting Psychological Research 15 credits

Students will develop and apply hands-on skills for conducting research in psychology. They will design and conduct research for a range of psychological studies and develop capabilities in the ethical application of both qualitative and quantitative research and science communication. The course is designed to prepare students for postgraduate level study and/or a career that requires research skills.

175343 Personnel Psychology and Career Development 15 credits

Study of applied aspects of individual differences in organisations. Issues such as selection and training, performance evaluation, occupational health and vocational and career development will be studied.

175345 Organisational Psychology 15 credits

An introduction to key concepts within organisational psychology, concentrating on the interplay between theoretical issues and practical concerns. Students will be enabled to critically evaluate the implications which different psychological perspectives have for understanding organisational problems.

175718 Postmodernism and Psychology 15 credits

The course will focus on some of the ways in which the cultural phenomenon labelled as 'postmodernism' has impacted on/in psychology, with particular emphasis on the poststructuralist theories through which postmodern psychology is developing.

175719 Applied Criminal Psychology 15 credits

An advanced study of the aetiology of recurrent criminal behaviour with reference to cultural and ethnicity issues, familial and societal factors, and cognitive and psychopathological correlates. The underlying emphasis of the course is offender rehabilitation.

175720 Advanced Psychology of Women 15 credits

This course examines contemporary theoretical studies in the psychology of women. It is an advanced study of the history of women in psychology and critiques traditional approaches to research on women and girls. It includes three contemporary approaches focusing on specific areas of concern in the sub-discipline at present.

175721 Child and Family Therapy 15 credits

The course covers a variety of theoretical frameworks which are used in working with children and families. An in-depth case study approach will be used to develop students' skills in working with children and families. The course is designed to build on the students prior knowledge of developmental and abnormal psychology.

175722 Principles of Clinical Neuropsychology 15 credits

This course will focus on the principles of neuropsychological assessment, as they apply across the life span. Factors which influence neuropsychological functioning will be considered including neuroanatomy, cognitive functioning and the conditions that influence these factors.

175724 Advanced Experimental Psychology 30 credits

This course provides an advanced overview of the theoretical and methodological issues that define contemporary experimental psychology with particular focus on affective, cognitive, and social psychology.

175725 Applied Social Psychology 30 credits

This course adopts an applied orientation to social psychology in relation to complex socio-cultural issues.

175729 Psychology and Culture 15 credits

This course examines the wide-ranging influence culture has in people's lives, from their ideological beliefs and values to their behaviour patterns. How cultural influences have been considered in the theory, research, and practice of psychology will be examined.

175730 Professional Practice in Psychology 15 credits

The course provides an in-depth examination of the professional issues that impact on the practice of psychology. Models of practice, ethics, the statutes that affect practitioners, professional interrelationships and cultural issues are all analysed using a case-based approach.

175732 Psychological Well-being in Organisations 15 credits

This course examines the influence of organisational and work characteristics on staff well-being and performance. It covers stress and stress management, designing salutogenic workplaces, implications of disaster and crises for staff, families and communities, psychological aspects of promoting health and safety in organisations.

175733 Sustainable Livelihood 15 credits

According to the UN, Sustainable Livelihoods include not only access to shelter and food but also security, dignity, societal participation for groups and individuals. This course examines how workplaces potentially enable such capabilities, e.g., by respecting cultural foundations, enabling work-life-

balance, providing decent work, and reducing inequality, through equitable partnerships between organizations along global supply chains, fair trade, living wages.

175734 Child Clinical Neuropsychology 15 credits

This course is designed to enable students to understand and use theories, research and skills involved in child neuropsychology. An emphasis will be placed on functioning in interdisciplinary teams.

175737 Occupational Psychology 15 credits

This course examines the relationship between people and organisations. Adopting a psychological perspective, it examines strategic aspects of staff development, job, social and cognitive approaches to task and role analysis, recruitment, selection, the training process, equal employment opportunities, industrial relations and performance assessment.

175738 Psychological Research: Principles of Design 15 credits

An advanced study of the principles of research design in psychology. The course will provide a conceptual orientation to the integrated components of the design process. Through a meta-theoretical framework, various approaches to design will be explored to enable advanced engagement with psychological research from scientific, interpretivist and/or indigenous perspectives.

175739 Health Psychology: Understanding Health and Illness 15 credits

An examination of how psychological factors enhance physical health or increase the risk of illness and disease. Theoretical and methodological aspects of etiology are given particular emphasis using examples from such areas as cardiovascular diseases and psychoneuroimmunology.

175740 Occupational Health Psychology 15 credits

The application of psychological principles and theory to health and managing hazards in occupational settings. Students will learn critical skills in psychological evaluation, appropriate for the environmental, cultural and political contexts of the New Zealand workplace.

175741 Psychological Assessment in Organisations 15 credits

This course investigates the application of the principles and theory of psychological measurement in organisational contexts. It covers the development of psychological tests, the implications of organisational factors for latent psychological constructs, test characteristics and test evaluation, and the application of psychological tests for processes such as selection, promotion, performance appraisal.

175743 Health Psychology: The Social Context 15 credits

An examination of psychological theory and research on how social context shapes the experience of physical health and illness. An emphasis will be placed on the individual's understandings of health and experience of illness, and a critical consideration of research methods appropriate for examining these issues.

175744 Health Psychology: Promoting Health 15 credits

An analysis of psychological theories and methods as applied to health promotion and disease prevention, and consideration of their applications at group, community and population levels.

175746 Psychological Research: Quantitative Data Analysis 15 credits

An examination of how psychologists use quantitative data analysis techniques to address complex research problems involving multiple variables. Techniques including multiple regression, factor analysis and structural equation modelling are explored, with an emphasis on the relationships between analyses, research questions and design issues.

175747 The Psychology of Sport and Exercise 15 credits

The course will examine current psychological theories and related research in the sport and exercise domain. Specifically, the focus of the course is on how psychological factors influence involvement and performance in sport and exercise.

175748 The Psychology of Organisational Change 15 credits

This course examines psychological aspects of organisational change. It considers societal and organisational factors driving change and models of both planned and unplanned organisational change, illustrating these issues through the use of case studies of organisational change and psychologists' accounts of their experiences as change agents.

175749 Health Psychology Practicum 15 credits

Practical experience of at least 120 hours working in a community health agency under supervision. Students will participate in the design, implementation or evaluation of a health intervention, and critically reflect on their practice in relation to relevant theories and methods.

175750 Qualitative Methods in Psychology 15 credits

The course provides advanced understanding and skill development to enable students to undertake qualitative research in psychology.

175751 Neuropsychological Rehabilitation 15 credits

This course is designed to enable students to understand and use theories, research, and skills involved in neuropsychological rehabilitation. This course will review interventions that arise from neuropsychological evaluation. An emphasis will be placed on functioning in interdisciplinary teams.

175761 Theory and Practice of Cognitive Behaviour Therapy 15 credits

This course provides a broad overview to the theory and practice of Cognitive Behaviour Therapy. Early research foundations and current empirical support will be examined. In addition to gaining an understanding of the generic cognitive model and its variants, practical experience in the use of basic assessment instruments and procedures for effective behavioural and cognitive intervention will be gained through demonstrations and roleplays.

175781 Understanding Mental Distress 15 credits

This course builds on undergraduate study of clinical psychology to provide an advanced understanding of mental distress across the lifespan. The focus is on recognising the most common experiences of mental distress and understanding their etiology using evidence-based theoretical frameworks, emphasising psychological approaches. Attention is given to recovery and lived experience perspectives, and contextual and cultural influences on understanding the experience of mental distress. A case study approach is taken to provide opportunities for applied learning.

175782 Clinical Psychology Assessment 15 credits

This course will examine a variety of standard objective and subjective clinical assessment instruments, and their use in diagnosis and treatment across the lifespan. Topics covered include cognitive, emotional and behavioural assessment; diagnosis-specific and population-specific instruments; and diagnostic interview systems. Principles of test administration, scoring and interpretation as well as ethical issues surrounding psychological testing will also be covered.

175783 Clinical Psychology Interventions 15 credits

The course emphasises empirically validated treatments and integration of psychotherapy research and practice across the lifespan. The course covers behavioural and cognitive-behavioural interventions, experiential and brief dynamic psychotherapies as well as other factors in therapy (e.g., the roles of therapist, client, and culture).

175799 Research Report (30) 30 credits**175811 Clinical Assessment Skills 30 credits**

This is a workshop based course that requires students to engage in learning activities across a full range of applied skills, of clinical psychology assessment across the lifespan, including interview skills, skills in case conceptualisation and psychological formulation, and skills in the selection, administration, scoring, interpretation and reporting of psychological and neuropsychological tests. Training will also include compulsory attendance at workshops and other training opportunities as they arise.

175812 Clinical Intervention Skills 30 credits

This is a workshop based course that requires students to engage in learning activities across a full range of applied skills, of clinical psychology interventions across the lifespan, including behavioural and cognitive behavioural interventions, family and systems approaches and neurorehabilitation interventions. Training will also include compulsory attendance at workshops and other training opportunities as they arise.

175813 Clinical Psychology Practica 60 credits

Provides structured supervision of the student's clinical activities. It includes observation of the work of clinical psychologists, supervised practice of designated clinical psychology skills, and exploration of individualised psychotherapy approaches and formal treatment protocols in a selected domain of practice. And provides opportunities for supervised practice of all the professional activities of a clinical psychologist, including working in

professional teams, conducting assessments under supervision, and using the empirical literature to guide clinical decision making.

175814 Clinical Psychology Internship 120 credits

Supervised experience in all aspects of clinical psychology service delivery in a professional service setting, with increasing emphasis on independent ability to offer specialised assessment and treatment programmes to a diversity of clients in a safe, culturally appropriate, and ethical manner. The internship comprises a minimum of fifteen hundred hours of supervised direct clinical experience in an approved setting. The internship involves supervision, videotaped assessment of work with clients, seminars and workshops designed to deal with specialised clinical issues such as client safety, legal concerns, sophisticated diagnostic methods, bicultural practice and so on, culminating in a practical-oriented exam involving external examiners.

175851 Advanced Professional Issues in Psychological Practice Part I 30 credits

This course is Part I of the core curriculum for students completing the PGDipPsychPrac. The course covers the advanced study of professional psychology theory, models, methods, and principles as they relate to those who are establishing their professional identity and beginning to practice. The integrated curriculum develops student's knowledge of the New Zealand Psychologists Board Cultural and Core Competencies and provides the scientific and reflective frameworks for safe and ethical practice.

175852 Advanced Professional Issues in Psychological Practice Part II 30 credits

This is Part II of the core curriculum for students completing the PGDipPsychPrac. The course covers the advanced study of professional psychology theory, models, methods, and principles as they relate to those who are consolidating their professional identity and attaining entry level competence. The integrated curriculum deepens students' knowledge of the New Zealand Psychologists Board Cultural and Core Competencies and reflective practice, and addresses the complexities of safe and ethical practice with individuals and systems.

175853 Practicum in Psychological Practice Part I 30 credits

This is Part I of the individualised curriculum for students completing the PGDipPsychPrac. For this course students undertake supervised practice with clients in an approved setting. The focus is on the ethical, safe, respectful application of psychological knowledge/theory in practice, and demonstration of the foundations of Core and Cultural Competence. The integrated curriculum allows students to apply their learning in the workplace, establish their professional identity, and attain a strong understanding of the role and obligations of a psychologist in Aotearoa New Zealand.

175854 Practicum in Psychological Practice Part II 30 credits

This is Part II of the individualised curriculum for students completing the PGDipPsychPrac. For this course students continue supervised practice with clients in an approved setting. The focus is on preparing for independent practice and consolidating all of the Core and Cultural Competencies. The integrated curriculum allows students to apply their learning in the workplace, effectively manage complexity, and demonstrate attainment of all competencies required to register as a psychologist in Aotearoa New Zealand.

175873 Research Report Psychology (60) 60 credits**175894 Thesis 120 Credit Part 1 60 credits**

A supervised and guided independent study resulting in a published work.

175896 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

175899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

175900 PhD Psychology 120 credits**175920 Clinical Psychology Practicum A 15 credits**

Provides structured supervision of the student's clinical activities in the workplace to fulfil clinical psychology practicum requirements. It included observation of the work of clinical psychologists, supervised practice of designated clinical psychology skills, and exploration of individualised psychotherapy approaches and formal treatment protocols in a selected domain of practice.

175921 Clinical Psychology Practicum B 15 credits

Provides further supervision of the student's clinical activities in the workplace to fulfil clinical psychology practicum requirements. It includes supervised practice of all the professional activities of a clinical psychologist, including working in professional teams, conducting assessments under supervision, and using the empirical literature to guide clinical decision making.

175922 Clinical Psychology Internship 60 credits

Supervised experience in all aspects of clinical psychology service delivery in a professional service setting, with increasing emphasis on independent ability to offer specialised assessment and treatment programmes to a diversity of clients in a safe, culturally appropriate, and ethical manner.

175935 Skills in Clinical Assessment 15 credits

Provides advanced training in applied skills of clinical psychology assessment across the lifespan, including interview skills, skills in case conceptualisation and psychological formulation, and skills in the selection, administration, scoring, interpretation and reporting of psychological and neuropsychological tests.

175936 Skills in Clinical Interventions 15 credits

Provides advanced training in applied skills of clinical psychology interventions across the lifespan, including behavioural and cognitive behavioural interventions, family and systems approaches, and neurorehabilitation interventions.

175991 Thesis Part A 90 credits

Thesis research builds the student's ability to carry out independent scientific inquiry which represents a significant contribution to knowledge and understanding in clinical psychology. In the initial stages of thesis preparation, students participate in a group seminar to review a number of specialised methodological issues that exist within clinical psychology.

175992 Thesis Part B 90 credits

Supports continued research activities, normally involving selecting and testing participants; other data collection strategies as needed by the research design; statistical analysis of data, conceptualisation of the findings, and the development of tentative conclusions.

175993 Thesis Part C 60 credits

Integrates the student's emerging ability to carry out independent research of direct relevance to conceptual foundations of clinical psychology. The candidate integrates the major study with clinical follow-up study or studies of a practical nature, derived from the concurrent internship experiences.

176**Sociology****176101 The Sociological Imagination 15 credits**

A foundation course in Sociology covering the key substantive aspects of contemporary society e.g. individual and social processes, globalisation and social inequalities.

176106 The Stuff of Everyday Life 15 credits

An introduction to the sociology of everyday life and everyday material objects in both local and global contexts.

176216 Globalisation in a digital world 15 credits

This course examines the intersecting material, social, and digital complexities of late capitalism in the context of increasing conditions of globalisation and glocalisation. Using a variety of sociological optics, the course aims to assist students to develop critical understandings that will enable them to be constructive contributors to their future worlds.

176218 Race, Nation and Modernity 15 credits

A review of the development of ideas of race and nation from the early modern era in Europe through to their world-wide crisis of the twentieth century including contemporary attempts to move beyond race via the concepts of ethnicity and indigeneity in Aotearoa New Zealand.

176223 Social Inequality and Justice 15 credits

An examination of how social structures create inequalities with a focus on gender, class, and ethnic diversities and identities and how claims for social transformation are made.

176224 Gender: Bodies that Matter 15 credits

An examination of how people experience gender, how gender inequality relates to other categories of social difference and how feminist approaches reveal and disrupt gender.

176302 Research Design and Practice 15 credits

A practical course that introduces the principles of research design, quantitative and qualitative methods and research dissemination, and students undertake a small sociological research project under supervised conditions.

176308 Sociology of the Environment 15 credits

An advanced examination of the interconnections between society and the environment with a particular emphasis on the roles of science and politics in the creation of environmental knowledge and practice.

176318 Sociology of Death and Dying 15 credits

A grounding in the literature on death and dying and an examination of sociological analyses of dying and death. The course is intended for Sociology and other students.

176322 The World of Work: Contemporary Issues 15 credits

This course provides an in-depth exploration of the changed nature of work in contemporary society. It examines the broader context of change, contemporary forms and patterns of work and occupations and issues and perspectives on global and local labour markets.

176324 Imagining Other Worlds 15 credits

A study of contemporary utopian sociological approaches to social change, based upon models of economy, administrative governance, and social reproduction that differ from those of colonial capitalism.

176325 The Politics of Truth 15 credits

An enquiry into the social contexts and power relationships that influence the production of knowledge, drawing on situations of current political significance. 'Truth-claims' are deconstructed in order to identify underlying ideological and political impulses.

176701 Current Issues and Theories 30 credits

An examination of key concepts, theories and debates in contemporary social theory.

176702 Advanced Social Inquiry 30 credits

An advanced study of methodological issues pertinent to social research. The course is designed to assist the planning of postgraduate theses and reports.

176718 Environmental Sociology 30 credits

An exploration of the interrelations between society and the environment, with an examination of major contemporary environmental issues from a sociological point of view. Among the major issues covered are consumerism, population growth, resource limits, development, political conflicts, environmental groups and environmental values.

176799 Research Report (30) 30 credits**176816 Thesis 120 Credit Part 1 60 credits**

A supervised and guided independent study resulting in a published work.

176817 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

176873 Research Report Sociology (60) 60 credits**176881 Thesis 90 Credit Part 1 45 credits**

A supervised and guided independent study resulting in a published work.

176882 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

176883 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

176899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

176900 PhD Sociology **120 credits**

178

Economics

178100 Principles of Economic Policy **15 credits**
The course provides students with a basic understanding of economic policy at industry, national and international levels.

178110 The New Zealand Economy **15 credits**
An introduction to the development and structure of the economy of New Zealand, with emphasis on actual issues and policies. International influences from a New Zealand perspective.

178111 Quantitative Methods for Economics **15 credits**
This course provides a foundation for students to develop their quantitative and analytical skills in the context of the Economics discipline.

178200 Macroeconomics **15 credits**
The development and application of macroeconomic models to globally-oriented economies, and the assessment of real-world policy problems from a practical perspective.

178201 Microeconomics **15 credits**
The development and application of models of consumer optimisation, producer behaviour, and competition in markets.

178210 Economic Policy **15 credits**
Macroeconomic and microeconomic policies and problems of unemployment, inflation, balance of payments, growth, market distortions and public goods. Justification for government intervention and its effectiveness. Application of economic principles will be stressed and social considerations incorporate emphasis on the New Zealand experience.

178221 Methods of Economic Analysis **15 credits**
An introduction to the techniques of quantitative economic analysis. The use of linear algebra and calculus in economics. Constrained optimisation. Simple dynamics.

178230 The Economics of Human Behaviour **15 credits**
An in-depth exploration of people's real-world decision-making processes with insights from psychology and other behavioural sciences.

178239 Sport Economics **15 credits**
An introduction to fundamental economic principles and concepts and their application to sports.

178240 Managerial Economics **15 credits**
Economic principles applied to decision problems of managers in a business organisation. Analysis of costs, revenues and profits in relation to a firm's objectives. Emphasis on pricing policy, investment decisions, advertising and promotion expenditure.

178242 Land Economics **15 credits**
The treatment of land resource questions in economics, including changing theoretical approaches to land and the income from the land, factors influencing the behaviour of land markets, environmental economics and land use, specific models of land use patterns, the question of the efficient use of land resources, estimating changing land use requirements, taxation in relation to land markets, location decision.

178280 Regression and Predictive Analysis **15 credits**
An introduction to regression and predictive analysis, using real world data to provide actionable insights that aid organisational decision-making processes.

178300 Macroeconomic Policy and Applications **15 credits**
This course incorporates financial markets into macroeconomic models and analyses government policies that address current macroeconomic events.

178301 Competition and Industry **15 credits**
The modelling of microeconomic decision-making of competing firms in industries, with application to real-world issues.

178307 Markets, Firms and Consumers **15 credits**
Microeconomic analysis will be applied to problems in consumer behaviour, business strategies and investment choice, resource allocation and regulation.

178308 Economic Analysis of Money, Banking and Financial Markets **15 credits**

This course analyses the causes, characteristics and consequences of business cycles. A neo-classical framework is applied to situations commonly seen in small open economies such as New Zealand. The role and importance of financial markets is highlighted and used to prescribe optimal government policy in many frequently observed macroeconomic situations.

178311 Big Data, Econometrics and Machine Learning **15 credits**
This course investigates big data analytic and econometric methods, particularly machine learning methods, to better inform business and policy decision making.

178312 Globalisation and Trade **15 credits**
An examination of selected economic concepts to the operation of global trade, agribusiness and financial markets.

178328 Project Evaluation **15 credits**
Theoretical and empirical aspects of economics (benefit-cost analysis) and financial project evaluation. Consumption/investment decisions; discounted cash-flow techniques; cost of capital financing; risk and uncertainty; and shadow pricing for economic policy. Emphasis is on practical applications, using microcomputers, to projects and investments in developed and developing countries.

178360 Sustainability, Environmental and Climate Change Economics **15 credits**
A survey of environmental and climate change issues and the application of economic analysis to these issues and policies to achieve sustainable outcomes.

178370 Development Economics **15 credits**
An examination of major development problems and issues, both domestic and international, from a combined economic theory, empirical and policy-oriented perspective.

178380 Business Forecasting **15 credits**
Specification and estimation of business models for policy analysis and forecasting. Treatment of common problems encountered in real world data analysis using econometric models.

178702 Macroeconomics **30 credits**
The course provides an advanced exposition and critical assessment of selected topics from macroeconomic theory and policy. The general focus will be on the issues of short and long term effects of macroeconomic policies on the economy. The relationship between theory and empirical research is also examined.

178703 The Theory and Practice of Economics **30 credits**
This course is a survey of developments in macroeconomic and microeconomic theory with extension into contemporary issues and practice.

178712 International Monetary Economics **30 credits**
This course is concerned with the monetary and macroeconomic relationships between countries. It deals with such issues as balance-of-payments problems and policies, the functioning of foreign exchange rate markets, the determination and causes of exchange-rate movements, the international monetary system, and derivative instruments including swaps, options and futures.

178713 Microeconomics **30 credits**
An examination of advanced microeconomic topics. The general focus will be on issues of industrial organisation and game theory.

178718 Health Economics **30 credits**
Subject areas to be covered include microeconomics for healthcare, the economics of politics and bureaus, demand for healthcare, the supply and organisation of healthcare, hospital behaviour, moral hazard, cost-

benefit analysis in health, private versus public provision of healthcare and contemporary policy issues.

178719 Climate Change Economics and Policy 30 credits

An analysis of the economics of climate change and evaluation of the mitigation options used by policy makers globally.

178724 Applied Econometric Methods 15 credits

This course covers the specification, estimation and validation of econometric models for analysis and forecasting, incorporating in-depth discussions regarding the treatment of common problems encountered in data analysis.

178732 Advanced Econometrics 30 credits

This course introduces students to advanced methods used in econometrics and forecasting. Topics include time-series analysis; testing and model selection; simultaneous equations; nonstationarity; vector autoregressive models; causality and exogeneity; binary choice models and panel data analysis.

178740 Global Food Markets and Trade 15 credits

An economic analysis of the global food markets with emphasis on international trade, agri-food policies, and on the industrial organisation of the contemporary food sector.

178741 Research Methods in AgriCommerce 15 credits

An introduction to advanced methods used in agricommerce research. A selection of the basic research principles illustrated with examples from agricultural production and marketing, agribusiness management and consumer economics. This course has a practical orientation.

178742 Environmental Economic Issues 15 credits

Economic analysis of policy management issues in the use of natural resources, climate change, and the environment.

178755 Economic Growth, International and Development Economics 30 credits

A critical assessment of topics from economic growth, international economics and the nature and measurement of development. There is an emphasis on the empirical and policy implications of development strategies including the relationship between managing development, role of the State, international economy, globalisation, trade theory and policy, global crises, and macroeconomic policy.

178771 Economics 15 credits

A study of macroeconomic and microeconomic theory in the context of a modern open economy.

178775 The Economics of Knowledge and Innovation 30 credits

An introduction to the complex process of innovation and its many dimensions in advanced and emerging knowledge-based economies. The nature of knowledge, innovation and intellectual property, the microeconomics and macroeconomics of innovation, and policy at the firm and macro levels are examined in the context of a globalised world economy that faces major economic and environmental challenges.

178781 Research Project Part 1 15 credits

178782 Research Project Part 2 15 credits

178799 Research Project 30 credits

178894 Research Report 60 credits

Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

178896 Professional Practice 60 credits

Candidates will undertake professional practice within the subject area in which the Master of Management is being completed. Professional Practice may be conducted either individually or in groups and assessment of the outcome of the investigation may be in a variety of ways including written and oral presentations and case studies

178897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

178898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

178899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

178900 PhD Economics 120 credits

179

Social Work

179110 Creating a Foundation for Social and Community Work 15 credits

An introduction to social and community work in Aotearoa New Zealand and internationally. This introduction includes an examination of colonisation throughout the development of social and community work.

179120 Environmental Sustainability in Social and Community Work 15 credits

An introduction to issues of sustainability, climate change and the environment in social and community work.

179121 Identity Development in Aotearoa New Zealand 15 credits

An exploration of identity development and how our personal and social histories contribute to our personal, professional and social interactions within the context of social work practice.

179155 A Foundation of Interpersonal Skills for the Helping Professions 15 credits

An introduction to the role of self and the skills required to develop an effective helping relationship that can be applied in a variety of helping professions in Aotearoa/New Zealand.

179202 An Introduction to Social Research for Social Work and Social Policy 15 credits

An introduction to social research and an examination of application of evidence to inform social policy and social work practice.

179210 A Relational Framework for Social Work Theory and Practice 15 credits

Developing a relational-praxis framework for different theories of social work, models of practice and approaches to engagement, assessment and intervention.

179230 Tangata Moana Perspectives and Practices for Transformation 15 credits

Examining Tangata Moana (Pacific/Pasifika) perspectives and how they inform social practice and policy towards transforming individual, family and community outcomes.

179240 Ethics, Values and Law in Social Work and Social Policy 15 credits

An examination of the impact of values and ethics in professional practice while addressing issues of law, power, social justice and human rights with a particular focus on social work and social policy.

179255 Preparation for Field Education 15 credits

An introduction to field education through workshops, field visits and voluntary work.

179310 Integrated Social Work Practice - Decolonising Social Work 15 credits

Theories and skills of group dynamics, collaboration, conflict management and culturally appropriate communication. Students develop their facilitation skills for working with people from diverse and culturally different backgrounds.

179320 Community Development 15 credits

An examination of the fundamental theories, principles and definitions of community development. Individual, group and community action is examined with emphasis on the relationship between individual and social change.

179330 Māua ko Te Tiriti o Waitangi 15 credits

An examination of self and cultural positioning within Te Tiriti o Waitangi. Students will be able to create meaning and make sense of their personal journey as Tangata Whenua or Tangata Tiriti, their social citizenship and

active responsibility in advancing Māori aspirations in Aotearoa. Students will develop confidence in utilising Māori models of practice in whānau hui and social work practice from a te ao Māori perspective.

179340 Developing Practice 15 credits

The development of a personal practice framework and clinical skills in diverse social, cultural and professional contexts.

179355 Field Education I 45 credits

A 60-day supervised field education placement in a social service setting, negotiated and supervised, in accordance with the Social Workers Registration Board's standards.

179410 Social Work Fields of Practice 30 credits

An advanced study of selected fields of social and community work practice. Particular emphasis is placed on the knowledge base relevant to each field including theoretical explanations, research, practice principles, models of intervention and current issues.

179420 Advanced Social Work Practice 30 credits

An advanced study of selected theoretical models and clinical skills in professional practice with individuals, families, groups and communities.

179430 Integrated Social Work Practice – Authenticising Practice 15 credits

An advanced study of selected fields of practice, selected theoretical models, and clinical skills to develop integrated and authentic professional practice.

179431 Consolidating Practice 15 credits

The consolidation of a social work practice framework and clinical skills in diverse social, cultural and professional contexts.

179432 Ahurea ki uta, Ahurea ki tai 15 credits

Students will critically reflect on and consolidate Tangata Whenua and Tagata Pasifika cultural learning and cultural humility inside of their own integrated practice framework as they prepare to enter the social work profession.

179433 Selected Study in Policy, Practice or Diverse Populations 15 credits

A study of the literature and research evidence in a selected area of policy, practice or diverse population group.

179440 Leadership in the Social Services 15 credits

Exploration of leadership and management theories relevant to human services including administrative and professional supervision.

179455 Field Education II 45 credits

A 60-day supervised field education placement in a social service setting, negotiated and supervised, in accordance with the Social Workers Registration Board's standards.

179702 Advanced Research Methods 30 credits

An examination of research methods, traditions and techniques used in social work, social policy and health research. The course is designed to assist in developing a research proposal for a thesis, or research project.

179730 Whakamana Tangata 30 credits

Whakamana Tangata supports students to extend their knowledge of Mana Whenua social work theories and practice. To clarify the position of this course, the following whakatauaāki has been formulated: Whakatauaāki: "Te mata o te tangata, Te mata o te taringa, Te mata o te arero, Rurukutia hei whakamana tangata Tīhei mauri ora"

179731 Tangata Moana Social Practice, Policy and Action 30 credits

An advanced study of social work and social policy drawing from Tangata Moana perspectives. Historical and contemporary issues, policies and initiatives impacting Tangata Moana are critically analysed. Relevant theories and ethnic specific Tangata Moana approaches are examined and applied to both micro and macro practice in the social and health services.

179732 Social Diversity and Professional Practice 30 credits

A critical review of social diversity in international and Aotearoa New Zealand contexts with a particular emphasis on the challenges of marginalisation, social exclusion, and othering. It analyses societal efforts through social policies and legal innovations to achieve social diversity and examines the implications for professional practice.

179740 Clinical Supervision Theory and Practice 30 credits

An examination of the key components of clinical supervision theory and practice leading to the development of a framework for supervisory practice.

179741 Leadership, Management and Clinical Supervision 30 credits

An advanced study of leadership, management, and clinical supervision as it applies to human service organisations. This includes critically examining the functions of management and clinical supervision, leadership and management theory, and organisational development and change within human services.

179742 Learning and Decolonisation in Clinical Supervision 30 credits

An advanced study in learning and decolonising in clinical supervision, including identity journeys.

179743 Clinical Supervision Practice 30 credits

An advanced study of clinical supervision in professional practice.

179761 Advanced Study of Social Issues and Practice Theories 30 credits

An advanced study of the impact of contemporary social issues on social work practice and a critical evaluation of the practice theories applied.

179763 Transforming Practice 30 credits

An advanced study and development of theoretical models, research evidence and practice skills in professional social work practice.

179771 Whānau and Family-centred Practice 30 credits

An advanced study of Whānau and Family-centred social work practice.

179778 Mental Health, Addictions and Social Work 30 credits

An advanced study of the field of Mental Health and Addiction in social work. This course considers the social determinants, cultural context, assessment, intervention strategies, ethics and Te Tiriti o Waitangi responsibilities.

179781 Social Work Theory and Practice 30 credits

A critical examination of social work theory and social work as a profession. A reflexive study of the utilisation of theories, models and skills for practice with individuals, whānau, families, groups and communities.

179782 Wellbeing and Sustainable Development 30 credits

An examination of the role of community development and social policy in advancing wellbeing and sustainable development with a particular focus on history, theory, strategies, and stakeholders.

179783 Manu tute 30 credits

A critical examination of the personal and professional self as Mana Whenua or Mana Tiriti, social citizenship and active responsibility in advancing Mana Whenua aspirations. There is active engagement in Tangata Whenua theories and models of practice.

179784 Advanced Study of Fields of Practice in Social Work 30 credits

An advanced study of social work in selected fields of practice examining current issues, theory, practice and research.

179789 Field Work Practice I 30 credits

A 60-day supervised field education placement in a social service setting, negotiated and supervised, in accordance with the Social Workers Registration Board's standards.

179792 Organisations, Leadership and Social Work 15 credits

A critical examination of current management and organisational theory and practice and its implications for leadership, management, administrative systems and professional practice in social service agencies.

179800 MPhil Thesis 120 credits

A supervised and guided independent study resulting in a published work.

179801 MPhil Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work

179802 MPhil Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

179816 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

179817 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work.

179890 Field Work Practice II **30 credits**
A 60-day supervised field education placement in a social service setting, negotiated and supervised, in accordance with the Social Workers Registration Board's standards.

179891 Applied Research in Social Work **15 credits**
An advanced examination of applied research methodologies and methods used in social work and social policy to promote best research practice.

179895 Research Report (30) **30 credits**
An applied research project with topics selected from areas relevant to social work, social policy, and/or the social services in the Aotearoa New Zealand context. Selected topics must be confirmed by the supervisor who will assist students in planning and managing their research.

179896 Thesis 90 Credit Part 1 **45 credits**
A supervised and guided independent study resulting in a published work.

179897 Thesis 90 Credit Part 2 **45 credits**
A supervised and guided independent study resulting in a published work.

179898 Thesis **90 credits**
A supervised and guided independent study resulting in a published work.

179899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

179900 PhD Social Work **120 credits**

179911 Advanced Social Work and Social Development Theory **30 credits**
A critical analysis of the political, social, cultural, historical and philosophical perspectives underpinning social work and social development and a critical evaluation of the theories informing a chosen field of practice or speciality.

179912 Advanced Studies in International Social Work **30 credits**
A critical examination of International Social Work as it pertains to the nature of social work and social development, international issues, organisations and fields of practice or specialisms.

179913 Advanced Social Work Research and Evaluation **30 credits**
A critical examination of social work research and evaluation methods as they apply to the design, conduct and reporting of social work research and evaluation.

179929 Advanced Directed Study in Social Work **30 credits**
This course requires students to demonstrate an integration of local and international research, literature, theory and methodology through the production and defence of a research proposal and any necessary pilot work in preparation for undertaking the thesis.

179930 Thesis Doctor of Social Work **240 credits**
This course requires the student to undertake research and produce a doctoral thesis for examination.

187

Social and Policy Studies in Education

187080 Study Skills **15 credits**
This course focuses on study skills including time management, note-taking, reading and research skills and exam preparation as well as learning processes appropriate for university studies.

188

Natural Resource Management

188363 Applied Environmental Management **15 credits**
This course introduces key environmental management tools and techniques and how they can be applied. The course also examines some of the challenges that face environmental management and the best ways to address these with a particular focus on linking science, policy and practice for more effective environmental management.

188707 Environmental Management Principles and Practice **15 credits**
This course uses a multidisciplinary approach to examine contemporary environmental issues. Key environmental management principles and practices are introduced and explored through a series of applied case studies.

188708 Land System Change **15 credits**
The consequences of the processes and activities that pertain to human use of the land are considered. The patterns and distribution of land use and land cover types and the methods for measuring, recording and managing information about land use and land cover and how it changes over time are evaluated, and the implications of land system change are investigated.

188751 Advanced Zero Waste for Sustainability **30 credits**
An in-depth exploration of the life cycle and environmental issues of solid material resources upon which all economic production depends. Zero Waste is examined as a resource management paradigm shift in philosophy, policy, technology and practices focused on sustainable development.

188764 Advanced Environmental Management I **15 credits**
The course is made up of three parts. It develops project and programme management skills, strengthens students' knowledge of natural resources at an advanced level, and combines these two to produce integrative skills in Environmental Management.

188765 Advanced Environmental Management II **15 credits**
This course examines current environmental issues and explores alternative approaches to environmental management. A case study approach is used to develop critical thinking skills, and an in-depth understanding of complex human-environment interactions and possible solutions to environmental problems.

188863 Environmental Research and Data Analysis **60 credits**
Students will review the theoretical foundation and recent advances in selected environmental management themes in different countries; apply research methods and selected statistical techniques to analyse and evaluate environment management projects; write a self-directed research report.

188881 Thesis 90 Credit Part 1 (30 credits) **30 credits**
A supervised and guided independent study resulting in a published work.

188882 Thesis 90 Credit Part 2 (60 credits) **60 credits**
A supervised and guided independent study resulting in a published work.

188885 Thesis 90 Credit Part 1 **45 credits**
A supervised and guided independent study resulting in a published work.

188886 Thesis 90 Credit Part 2 **45 credits**
A supervised and guided independent study resulting in a published work.

188888 Thesis **90 credits**
A supervised and guided independent study resulting in a published work.

188889 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

188897 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

188898 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work.

188900 PhD Natural Resource Management **120 credits**

189

Soil Science

189006 Soil Productivity 15 credits

A study of the soil as a resource in farming systems. Modification of soil conditions by various agricultural practices such as fertiliser use, liming, drainage and irrigation. Maintenance of the soil through conservation practices and use of soil and land resource information.

189151 Principles of Soil Science 15 credits

An integrated introductory course in soil science. An exploration of the interaction between soil and the environment, soil formation and morphology, soil physical, chemical, and biological properties and their influence on soil management, nutrient cycling, and soil-plant interactions.

189251 Soil Fertility Management 15 credits

This course examines the influence of soil factors on plant nutrient cycling in agricultural production systems. The composition, properties and uses of fertilisers to improve soil fertility and the associated environmental issues arising from soil water relationships and interactions with plant nutrients. Methods for measuring nutrient levels in soils will also be covered.

189362 Integrated Farm and Environmental Management 15 credits

This course examines farm physical resources, nutrient management and budgeting and contaminant loss processes in the context of Te Mana o te Wai. Students will integrate their knowledge to produce a freshwater Farm Environment Plan which identifies soil, pathogen, nutrient and greenhouse gas loss pathways on multiple land uses and justifies mitigation practices which are appropriate for the farm system and to protect freshwater.

189730 Sustainable Land and Water Management 15 credits

Advanced theoretical and practical experience in the application of soil, water and GHG emission sciences to the sustainable management of New Zealand's land, water and air resources. Sources and pathways for nutrient, contaminant and GHG transfer from soil to water and atmosphere will be analysed, and considered in the context of land use and potential in-field and edge-of-field attenuation technologies and practices.

189731 Advanced Studies in Soil Science 15 credits

A selection of modules from professional development courses: intermediate and advanced sustainable nutrient management; intermediate and advanced farm environment planning; farm dairy effluent system design and management; introduction to NZ agricultural greenhouse gas emissions and management. This course is targeted to students wanting an applied course in soils relevant to production agriculture and horticulture or to environmental management.

189872 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work

189873 Thesis 90 Credit Part 1 (30 credits) 30 credits

A supervised and guided independent study resulting in a published work.

189874 Thesis 90 Credit Part 2 (60 credits) 60 credits

A supervised and guided independent study resulting in a published work

189875 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

189887 Research Report 60 credits**189895 Thesis 120 Credit Part 1 60 credits**

A supervised and guided independent study resulting in a published work.

189896 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work

189899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

189900 PhD Soil Science 120 credits

190

Aviation Studies

190104 Principles of Navigation I 15 credits

An introduction to navigational principles and operational requirements for visual flight.

190107 Human Performance 15 credits

The application of information processing strategies for improving performance in learning, problem-solving, decision-making, interpersonal interrelations, and an introduction to aviation medicine.

190109 Aviation Studies 15 credits

An introduction to the interaction of components in the aviation system, including human resources, aircraft, airports and airways systems.

190112 Introduction to Flying 15 credits

This course is an introduction to the theory and practice of flight radio, aviation law and principles of flight for pilots.

190113 Aviation Meteorology 1 15 credits

An introduction to aviation meteorology for pilots.

190114 Aircraft Systems 1 15 credits

An Introduction to aircraft systems for pilots

190115 Introduction to Aeronautics 15 credits

An introduction to the non-practical components of airline and commercial pilots' aeronautical knowledge. Emphasis is placed on general aircraft technical knowledge, principles of flight, aeronautical meteorology, flight procedures and aviation law.

190116 Introduction to Management in Aviation 15 credits

An overview of management concepts in the aviation industry.

190117 Introduction to Human Factors 15 credits

The application of information processing strategies for improving performance in learning, problem-solving, decision-making, interpersonal interrelations, coping in situational anxiety and mental rehearsal.

190120 Aeronautical Legislation 15 credits

This course includes the integration of theory and practice for aviation regulations and law pertaining to Visual Flight Rules (VFR) and Instrument Flight Rules (IFR).

190121 Aviation Meteorology 2 15 credits

An examination of fundamental concepts and processes in meteorology and climate.

190123 Aircraft Systems 2 15 credits

A study of aircraft systems for light aircraft and their performance management.

190124 Aircraft Performance 15 credits

The study of aircraft performance management for single-engine aircraft, including propeller theory, and operational performance requirements.

190154 Principles of Navigation II 15 credits

An in-depth study of Air Navigation principles; and the construction, properties and usage of aeronautical charts.

190164 Aeroscience 15 credits

This course is an examination of the principles of mathematics, mechanics, and physics as they apply to aeroscience.

190189 Basic Gas Turbine Operations 15 credits

A study of the principles of operation and construction of aircraft gas turbine engines, including identification and rectification of abnormal operation. Students will practice engine starting, shutdown, and normal and emergency procedures in simulated environments (such as in the Hawker Pilot Trainer HPT flight training device). The course is designed to meet the theoretical requirements for CAA examination leading to the award of a Gas Turbine Rating.

190201 Aircraft Systems 3	15 credits	190249 Aircraft Maintenance Management	30 credits
This course is an examination of advanced multi-engine aircraft systems, including structures of heavy aircraft.		An examination of knowledge appropriate to the management of an aircraft maintenance organisation.	
190203 Air Traffic Control/Aviation Law	15 credits	190254 Flight Planning and Advanced Navigation (Part 2)	15 credits
The integration of theory and practice for Flight Operations and Flight Standards. This course will enable pilots to use the operational procedures and facilities required by civil aviation and air traffic control organisations. Students will be introduced to international aviation systems, including the Covenants of the International Civil Aviation Organisation (ICAO).		Second of two courses on the development of practical flight planning competencies, including route planning, fuel planning, load planning and flight plan amending for instrument flight operations, and for long distance heavy transport operations for B747 and B777 aircraft.	
190204 Flight Planning and Advanced Navigation (Part 1)	15 credits	190282 Introduction to Flight Instruction	15 credits
First of two courses on the development of practical flight planning competencies including route planning, fuel planning, load planning and flight plan amending for instrument flight operations. The use of inflight navigation techniques, instrument flight management, and search are included.		A theoretical and practicum-based study of flight instructional and teaching skills required for employment as Flight Instructor.	
190205 Crew Resource Management	15 credits	190283 Aviation Law	15 credits
The development of practical competencies in crew resource management (CRM) in the professional aviation environment.		This course examines the application of aviation law beyond the initial professional licence issue. The course meets the requirements for the NZ Civil Aviation Authority Air Transport Pilot Licence (ATPL) qualification and introduces the student to international aviation systems, including the International Civil Aviation Organisation (ICAO). A special emphasis is placed on the responsibilities and accountabilities of aviation personnel and management systems under the CAA Rules regime.	
190206 Aerodynamics 1	15 credits	190285 Aerobatic Aircraft Handling	15 credits
This course introduces principles of incompressible fluid statics and fluid dynamics, basic concepts of low and high speed aerodynamics, and lift theory.		The theory and practice of advanced aircraft handling techniques, aerobatics and advanced stalling and spinning.	
190210 Aviation Safety Management	15 credits	190288 Advanced Aircraft Handling	30 credits
To provide a comprehensive understanding of safety management in civil flight operations environments, particularly relating to international standards and recommended practices prescribed by the International Civil Aviation Organization (ICAO) for the design and implementation of safety management systems in aviation.		This course covers the theory and practice of aircraft operations to an advanced level. The course's emphasis is on the development of non-technical skills applicable to a pilot working in a multi-crew environment. The student will be introduced to safety management systems (SMS) and optimal decision making under normal, abnormal, and emergency phases of flight. The course bridges the gap between traditional General Aviation Operations and Air Transport Operations.	
190211 Aviation Strategic Management	15 credits	190298 Turbo-Prop and Jet Handling	30 credits
An examination of the strategic management processes employed in the aviation industry, and how the business environment shapes strategy formulation and implementation in the aviation industry.		The theoretical and practical requirements for the safe ground and flight operation of gas-turbine powered aircraft will be examined.	
190216 Aviation Human Factors	15 credits	190299 Aviation Special Topic	15 credits
The course provides an overview of the basic concepts of human factors in aviation, human performance, and issues relating to judgement and decision-making in this high risk environment. Communication and other aspects of social psychology in various aviation environment are also explored.			
190220 Managing Airline Systems	15 credits	190301 Flight Instructor Human Factors	15 credits
An examination of the management of airline organisations.		Theory and application of human factor issues in decision-making, interpersonal relations, communication styles and personality characteristics as they affect flight deck performance in the instructional environment.	
190221 Climatology	15 credits	190303 Advanced Aero Systems Development	15 credits
A study of the global climate and of regional climates at the levels at which modern jet aircraft fly and at lower levels.		An advanced theoretical and practicum based study of the regulatory requirements and operational competencies of the New Zealand Commercial Pilots Licence and Instrument Rating.	
190222 Basic Air Safety Investigation	15 credits	190306 Airline Strategic Management	15 credits
The aim of this course is to give students an insight to aircraft accident investigation. The course will also benefit those who need to understand the investigation process, such as managers of airlines and regulatory authorities. The course covers the basic requirements and procedures involved in air safety investigation.		A review of the current state of strategic management in the airline industry. The approach is both multidisciplinary in focus and international in scope. Attention will be focused on the Asia-Pacific region, as the potential location of the world's largest aviation market.	
190224 Environmental Impacts of Aviation	15 credits	190307 Airport Planning	15 credits
Advanced study of the environment of aviation, the impacts of aviation on the environment and the methods for reducing the impacts.		A study of demographic, environmental and economic considerations which apply to the design and evaluation of airport facilities.	
190225 Introduction to Research Methods in Aviation	15 credits	190308 Airport Operational Management	15 credits
An introduction to the theories and methods of research in the aviation industry. A range of both quantitative and qualitative methodologies is explored, and various techniques for aviation research are examined.		An examination of the management of airport systems, such as air-side and land-side facilities, technical and support services which contribute to the operational effectiveness of modern airports. The course will further examine the relationship between airport authorities and the local community.	
190237 Heavy Jet Aircraft Performance	15 credits	190309 Design of Airways and Air Traffic Systems	15 credits
This course introduces performance theory and practice as it applies to modern heavy jet aircraft. This course covers NZ ATPL performance theory requirements.		An examination of air traffic and air navigational systems and the principles which apply to their operational infrastructure, including the development of visual and instrument flight procedures.	
190240 Air Power	15 credits	190313 Advanced Aviation Human Factors	15 credits
This course examines military air power, its characteristics, history and development, including selected air campaigns and use of Remote Piloted Aerial Systems (RPAS).		This course explores the role of human behaviour and physiological limitations in aviation, how they fit with complex systems, and how behaviour and systems may be modified to improve safety.	

190314 Legal Issues in Aviation	15 credits	190721 Design and Management of Airports	30 credits
General principles of law as applied in the context of the airline transport industry. The course will focus on the application of law to flight crew, airline operations and civil aviation authorities in terms of both international conventions and treaties and of national legislation and law. Issues such as contractual and tortious liability will be considered.		The course will examine the strategic, economic and administrative contexts within which modern airports operate. It will also seek to explore the primary issues that are shaping the development of airports in the current, medium and long terms.	
190315 Flight Instruction Fundamentals I	15 credits	190790 Special Topic	30 credits
Principles and techniques for theory, simulator and flight instruction for primary visual flight and day operations, including a review of aircraft performance management requirements. The course will incorporate the theoretical issues which underpin aviation science and aircraft systems.		190791 Special Topic	30 credits
190318 Air Transport Economics	15 credits	190890 Thesis 90 Credit Part 1	45 credits
This course covers economic aspects of air transport and airline operations and provides insights into the methods employed to manage and evaluate the economic viability of these operations.		A supervised and guided independent study resulting in a published work.	
190327 Managing Cultures in Aviation	15 credits	190891 Thesis 90 Credit Part 2	45 credits
A critical evaluation of theory and practice of management of cultures in aviation, incorporating: (a) an exploration of theoretical and practical aspects of cultural diversity and its effect on aviation industry in the global business environment; and (b) an assessment and management of international, national, and organisational cultural dimensions and their shaping influence in various aspects of aviation operation.		A supervised and guided independent study resulting in a published work.	
190328 Aviation Management Practicum	15 credits	190892 Thesis 120 Credit Part 1	60 credits
Provides a practical experience in an aviation organisation, linking theory to practice.		A supervised and guided independent study resulting in a published work.	
190335 Flight Instruction	30 credits	190893 Thesis 120 Credit Part 2	60 credits
This integrated course includes the principles and techniques for theory, simulator and flight instruction.		A supervised and guided independent study resulting in a published work.	
190340 Contemporary Issues in Aviation Security	15 credits	190894 Professional Practice in Aviation	60 credits
This course explores aviation security with a particular emphasis on terrorism. Students explore key incidents, areas at risk, and the legislation and practical means by which risks are managed. The trade off between an erosion of civil liberties and increased security will be explored, as will the reasons why risks will always remain.		Candidates will undertake professional practice within the Aviation subject area. Professional Practice may be conducted either individually or in groups and assessment of the outcome of the investigation may be in a variety of ways including written and oral presentations and case studies.	
190351 Aircraft Systems 4	15 credits	190895 Research Report	60 credits
An in depth study of mechanical aircraft systems, as they apply to large aircraft.		Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.	
190356 Aerodynamics 2	15 credits	190898 Thesis	90 credits
This course introduces principles of stability and control of aircraft, high speed aerodynamics, and methods for analysing aerodynamic properties of high speed aircraft.		A supervised and guided independent study resulting in a published work.	
190398 Aviation Internship Project	15 credits	190899 Thesis	120 credits
190399 Aviation Special Topic	15 credits	A supervised and guided independent study resulting in a published work.	
190701 Human Factors for Professional Aviation	30 credits	190900 PhD Aviation	120 credits
An in-depth study of the latest developments in human factors policies and regulations made by the International Civil Aviation Organization (ICAO), with the aim of enhancing the safety, security and reliability of all areas of air transport. Contemporary research and research applications associated with the human factor aspects of aviation complements above study.			
190703 Management in Aviation Systems	30 credits		
A study of the roles, relationships and functions of senior management systems within the aviation industry. The course will examine the obligations and responsibilities of aviation corporations and their executives (moral, ethical and legal) to staff, clients, shareholders, the aviation community and the wider community.			
190704 Research Methods in Aviation	30 credits		
To introduce students to the research design principles of qualitative and quantitative research methodologies, data collection procedures, analysis of data and interpretation of results, and writing the research report.			
190720 Aviation Strategic Management	30 credits		
The application of economic, political regulatory and management knowledge to the planning and development of airline and aviation organisation product outcomes.			

192

English Language Studies

192002 General English/English for Academic Purposes	0 credits
A course of study in English language at different levels for students from non-English-speaking backgrounds. This course is offered through the English Language Centre. It is a full-time non-credit course.	
192010 English Language Study	0 credits
An intensive tailor-made course of study in English language for specific groups of international students that incorporates classroom based learning and field work or visits.	
192011 Foundation Communications	15 credits
An introduction to the skills necessary for successful communication both individually and in groups, and across a variety of contexts.	
192012 Foundations of Tertiary Learning	15 credits
An introduction to the development of resilience and confidence as an active learner within tertiary study.	
192013 Strategies for Undergraduate Success	15 credits
An introduction to goal setting, life planning, and wellbeing in preparation for undergraduate studies.	
192020 Academic Reading and Writing 1	18 credits
An introduction to academic reading and writing skills required for undergraduate study.	
192021 Language Skills for Academic Study 1	18 credits
An introduction to academic language, listening and speaking skills required for undergraduate study.	

192022 Academic Reading and Writing II	18 credits	192074 Skills and Strategies for Pre-Intermediate Listening and Speaking	18 credits
An extension of Academic Reading and Writing 1, focusing on developing critical thinking, academic reading and writing skills for undergraduate study.		Develops skills and strategies in listening to and speaking about familiar ideas and personal information.	
192023 Language Skills for Academic Study II	18 credits	192075 Intermediate Reading and Writing	18 credits
An extension of Language Skills for Academic Study 1, focusing on academic language, listening, speaking and presentation skills for undergraduate study.		Further develops reading and writing skills to understand and produce a range of non-personal texts.	
192030 Advanced Academic Reading and Writing I	18 credits	192076 Intermediate Listening and Speaking	18 credits
An introduction to academic reading, writing and critical thinking skills required for postgraduate study.		Further develops listening and speaking skills to understand and communicate a range of less familiar topics.	
192031 Advanced Academic Language Skills and Conventions I	18 credits	192078 Skills and Strategies for Intermediate Reading and Writing	18 credits
An introduction to academic language, listening and speaking skills required for postgraduate study.		Further develops reading and writing skills and strategies for understanding and communicating non-personal information.	
192032 Advanced Academic Reading and Writing II	18 credits	192079 Skills and Strategies for Intermediate Listening and Speaking	18 credits
An extension of Advanced Academic Reading and Writing I, focusing on developing academic reading and writing skills to comprehend and produce texts commonly encountered in postgraduate study.		Further develops listening and speaking skills and strategies for understanding and communicating non-personal information.	
192033 Advanced Academic Language Skills and Conventions II	18 credits	192080 Upper Intermediate Reading and Writing	18 credits
An extension of Advanced Academic Language Skills and Conventions I, focusing on academic language, listening, speaking and presentation skills for postgraduate study.		Extends the ability to read and write a range of narrative and academic text types.	
192040 Academic Language and Writing 1	15 credits	192082 Upper Intermediate Listening and Speaking	18 credits
An introduction to the features of effective academic writing and their application for undergraduate studies.		Extends the ability to listen to and express ideas and opinions.	
192041 Academic Language and Writing 2	15 credits	192085 Skills and Strategies for Upper Intermediate Listening and Speaking	18 credits
An extension of Academic Language and Writing 1, focusing on further developing academic literacies and research skills for the production of written and oral assignments.		Extends listening and speaking skills and strategies for study in an academic context.	
192042 Study Skills and Strategies	15 credits	192088 Skills and Strategies for Upper Intermediate Reading and Writing	18 credits
An introduction to the study skills and strategies necessary to be successful in the undergraduate tertiary environment.		Extends reading and writing skills and strategies for study in an academic context.	
192043 Critical Academic Skills	15 credits	192089 Advanced Reading and Writing	18 credits
An introduction to critical thinking, reading, writing and numeracy skills essential for undergraduate studies.		Explores strategies in reading and writing. Provides opportunity for analysis of different text types and strategies for reading advanced texts.	
192062 Elementary Listening and Speaking	18 credits	192090 Expressing Complex Ideas and Relationships	18 credits
Enables learners to listen to and speak about simple biographical, narrative and descriptive information.		Develops linguistic strategies to process complex information and express complex ideas in a wide range of contexts.	
192063 Elementary Reading and Writing	18 credits	192091 Accessing the Community	18 credits
Enables learners to read and write simple biographical, narrative and descriptive texts.		Explores the community organisations and institutions both locally and internationally. Provides opportunities to achieve identified goals and effectively project personality in English. Explores idiomatic and colloquial language.	
192064 Skills and Strategies for Elementary Listening and Speaking	18 credits	192092 Advanced Reading and Writing (Special Topic)	18 credits
Enables learners to develop skills and strategies to listen to and speak about familiar ideas and information needed in social situations.		Provides opportunities to engage and interact with a wide range of text-types and produce complex texts in response. This course requires students to be highly pro active in the learning opportunities provided.	
192065 Skills and Strategies for Elementary Reading and Writing	18 credits	192095 English for Academic Purposes: Advanced	18 credits
Enables learners to develop skills and strategies to read and write simple texts expressing familiar ideas and information needed in social situations.		Develops advanced language and learning skills needed for tertiary study in an English-speaking environment.	
192070 Pre-Intermediate Listening and Speaking	18 credits	192096 Extending Language Skills and Strategies for Tertiary Studies	18 credits
Develops skills in listening to and speaking about biographical, narrative and descriptive texts.		Extends advanced language and learning skills needed for tertiary study in an English-speaking environment.	
192072 Pre-Intermediate Reading and Writing	18 credits	192101 English for Academic Purposes for Speakers of Other Languages	15 credits
Develops skills in reading and writing biographical, narrative and descriptive texts.		An introduction to vocabulary development, critical and analytical reading, seminar presentation, and listening and note-taking for academic purposes. This course is designed for students for whom English is a second or other language, and who are enrolled in degree/diploma programmes. It is most suitable for students who are new to an English-speaking academic environment.	
192073 Skills and Strategies for Pre-Intermediate Reading and Writing	18 credits		
Develops skills and strategies in reading and writing about familiar ideas and personal information.			

192102 Academic Writing in English for Speakers of Other Languages **15 credits**

A course of study in academic English writing for international students and permanent residents for whom English is the second or other language.

193**Veterinary Nursing****193301 Veterinary Biostatistics and Epidemiology for Veterinary Technologists** **15 credits**

Statistical principles and methodology, and their application to veterinary science. Emphasis on interpretation of results using computer packages. Principles of applied veterinary epidemiology including patterns of disease, investigation of disease in animal populations, interpretation of diagnostic tests, observational studies and critical appraisal of the literature.

193303 Advanced Clinical Studies **15 credits**

In the context of veterinary technology, the course will develop a student's knowledge on the Aetiology and Pathogenesis of common diseases. Its coverage includes Clinical and Gross Pathology; Diagnostic Imaging; Advanced Anaesthesia including drugs, monitoring and physiological responses; Intensive Care including pain management, blood transfusions; Medical and Surgical procedures; Pharmacology.

193306 Integrative Studies for Veterinary Technologists **60 credits**

This course provides tuition, demonstration and clinical experience and application in surgery, anaesthesia, medicine and imaging of animals; health and management of production animals. Students will perform nursing care, clinical and pathology procedures and develop nursing and treatment plans for patients. They will have opportunity to concentrate on a selected (small animal, production animal, equine, business) area of veterinary technology. Students will complete a research proposal, case studies and grand rounds. They are required to participate in compulsory elements including external and internal placements.

194**Physiology****194241 Physiological Control Systems** **15 credits**

The principles of control systems involving nerves and hormones are examined. Control at the cellular, tissue, organ system and whole-body levels is explained with reference to the basis of cell excitability, basic functions of the nervous system, muscle contraction, actions of hormones, the immune system and the renal system.

194242 Physiology of Mammalian Organ Systems **15 credits**

An examination of the roles of organ systems in maintaining life and health in mammals, including humans, with emphasis on the alignment between structure and function. Topics include the functions of the heart and blood vessels, breathing, reproduction, and the digestive system.

194243 Physiological Strategies for Survival **15 credits**

Survival of individual animals, and species of animals, depends on effective physiological mechanisms that allow animals to live in different environments and to respond to changes in their environment, whether benign or extreme. These mechanisms are examined in relation to environmental factors that may include photoperiod, temperature, altitude, and latitude, and in relation to life in the air and underwater.

194350 Human Lifecycle Physiology **15 credits**

Advanced study of human physiology from conception to death, covering pregnancy, the foetus, birth, lactation, growth, puberty and ageing. The impact of earlier events on normal and abnormal body function later in the lifecycle will be considered.

194897 Thesis 120 Credit Part 1 **60 credits**

A supervised and guided independent study resulting in a published work.

194898 Thesis 120 Credit Part 2 **60 credits**

A supervised and guided independent study resulting in a published work.

194899 Thesis **120 credits**

A supervised and guided independent study resulting in a published work.

194900 PhD Anatomy/Physiology **120 credits****196****Ecology****196101 Ecology, Evolution and Behaviour** **15 credits**

An introductory biology course on the way organisms react, adapt, and interact. The course investigates the relationships between genotype, phenotype and environment, and the diversity of life on Earth within a phylogenetic framework. The course includes an examination of the dynamic interactions within and between abiotic and biotic components of ecosystems, including a focus on the evolutionary ecology of behaviours such as foraging, mating, parenting, and cooperation.

196201 Biodiversity of New Zealand **15 credits**

An introduction to the biodiversity of New Zealand in a world context. This course considers the origins and relationships of New Zealand biota, species' distributions, adaptive features, behaviours and ecology, along with a consideration of characteristic New Zealand ecosystems. Practicals include compulsory field work.

196205 Ecology and Conservation **15 credits**

Terrestrial ecology and the application to conservation biology, including evolutionary ecology, population biology, species interactions, community, ecosystem and landscape ecology. New Zealand and overseas case studies are considered throughout the course. An analytical approach is taken in the field trips and laboratory work including the use of statistics to test ecological hypotheses and to identify patterns in plant and animal distributions. There is one compulsory weekend field trip.

196217 Evolutionary Biology **15 credits**

Understanding the processes and patterns of evolution is central to developing insight into questions of how and why in biology. This course introduces students to the core concepts in evolution, including the geological, biological, phylogenetic and rational evidence for evolution by common descent. Core concepts - including the origins of genetic and phenotypic variation, and micro and macro-evolutionary processes and patterns - will be reinforced and explored in the lab via computer-based simulations and real evolution experiments with digital organisms. Students will be introduced to current theories of human evolution and topics of special interest including the evolution of cooperation and conflict; game theory; the origin of sex; and microbial experimental evolution. Theory will be illustrated, where appropriate, with examples from New Zealand's native species.

196223 Freshwater Ecology **15 credits**

The study of freshwater ecosystems, including the physical and chemical processes that occur in streams, lakes, and their interactions with the biota. Ecological concepts are applied to problems of water quality, ecosystem health, monitoring and the restoration of freshwater systems.

Marine Ecology**196225 Introductory Marine Biology** **15 credits**

An introduction to Marine Biology - the scientific study of life in the sea. First principles of marine biology from history of Marine Biology to use of the sea as a fundamental resource. Studying the ocean as a habitat and examining the form and function of marine taxa within marine biomes, students will discover how the biology, behaviour and ecology of organisms differ between contrasting marine environments.

Ecology**196315 Conservation Science** **15 credits**

The principles and practice of conservation and management of populations. Ecological principles are applied to the sustainable use of natural resources including conservation of threatened species and fisheries management. The practical component includes statistical analysis and modelling. There is a compulsory field trip day.

Art and Design Studies

197119 Coding for Creative Practice **15 credits**

In this studio course students will be introduced to the fundamentals of computer programming as an art and design tool. Students will acquire basic knowledge and fundamental techniques for the creative uses of coding across a range of art and design contexts.

197122 Digital Fabrication **15 credits**

In this studio course students will be introduced to open source and consumer software as a means to produce objects with digital fabrication tools. Through an iterative making process, students will develop an understanding of design considerations, workflows and new methods of creating using contemporary digital technologies.

197123 Explorations in Visualisation **15 credits**

Explorations in Visualisation explores how creative practitioners comprehend, generate, and communicate ideas. The course provides students with foundational skills and techniques for representing ideas in traditional and digital media. The course will be valuable for students from any creative area who want to communicate their work and thoughts visually.

197124 Explorations in Materials and Making **15 credits**

Explorations in Materials provides students with practices and skills to explore physical materials, surfaces and structures in their making. Students will gain hands-on creative and technical knowledge and understanding of sustainable ecologies of materials. It will appeal to students across the creative arts who want to create and work with physical materials as part of their creative practice.

197139 Design, Purpose, People and Place **15 credits**

Positionality is a key concept in the creative arts. In this course you will interrogate the concept in relation to how we think about the world we live in, what we see as beautiful or objectionable, and what we believe about who we are. We pay particular attention to our place: in Pukeahu, in Aotearoa, and in the world.

197190 Professional Cultures in Design 1 **15 credits**

An introduction to the design studio environment, with specific emphasis on ethics, studio culture, learning, and positionality.

197191 Explorations in Creative Coding and Media **15 credits**

Explorations in Coding and Media explores how creative practitioners leverage computational concepts as a creative tool. Students will acquire basic knowledge and foundational techniques that can be applied across creative practice.

197193 Explorations in Modelling **15 credits**

Gain three-dimensional literacy and confidence as you model, sculpt, 3D sketch and fabricate objects. Throughout the course you will experiment with a variety of iterative practices and processes, including sculpture and modelmaking, prototyping and testing. These approaches are applicable to a range of different creative specialisations. Throughout the course you will gain foundational skills and understanding in: Articulating creative work and ideas as 3-dimensional objects; A range of analogue and digital 3-dimensional materials and methods; The processes associated with different forms of 3D making

Creative Arts

197194 Creative Arts Special Topic 1B **15 credits**

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

Art and Design Studies

197228 Creative Arts Special Topic 2C **15 credits**

Engagement with new thinking in creative arts research through a specific lecturer-led project.

196317 Community and Ecosystem Ecology **15 credits**

A theoretical perspective to the study of community and ecosystem ecology examining the role of interactions between two or more species and their environment. Topics covered include techniques of community description, abiotic and biotic controls of community structure, the effects of disturbance, food web theory, ecosystem function and biodiversity. The emphasis will be on understanding the models and theories relating to this area of science, although examples of the application of these principles will also be given. Practical classes will involve a small research project emphasising the statistical and writing skills important in community and ecosystem ecology.

196318 Molecular Ecology **15 credits**

This course explores the application and analysis of molecular markers to address questions within basic and applied ecology. The diversity of genetic techniques, metrics, and analyses used in molecular ecology will be demonstrated. Examples will address how molecular approaches can be applied to gain insights into ecology, demography, behaviour, biodiversity, and conservation.

196319 Terrestrial Ecology **15 credits**

The course explores the diversity of plant interactions with other organisms, their ecological relevance to communities and ecosystems, and the impacts of human activities and the role of restoration ecology.

Marine Ecology

196327 Marine Mammalogy **15 credits**

This course examines the zoogeography of marine mammals and the morphological, physiological and behavioural adaptations which have enabled this diverse group to successfully colonise all of the world's oceans and some freshwater systems. An understanding of the underlying ecological principles not only provides interesting insights into marine mammal biology but also yields consequences for marine mammal conservation and management.

Ecology

196329 Marine Ecology **15 credits**

Students will develop an in-depth understanding of the life histories of marine organisms and the mechanisms that determine the distribution and abundance of biodiversity in our oceans. Topics include: marine organism life histories, connectivity and dispersal, community ecology, trophic ecology, and anthropogenic impacts including climate change.

196712 Aquatic Ecology **30 credits**

This course presents an historical and theoretical perspective to the study of freshwaters, building on the general introduction in 196.313. Topics covered include stream ecosystem structure and function, aquatic macrophytes, plankton, freshwater fish, disturbance and land use impacts, and the implications of the Resource Management Act to aquatic ecology.

196713 Ecology **30 credits**

This course explores contemporary issues in ecology, emphasising a functional outlook on the role of species in communities. It will focus on biodiversity and the interactions of organisms as stimuli for biodiversity. Topics include diversity and ecosystem function, patterns of species diversity, keystone species, herbivory, community structure, assembly roles and food web studies.

196871 Thesis 90 Credit Part 1 **45 credits**

A supervised and guided independent study resulting in a published work

196872 Thesis 90 Credit Part 2 **45 credits**

A supervised and guided independent study resulting in a published work.

196875 Thesis **90 credits**

A supervised and guided independent study resulting in a published work.

196897 Thesis 120 Credit Part 1 **60 credits**

A supervised and guided independent study resulting in a published work.

196898 Thesis 120 Credit Part 2 **60 credits**

A supervised and guided independent study resulting in a published work

196899 Thesis **120 credits**

A supervised and guided independent study resulting in a published work.

196900 PhD Ecology **120 credits**

197238 Interaction and Interface I 15 credits

In this studio course students will focus on issues and design considerations particular to the interface between technology and people. Principles of usability and interaction will be applied to a range of situations including hand-held, web located, environmental and spatial.

197239 Design in the Pluriverse 15 credits

Examine how contemporary design evolved from its roots in identity, craft and technology through to its place in contemporary culture and society. From our local perspectives as Tangata Whenua and Tangata te Tiriti to the broader tensions of functioning in a globalised world with a plurality of identities and subject positions, we examine what it means to operate within the pluriverse, always in relation to one another.

197288 Creative Collaboration 15 credits

In this course, students from a broad range of creative practices will work together to conceptualise and create innovative offerings to experience and reflect upon collaboration as creative citizens.

197290 Professional Cultures in Design 2 15 credits

A further orientation to the design studio environment, with specific emphasis on collaboration and working within the context of Te Tiriti O Waitangi.

Creative Arts**197291 Creative Arts Special Topic 2D 15 credits**

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

197331 Creative Arts Special Topic 3E 15 credits

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

197332 Creative Arts Project 3A 15 credits

Engagement with new thinking in creative research through a specific lecturer-led project.

Art and Design Studies**197338 Interaction and Interface II 15 credits**

In this studio course students will expand their knowledge and proficiency with specific aspects of human-technology interaction. Students will intensify their focus on areas such as small-screen interface, web-based networking, touch control, reactive environments and spatial interaction.

197339 Transformation: Discourse in Design 15 credits

From the design of serving communities, to processes, to the necessity of embracing the health of our planet, this course encourages students to independently explore and appraise a range of ideas that critically examine how contemporary design is shaped by cultural, ethical, moral, commercial, ecological and technological complexity.

197379 Service and Experience Design 15 credits

In this studio course students will learn and apply human-centred design processes to create a multi-dimensional response to a specific brief. Using a human-centred approach, students will negotiate the opportunities and tensions inherent in the design of services and experiences, offering original solutions that explore current paradigms (including the dynamic interplay of production and consumption).

197383 Internship 15 credits

In this course, and in partnership with the course coordinator, the student will identify an academic researcher, external group, mentor or professional to exercise and develop their creative practice while working within a direct collaborative relationship.

197388 Creative Communities 15 credits

Students from a broad range of creative practices will work together to explore conceptual and strategic dimensions of professional practice through engagement with experts from the creative sector. Students will develop an understanding of their position as creative citizens within a broader community.

197390 Professional Cultures in Design 3 15 credits

Develop skills and knowledge for a future career in design. Students will be supported in developing professionalism within the context of designer-client relationships.

197433 Designing Science Fiction 15 credits

In this studio course students will, through a process of research-informed practice, investigate design issues particular to the science fiction genre. Students will explore and expand science fiction theory and practice in the development of an original production concept.

197434 Design Awards and Competitions 15 credits

In this studio course you will develop a response to a top-level national or international design brief, award, or competition. You must apply for a specific offered module appropriate to your design specialisation or propose a competition brief to a supervising faculty member. All modules extend your skills in design research, conceptual development and advanced technical application, so that you can produce a high calibre award or competition entry.

197435 Design for Festivals and Events 15 credits

This course focuses on developing creative work that responds to specific festival themes and locations. With a focus on practice and collaboration you will contextualise, define, develop and deliver creative outcomes for a specified festival or event.

197436 Play, Research and Design 15 credits

Advanced design research informing the meaning and methodology of play within a social, cultural or technological context. This course focuses on the development of design strategies for the formation of original Play activities, games and experiences. Students will explore ways in which Play can engage users to participate in the experience of other perspectives and challenge their worldview through active participation in a multidisciplinary Play scenario.

Creative Arts**197440 Creative Arts Project 4A 15 credits**

Engagement with new thinking in creative practice research through a specific lecturer-led project.

197441 Creative Arts Project 4B 15 credits

Engagement with new thinking in contemporary design research through a specific lecturer-led project.

197442 Creative Arts Project 4C 15 credits

Engagement with new thinking in creative practice research through a specific lecturer-led project.

Art and Design Studies**197465 Creative Leadership 15 credits**

In this course, students from a broad range of creative practices will work together to situate themselves within the spectrum of the creative industries. Serving their communities as creative leaders, students will apply research and innovation theories to business and social-enterprise practices in order to conceptualise, develop, and deliver a strategic offering for a defined audience.

197470 Creative Ecologies 15 credits

In this studio course students will investigate how understanding “ecology” can catalyse research that may transform a current social or environmental issue. This course will engage in practices that include behavioural change frameworks, transformation design and sustainable design. A student will self-select a topic that is independently researched and results in a speculative proposal.

197471 Social Interventions Through Design 15 credits

In this studio course students will establish a critical position through theme based experimental projects exploring the intersection between diverse design practices. Students will work collaboratively and interdisciplinary to explore and combine unconventional communication design materials, methods and practices to creative interventions in public spaces.

Creative Arts

197490 Creative Arts Special Topic 4B 15 credits

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

197495 Creative Arts Independent Study 15 credits

Supervised independent student work on a negotiated creative arts topic involving the setting of objectives, research and /or project work and the presentation of appropriate written and/or practical outcomes.

Art and Design Studies

197701 Creative Research Practices I 30 credits

Introduction to creative research as a critical practice through advanced methods, processes, technologies and skills.

197702 Creative Research Practices II 30 credits

Development of a creative research topic area through application of advanced research methods, processes, technologies and skills.

197703 Creative Research Special Topic A 30 credits

197704 Creative Research Special Topic B 15 credits

197705 Independent Study 15 credits

197706 Advanced Digital Fabrication for Creative Res 1 15 credits

In this studio course in Fab Lab Wellington, students will develop software, systems, and related technical infrastructure for digital fabrication technologies, and thereby develop an advanced understanding of open design principles and practices.

197707 Advanced Digital Fabrication for Creative Res 2 15 credits

In this studio course, students will use the latest digital fabrication technologies in Fab Lab Wellington to prototype and manufacture creative outputs, and thereby gain an advanced understanding of open design principles and practices.

197800 Design Thesis 120 credits

Preparation of a thesis consisting of an advanced design-led research project and an exegesis to satisfy the requirements of the Master of Design qualification.

197801 MPhil Thesis 120 credits

A supervised and guided independent study resulting in a published work.

197802 Design Thesis 120 Credit Part 1 60 credits

Preparation of a thesis consisting of an advanced design-led research project and an exegesis to satisfy the requirements of the Master of Design qualification.

197803 Design Thesis 120 Credit Part 2 60 credits

Preparation of a thesis consisting of an advanced design-led research project and an exegesis to satisfy the requirements of the Master of Design qualification.

197808 MPhil Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

197809 MPhil Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

197810 Thesis 120 credits

In this programme of independent research students generate and present a distinctive body of new work that demonstrates innovative engagement with art/ design practice. The thesis comprises the presented creative work and an exegesis.

197811 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

197812 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

197821 Advanced Studio Praxis I 60 credits

Through the generation and presentation of a body of advanced creative work, contextual writing and participation in masterclass sessions, students identify key issues in their practice and critically respond to the research context in which they are working.

197822 Advanced Studio Praxis II 60 credits

Students reflect on the advanced creative work they are undertaking and the critical perspectives they have explored to develop a practical and written framework for a significant body of new work. Students develop and present a research proposal for their Thesis Project alongside a selection of creative work.

197830 Design Research Project: Honours 60 credits

In this course, students further develop, research and resolve the project that they proposed in their honours research development. Completed work is to a high level of resolution, making tangible links between theory and practice appropriate to the design specialization and project parameters. The completion of the research project is complemented by supplementary documentation that will position the student as a design practitioner within their specialization.

197900 PhD Design 120 credits

198

Industrial Design

198124 Explorations in Digital Asset Creation 15 credits

Learn foundational skills for creating digital 3d assets. In this course, you will be guided through hands-on creative exercises to develop the skills and knowledge required to produce digital assets that can then be inputted into various software for object-building, world-building and character building across a variety of digital platforms. The approaches and outputs in this course will benefit any creative arts students working in digital technologies. The core 3D skills you will gain include: - Understanding the creative process to make 3D assets - UV mapping – initial process of adding texture/colour to 3D work - Creating textures/colour - Digital lighting - Preparing your assets for animation Explorations in Digital Assets can be used to take your creativity to the next level - especially when paired with other Exploration and studio courses.

198157 Product and Industrial Design 1.1: An Introduction 15 credits

Focused on the development of product through a sustainability context, shaped by materials exploration, this studio provides an introduction to product and industrial design practice. Students develop creative and analytical thinking, idea generation, visualisation and making, central to three-dimensional design practice. Students will develop techniques and processes in critique, form-giving, problem solving, user-experience and affective design.

198158 Product and Industrial Design 1.2: Furniture Design 15 credits

In this studio students will develop three-dimensional design skills in making, prototyping, materiality, ergonomics and user-experience as they design and make furniture. Students will gain an understanding of the theoretical, historical and practical applications of these skills in Product and Industrial Design by exploring the development and production of furniture as products in one-off, batch or mass production contexts.

198212 Product Design Visualisation 15 credits

Introduction to visualisation techniques and processes that are used for the design of tangible products that focus on developing drawing, rendering, concept development and presentation skills across a range of software and traditional media.

198213 Furniture Design 15 credits

In this studio course students will develop skills in the design, development and production of furniture in one-off, batch or mass production. By gaining an understanding of the theoretical, historical and practical applications of the discipline, they will produce a project for a specific design context.

198221 Modelling and Prototyping 15 credits

In this studio course students will explore issues and design considerations particular to modelling and prototyping for three-dimensional design. Through the application of skills and techniques, this course draws on a

range of strategies and methods for exploring and representing the form and function of products.

198263 Product and Industrial Design 2.1: Experiential Design **15 credits**

Successful design development requires the integration of individual features and functions to achieve higher levels of design integrity. In this studio course students will explore and articulate creative responses to design challenges through critical awareness of contextual issues, elevating user-experience and perceived user benefits. Students will develop and apply core techniques, skills and processes in Product and Industrial Design.

198264 Product and Industrial Design 2.2: Dynamic Workflows **15 credits**

Accelerating innovation requires strategy and implementation of a range of design activities. Students will gain knowledge, integrating digital and physical three-dimensional workflows for Product and Industrial Design, used in the visualisation, making and design of tangible products. Skills in CAD modelling, rendering, concept development, output methods and presentation are gained across a range of methods synthesising digital and physical contexts.

198265 Product and Industrial Design 2.3: Empathy, Impact and Consequence **15 credits**

In this studio course students will explore and articulate creative responses to design challenges through critical inquiry and responsible design, to examine contemporary issues relevant to Industrial design in global contexts. Students will develop and apply core design techniques, skills and processes, along with an understanding of consumer research and its consequence, within the design context.

198266 Product and Industrial Design 2.4: Manufacturing Realities **15 credits**

Students will move beyond designing product concepts to realisable manufactured batch production by articulating issues and considerations particular to developing products for manufacture. Considerations include robust design, design for recovery, costing, planning and manufacturing standards. Through a design and build project students explore and apply their individual and collaborative practices as required for developing a product within a user-experience context.

198315 Product Development **15 credits**

In this studio course students will explore and articulate issues and design considerations particular to the development of products for manufacture. Through a design and build project, students will explore and apply their individual and collaborative practices required to develop a product from concept to manufacture.

198320 Open Design & Digital Fabrication **15 credits**

In this studio course students will utilise open design methodologies and digital fabrication tools to produce an open design project. They will explore the possibilities and articulate issues related to an open design philosophy whilst developing skills in making and digital fabrication.

198358 Product and Industrial Design 3.3: Definitive Design Practice **30 credits**

In this studio students develop and realise a complex project to demonstrate proficiency in Product and Industrial Design. Students work within a defined thematic using appropriate practice methods to advance and resolve complex design challenges to produce high-quality tangible outputs. In this milestone project students gain independence, demonstrate multifaceted problem solving skills and showcase their design skill set and practice.

198362 Industrial Design Visualisation **15 credits**

Advanced rendering and visualisation for industrial design, focusing on developing rendering, concept development and presentation skills across a wide range of digital and traditional media.

198367 Product and Industrial Design 3.1: Context Specific Project **15 credits**

The landscape of Product and Industrial Design is broad in application and reach. Establishing project scope informs the development of expectations of salient outputs to a design enquiry. Students establish a critical position through individual or collaborative exploration, with opportunities for varied contextual applications. Students consolidate and expand design concepts, techniques, skills and processes in the production of their design.

198368 Product and Industrial Design 3.2: Industry Based Project **15 credits**

In this studio students will negotiate a critical position through individual or collaborative professional practices, with opportunities to apply their specialist skills to a range of contexts. In addition to advancing Product and Industrial design concepts, techniques, skills and processes in the production of design work, students will develop and apply transferable skills relevant to professional and industry facing environments.

198453 Industrial Design Research and Development **30 credits**

Research methods, processes and practices for industrial design and their application through a research project.

198454 Industrial Design Research Project **45 credits**

Development and application of research to an independent industrial design project.

198455 Industrial Design Studio Project **45 credits**

Development and realisation of an advanced industrial design project.

198463 Industrial Design Digital Representation **15 credits**

Digital design processes and their integration into design research.

199

Zoology

199103 Animals and the Environment **15 credits**

An introductory biology and natural history course presented within an evolutionary framework that investigates the diversity of animal life, human-animal interactions, nutrient and energy flows, conservation and sustainability. This course places emphasis on wild animals and ecological processes operating within New Zealand and globally.

199203 Evolutionary Principles of Animal Behaviour **15 credits**

This course explores how genetics, the environment, and humans shape the evolution of animal behaviour and inter- and intraspecific interactions. Practice sessions develop skills on the description, quantification, comparison and statistical analysis of animal behaviour using a variety of animals (vertebrate and invertebrate, wild and domestic). The use of scientific writing to communicate research findings is emphasised.

199211 Invertebrate Zoology **15 credits**

A largely marine-based course that introduces the spectacular diversity amongst invertebrates. An appreciation of the major phyla is gained through learning about their diversity, anatomy, feeding, ecology and reproduction. Practical work focuses on identifying invertebrates, their morphology, and how they function.

199212 Vertebrate Zoology **15 credits**

An exploration of the diversity and origins of fish, amphibians, reptiles, mammals, birds, and other chordate animals. Form, function and evolutionary drivers of body systems in vertebrate animals are examined, especially in practical work. Evidence for evolution is emphasised in comparative anatomy laboratories. Applications of vertebrate zoology knowledge for wildlife conservation and natural history research are highlighted.

199310 Entomology **15 credits**

Insect diversity, anatomy, physiology, behaviour, plant-insect relationships, biosecurity, and integrated pest management in agriculture, horticulture and forestry. Insect identification and curation skills are taught in the laboratories. An insect collection is required.

199312 Behavioural Ecology **15 credits**

An examination of the behavioural adaptations of animals to their environment with particular emphasis on the evolution of the behaviour. Topics include foraging, reproduction, parental care, sociality, communication, and the importance of integrating behavioural ecology into conservation and co-management. The practical work includes project work, some of which takes place outside scheduled lab hours.

199313 Environmental Physiology **15 credits**

The physiological mechanisms that enable invertebrate and vertebrate animals to live in changing environments.

199330 Ornithology 15 credits

This course examines the diversity of birds through consideration of their evolution, taxonomy, morphology and behaviour. The recognition of New Zealand birds by sight and sound is developed through tutorials. Practical work in this course focuses on research techniques employed in studies of anatomy, wing moult, plumage colouration and vocalisations.

199714 Animal Behaviour 30 credits

How do animals choose a mate, rear their young, avoid predators, find a meal and communicate with each other? These problems and applications of behavioural ecology to pest control and conservation are investigated in detail through reading current literature and class discussions. Topics change from year to year and according to the interests of the participants.

199717 Entomology 30 credits

An advanced course of study involving literature reviews, tutorials and personal research on selected aspects of insect evolution, physiology, behaviour and ecology. Topics could include the evolution of insect flight and sociality, pollination of native plants, courtship and mating behaviour, reproductive hormones and pheromones and insect dispersal, pest management and post-harvest disinfestation.

199871 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

199873 Thesis 90 Credit Part 1 (30 credits) 30 credits

A supervised and guided independent study resulting in a published work.

199874 Thesis 90 Credit Part 2 (60 credits) 60 credits

A supervised and guided independent study resulting in a published work.

199875 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

199897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

199898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

199899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

199900 PhD Zoology 120 credits**200****Politics****200100 Politics of Culture and Power 15 credits**

A broad exploration of what counts as politics in the context of cultural identities, social hierarchies and power relations.

200161 Introduction to Politics 15 credits

An introduction to the study and nature of politics, including political theory, political parties, electoral systems, public policy and international relations.

200215 Foundations of Political Thought 15 credits

A study of the history of political thought from antiquity to the nineteenth century.

200261 World Politics 15 credits

An introduction to major theories, issues, events and institutions in contemporary world politics.

200262 Politics and Public Policy in Aotearoa New Zealand 15 credits

A critical study of politics and public policy in Aotearoa New Zealand, with an emphasis on political institutions, the development of public policy, and the interplay between politics and economics in policy development.

200300 Peace Studies 15 credits

A critical investigation of the ways that violence, conflict, and peacebuilding are understood within politics, and the resulting sub-discipline of peace studies.

200301 Contemporary International Conflict 15 credits

An examination of contemporary international conflict drawing on case studies from around the world.

200303 Global Democratic Politics 15 credits

This course will critically examine core issues and debates in contemporary democratic theory and practice in a global context, with a focus on diverse forms of and challenges to political participation in contemporary democracies.

200315 Contemporary Political Thought 15 credits

A study of key developments and debates in contemporary political thought.

200361 Contemporary New Zealand Politics 15 credits

A study of selected topics and themes in contemporary New Zealand politics and government, with particular reference to the period from 1984 to the present.

200701 Advanced Political Thought 30 credits

An advanced study of significant and diverse scholarships and debates that frame and contest contemporary political events.

200702 Comparative Politics 30 credits

An in-depth exploration and critical analysis of the operation and nature of politics in different countries and regions around the world.

200761 International Relations: Theory and Practice 30 credits

An exploration of the theory and practice of international relations.

200798 Research Report (30) 30 credits**200799 Research Report (60) 60 credits****200816 Thesis 120 Credit Part 1 60 credits**

A supervised and guided independent study resulting in a published work.

200817 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

200873 Research Report Politics (60) 60 credits**200881 Thesis 90 Credit Part 1 45 credits**

A supervised and guided independent study resulting in a published work.

200882 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

200883 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

200899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

200900 PhD Politics and International Relations 120 credits**201****Classical Studies****201103 Magic and Witchcraft 15 credits**

A multidisciplinary study of magic and witchcraft in selected societies in different time periods.

201112 Greek History 15 credits

This course provides a survey of Greek History from the Bronze Age to the death of Alexander the Great in 323 BC.

201113 Greek Mythology 15 credits

A study of the nature and uses of Greek mythology in ancient Greek literature and art.

201114 The Roman Republic 15 credits

This course provides an introduction to Roman history, from its mythical beginnings to the battle of Actium in 31 BC.

201115 Introductory Latin 15 credits

An introduction to the grammar and translation of Latin. No prior knowledge of Latin assumed.

201117 Greek and Roman Warfare 15 credits

An introduction to warfare in antiquity, in its social and political contexts, with an examination of weapons, tactics, strategy, famous battles and generals.

201201 The Pursuit of Happiness in the Classical World 15 credits

This course explores views of happiness in the ancient Greek and Roman world from Homer to Marcus Aurelius.

201211 Love and Sexuality in Ancient Greece 15 credits

This course offers a systematic study of ancient Greek attitudes and practices relating to love and sexuality as reflected in history, literature, art, and philosophy, and against the background of the family and society at large.

201212 Intermediate Latin 15 credits

A development of reading proficiency in classical Latin by increasing core vocabulary key grammatical concepts and translation.

201216 The Trojan War 15 credits

A comparative examination of the Trojan War in Greek and Roman literature.

201218 Greek and Roman Religion 15 credits

A study of the religion of the Greeks and Romans, approached through both literary and archaeological sources. The course focuses on cult practices and their impacts on the societies of the time.

201219 Greek Art and Society 15 credits

A survey of techniques, developments and achievements in Greek architecture, sculpture, wall- and vase-painting, set in their archaeological and social contexts. The period covered is from the Bronze Age through to Late Classical times.

201231 Leaders and Leadership in the Classical World 15 credits

A study of leadership in the Classical world from the point of view of the leaders themselves and from those they led.

201313 Greek Tragedy, Then and Now 15 credits

This course examines ancient Greek tragedy in translation. It looks at the transformation of myth into tragedy in the fifth century BCE and reflects on why these classical dramas remain popular today.

201314 Imperial Rome 15 credits

A study of the first 200 years of Roman imperial rule, from the time of Augustus to the death of Marcus Aurelius.

201317 Ancient Multiculturalism: Egypt, Greece and Rome 15 credits

The study of cultural exchange between the ancient Egyptian, Greek, Roman, and Jewish civilizations over the thousand years of classical antiquity, focusing on interactions in literature, art, religion, philosophy, economy, and politics.

201318 Greek and Roman Religion 15 credits

A study of the religion of the Greeks and Romans, approached through both literary and archaeological sources. The course focuses on cult practices and their impacts on the societies of the time.

201320 Roman Art and Society 15 credits

A detailed survey of techniques, developments and achievements in Hellenistic and Roman architecture, painting, mosaics and sculpture, set in their archaeological and social contexts. The period covered is from the Hellenistic Age through the Republic down to the Late Empire.

201901 PhD Classical Studies 120 credits**202****Medical Laboratory Science****202701 Clinical Laboratory Haematology 15 credits**

Introduction to the homeostatic mechanisms of blood cell production and regulation and the control mechanisms that maintain haemostasis in humans.

Prescriptions and Schedule of Courses | Tūtohu Kaupapa Me Ngā Wātaka

The role of the haematologist and the laboratory in the diagnosis of diseases such as anaemia, haemophilia, thrombosis, leukaemia and other blood cell neoplasms.

202702 Transfusion Science 15 credits

An introduction to the principles of transfusion and transplantation practice. The collection and storage of blood and the manufacture of human blood products for transfusion. The major human blood groups and blood group alloantibodies. Blood borne viruses including the hepatitis viruses and the Major Histocompatibility Complex in the context of donor/recipient matching of organs for transplantation.

202703 Diagnostic Clinical Biochemistry & Immunology 15 credits

The biochemistry of human tissue with particular emphasis on disease detection. The practical course will include analytical methods and specialised laboratory techniques applied to clinical biochemistry, immunology and serology.

202704 Diagnostic Medical Microbiology 15 credits

Bacterial and fungal pathogens of humans in terms of the organisms, their habitats, modes of transmission, disease patterns, laboratory diagnosis and relationship with the human microbiome. Sterilization and disinfection. Antimicrobial agents, resistance to antimicrobial agents and antimicrobial susceptibility testing.

202705 Advanced Clinical Sciences 30 credits

The clinical sciences are studied at an advanced level in one of the specialty areas of: Diagnostic Clinical Biochemistry & Immunology, Diagnostic Microbiology, Clinical Laboratory Haematology, Transfusion Science and Molecular Diagnostics. The role of the Medical Laboratory Scientist in the generation of clinical laboratory results used in the diagnosis and the treatment of disease/disorders and the maintenance of standards of quality and laboratory safety.

203**Genetics****203203 Biomedicine 15 credits**

This course focuses on discoveries important to our understanding of human genetics and disease. The genetic and molecular basis of human diseases will be explored. How links between genotype and phenotype are made, and how such knowledge can lead to new treatments for diseases, will be addressed.

203210 Genetics and Evolution 15 credits

This fundamental course for the biological sciences explores the genetic principles and evolutionary processes important for understanding the relationships among genetic diversity, phenotype variation, and biological evolution. Topics include sources of molecular genetic variation, the genetic basis of traits with simple and complex patterns of inheritance, evolutionary mechanisms and patterns, and molecular evolution.

203310 DNA Technology 15 credits

Advanced molecular biology methods to address areas ranging from detection of microbial pollution and vaccine development, to molecular characterization of inherited diseases and cancer. Topics will include gene cloning, PCR, recombination, transposons, transgenes and mutagenesis using state-of-the-art technologies like CRISPR and gene drives. Students will gain practical experience by planning and performing a DNA technology project encompassing primer design, PCR, molecular cloning, DNA quantification, electrophoresis, DNA sequencing and computer analysis of the recombinant construct.

203311 Genome Science 15 credits

This advanced course focuses on the practical computational skills needed to extract biological information from the genome and associated 'omics systems, including transcriptomes, metagenomes and comparative genomics. Delivered via tutorials and hands-on activities, the course is assessed solely through practical assignments and spans topics including the dynamic nature of the genome through to sequence analysis, curation, annotation and data visualization. This introduction to computational analysis is geared towards biologists and assumes no previous knowledge or familiarity with computational methods.

203870 Research Report 60 credits

203871 Thesis 90 Credit Part 1 **45 credits**
A supervised and guided independent study resulting in a published work

203872 Thesis 90 Credit Part 2 **45 credits**
A supervised and guided independent study resulting in a published work.

203897 Thesis 120 Credit Part 1 **60 credits**
A supervised and guided independent study resulting in a published work.

203898 Thesis 120 Credit Part 2 **60 credits**
A supervised and guided independent study resulting in a published work.

203899 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

203900 PhD Genetics **120 credits**

204

Data Science

204900 PhD Decision Science **120 credits**

212

Fashion Design

212100 Fashion Pattern Making **15 credits**
In this studio course students will be introduced to fundamental patternmaking methods through an applied 3D- 2D developmental process. Students will acquire basic skills for the creation of garment patterns for contemporary fashion design.

212101 Fashion Construction **15 credits**
In this studio course students will be introduced to specialised apparel industrial machinery, techniques and applied processes of apparel manufacture through construction sampling and prototyping. These industrial methods will enrich understanding of design solutions for garment and product assembly and creative exploration.

212157 Fashion Design 1.1: Fashioning the Body **15 credits**
This course introduces students to the clothing design process, exploring various technical and conceptual skills to inform and support the creative process. Students will explore the relationship between the body and cloth, and the role that clothing plays in constructing identity.

212158 Fashion Design 1.2: Introduction to Making Clothes **15 credits**
This course provides students with introductory patternmaking and garment construction skills, to gain understanding of the garment development process for realising design ideas.

212200 Garment Block Pattern Drafting and Grading **15 credits**
In this studio course students will be introduced to pattern drafting and basic size grading techniques. Through manual and digital applications, students will develop an understanding of block foundation shapes and how they form the basis of garment styles.

212226 Fashion Communication **15 credits**
Critically explore the way in which 'fashion' is communicated to the world. Through creative and technical learning, and an ethical /sustainable fashion lens, students explore experimental fashion illustration, styling, fashion photography, advertising, marketing, and fashion writing through the use of visuals and text.

212263 Fashion Design 2.3: Designing with Stretch Knit Fabrics **15 credits**
Students will utilise the unique qualities of stretch knit fabrics to generate and realise fashion design outcomes. Through critical analysis, design principles, drawing and sampling processes, students will develop creative responses to a brief. We recommend that students wishing to take this course have a foundation in drawing, such as through 213155 Explorations in Drawing.

212264 Fashion Design 2.4: Making Clothing with Stretch Knit Fabrics **15 credits**

Students will gain an understanding of the use stretch knit fabrics in fashion industry methods of patternmaking and construction. Students will apply this understanding to realise their designs through practice-based research and creative problem solving.

212265 Fashion Design 2.1: Design Development for Woven Fabrics **15 credits**

In this studio course students will develop critical inquiry and fashion design practise from historical and contemporary topics. This will focus on fashion research, consumer markets, idea generation processes through communication, drawing and sampling using woven fabrics.

212266 Fashion Design 2.2: Technical Design for Woven Garment Realisation **15 credits**

In this studio course students will develop their technical design skills using pattern making and construction processes, through design refinement and applied fashion industry methods for woven fabrics.

212304 Drape for Design **15 credits**

In this studio course the student will investigate and explore creative and innovative design pattern processes through application and manipulation of fabric directly on the three dimensional form. Students will expand their pattern processes through critical analysis of drape techniques with increased understanding of fabric behaviour, fit and relationship of the garment to the body.

212309 Contoured and Knit Apparel **15 credits**

In this studio course students explore the specialised aspects of pattern development and production in the area of contoured and stretch apparel design.

212321 Digital Applications for Fashion Production **15 credits**

In this studio course students will apply their understanding of pattern production and grading methods specifically oriented to developing designs for mass manufacture.

212358 Fashion Design 3.3: Creative Fashion Exploration and Refinement **30 credits**

Students will establish their critical position as a designer and identify a context that informs the development of their fashion design outcome, using a variety of materials which may include high stretch knit, woven and non-woven fabrics.

212367 Fashion Design 3.1: Fashion Industry Processes **15 credits**

Students will design a collection for a proposed brand and a specified consumer market, building on their fashion industry knowledge and production development skills.

212368 Fashion Design 3.2: Tailoring Methods **15 credits**

Students will build on their structured garment skills through design refinement and tailoring methods to realise tailored garments.

212403 Apparel Production Research **15 credits**

In this studio course students will apply a research informed investigation of advanced apparel production processes. Students will expand their advanced technical knowledge through design exploration, sampling and prototyping.

212453 Fashion Design Research and Development **30 credits**

Research methods, practices and processes for fashion design and their application through a research design project.

212454 Fashion Design Research Project **45 credits**

Application and development of research in an independent fashion design project.

212455 Fashion Design Studio Project **45 credits**

Development and realisation of an advanced fashion design project.

Fine Arts

213150 Painting 15 credits

In this studio course students will be introduced to aspects of contemporary painting focusing on colour, surface and structure and developing an awareness of the diversity of painting mediums and techniques. While working to a brief, students are expected to undertake independent investigations and develop individual responses.

213151 Contemporary Sculpture 15 credits

In this studio course students will be introduced to aspects of contemporary sculpture with a focus on object making, the exploration of physical materials and applied processes. While working to a brief, students are expected to undertake independent investigations and develop individual responses.

213154 Contemporary Drawing 15 credits

In this studio course students will be introduced to the potential for drawing to become more than a traditional practice of representation. The course will focus on expanding students' observation skills, and modes of expression and representation, in an expanded field of contemporary art and design practice.

213155 Explorations in Drawing 15 credits

Explorations in Drawing introduces students to foundational techniques and practices of observational drawing, drawing as thinking, drawing for ideation. The course guides beginners and skilled practitioners alike through a variety of exercises, introducing students to practices from across the creative arts. Skills taught in this course will be useful for students in all areas creative practice.

213157 Fine Arts Studio 1.1: Art Lab 15 credits

In this studio course students will be introduced to a range of art practices. Making artworks in relation to a prescribed project, they will explore specific techniques and processes, idea generation, and creative analytical thinking. They will learn to discuss and evaluate their work and the work of their peers.

213158 Fine Arts Studio 1.2: Media and Processes 15 credits

In this studio course students will be introduced to a range of art practices. Making artworks in relation to a prescribed project, they will explore art strategies and processes, idea generation and creative and analytical thinking. They will learn to discuss and evaluate their work and the work of their peers.

213170 Professional Cultures in Art 1 15 credits

An introduction to developing artistic practice, with specific emphasis on ethics, fine art cultures, learning, and positionality.

213241 Fine Arts Studio 2.3: Practice 30 credits

In this studio course students will begin to establish an individual art practice. They will respond to a provocation and develop an individual project to explore ideas, processes, context, and critical thinking in the production of contemporary art.

213243 Fine Arts Studio 2.1: Project 15 credits

In this studio course students will explore new possibilities for the production of contemporary art. They will investigate ideas, processes, context and critical thinking to develop an independent project that extends their current practice.

213244 Fine Arts Studio 2.2: Exhibition 15 credits

In this studio course students will explore new possibilities for the production and exhibition of contemporary art. They will investigate ideas, processes, context and critical thinking to develop an independent project that extends their current practice. They will present their work in a group exhibition.

213254 Drawing in Practice 15 credits

In this studio course students will be guided by experts, each with a focus on particular approaches and technologies of drawing. Students will experiment with these different methodologies, and critically reflect on the role of drawing within their own practice.

213255 Drawing the Body II 15 credits

A creative response to representation of the human body through a prescribed project. Students apply a range of drawing practices and media to the development of individual work.

Creative Arts

213256 Creative Arts Project 2A 15 credits

Engagement with new thinking in creative practice research through a specific lecturer-led project.

213257 Creative Arts Project 2B 15 credits

Engagement with new thinking in creative research through a specific lecturer-led project.

213258 Creative Arts Project 2C 15 credits

Engagement with new thinking in creative research through a specific lecturer-led project.

213262 Creative Arts Project 2D 15 credits

Engagement with new thinking in creative research through a specific lecturer-led project.

Fine Arts

213270 Professional Cultures in Art 2 15 credits

A further orientation to developing artistic practice, with specific emphasis on working with and within communities, and practicing within the context of Te Tiriti O Waitangi.

213311 Creative Arts Project 3B 15 credits

Engagement with new thinking in creative practice research through a specific lecturer-led project.

213341 Fine Arts Studio 3.3: Practice 30 credits

In this studio course students will extend their art practice. In consultation with lecturers, they will devise, undertake and document a substantial individual or collaborative project. They will explore content, context, methods, and the role of critical dialogue in the production of contemporary art.

213343 Fine Arts Studio 3.1: Project 15 credits

In this studio course students will explore new possibilities for the production of contemporary art. They will investigate content, processes, context and critical dialogue to develop a body of work that extends their current practice.

213344 Fine Arts Studio 3.2: Public Exhibition 15 credits

In this studio course students will situate their practice by investigating the relationship between the production and dissemination of art. They will develop artwork that extends their current practice and work in a collaborative group to present this work in a public exhibition.

213355 Drawing the Body III 15 credits

The development of an individual drawing project using the body as subject. A degree of innovation and experimentation is expected in both the practice of drawing and applied understanding of the representation of the human body.

Creative Arts

213356 Creative Arts Project 3C 15 credits

Engagement with new thinking in creative practice research through a specific lecturer-led project.

Fine Arts

213357 Introduction to Fine Arts Research Methods and Practices 15 credits

An introduction to a range of methods and practices for undertaking research in a fine art context.

213358 Fine Arts Internship 15 credits

A negotiated programme of study that provides students with the opportunity to gain experience and practice by working alongside visual arts professionals. Students work through self-directed inquiry and collaboration (as appropriate) towards the development of a project and assigned tasks within the professional environment. Prior approval by the course Coordinator is required.

213370 Professional Cultures in Art 3 15 credits

Learn skills and knowledge to develop sustainable art practice within Aotearoa.

Creative Arts

213411 Creative Arts Special Topic 4A 15 credits

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

Fine Arts

213440 Art Studio IV A Practice 30 credits

In this studio practice course students will further advance the exploration of content, context, methodology and the role of critical dialogue in the production of contemporary art. In consultation with lecturers, students develop and present a substantial, innovative and individual body of work.

213441 Art Studio IV A Research 30 credits

In this studio research course students will advance the exploration of content, context, methodology and the role of critical dialogue in the production of contemporary art. In consultation with lecturers, students develop a substantial, innovative research project that engages in critically reflexive practice.

213442 Art Studio IV B 45 credits

In this studio course students will further advance the exploration of content, context and engaged dialogue in the production of contemporary art. In consultation with lecturers, students produce a substantial innovative body of work.

213463 Fine Arts Research Seminar 15 credits

A programme of advanced study that addresses the application, dissemination and discussion of research practices in contemporary art. Emphasis will be placed on selective investigation and presentation of critical issues in the production of art and culture.

213464 Art in Context 15 credits

The course will discuss, critique and apply a range of exhibition, dissemination and publication conventions and practices within the context of contemporary art including art galleries, social practice, temporary and permanent artworks, public art, publishing, screenings and events

213465 Exhibition 15 credits

In this studio-based course students situate their creative practice through exhibition. Students work in a collaborative group to develop and realise an exhibition project. One of the key focus points for the course is students' growing understanding of the reality of public presentation of the creative output. This advanced programme of study will encourage discussion and critical reflection on diverse approaches to the exhibition of creative work and its relevance for a range of academic and/or professional contexts.

213702 Postgraduate Studio Practice II 30 credits

An approved individually designed programme of advanced practice in Fine Arts.

213703 Special Topic 30 credits

An opportunity to follow a particular academic interest. The topic and the manner in which it is approached require prior approval. With permission of the Head of Department a prescribed course at 700-level may be substituted.

213704 Fine Art Theory and Research 30 credits

A programme of advanced study that examines the theoretical and historical contexts of Fine Art Practice. Emphasis will also be placed on developing and implementing research strategies.

213706 Postgraduate Studio Practice I 30 credits

An individually designed programme of advanced studio practice in fine arts.

000

213729 Fine Arts Research and Development: Honours 30 credits

Advance the exploration of content, context, methodology and the role of critical dialogue in the production of contemporary art. In consultation with lecturers, students develop a substantial, innovative research project that engages in critically reflexive practice.

213

Fine Arts

213830 Fine Arts Research Project: Honours 60 credits

In this studio research course students will advance their exploration of content, context, methods and the role of critical dialogue in the production and dissemination of contemporary art. In consultation with lecturers, students refine and present a substantial, critically reflexive practice-based research project.

213900 PhD Fine Arts 120 credits

214

Health Sciences

214003 Foundation Human Bioscience 15 credits

An introduction to the core concepts in human biology and basic physiology.

214004 Foundation Health Studies 15 credits

A multidisciplinary introduction to factors that affect the health and wellbeing of ourselves and our communities. Suitable for students transitioning into discipline areas that require a broad understanding of the fundamentals of health.

214101 Human Bioscience: Normal Body Function 15 credits

Human body structure and function (anatomy and physiology), including relevant concepts of homeostasis and metabolism and development throughout the lifespan.

214102 Applied Sciences for Health Professionals 15 credits

An introduction to the basic scientific concepts that are relevant to the maintenance of human and environmental health.

214201 Human Bioscience: Impaired Body Function 15 credits

An examination of the aetiology of disease and alteration of health status and the relevant scientific clinical tests, including the role of micro-organisms in disease processes.

214202 Pharmacology 15 credits

The study of pharmacokinetics, pharmacodynamics and pharmacogenetics; drug groups; principles of adverse drug effects; and drug interactions of prescription and non-prescription medication.

214212 Research Methods in the Health Sciences 15 credits

Examination of health science research including the research process, research questions, quantitative and qualitative research methods, and the ethics of health research.

214213 Toxic Substances, Human Health and the Environment 15 credits

A study of the interactions of key groups of toxic substances with the human body and the ecosystem. Provides an overall understanding of the terminology, principles, concepts and methodologies. Discusses applications to human or environmental toxicological risk assessment.

214215 Food Safety and Human Health 15 credits

Introduces students to the key issues surrounding the preparation, handling and delivery of safe food, and applications of food safety, HACCP, inspection and assessment techniques, food legislation and common problems, will be examined. Will include a study of relevant organisations involved in the food industry.

214216 Environmental and Public Health Law 15 credits

Legislative, judicial and administrative aspects of the New Zealand legal system as they apply to environmental health. Examination of statutory and common law legal issues, collection of evidence and prosecutions, management of cases, negligence and potential liability. Special focus on the RMA (1991) and Health Act (1956).

214301 Environmental Health Risk Management for Disasters**15 credits**

Advanced theory and practice in environmental health risk management applicable to typical disaster and humanitarian relief scenarios encountered in New Zealand/Pacific Rim.

214311 Epidemiology and Communicable Diseases**15 credits**

The nature of important communicable diseases and the factors that influence the occurrence, prevention and control of infectious diseases. The microbiology of common agents of communicable diseases. Examination of the major reasons for disease emergence and resurgence. Concepts and applications of epidemiology in relation to infectious and non-infectious agents.

214312 Environmental Monitoring and Investigative Methods**15 credits**

Exploration of approaches used to sample and test air, water, soil or food for human health protection purposes; from sampling design to techniques used, and from data validation to the interpretation and regulatory use of results.

214314 Water and Waste Treatment**15 credits**

Water treatment for drinking water supplies and public bathing facilities, the treatment and disposal of liquid (e.g. sewage) and solid wastes for the provision and maintenance of public health, with particular reference to common systems.

214316 Bio-Physical Effects of Noise and Vibration**15 credits**

Sources, propagation, measurement units and effects of noise and vibration on human health. Measurement and assessment of these factors in the community. Instrumentation, procedures, collection of data and interpretation; legislation, standards and guidelines; and requirements for legal action.

214781 Advanced Topics in Health Science**30 credits**

Critical reviews, standards, advanced study and/or research in a selected area of health science.

214900 PhD Health Sciences**120 credits****218****Building and Construction****218101 Building Materials, Elements and Regulation****15 credits**

The course introduces the basic principles of construction and building materials within New Zealand's building codes context. Students will examine the basic properties, behaviours, performance and constraints of common construction materials. Students are introduced to key standards, guides and codes to building construction in New Zealand.

218102 Construction Technology and Services I**15 credits**

This course will enable students to understand how components of residential buildings are assembled to create habitable and usable spaces. Students will explore the characteristics of various construction materials used in interior finishing. Students are introduced to the principles and applications of services and facilities for comfort and energy performance of residential buildings.

218103 Construction Design and Drawings**15 credits**

This course introduces students to the production and interpretation of construction design and drawings. Students will learn basic design principles and produce two-dimensional technical drawings and three-dimensional models manually and using drafting software.

218104 Mathematics and Structural Principles**15 credits**

The course is designed to improve student competency in construction-based mathematical calculations and tasks. It introduces basic structural principles and computations for structural integrity in building elements.

218105 Integrating Design and Delivery in Built Environment**15 credits**

This course examines the nature and operations of the New Zealand construction industry. It examines the role and responsibilities of key industry players, their interactions and inter-relationships towards design and delivery of construction projects as a pre-cursor to implementing a collaborative working platform such as Building Information Modelling (BIM). The course

reviews the legal position of the Treaty of Waitangi in relation to construction projects in New Zealand.

218106 Construction Health, Safety and Wellbeing**15 credits**

This course examines the potential hazards and safety strategies of the construction workplace. Students will explore strategies for safe designs, hazard assessment and the implication of health and safety legislation. The course reviews construction-related health conditions and their mitigation strategies.

218110 Construction Industry Work Experience I**0 credits**

Construction industry work experience for at least 300 hours in a public or private business in an area related to the student's chosen major. A descriptive report demonstrating satisfactory work experience and generic skills such as observational, fact-finding, analytical and reporting skills is required.

218141 Introduction to Facilities Management**15 credits**

Understanding the language and basic concepts in facility management service delivery. The Facility Manager's role in adding value to enhance assets, user experiences, wellbeing and productivity.

218143 Asset Management**15 credits**

Identification and classification of assets and facilities. Asset lifecycle stages and deliverables. Facility Manager's role in managing assets and stakeholders.

218146 Facilities Management Planning**15 credits**

Concepts in operation, maintenance and management of assets. Use life stages, obsolescence and maintenance principles for achieving 'fit for purpose' use.

218147 Workplace Management**15 credits**

Evolution of assets and space usage. Principles and practices in adaptation, change management, and future proofing. Management of multi-user facilities.

218201 Construction Technology and Services II**15 credits**

This course covers the construction methods and materials used in commercial buildings. Students will examine installation of services and facilities for comfort and energy performance of commercial buildings including in a 3D digital environment.

218203 Principles of Measurement and Estimation**15 credits**

The course covers the principles of measurement of building works. Students will integrate and apply preliminary and detailed estimating, and cost planning principles to make cost-related decisions.

218204 Construction Contracts and Legal Principles**15 credits**

An introduction to basic legal principles and contexts that may affect construction projects in New Zealand including a basic introduction to the Treaty of Waitangi. It includes an introduction to Commonwealth legal systems and basic principles of the law of contract and tort. These are then extended to legal principles affecting construction contracts and an introduction to construction dispute resolution methods.

218210 Construction Industry Work Experience II**0 credits**

This course extends the construction industry work experience gained in first year to additional 300 hours in a public or private business in an area related to the student's chosen major. A descriptive report demonstrating satisfactory work experience and generic skills such as observational, fact-finding, analytical and reporting skills is required.

218220 Measurement I**15 credits**

The course develops proficiency in the rules and basic processes of building measurement using appropriate Standard Method of Measurement of building works. Students will perform 2D quantity take-off to produce Bills of Materials covering major trades and/or building elements using computer aided measuring and scheduling packages.

218226 Planning and Digital Built Environment for Quantity Surveyors**15 credits**

Students develop construction project-planning skills and apply these to the production of cost-related information for decision-making. Students will cover practical application of cost information to the digital approach to and digital simulation of design, construction and operation of buildings.

218228 Planning and Digital Built Environment for Construction Managers 15 credits

Students develop construction project-planning skills and apply these to the production of schedule-related information for decision-making. The practical application of schedule information to the digital approach to and digital simulation of design, construction and operation of buildings.

218230 Construction Site Operations 15 credits

This course examines site practices, operations and control. Students will undertake planning and coordination of a construction site from project inception to completion. The course covers project documentation, compliance requirements and processes including health and safety management, stakeholder management, payment mechanisms, waste minimisation, and site layout optimisation based on a programme of works using digital simulation tools.

218320 Civil & Services Measurement 15 credits

The course will develop proficiency in the measurement of civil engineering projects and building services using appropriate Standard Methods of Measurement. Students will perform 2D and 3D quantity take-off to produce Bills of Quantities for civil projects and for engineering services.

218321 Construction Estimation & Risks 15 credits

The course develops further construction estimating skills for bill preparation, tendering and decisions. Students in this course will identify and mitigate construction risks in dealing with preliminaries and strategies for fixing margins for profit and overheads.

218323 Measurement II 15 credits

Students will use industry standard software packages for building measurement and for the production of professional level schedules and Bills of Quantities for complex buildings and structures

218324 Integrating Building Information and the Supply Chain 15 credits

The course provides knowledge and skills on project information management processes based on Building Information Modelling (BIM) platforms across different construction organisations and the supply chain. Students will learn how to integrate digital technologies with the construction supply chain to collaborate and increase productivity.

218325 Post Contract Financial Administration 15 credits

The financial administration of construction projects after a contract has been awarded. Evaluation and preparation of progress claims, variations and fluctuations, extension of time claims and final accounts. Collation and presentation of contract documentation.

218326 Quantity Surveying Capstone 15 credits

This course provides students with the opportunity to consolidate and apply the knowledge and skills they have developed over the course of the degree.

218327 Sustainability and Construction Innovation 15 credits

This course introduces students to the broader concepts of sustainability and innovation applied to the entire building lifecycle. The course examines sustainable development goals, environmental legislation and their implications on building production during the pre-construction phase, use/re-use, recycle, waste and innovations to minimise environmental impacts during the construction phase, innovations for sustainable maintenance during the post-construction phase and also innovations in deconstruction and reclaiming during the demolition phase as a means to enable a circular economy.

218328 Construction Professional Practice and Ethics 15 credits

This course continues the study of basic principles of the law affecting construction contracts into the wider area of construction law. These include principles of professional ethics and the roles and liabilities of construction professionals. The course introduces both legal principles and practical aspects of construction contracts including construction contract administration. The course also includes an exploration into more common construction dispute resolution methods such as statutory adjudication.

218329 Facilities Management for Construction Managers 15 credits

The course covers the concepts and principles of managing built facilities. It covers strategic aspects of facilities management, space planning management, support services, building performance, and sustainability. Review of software applications in facility management to also enable 6D digital asset management.

218330 Construction Procurement and Tendering 15 credits

This course explores the process of procuring and tendering construction projects, including in a digital environment such as e-Procurement and e-Tendering. Students investigate the principles and processes of various traditional and non-traditional procurement and tendering methods, prepare tender and contract documents, undertake contractual risks assessments, and analyse tenders.

218331 Construction Quality Assurance 15 credits

The course develops knowledge on the principles and concepts of quality in construction. This includes implementation of quality management, a legal and regulatory environment; quality assurance practices (methods, processes and systems); quality costing; quality planning and quality management in construction projects and activities.

218335 Construction Management and Equipment 15 credits

The course covers concepts and functional application of major categories of construction equipment. Students will develop systems and procedures for the efficient management of construction equipment using underlying concepts in methods and operational characteristics; selection and utilisation; lifecycle analysis; economic and financial considerations; health and safety management; and sustainability.

218336 Construction Management Capstone 15 credits

This course provides students with the opportunity to consolidate and apply the knowledge and skills they have developed over the course of the degree

218344 Managing Risk and Operational Sustainability 15 credits

This course introduces the broader concepts of risk and decision making as they relate to the operation, maintenance and disposal of assets. Application of sustainability principles and practices to meet business objectives. Business continuity and emergency planning at a high level/policy.

218346 Digital Evolution of Facilities Management 15 credits

This course introduces students to different digital tools used by construction practitioners for the efficient management of facilities and assets. Students learn the advantages and disadvantages of digital technologies and information systems in the context of design, operation, maintenance, retrofit and disposal of facilities using a mixture of theoretical concepts and practical application.

218352 Facilities and Asset Maintenance 15 credits

An examination of concepts and strategies for the operation and maintenance of assets and facilities. Students will apply asset management assessment frameworks for planning and maintenance in facilities management.

218710 Advanced Construction Planning and Scheduling 15 credits

Advanced principles and practice of construction project planning, scheduling and risk analysis.

218711 Research Methods in Construction 30 credits

The course develops skills critical to the analysis, synthesis and review of literature; discuss alternative research methodologies; review tools and techniques for data collection; review data analysis techniques and their application in construction research; and the evaluation of research findings.

218712 Building Information Modelling Practices 15 credits

This course equips students with the knowledge of Building Information Modelling (BIM) development and management and enables students to apply a range of BIM tools across the lifecycle of a building project. This course is suitable for construction professionals and stakeholders.

218713 Digital Technology Applications in Construction 15 credits

A study of current application of digital technologies within the construction industry. The course includes the approaches to developing digital technologies that can be applied at all stages of a project's lifecycle.

218714 Sustainable Buildings and Structures 15 credits

Strategies and techniques of sustainable design and construction for the built environment, including green procurement, Design for Excellence (DfX), construction techniques and practice, zero-carbon buildings, constructability and operation and maintenance considerations.

218715 Sustainability and Climate Change for Construction Industry 15 credits

Climate change presents specific challenges to the domestic and international construction industry, requiring innovations during the entire lifecycle

of projects. This course introduces students to aspects of climate change, principles of sustainability, and the UN Sustainable Development Goals relevant to the built environment. It focuses on the specific implications of climate change for the construction industry and ways in which the industry can take leadership in promoting sustainability.

218716 International Construction 15 credits

Globalisation and booming regional economies are creating a need for construction professionals who are aware of both local and international construction markets and practices, and who are capable of managing complex construction operations. This course details the critical issues and concepts relevant to managing projects in an international context, such as marketing, negotiations, project procurement, financing, law and contracts, industry regulations, human resources, communications, safety, and risk management.

218717 Research Methods in Built Environment 15 credits

This course develops skills critical to the analysis, synthesis and review of literature; discusses a range of research methodologies; reviews tools and techniques for data collection; examines data analysis techniques and their application in construction research; and outlines the evaluation of research findings.

218718 Advanced Research Methods in Built Environment 15 credits

This course addresses the development of research skills required for advanced research in the built environment, from developing a research proposal, reviewing literature and applying analytical processes through to the key features of scientific reporting of findings.

218720 Advanced Construction Site Operations and Control 15 credits

Advanced principles and practice of construction project site planning and organisation, site operations, progress monitoring and control.

218730 Construction Project Management 15 credits

Advanced construction project management principles and practice.

218741 Light & Lighting 15 credits

This course considers photometric concepts and develops the principles of light control and distribution. Human visual processes are considered and colour science is introduced.

218742 Lamps and Luminaires 15 credits

This course develops the principles of light production as applied to lamps and considers the application of lamps in lighting design. The requirements for lamp control gear are considered together with the application of optical control to achieve accurate and efficient distribution of luminous flux. Methods of photometric testing of lamps and luminaires will be investigated.

218743 Interior Lighting Design 15 credits

This course develops the principles of interior lighting design. The human requirements and statutory regulations are investigated. Lighting designs are undertaken to demonstrate the techniques involved. The utilisation of daylight to enhance lighting installations and assist with energy savings is considered. Creative lighting techniques are investigated.

218744 Energy Efficient Lighting and Exterior Lighting Design 15 credits

This course considers the efficiency of lamps and luminaires in producing and distributing luminous flux. Lighting controls for energy saving applications are investigated. Principles of exterior lighting for work places are considered and the flood lighting of building facades is developed. The design of landscape lighting for commercial and public spaces is undertaken. The statutory requirements for, and the techniques associated with, road way and pedestrian lighting are considered. The design of lighting for sports grounds is undertaken.

218763 Advanced Construction Law 15 credits

Principles of construction law including construction professional liability, formation, drafting and interpreting construction contracts, and application of construction law principles on issues relating to time, payment, quality, subcontracting, termination of contracts, and alternative dispute resolution.

218764 Construction Contracts and Administration 15 credits

Specialist areas of construction law including contractual risk analysis, comparative construction contracts, construction contract administration, and specialist topical areas such as modern plain English drafting, subcontracting, and modern methods of resolving disputes.

218765 Construction Adjudication 15 credits

Statutory adjudication in Commonwealth jurisdictions with a focus on the law and practice of adjudication under the New Zealand Contracts Act 2002 and subsequent amendments including the adjudicator's appointment, jurisdiction, duties, powers and adjudicator's determination.

218769 Energy-Efficient Building Design 15 credits

This course examines approaches to reducing energy consumption in residential and commercial buildings resulting from the design and use of the building and its energy services. The course covers the principles of energy-efficient building design as well as use and interpretation of energy and sustainability audits. Identification of options for reducing energy use through renovation and retrofitting as well as occupant behaviour are also covered.

218770 Advanced Construction Technology 15 credits

Construction industry operations, systems and technology including the project life cycle, key stakeholders, sustainable buildings, smart living spaces, innovation, lean production, offsite construction, logistics and current trends.

218780 Quantity Surveying Practice 15 credits

Pre contract Quantity Surveying practice including feasibility, preliminary estimates, cost plans, cash flow forecasting, life cycle costing and measurement.

218781 Construction Financial Administration 15 credits

Post- contract financial administration of construction projects including construction procurement and tendering, interim payments, variations, claims, and final accounts.

218810 Research Report 45 credits

A detailed examination of a specific researchable topic within the field of construction. The course provides the opportunity for the student to demonstrate independence and originality to solve a construction-related problem requiring analytical, design and experimental effort.

218811 Research Report (90 credits) 90 credits

This course provides the opportunity to undertake research work that demonstrates independence and originality to solve a construction-related problem requiring analytical, design and experimental effort. Students will be guided through a series of supervised tutorials, workshops, presentations, seminars and written reports to document and disseminate their research.

218812 Research report 90 credit Part 1 (30 credits) 30 credits

This course provides the opportunity to undertake research work that demonstrates independence and originality to solve a construction-related problem requiring analytical, design and experimental effort. Students will be guided through a series of supervised tutorials, workshops, presentations, seminars and written reports to document and disseminate their research.

218813 Research report 90 credit Part 2 (60 credits) 60 credits

This course provides the opportunity to undertake research work that demonstrates independence and originality to solve a construction-related problem requiring analytical, design and experimental effort. Students will be guided through a series of supervised tutorials, workshops, presentations, seminars and written reports to document and disseminate their research.

218820 Dissertation 60 credits

A detailed examination of a specific researchable topic within the field of construction. The course provides the opportunity for the student to demonstrate independence and originality to solve a construction-related problem requiring analytical, design and experimental effort.

218828 Thesis 90 Credit Part 1 45 credits

A supervised independent research in the built environment resulting in a research thesis.

218829 Thesis 90 Credit Part 2 45 credits

A supervised independent research in the built environment resulting in a research thesis.

218830 Thesis 90 credits

A detailed examination of a specific researchable topic within the field of construction. The course provides the opportunity for the student to demonstrate independence and originality to solve a construction-related problem requiring analytical, design and experimental effort.

218831 Thesis 90 Credit Part 1 (30 credits) **30 credits**
A supervised and guided independent study resulting in a published work.

218832 Thesis 90 Credit Part 2 (60 credits) **60 credits**
A supervised and guided independent study resulting in a published work.

218900 PhD Construction **120 credits**

219

Communication and Journalism

219101 Media Skills **15 credits**
Understanding and working with the news media combining practical skills with critical and ethical perspectives on media use. Skills include media strategy, writing media releases, broadcast interviewing and running a media conference.

219108 Introduction to Journalism **15 credits**
An introduction to the role and function of contemporary news media, with special attention to the role of the journalist in society, the diversity of journalism cultures and basic journalism skills.

219204 News Media and Society **15 credits**
This course examines the structure and functions of New Zealand news media, including its linkages to global news media systems. It also examines how different social identities are constructed in news media.

219205 Professional Presentations in Business **15 credits**
This course is about how to persuade, inform, and entertain. In this practical course students will learn about aspects of performance, including character, style, creativity, making meaning, psychology, semantics, and how to read contexts/audiences. Students will explore and develop strategies for managing fear and anxiety.

219206 Communication and Technological Change **15 credits**
This course examines the impacts of technology on communication, organizations, and cultures. Students will learn to anticipate change and engage with big problems. Students will also design, create and critique human-centric, ethical solutions to help navigate the complex challenges of the 21st century.

219207 Writing for Public Relations and Digital Media **15 credits**
This course develops students' skills in writing for public relations and relationship management purposes, with particular attention paid to the characteristics and requirements of digital media.

219209 Public Relations Campaigns **15 credits**
An introductory study of public relations and its use to create and maintain relationships between organisations and publics. Emphasis is placed on public relations campaigns and the theory and practice of campaign planning.

219211 Interpersonal Communication **15 credits**
This course examines the importance and practice of building thriving communities and relationships, both in and out of the workplace. Students will examine how communication is used to connect with others, to express and uphold identities, and to manage challenging interactions and relationships.

219212 Introduction to Global Communication **15 credits**
This course examines the role of communication in diverse global contexts, the interplays between global processes and transformations in communication, and the role of communication in addressing contemporary global business challenges.

219213 International Communication **15 credits**
This course explores the role of media systems in shaping international politics, security, societal activism, and trans-border business and cultural practices.

219219 International Public Relations **15 credits**
An examination of the practice and theory of public relations interculturally and internationally, overviewing the global industry structure and introducing specialist intercultural communication skills for internationally mobile public relations practice.

219223 Specialist Reporting **15 credits**
The theory and practice of reporting on a specialist area of the student's choice (e.g. arts, music, sports, business, science), including building a portfolio of news and feature stories to a publishable standard in either print and/or multi-media formats.

219228 Fundamentals of Applied Communication **15 credits**
Focusing on core global challenges around the Sustainable Development Goals, the course explores the nature and role of communication in addressing these challenges. Students learn to design and implement Te Tiriti-led strategic communication applications developed through culture-centred community partnerships.

219229 Public Policy Communication **15 credits**
The course will cover the application of communication theories in the design, development, and implementation of public policies. Students will learn to engage in authentic community consultation to develop policies. They will critically examine public policies, analyse public opinion, and co-design community engagement. Attention will be given to incorporating the provisions and principles of Te Tiriti in public policy communication.

219230 Sport Communication **15 credits**
An examination of the theoretical background of sport communication, which includes an application of skills and principles within the topic.

219231 News Reporting **15 credits**
An exploration of current principles and practices and the fundamentals of news gathering and news production.

219234 Editing and Publishing for Journalism and Communication **15 credits**
Editing text for print and web publication, and understanding and applying the principles of design and layout in publishing.

219303 Organisational Communication **15 credits**
This course draws on current research and theory to examine the communication process, and practices in the context of organising.

219304 Intercultural Communication **15 credits**
This course compares the communication behaviours of different cultures. Students will develop skills that help them analyse and address intercultural conflicts and issues, and gain skills that allow them to communicate effectively in intercultural contexts.

219305 Public Relations Management **15 credits**
This course provides an in-depth examination of public relations theory and shows how it applies to practice. It focuses on strategic engagement with diverse publics, the development of long-lasting and meaningful organisational relationships, and reputation management.

219310 Speech Writing **15 credits**
This course focuses on the art of writing interesting, strong and memorable speeches. Students will analyse some of the world's greatest speeches, and practise applying the techniques to write speeches that audiences will find compelling. The curriculum will assist, but is not exclusively directed at, students pursuing careers in Communication Management and Public Relations.

219311 Communication Internship **15 credits**
This course provides students with a period of workplace experience with knowledge of communication concepts and terminology gained throughout their degree, in a series of analytical assessments.

219312 Crisis and Reputation Management **15 credits**
This course critically evaluates ways that organisations can manage reputational risk and communicate in response to crisis situations.

219320 PR Consultancy **15 credits**
An examination of the key skills, knowledge, and practices of public relations consultancy to both internal and external clients.

219325 Current Affairs Journalism **15 credits**
The theory and practice of covering current affairs, including national and local politics and other issue-based and breaking news stories in either print or multi-media formats.

219335 Media Law and Ethics	15 credits	219721 Transdisciplinary Communication Research Methods	30 credits
Students learn how to publish safely by navigating the legal and ethical challenges of writing and publishing in today's digital age.		An advanced introduction to selected communication research traditions and methods. Transdisciplinary competency in applied communication research is developed through the evaluation and application of different methodologies to communication research challenges.	
219336 Global, Investigative and Data Journalism	15 credits	219799 Research Report	30 credits
Explore the diversity of journalism as it is practised around the world, including investigative, undercover and data journalism.		Students are required to conduct a piece of independent research.	
219345 Strategic Communication	15 credits	219820 Applied Public Relations Project	45 credits
This course integrates the theory and application of strategic communication concepts and methods.		In this capstone course students apply their learning from the degree programme to developing a critically informed public relations activity plan for a selected organisation.	
219346 Advanced Applied Communication	15 credits	219850 Thesis	120 credits
Students will develop communication theory and Te Tiriti informed responses to address a problem or challenge that faces a community, group, or organisation.		The supervised undertaking of an original piece of research in communication management.	
219702 Management Communication	30 credits	219851 Thesis 120 Credit Part 1	60 credits
This course examines the management of internal communication processes within organisations.		A supervised and guided independent study resulting in a published work.	
219703 Perspectives in Business Communication	30 credits	219852 Thesis 120 Credit Part 2	60 credits
An exploration of the theory and practice of workplace communication in diverse organisational settings. Theory is linked to practice through the analysis of contemporary case studies.		A supervised and guided independent study resulting in a published work.	
219704 International and Intercultural Communication	30 credits	219853 Thesis 90 Credit Part 1	45 credits
This course uses communication theory and research to explore ways of developing cross-cultural effectiveness, with an emphasis on communication in organisational settings.		A supervised and guided independent study resulting in a published work.	
219712 Advanced News Journalism	30 credits	219854 Thesis 90 Credit Part 2	45 credits
Students study the theory and practice of gathering and writing news journalism for publication, including generating news-story ideas, gathering the relevant information, writing these news stories, and publishing them in mainstream media outlets. Students critically reflect on their experience, making links to the relevant scholarly literature.		A supervised and guided independent study resulting in a published work.	
219713 Advanced Audio-Visual Journalism	30 credits	219887 Research Report	60 credits
Students study the theory and practice of journalism in various non-print media platforms, including radio, television and multi-media platforms.		Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.	
219714 Journalism and Society	30 credits	219888 Professional Practice	60 credits
Students study and critically reflect on the role and function of journalism in society. This includes the principles of media law and ethics.		Candidates will undertake professional practice within the subject area in which the Master of Management is being completed. Professional Practice may be conducted either individually or in groups and assessment of the outcome of the investigation may be in a variety of ways including written and oral presentations and case studies.	
219715 Advanced Data and Investigative Journalism	30 credits	219889 Journalism Project	60 credits
In the era of big data, journalists need the tools of data and investigative journalism to mine, refine and present stories that matter to their audiences. Students in this course will learn the principles and methods of advanced data and investigative journalism and apply them in a data-investigative journalism project.		Students investigate and write a supervised 5,000-word piece of long-form journalism on a matter of substance and a 10,000-word scholarly, reflective, critically analytical report.	
219716 Public Relations Research Methods	15 credits	219890 Journalism Project (Part I)	30 credits
An application of contemporary research methods to the demands of public relations practice in both local and transnational campaigns.		Students investigate and write a supervised 5,000-word piece of long-form journalism on a matter of substance and a 10,000-word scholarly, reflective, critically analytical report.	
219717 Digital Innovation and PR Management	30 credits	219891 Journalism Project (Part II)	30 credits
A critical examination of trends in public relations application of mobile and social media to inform communication planning. Students critically reflect on the implications of the rapid evolution of digital platforms for their own practice.		Students investigate and write a supervised 5,000-word piece of long-form journalism on a matter of substance and a 10,000-word scholarly, reflective, critically analytical report.	
219719 Public Relations Analytics	30 credits	219897 Thesis 120 Credit Part 1	60 credits
Analytical techniques and strategies for PR practitioners using traditional, web, mobile and social media are explored, including the responsible interpretation and communication of the findings 'big data' makes and does not make possible.		A supervised and guided independent study resulting in a published work.	
219720 Global Public Relations Management	30 credits	219898 Thesis 120 Credit Part 2	60 credits
This course identifies and analyses how global public relations management is shaped by emerging technologies, national cultures and diplomacy. A comparative study of public relations practice in different countries is based on an international study trip.		A supervised and guided independent study resulting in a published work.	
		219899 Thesis	120 credits
		A supervised and guided independent study resulting in a published work.	
		219900 PhD Communication and Journalism	120 credits
		221	
		Photography	
		221100 Photography as an Agent of Change	15 credits
		In this studio course students from all disciplines will gain a grounding in photographic technologies and how they can be utilised in contemporary	

photographic practice. Students will explore the ongoing relationship photography has with social and political issues.

221157 Photography Studio 1.1: What is Photography? 15 credits

How do we photographically 'see' the world? How does photography function in your world and the wider culture you live within? Through an introduction to the fundamentals of photography you will consider these questions and acquire specific skills and processes in digital photographic image making. You will use creative and analytical skills and idea generation to develop a practical project.

221158 Photography Studio 1.2: Introduction to the Darkroom 15 credits

How are analogue darkroom technologies employed in contemporary photographic practice? Through experimentation with materials and engagement with the wider world you will develop a practical project. You will be introduced to selected darkroom and wet-based analogue photographic techniques and consider how you will make them relevant to your practice.

221220 Photography and the Studio 15 credits

In this studio course students will learn controlled lighting techniques (in the studio and on location). They will develop a self-initiated lighting project in order to enrich other strands of their creative practice.

221221 Photography and Digital Practices I 15 credits

In this studio course students will be introduced to photographic digital image manipulation techniques within a broader discussion of the veracity and consumption of digital photographs. They will develop a self-initiated project in response to their specific area of creative practice.

221222 Photography and the Darkroom 15 credits

In this studio course students will be introduced to a variety of photographic analogue processes, which they will employ to produce a body of work. Selected darkroom and wet-based photographic techniques will be explored.

221263 Photography Studio 2.1: Attributes of Light 15 credits

By engaging with the attributes of light you will become articulate in understanding and influencing photographic meaning. You will develop skills in conventional and experimental photographic lighting technologies, within and beyond the lighting studio. Through photographic or moving image work, you will employ this knowledge in a self-directed project.

221264 Photography Studio 2.2: Fact and Fantasy 15 credits

You will explore how ongoing developments in digital technologies within wider visual culture affect photography and lens-based practice. Working with Photoshop and related technologies, you will apply research and experimentation to your own and others work. You will consider how an understanding of the discourse around digital photographic technologies and how photography functions as a language will impact your practice.

221265 Photography Studio 2.3: The Living Archive 15 credits

Engaging with practice-based learning informed by research and experimentation you will explore the photographic archive as a cultural repository. Investigating social, political, personal, and historical uses of photography you will respond to an archive through a creative photographic project. Content includes principles of archival collection and management, film scanning and creative use of archival material.

221266 Photography Studio 2.4: Photography, Representation and the Gaze 15 credits

How can creative practitioners formulate positions on critical issues associated with photographic representation and agency? You will develop strategic and ethically based explorations for a practical photographic outcome honouring the complexities of your chosen subject. You consider issues specific to making photographs in 21st century Aotearoa, including Te Tiriti, the gendered gaze and representation of people and whenua.

221320 Photography and the Body 15 credits

This studio course engages with the human form as subject in photography and examines principles of lighting. It also explores the history of representation of the human form, taking in photographic portraiture and approaches to fashion photography along with the central and sometimes controversial history of the nude.

221321 Photography and Digital Practices II 15 credits

This studio course provides students from all disciplines with advanced knowledge in digital photographic technologies and how they can be utilised

in contemporary photographic practice. Particular attention will be paid to colour theory, colour management and advanced photographic manipulation and output strategies.

221322 Photography and the Advanced Darkroom 15 credits

Engage with the histories of photography by applying analogue processes in studio. Workshops will include cyanotype and advanced darkroom printing, as well as the construction of digital negatives. We will also visit photographic archives to study original materials. All of which will help you create an experimental final project using methods of your choice.

221358 Photography Studio 3.3: Extended Photographic Practice 30 credits

Negotiating a critical position through an individual creative project, you will apply your specialist skills to a selected photographic context. In addition to extending photographic concepts, skills and processes in the production of personal creative work, you will develop and apply transferable skills relevant to creative environments. Content includes collaborative practices and output strategies relevant to future pathways. In addition to advancing photographic concepts, techniques, skills and processes in the production of their creative work, students will develop and apply transferable skills relevant to professional environments.

221367 Photography Studio 3.1: The Photobook and Narrative 15 credits

In this course we investigate the photographic book as a vehicle for exploring visual narrative. You will develop a self-directed theme into a photographic project, experiment with materiality, and construct a photobook. Visual language will be informed by encounters with innovative published work and consideration of audience. The course covers methods and strategies for book design, material considerations and production.

221368 Photography Studio 3.2: Post Photography 15 credits

Engaging with practice-based learning informed by research and experimentation you will extend photographic technologies and their possibilities. You will creatively engage with a self-selected photographic technology, considering both historical and current photographic approaches. Digital, moving image, lighting studio and analogue technologies can all be used within individual projects. Advanced analogue photography workshops will be delivered.

221453 Photography Research and Development 30 credits

Research methods, practices and processes for Photographic Design and their application.

221454 Photography Research Project 45 credits

Application and development of research to an independent Photographic Design project.

221455 Photography Studio Project 45 credits

Development and realisation of an advanced photographic design project.

221456 Photography and the Archive 15 credits

A studio-based course that examines photography's engagement with the 'archive' as a cultural repository. Students will investigate the social, political and historical uses of archives through photography.

221457 Photography and Visuality 15 credits

A studio-based course that examines photography's historical and contemporary relationships with vision and visuality. Students will discuss the impact of visual representations on contemporary life and they will develop this discussion through verbal presentations, written work and in the execution of a body of experimental photographic images.

222

Visual Communication Design

222104 Printmaking 15 credits

In this studio course students will focus on issues and design considerations particular to printmaking. Students will acquire specific printmaking techniques, skills and processes to gain competence in this hands-on medium.

222157 Visual Communication Design 1.1: Introduction to Graphic Design 15 credits

In this course students will be introduced to fundamental graphic design principles, understanding rhetorical approaches and building visual language. Students will explore a specific topic and develop content and compositions that are compelling and persuasive and communicate a clear and engaging message for both print-based, and dynamic interactive/motion graphic outputs. This course introduces core skills for all designers communicating visually.

222158 Visual Communication Design 1.2: Introduction to Typography 15 credits

In this course students will be introduced to typography, the foundational design skill of arranging type, exploring the interplay of content and meaning. Students will gain an understanding of fonts, the language of letterforms and the power of structuring written words through developing layout systems and information hierarchies to make information accessible and engaging. This course will be instrumental for all designers who deal with words and images for print, screen and beyond.

222159 Visual Communication Design 1.3: Introduction to User Experience Design and Interactivity 15 credits

In this course students will be introduced to interaction design, and develop understanding of user experience design (UX) through the design of user interfaces (UI) in a web design context. Students will gain knowledge of prototyping and user testing practices through designing a digital interface, learning how information can be effectively communicated in online media. This course will be useful for all students interested in graphic design for interactive environments.

222208 Letterpress 15 credits

In this studio course students will explore and articulate issues and design considerations particular to letterpress technologies. Students will develop and apply techniques, skills and processes in letterpress typography and print production.

222215 Brand Communication 15 credits

In this studio course students will learn history and methods particular to practices of brand positioning and marketing communication. Students will apply fundamentals of brand strategy to the process of differentiating branded offerings through design.

222225 Narrative Illustration 15 credits

In this studio course students will explore and articulate issues and creative considerations particular to narration and narrative theory. Students will develop and apply techniques, skills and processes in the use of storytelling in their creative practice.

222232 Illustrated Characters 15 credits

In this studio course students will explore the unique area of character creation, design and production. Following an investigative process, students will develop an original character that is meaningfully placed within a social or fantastical context.

222248 Typographic Systems 15 credits

In this studio course students will explore and articulate issues and design considerations particular to managing complex information. Students will develop and apply techniques, skills and processes in communicating through text, symbol, colour and form.

222263 Visual Communication Design 2.1: Graphic Design: Type and Image Systems 15 credits

In this course students will explore strategies for developing a visual language using type and image. Students will design a printed publication using flexible and cohesive graphic systems for the meaningful, logical and consistent organisation of information on a page. This course develops skills that can be applied to any aesthetic, project or media across print and digital outputs.

222264 Visual Communication Design 2.2: Visualising Information 15 credits

In this course, students will learn narrative and data visualisation techniques to aid audience interpretation of information in compelling and accessible ways. Students will consider different audiences and produce responses across multiple media. This course provides an opportunity to apply and extend typographic, graphic design and illustration skills, and consider how interactivity and narrative can enhance the communication of complex information.

222265 Visual Communication Design 2.3: User Experience Design in Web and Digital Media 15 credits

In this course students will deepen their knowledge of web design and digital media concepts. Students will design a comprehensive website through a user-centred design practice, including developing information architecture appropriate to a large-scale website. Students will develop their user interface (UI) and user experience (UX) design skills further, integrating visual communication design principles into the online environment.

222266 Visual Communication Design 2.4: Brand Communication 15 credits

This course explores a designer's role in creating, developing, positioning and implementing a brand. Students will create a visual identity system applied across print, packaging and promotional touchpoints. Learn about brand positioning, audience profiling and persuasive strategies alongside processes for logo identity design.

222267 Visual Communication Design 2.5: Illustration Practice 15 credits

In this course students will explore illustration as both art form and as a powerful medium for design communication and storytelling. Students will develop and apply techniques, skills and processes to create illustrations for a range of topics and audiences, which engage, inspire and provoke.

222268 Visual Communication Design 2.6: Transmedia and Motion Graphics 15 credits

In this course students will explore how visual language can be applied across different media to engage, inform and enable. Students will create a cohesive visual narrative to work across print and digital media. This will appeal to students interested in branding, marketing, transmedia narrative and motion design. It also provides excellent opportunities for innovative application of illustration and typographic design.

222326 Sequential Art 15 credits

In this studio course students will learn how to create visual narratives in sequential form. The emphasis will be on visual narrative construction for the picture book, with some contextual history of the genre. Production aspects include analogue and design techniques, continuity and image and text relationships.

222333 Concept Design for Imaginary Worlds 15 credits

In this studio course students will learn how to represent ideas, characters, moods, scenes and scenarios which could be used in film, games or animations. Within this area of pre-production students will use both divergent and convergent approaches that will result in multiple concept options as well as technically resolved images.

222347 Editorial Design 15 credits

In this studio course students will explore and articulate design considerations particular to managing editorial content. Students will develop and apply techniques, skills and processes in communicating through advanced typographic techniques and image composition.

222348 Narrative Information Design 15 credits

In this studio course students will explore information design concepts and expand information design theory and practice. Complex information will be interpreted and translated into precise and accessible form for specific audiences.

222358 Visual Communication Design 3.5: Design for Social Change 30 credits

In this course, students will develop a deep understanding of human-centred design processes that respond to the needs, preferences, and behaviours of the target audience. Students will create an innovative design strategy to address a societal issue. This course has broad appeal, offering students a high level of creative independence and an opportunity to focus on their specific area of design interest. Students are also encouraged to consider their role as a designer and how they can contribute to society in a meaningful way.

222367 Visual Communication Design 3.1: Editorial Design and Production 15 credits

In this course students will extend skills for managing complex editorial content for a curated reading experiences. Students will find that this course helps them develop their skills in typographic detailing, document structure, grids and hierarchy, alongside hands-on format, print-finishing and binding techniques. This course will be valuable for students interested in book/

publication design, and those wanting to advance their typographic skills for any medium.

222368 Visual Communication Design 3.2: Brand Communication Identity and Narrative **15 credits**

In this course, students will extend their understanding of the role of branding in the context of the overall marketing and communication mix. Working with a studio group, students will create a cohesive brand narrative and apply it across a comprehensive range of touchpoints. This will be of particular appeal to students interested in branding, marketing and transmedia narrative, with opportunities for detailed exploration and application of graphic design, typography, motion graphics, photography, illustration and video.

222369 Visual Communication Design 3.3: User Experience Design: Service, Experience and Interaction **15 credits**

In this course students will extend their knowledge of web, service and experience design. Students will apply a robust user centred design process to create a comprehensive digital service through experience design. This course will be valuable to those interested in advancing their graphic design and service and experience design skills through digital media practice.

222372 Visual Communication Design 3.4: Creating Visual Narrative Content **15 credits**

In this course students will expand their content creation practice. Explore professional ways of generating, translating and presenting ideas and narratives into expressive and engaging visual forms for specific audiences. Outputs may include analogue or digital responses, encompassing illustration, moving image, graphic design, and digital interactive interfaces.

222408 Experiential Information Design **15 credits**

This course explores ways in which complex information can be interpreted and translated into sophisticated visual language through analytical and practical design enquiry.

222409 Contemporary Letterpress **15 credits**

In this studio course students will apply a visual research process of typography with historical and contemporary printing methods. Students will explore aesthetic and theoretical implications of hand presses, metal type, wood type and digital technologies in the creation of new hybrid visual communication.

222417 Image and Identity **15 credits**

In this course students will explore how designers lead and manage the branding process for organisations by communicating with images and words. How an organisation presents itself can be called its identity. How different audiences perceive this is can be called its image. Students research, explore, and develop a flexible design system for an organisation by creating a dynamic brand experience that can adapt to visual, interactive, and sensory modes.

222424 Illustration Art Now **15 credits**

In this studio course, students will explore ways in which illustration can be 'lifted off the printed page', and be extended and applied to contemporary scenarios and social, personal and historic narratives via explorative and sometimes experimental techniques.

222425 Illustration Studio Practice **15 credits**

Advanced exploration and application of illustrative processes, methods and strategies to a range of complex issues.

222449 Spatial Type **15 credits**

In this studio course students will apply a research-informed investigation of typography in spatial environments. Students will explore two and three dimensional typographic solutions that may include interpretive, navigational or informational typography.

222453 Visual Communication Design Research and Development **30 credits**

Application of research methods and processes to investigate social, cultural, aesthetic and technical issues and strategies in an approved visual communication design project.

222454 Visual Communication Design Research Project **45 credits**

Application of research to the development and production of an approved independent visual communication design project.

222455 Visual Communication Design Studio Project **45 credits**

Development and realisation of an advanced visual communication design project.

222499 Independent Visual Communication Design Study **15 credits**

Independent student work is undertaken on an approved course of study involving research and/or project work in visual communication design.

223

Textile Design

223157 Textile Design 1.1: Interwoven Structures **15 credits**

In this studio course students will be introduced to a range of interlacing techniques to enable exploration of surface, structure and 3D forms. Students will work with a range of hard and soft materials to develop skills in 3-dimensional ideation. This course provides a good grounding for students interested in the material intersections between spatial, fashion, industrial and textile design.

223158 Textile Design 1.2: Surface Design, Colour and Screen Print **15 credits**

In this introductory studio course students will gain access to Textile studio through print processes. They will acquire specific techniques, skills, and processes through the investigation of print practice: through mark-making, colour, composition and drawing for the design and making of textiles. They will learn to discuss and evaluate their work and the work of their peers.

223207 Materials Lab **15 credits**

In this studio course students will be introduced to identification and testing of materials for design and performance. Students will analyse innovative, technical, and industrial materials for a wide range of design products and contexts through workshops and interaction with industry.

223211 Fashion Textiles **15 credits**

This studio course introduces the design and creation of textiles for apparel. Students will explore a variety of textile techniques and processes, and their creative fashion application.

223263 Textile Design 2.1: Intro to Knit **15 credits**

In this course students will gain knowledge in knitted textiles and co-creation concepts. Students will develop a range of knitted samples and be introduced to dye techniques for wool yarns. Students interested in constructed materials will find that the course helps them develop understanding of how interlocking loops can be manipulated for multiple applications.

223264 Textile Design 2.2: Intro to Print, Colouration and Pattern **15 credits**

An introduction to Textile surface pattern design and sustainable and commercial screen print processes. Students will find that this course helps them develop and translate ideas by exploring various colouration processes and textile repeat structures.

223265 Textile Design 2.3: Intro to Weave **15 credits**

Students will gain knowledge of fibre and yarn properties and create a range of woven and hand embroidered textiles. Students interested in communicating through cloth will find that the course helps them to translate intangible resonances into textile designs.

223266 Textile Design 2.4: Digital Textile Print and Application **15 credits**

Students interested in digital processes for textile design will be introduced to digital print, digital embroidery processes, advanced repeat systems for textile surface design and an introduction to industry trends, market and collection building.

223301 Contemporary Wallcoverings **15 credits**

In this studio course students will design and develop collections for wallpaper and wall coverings, with emphasis on creative investigation and forecasting.

223312 Textile Print Project **15 credits**

In this studio course, students explore the design and development of printed textiles for a specific performance, installation or exhibition.

223358 Textile Design 3.3: Studio Collections 30 credits

In this studio students will design a collection to connect with a specific audience. With opportunities for varied contextual applications, students will consolidate and expand textile design concepts, techniques, skills and processes in the production of their creative work.

223367 Textile Design 3.1: Advanced Textile Structures 15 credits

In this studio course students will extend their competency of textile structures through advanced weaving and knit technology, such as digital technologies and jacquard weaving. Gaining knowledge of warp design and material testing, students will produce collections of knitted and woven textiles to address current and future needs, problems or opportunities.

223368 Textile Design 3.2: Advanced Textile Print for Collection and Industry 15 credits

Students will gain advanced technical knowledge towards large-format printing and colouration processes while innovating existing knowledge on textile repeat structures. Additional learning will include an introduction to digital visualization using various techniques. This course is a textile collection-based output.

223411 Embroidered Textiles 15 credits

Students will explore embroidery and advanced technologies for the production of innovative fashion textiles.

223412 Sustainable Colouration 15 credits

Students will explore contemporary design concepts using sustainable dye processing and advanced technology to colour and pattern textiles.

223453 Textile Design Research and Development 30 credits

Research methods processes and practices for Textile Design and their application through a research project.

223454 Textile Design Research Project 45 credits

Application of research to the development and production of an approved textile design project.

223455 Textile Design Studio Project 45 credits

Development and realisation of an advanced textile design project.

224

Spatial Design**224157 Spatial Design 1.1: An Introduction 15 credits**

In this studio course students will be introduced to skills and processes to design physical, temporal, and digital spatial environments. They will explore core spatial design principles of site, time, light, and movement to create a digital spatial design. Students will develop creative and analytical thinking as well as idea generation and visualisation skills for spatial design practice.

224158 Spatial Design 1.2: Immersive Experiences 15 credits

In this studio course students will be introduced to performance and inhabitation. They will investigate the relationship between individual and collective rituals and the way they shape the interaction between people, places and objects. In a live-lab environment students will engage with moving image technologies, lighting, sound and material making towards the realisation of an immersive spatial experience.

224204 Design for Performance 15 credits

In this studio course students will explore the design and making of performances and their settings. Students will apply their investigations through the design or production of performance experiences and events.

224205 Design for Display 15 credits

In this studio course students will investigate concepts for display and design strategies for exhibitions as temporary interventions in public space.

Art and Design Studies**224206 Visualising Space 15 credits**

A focus on the development fundamental spatial design visualisation skills and design strategies to communicate relationships between space, atmosphere and time in a range of contexts. Students will experiment with

a range of software workflows to explore socio-cultural, historical and technological intersections between visual representation and spatial design.

Spatial Design**224263 Spatial Design 2.1: Place and Community 15 credits**

In this studio course students will explore and design spaces for communities. Through an adaptive reuse project students learn about strategies for community engagement and urban experiences to begin to understand the importance of co-design and the shared nature of public places and facilities. Students are introduced to drawing and mapping techniques for spatial design practice including site analysis, architectural drawing conventions and 3D visualisations.

224264 Spatial Design 2.2: Producing Atmospheres 15 credits

In this studio course students will explore sensory perception in physical and digital space. They will develop an understanding of the production of atmospheres and experiences through investigations of bodies, space and light. In a live-lab environment, students will work between physical and digital modalities and apply immersive technologies to generate spatial installations.

224265 Spatial Design 2.3: Adaptive Interiors 15 credits

In this studio course students will investigate a range of adaptive reuse and spatial planning strategies through digital and physical modelling. They will develop an understanding of the dynamic relationship between communities, built environments and their spatial requirements to design an interior architectural mixed-use space. Students will gain knowledge of building materials, codes and structures alongside skills in creating architectural drawings.

224266 Spatial Design 2.4: Material Matters 15 credits

In this studio course students will investigate materials, how they matter and their application in the built environment. They will explore materials and light to develop processes and concepts for the creation of spatial experiences. Students will gain knowledge about material specification and detailing, surface finishes, architectural lighting codes, acoustics and the conventions employed to express and communicate these.

224358 Spatial Design 3.3: Advanced Spatial Practices 30 credits

In this studio course students will further develop their understanding of spatial ecologies. Students will consolidate and apply their individual spatial practice towards the design of a comprehensive spatial design proposition. In addition to advancing theoretical and practical approaches, techniques and skills in the production of their creative work, students will attain transferable skills relevant to professional environments.

224367 Spatial Design 3.1: Regenerative Practices 15 credits

In this advanced studio course students will critically engage with spatial ecologies and regenerative practices. Through inquiry-based learning students will explore the interconnected and relational condition of communities, the built environment and landscapes. Students will consolidate and expand spatial design concepts, techniques, skills and processes in the production of their creative work.

224368 Spatial Design 3.2: Spatial Agency 15 credits

In this advanced studio course students will critically engage with spatial ecologies and the formation of agency. Through inquiry-based learning students will explore the dynamic and relational condition of cultural, social and historical concerns in spatial design practice. Students will consolidate and expand spatial design concepts, techniques, skills and processes in the production of their creative work.

224453 Spatial Design Research and Development 30 credits

Research methods, processes and practices for Spatial Design and their application through a research project.

224454 Spatial Design Research Project 45 credits

Application and development of research in an independent spatial design project.

224455 Spatial Design Studio Project 45 credits

Development and realisation of an advanced spatial design project.

224495 Spatial Design Independent Study 15 credits

Supervised independent student work on a negotiated topic related to spatial design involving the setting of objectives, research and/or project work and the presentation of appropriate written and/or practical outcomes.

227

Veterinary Science**227106 Veterinary Biochemistry 15 credits**

An introductory biochemistry course covering the fundamental concepts of protein structure and function as well as metabolism of carbohydrates, lipids and amino acids. The focus will be on energy transactions in a physiological context including glucose homeostasis and muscle metabolism in mammals. A lecture and problem-based tutorial course will be complemented by case studies relevant to animal health and disease.

227107 Animal Behaviour and Welfare for Veterinary Science 15 credits

An introduction to common ethical frameworks for animal use with a focus on domestic animal species. Principles of the behaviour and welfare of domestic animal species. Theory of safe and effective animal handling.

227110 Farm Practical Training 0 credits

A practicum during which students will learn practical skills for working with livestock, farm safety and understanding farm-level agricultural economics. Modules on Health and Safety and handling of Agrichemicals useful for practical placements are also provided.

227120 Fundamentals of Veterinary Structure and Function 30 credits

An overview of the anatomy and physiology of domestic mammals, birds and reptiles. The structure and function of each major organ system is considered at a foundational level, with an emphasis on veterinary clinical relevance.

227130 Veterinary Work Integrated Learning 1 0 credits

This is the first in a series of three work-integrated learning courses in the BVSc. Students will undertake farm work in cattle, sheep, horse and/or other animal industries. Students will develop practical animal handling skills, and skills in observation, identification, analysis and communication.

227230 Veterinary Work Integrated Learning 2 0 credits

This is the second in a series of three courses in the BVSc for students undertaking work-integrated learning. Students will undertake farm work in cattle, sheep, horse and/or other animal industries. Students will develop practical animal handling skills, and skills in observation, identification, analysis and communication.

227231 Veterinary Science 2.1 60 credits

This course introduces the care and management of farmed animals and those kept for sport and companionship and the impact of these practices on animal welfare, public health and the environment. Introductory skills for gathering information as part of the clinical reasoning process (history-taking, performing distance and physical examinations) are taught. Professionalism is introduced including communication skills, the concept of the “good vet” and what constitutes a good vet, as well as the use of ethical decision-making frameworks to inform professional decision-making. The application of teamwork, communication, inclusivity and Te Tiriti o Waitangi to veterinary practice is introduced along with the development of introductory technical skills relevant to veterinary clinical practice.

227232 Veterinary Science 2.2 60 credits

This course builds on the content taught in 227.231 Veterinary Science 2.1 and introduces immunology and the foundations of infectious disease. Further skills for gathering information as part of the clinical reasoning process (history-taking, performing distance and physical examinations) are taught. Further aspects of professionalism are taught building on the use of ethical decision-making frameworks to inform professional practice. The application of teamwork, communication, inclusivity and Te Tiriti o Waitangi to veterinary practice is continued along with further development of introductory skills relevant to veterinary clinical practice.

227233 Special Topic in Veterinary Science 2 60 credits**227310 BVSc Farm Practical Work 0 credits**

In this course students will undertake farm work in cattle, sheep, horse and other livestock industries. Students will develop practical animal skills, and skills in observation, identification, analysis and communication.

227311 Farm Animal Population Health and Production 22 credits

The role of the veterinarian as a key agricultural advisor. Causes and investigation of sub-optimal health and production in farmed species, focusing on groups of animals rather than individuals. Relationships between farm management, husbandry, productivity, health and welfare. Treatment and prevention of sub-optimal health and production, including consideration of costs and benefits.

227312 Veterinary Infectious and Parasitic Diseases 19 credits

A further course in Veterinary Infectious Diseases that covers the bacterial, fungal, helminth, arthropod and protozoal pathogens of animals and their role in infectious disease and zoonosis. Epidemiology, pathogenesis, diagnosis, prevention, treatment and control of infectious diseases. Zoonoses and the role of the veterinarian in veterinary public health.

227313 Veterinary Anatomic and Clinical Pathology I 21 credits

General pathology. Anatomic and clinical pathology of body systems, including pathophysiology, gross and microscopic lesions. Interpretation of necropsy and laboratory test results (including haematology, serum biochemistry, urinalysis, serology, histology and cytology) for the diagnosis of disease. Specimen collection and handling, test selection, and performance of basic laboratory tests.

227314 Introductory Veterinary Clinical Studies II 16 credits

This course provides the basic principles and skills which are the foundation of clinical work. It covers the principles of pharmacology which provide the basis for therapeutics, the principles of anaesthesia and the skills required to use anaesthetic equipment, the principles of surgery and the basic skills required, the different methods for imaging animals, with emphasis on radiology and the practical aspects of taking and interpreting diagnostic radiographs.

227316 Companion Animal Medicine, Surgery and Therapeutics I 18 credits

This course covers aetiology, pathogenesis, diagnosis and treatment of common and important medical and surgical conditions of companion animals.

227317 Integrative Studies in Veterinary Science V 12 credits

This course is the fifth in a series of integrative and contextualizing studies that will extend through Years 1 to 4 of the BVSc programme. A case- and problem-based approach to the integration of concurrent and previous veterinary learning will be undertaken at a level appropriate to that of a third year veterinary student. This course will particularly focus on the interaction between therapeutic substances and disease states, alongside the development of professional behaviours. Students will be encouraged to develop a variety of problem solving strategies and professional competencies through the analysis of a broad range of clinical situations.

227325 Integrative Studies in Veterinary Science IV 12 credits

This course is the fourth in a series of integrative and contextualising studies in the BVSc. Students will identify problems related to veterinary science and investigate these through direct (e.g. field studies) or indirect (e.g. literature) research, at a level appropriate to a third year veterinary student. Students will develop problem solving strategies and professional competencies, including scientific writing.

227331 Veterinary Science 3.1 60 credits

In this sixty-credit, integrated course, students consolidate and build on foundational knowledge from years 1 and 2, expanding into the study of pathology, pharmacology and infectious diseases. Clinical topics are introduced, including principles of surgery and anaesthesia. Skills in physical examination and record-keeping continue to be developed, alongside other technical skills relevant to clinical practice. Students are expected to demonstrate safe practices in all settings. The clinical reasoning process is practised in the context of simulated clinical case scenarios, including refinement of problem lists, generation of differential diagnoses and the selection and interpretation of diagnostic tests. Concepts in population health are explored to practice identification of animal health and production goals, and the evaluation of potential interventions. Students are supported to differentiate the quality of information sources, and to identify and justify basic conclusions from scientific literature. Students continue to learn,

practice and apply communication skills relevant to veterinary clinical practice using language appropriate to the audience and context. Veterinary career options, basic financial concepts and legal obligations are introduced. The application of collaboration, Te Ao Māori, and concepts of diversity, equity and inclusion to veterinary practice and wider society is continued. There is further development of relevant professional skills for veterinary clinical practice.

227332 Veterinary Science 3.2 **60 credits**

In this sixty-credit, integrated course, students consolidate and build on foundational knowledge in the study of pathology, pharmacology and infectious diseases. Further clinical topics are introduced, including clinical nutrition and dentistry. Students continue to practise safe and effective animal handling techniques, and develop fluency in physical examination and technical skills. Students are expected to demonstrate safe practices in all settings. In the context of clinical scenarios, students practise the clinical reasoning process in multiple contexts, including the design and justification of basic diagnostic, treatment and management plans, as well as simple analgesic and anaesthetic protocols. Preventive health plans are developed, with consideration to animal welfare, public health, feasibility and economics. Students continue to demonstrate communication skills relevant to veterinary clinical practice using language appropriate to the audience and context. The use of ethical decision-making frameworks is expanded to include the perspectives of multiple stakeholders. The expanded application and interrelationship of collaboration, Te Ao Māori, and concepts of diversity, equity and inclusion to veterinary practice and wider society are explored. There is further development of relevant professional skills for veterinary clinical practice.

227333 Special Topic in Veterinary Science 3.1 **60 credits**

This semester one special topic course for BVSc3 students will be utilised for students progressing from the old BVSc curriculum to the new BVSc curriculum to ensure all appropriate content is covered.

227334 Special Topic in Veterinary Science 3.2 **60 credits**

This semester two special topic course for BVSc3 students will be utilised for students progressing from the old BVSc curriculum to the new BVSc curriculum to ensure all appropriate content is covered.

227410 BVSc Veterinary Practical Work **0 credits**

During this course, students will undertake practical work in external veterinary practices under the supervision of a registered veterinarian, to develop clinical skills and gain experience of client-based veterinary practice.

227411 Veterinary Anatomic and Clinical Pathology II **16 credits**

Further study of anatomic and clinical pathology of additional body systems which builds upon and extends information given in Veterinary Anatomic and Clinical Pathology I. Pathophysiology, gross and microscopic lesions. Interpretation of necropsy and laboratory test results (including haematology, serum biochemistry, urinalysis, serology, histology and cytology) for the diagnosis of disease. Specimen collection and handling, test selection, and performance of basic laboratory tests.

227413 Cattle Health, Production, Population Medicine and Therapeutics **12 credits**

This course covers the medicine, surgery, management and productivity of beef and dairy cattle. The aetiology, pathogenesis, diagnosis and treatment of disease, and the restoration of animals to normal levels of productivity.

227414 Companion Animal Medicine, Surgery and Therapeutics II **25 credits**

A further course covering the aetiology, pathogenesis, diagnosis and treatment of common and important medical and surgical conditions of companion animals. The application of surgical and anaesthetic principles in teaching laboratories is designed to develop competence in simple elective surgical and anaesthetic procedures.

227416 Integrative Studies in Farm Animal Production Medicine **12 credits**

Integration of veterinary medicine and whole farm systems. Farm management and production systems and the relationship between management systems, productivity and patterns of disease. The development of health and production programmes to minimise disease and maximise animal production.

227418 Integrative Studies in Veterinary Science VII **12 credits**

This capstone course is the final in a series of 7 courses in integrative and contextualizing studies that have extended through Years 1 to 4 of the BVSc programme. A case- and problem-based approach to the integration of concurrent and previous veterinary learning will be undertaken at a level appropriate to that of a pre-final year veterinary student. This course will particularly focus on the professional abilities of students, and their ability to synthesise heuristic 'illness scripts' and other intellectual shortcuts based upon the precepts of diagnostic reasoning. Students will be encouraged to develop a variety of problem solving strategies and professional competencies through the analysis of a broad range of clinical situations.

227425 Integrative Studies in Veterinary Science VI **12 credits**

This course is the sixth in a series of integrative and contextualising studies in the BVSc. A case- and problem-based approach to the integration of concurrent and previous veterinary learning will be undertaken at a level appropriate to a fourth year veterinary student. Students will develop problem solving strategies and professional competencies through the analysis of a range of clinical situations.

227431 Companion Animal Medicine, Surgery and Therapeutics III **10 credits**

This is the final of a series of three courses in BVSc3 and BVSc4 that cover aetiology, pathogenesis, diagnosis and treatment of common and important medical and surgical conditions of companion animals.

227432 Equine Clinical Studies **15 credits**

An overview of common equine diseases and preventative health programmes. This course covers aspects of equine medicine, surgery, lameness, reproduction and pharmacotherapeutics, with an emphasis on a diagnostic and therapeutic approach to the sick or abnormal horse.

227433 Medicine and Surgery of Birds, Reptiles and Amphibians **6 credits**

An introduction to the principles and applications of medicine and surgery of birds, reptiles and amphibians including wildlife, companion animals and backyard flock or collections.

227511 Veterinary Clinics and Public Health **120 credits**

Tuition, demonstration and clinical experience in surgery, anaesthesia, medicine, epidemiology and theriogenology of domestic animals; health and management of production animals; diagnostic procedures, including imaging, necropsies and laboratory tests; and diagnostic reasoning. Professional ethics and legislative obligations to the public and state; the role of veterinary professional organisations and veterinarians as communicators and educators, veterinary business management and the maintenance of physical and mental fitness as a veterinarian. Principles and practical applications of veterinary public health, meat hygiene and quality assurance programmes to meet national and international standards will also be taught. Opportunities for students to gain further experience in chosen areas of interest.

228

Engineering

228115 Introduction to Food Technology **15 credits**

An introduction to the fundamental technology and engineering skills required for professional engineers and technologists. Students will develop practical skills to design and solve engineering and technology problems carrying out simple design projects and creating new innovative solutions. Projects will include consideration of cultural, ethical and safety aspects and students will develop skills to effectively communicate design solutions.

Technology and Engineering

228210 Practicum I **0 credits**

Working in an industrial or commercial setting to gain real experience and apply knowledge, providing a foundation for a future career in industry. Continued development of the skills required to become a professional engineer and technologist.

Engineering

228211 Engineering Practice 3: Product Development 15 credits

The development of new and improved products is a key role of most practising engineers. This course provides the structured process and tools required for successful product development in the context of an applied project.

228212 Engineering Practice 4: Materials & Manufacturing 15 credits

The design and development of solutions to engineering problems with “concurrent engineering” capability is a core activity for engineers. A practical course with emphasis on integrating materials and manufacturing process selection into a structured design methodology based on the application of engineering and scientific principles.

228271 Engineering Mathematics 2 15 credits

This is a core course that provides key mathematical tools for modelling and analysing engineering problems. These tools represent a balance of stochastic and deterministic modelling approaches along with their mathematical underpinnings. Topics include random variables and distributions; analytical and numerical solution methods for linear systems of ordinary differential equations including Laplace transform techniques; sensitivity analysis, optimisation, curve-fitting and interpolation for data sets.

Technology and Engineering

228310 Practicum II 0 credits

Working in an industrial or commercial setting to gain real experience and apply knowledge, providing a foundation for a future career in industry. Continued development of the skills required to become a professional engineer and technologist.

Engineering

228311 Engineering Practice 5: Engineering Design with Constraints 30 credits

Technology must be effectively interfaced with society and the environment to succeed. Overarching social and environmental constraints are applied, including impact assessment and efficiency analysis tools. Project based learning is undertaken on the sustainable design of a consumer product underpinned by appropriate technical knowledge.

228312 Engineering Practice 5: Process Engineering with Constraints 30 credits

Technology must be effectively interfaced with society and the environment to succeed. Overarching social and environmental constraints are responded to using a systematic application of process engineering. Project based learning is undertaken on supply of utility inputs to and waste treatment outputs from an industrial process.

228371 Statistical Modelling for Engineers and Technologists 15 credits

This is a core course that provides essential grounding in statistical inference and modelling for engineers and technologists. Students will learn how to develop statistical models to describe random phenomena, and use them to test engineering questions of practical interest.

228711 Engineering Practice 6: Design Capstone Project 30 credits

This course marks the culmination of the BE(Hons) degree, that integrates the skills and knowledge acquired throughout the programme. It places specific emphasis on a commercial basis for complex engineering problem solving where success will be measured not only by the elegance of the engineering solution but also by the appropriateness of that solution within a defined commercial context.

228791 Special Topic 15 credits

228792 Special Topic 30 credits

228797 Research Methods in Engineering and Technology 15 credits

Research methods for students in engineering and technology. Topics include: statistical design of research experiments; hypothesis testing; use of statistical models to test engineering questions; data analysis; literature searches; development of research proposals; critical assessment of scientific literature.

228798 Individual Research Project 30 credits

A comprehensive study of a specific area of engineering or technology employing appropriate research practice to derive recommendations with respect to a pre-determined hypothesis.

228893 Research Report 45 credits

A research dissertation on an agreed topic.

228897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

228898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

228899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

228900 PhD Engineering 120 credits

230

Humanities Social Sciences

230001 Foundation Humanities 15 credits

An introduction to humanities disciplines and subject areas through study of the underlying philosophies, concepts and perspectives of the humanities.

230002 Foundation Social Sciences 15 credits

An introduction to the concepts, methods and scope of the Social Sciences through study of contemporary social issues in Aotearoa/ New Zealand and in global contexts.

230102 Pacific Peoples in New Zealand 15 credits

An introduction to the distinctive cultures of Pacific Peoples in New Zealand. Students will develop an understanding of core values, traditions, cultural protocols, social processes and world views that are characteristic of Pacific cultures in the New Zealand context.

230110 Tūrangawaewae: Identity & Belonging in Aotearoa NZ 15 credits

This course examines formations of identity and belonging in relation to concepts of place and turangawaewae (‘standing place’). The multiple factors shaping identity formation, citizenship and public engagement will be explored, and students will develop awareness of and reflect on diverse perspectives regarding identity and citizenship, and apply this understanding to analyse issues in contemporary New Zealand society.

230111 Tū Kupu: Writing and Inquiry 15 credits

This course introduces students to cultures of writing and inquiry in the Humanities and Social Sciences. It is designed to help students write effectively at undergraduate level by practising a variety of writing tasks, including analytical, persuasive, and research-based writing and argumentation. Students will learn practices of writing, research, peer-review and revision that have application in the university and broader contexts.

230112 Tū Arohā: Critical Thinking 15 credits

This course develops students’ foundational analytical and critical thinking skills. It is designed to provide students in any discipline with the ability to describe, evaluate, and generate reasoning / arguments effectively, appropriately, and sympathetically, alongside an understanding of the hidden complexities inherent in this approach and its limits when employed as a form of persuasion.

230191 Special Topic Humanities & Social Sciences 15 credits

A course of study, which may include a project or lectures and assignments; details of content to be specified for each student.

230210 Tū Rangaranga: Global Encounters 15 credits

The course explores our connections, impacts, and roles in the world, and our rights and responsibilities as global citizens. It examines what citizenship means in 21st century Aotearoa/NZ, given its history, cultural diversity, and place in the global arena. The course introduces the notion of global citizenship, and explores the relationship between individual and collective action in addressing global problems.

230291 Special Topic HSS	15 credits
230292 Special Topic HSS	15 credits
230310 Tū Tira Mai: Practising Engagement	15 credits
The questions of and possibilities for agency and action form the core of this course, through an enquiry-based exploration of the capacities of the humanities and social sciences for action, intervention and contribution in professional and community contexts. The course also covers the development and application of research skills, problem-solving skills, and ethical awareness in addressing practical issues.	
230391 Special Topic HSS	15 credits
230392 Special Topic Humanities & Social Sciences	15 credits
230701 Evaluation: Theory and Principles	30 credits
An advanced examination of the context, theories, and principles of evaluation research, and what it means to undertake evaluative activity in a range of social sector settings.	
230703 Techniques and Methods in Evaluation Research	30 credits
An in-depth examination of a range of qualitative, quantitative, mixed and innovative methods, skills and techniques as they would be applied to practical, 'real-life' evaluation questions.	
230791 Special Topic Humanities & Social Sciences	30 credits
230792 Special Topic Humanities & Social Sciences	30 credits
230793 Special Topic Humanities & Social Sciences	15 credits
230794 Special Topic Humanities & Social Sciences	15 credits

231

Public Health

231106 Introduction to Public Health	15 credits
An introduction to public health principles, perspectives, stakeholders and practices that are both internationally recognisable and of local importance to New Zealand.	
231107 Social Determinants of Health	15 credits
This course explores the social determinants of health, the complex range of social, cultural and economic interactions that influence individual and population health and help explain health disparities amongst populations.	
231200 Navigating Health Promotion	15 credits
Students will explore the broad range of ways in which health can be promoted. Focusing on the application of models and theories, the course will guide students in understanding health promotion strategies at the individual, community, and population levels.	
231307 Intervention Design	15 credits
A practical exploration of approaches and tools for designing interventions in public health and health promotion.	
231308 Health Promotion Advocacy	15 credits
An analysis of approaches to advocacy in health promotion with a particular focus on practical facilitation, engagement and reflection.	
231704 Hauora Māori	30 credits
This course provides an overview and analysis of hauora Māori perspectives. Historical and contemporary contexts and challenges are used to discuss Māori approaches in public health, with reference to Māori knowledge and Māori leadership. The course focuses on developing critical consciousness for becoming advocates and champions for Māori health through Te Tiriti o Waitangi-led practice.	
231705 Pacific Health	30 credits
This course provides an overview and analysis of Pacific health. Topics include: Pacific concepts of health; health effects of migration, urbanisation, demographic transition and economic development on Pacific people in Aotearoa and the Pacific; Pacific health promotion models and Pacific health	

policies. Pacific case studies will illustrate how providers can contribute effectively to Pacific development and improved Pacific health outcomes.

231707 Environmental Health	30 credits
Critical reviews or applied research on advanced topics in Environmental Health.	
231725 Foundations of Public Health	15 credits
This course presents the overarching framework, principles and core functions of public health in Aotearoa New Zealand. It utilises a multidisciplinary lens to investigate the key determinants of health status across population groups in Aotearoa New Zealand and globally. The course provides the necessary foundation for students to engage in advanced approaches essential for public health practice.	
231726 Health Systems and Policy	15 credits
This course uses systems thinking approaches to examine and compare the Aotearoa New Zealand health system within the international context, how it is structured and operates, and how this impacts on public health responses. Health policy and public health advocacy is examined as an instrument to enhance the health system and broader responses to major public health challenges.	
231727 Epidemiology and Biostatistics	30 credits
An exploration of the core principles and practice of epidemiology and biostatistics in assessing and responding to population health need. Students will learn the skills necessary to analyse and interpret data, disseminate information, and critically appraise quantitative literature. The focus of the course is on the application of epidemiology and biostatistics for policy development and decision-making across the health system.	
231728 Public Health Practice	15 credits
This course aims to provide students with the conceptual, analytical and strategic planning basis for effective public health practice. The course focuses on the theory and practice of designing, developing, implementing and evaluating practice. It draws upon analysis of determinants, stakeholders, Te Tiriti o Waitangi-led and community development approaches, and intervention research.	
231729 Qualitative and Participatory Research in Public Health	15 credits
This course provides a foundation in qualitative and participatory research methodologies, and the different approaches to knowledge that inform qualitative and participatory research. Students will develop competencies in qualitative and participatory research processes including design, data collection, analysis, dissemination, and critique of existing literature. The course foregrounds social, cultural, political and ethical considerations in the practice of public health research.	
231818 Public Health Praxis 1	30 credits
A capstone practicum in the public health environment involving supervised and team-based work on defined and contemporary public health issues.	
231819 Public Health Praxis 2	30 credits
An integrative capstone practicum in the public health environment involving supervised and team-based work on defined complex contemporary public health issues.	
231821 Public Health Thesis 90 Pt 1	45 credits
A supervised and guided independent Pt study designed to lead to a published work.	
231822 Public Health Thesis 90 Pt 2	45 credits
A supervised and guided independent study designed to lead to a published work.	
231900 PhD Public Health	120 credits

232

Ecology

232701 Conservation Biology	30 credits
A study of the multidisciplinary aspects of conservation biology under three key themes: importance of biodiversity, threats to biodiversity,	

and conservation actions. Theories, practices, and new developments in conservation biology will be explored including New Zealand case studies.

Zoology

232703 Wildlife Management **30 credits**

A problem-based course involving fieldwork, data analysis, and report writing. A range of research methods relevant to conservation managers will be explored using selected real-world problems. The problems will cover a diversity of techniques with a strong emphasis on gaining experience in conservation application and quantitative analytical methods.

Ecology

232871 Thesis 90 Credit Part 1 **45 credits**

A supervised and guided independent study resulting in a published work.

232872 Thesis 90 Credit Part 2 **45 credits**

A supervised and guided independent study resulting in a published work.

232873 Thesis 90 Credit Part 1 (30 credits) **30 credits**

A supervised and guided independent study resulting in a published work.

232874 Thesis 90 Credit Part 2 (60 credits) **60 credits**

A supervised and guided independent study resulting in a published work.

232875 Thesis **90 credits**

A supervised and guided independent study resulting in a published work.

232897 Thesis 120 Credit Part 1 **60 credits**

A supervised and guided independent study resulting in a published work.

232898 Thesis 120 Credit Part 2 **60 credits**

A supervised and guided independent study resulting in a published work.

232899 Thesis **120 credits**

A supervised and guided independent study resulting in a published work.

232900 PhD Conservation Biology **120 credits**

233

Earth Science

233105 Our Dynamic Earth **15 credits**

An introductory course exploring the dynamics of Earth and how it changes through time, from the core to the atmosphere, plate tectonics to volcanoes, glaciers to rivers, mountains to oceans, and mass extinctions to the evolution of life. Through exploration of these processes and their interrelationships with environments and society, including natural hazards, climate change, and earth resources, students will develop their practical, problem solving, and communication skills.

233209 Earth's Critical Resources **15 credits**

This course offers essential insights into how Earth's resources shape our environment, emphasising the critical importance of natural resources and environmental management. It delves into the composition of planet Earth, exploring the processes that govern its formation and the distribution of important minerals. This course explores the fundamental principles of the dynamic processes that drive the evolution of the surface of our planet, and the pivotal role of minerals in sustaining life on our planet.

233211 Earth Materials **15 credits**

This course explores the materials that make up planet Earth, and the processes integral to their genesis and distribution. The course covers the principles of stratigraphy and sedimentation, the processes and products of tectonics, and how mineralogy is key to understanding processes operating on Earth.

233212 Earth Surface Processes **15 credits**

This course explores surface processes across Earth's dynamic landscapes. Focusing on mountain, hillslope, river and coastal environments, the course investigates how and why these landscapes change over time. The course introduces methods for analysing and predicting landform change, and

provides a foundation for managing geomorphic issues impacting society and the environment.

233213 Earth Science Fieldwork **15 credits**

This course provides a hands-on experience of geoscientific fieldwork, from data collection through to analysis and interpretation of these data to explain geological and geomorphological processes. Analyses and interpretations will be applied to land, resource, and hazard management issues in New Zealand.

233214 GIS and Spatial Statistics **15 credits**

Introduction to handling and analysis of digital geospatial data. Operation of GIS software, including collection, processing and understanding of data, production of maps and geospatial projection systems. Integration of spatial statistical software with GIS. Introduction to appropriate spatial statistics techniques including kernel smoothing, kriging, point processes and spatially correlated areal data.

233215 Earth Surface Processes and Landforms **15 credits**

Erosion and sediment transport pose significant challenges for Aotearoa New Zealand's landscapes. This course delves into the processes driving changes in mountains, hillslopes, rivers, coastal, and marine environments as sediment is eroded, transported, and deposited. Moreover, we will explore the potential impacts of climate change on these processes and landforms. The course equips students with methods to analyse and forecast landform changes and sediment transport, laying the groundwork for effectively managing geomorphic issues that impact society and the environment.

233303 Natural Hazards and Climate Change **15 credits**

This course will delve into an in-depth analysis of the generation and occurrence of natural hazards, their impacts, and effective risk management strategies. This course also includes the consideration of how climate change is modifying natural events. Students will explore and analyse natural hazards and climate change that impact our environment and future global risk reduction and sustainability initiatives with a focus on creating solutions that mitigate the impact of hazards on society.

233309 Earth's Changing Climate **15 credits**

This course will focus on analysing recent climate reconstructions to gain insights into our current environment and to predict future changes. Understanding these trends is crucial for effective climate adaptation in environmental management. The course will delve into the investigation and reconstruction of past environments across diverse geological time frames and settings.

233311 Earth Environments Through Time **15 credits**

Principles and techniques for investigating and reconstructing past environments in a range of geological time frames and settings, with emphasis on the value of such reconstructions to understand our current environment and predict what may happen in the future.

233312 Natural Hazards **15 credits**

An exploration and analysis of the nature, causes, impacts, and management of natural hazards, covering earthquakes, volcanic eruptions, landslides, weather, floods and coastal hazards. How climate change and human activity influence the hazards facing society.

233313 Earth Systems **15 credits**

Quantification, forecasting, visualisation and communication of geoscience system dynamics to solve a range of environmental problems. Problems explored range from environmental pollution and instability of geoenvironmental structures to problems posed by gravity currents, landslides, tsunamis, floods and coastline changes. Students will learn to solve these geoscience problems quantitatively using modern computational, experimental, and analytical techniques.

233314 Remote Sensing and Earth Observation **15 credits**

Principles and applications of Earth observation, remote sensing and spectroscopy in earth and environmental sciences. Spatial mapping and image classification of imagery from a variety of Earth observation and airborne sensors and other observations that contribute to monitoring terrestrial environments. Students will learn how to access, interpret and utilise such satellite and airborne imagery.

233712 Environmental Geographic Information Systems **15 credits**

The application of geospatial analytical techniques within the environmental sciences is required as a key decision support tool in land management. This course will explore the way cartographic modelling, data fusion, database

query, geostatistical analysis and image integration are applied to solve common environmental and resource management issues drawing on a range of software currently used in industry.

233713 Environmental Remote Sensing 15 credits

Remote sensing is the process of detecting and monitoring the Earth by measuring its reflected and emitted radiation, usually from satellites or aircraft. The course will focus on the use of digital analysis of remotely sensed imagery and data. The integration of Geographic Information Systems (GIS) and digital elevation models (DEMs) with remotely sensed data will be used to highlight practical solutions in land management.

233714 Advanced Geoscience Techniques 15 credits

Studies utilising modern Geoscience techniques require the collection and analysis of complex data and datasets. In this advanced course experience will be gained in modelling and solving complex geoscience processes through advanced geological mapping and the collection of samples and data that will be analysed using specialised equipment and methods.

233715 Environmental and Geological Hazards 15 credits

One of the biggest issues facing the developed and developing world is exposure to environmental and natural hazards. Practical solutions to recognising, managing and mitigating environmental/natural hazard, risk and disasters will be explored in this course. Advanced quantification of natural hazards and how this informs modern day risk assessment, mitigation and management will be explored.

233871 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

233872 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

233873 Thesis 90 Credit Part 1 (30 credits) 30 credits

A supervised and guided independent study resulting in a published work.

233874 Thesis 90 Credit Part 2 (60 credits) 60 credits

A supervised and guided independent study resulting in a published work.

233875 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

233897 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

233898 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

233899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

233900 PhD Earth Science 120 credits

234

Sport and Exercise Science

234111 Training Principles and Practice 15 credits

An introduction to the knowledge and skills necessary for the planning, implementation and evaluation of goal-oriented training.

234121 Functional Anatomy 15 credits

An introduction to the structure and function of the musculoskeletal, neuromuscular and cardiopulmonary systems and their importance to health, movement and exercise.

234131 Introduction to Sport Organisations and Development 15 credits

An introduction to the provision of sport, fitness, and physical activity, including the roles of, and relationships between, key organisations and agencies

234135 Sociology of Sport and Exercise 15 credits

An introduction to sociological concepts, principles and theories as applied to sport and exercise.

Physical Education and Health

234140 Introduction to Physical Education 15 credits

An introduction to health and physical education through the exploration of a range of teaching models, management techniques, contemporary issues, and diversity with consideration to the Treaty of Waitangi relevant to undergraduate students.

234141 Introduction to Human Movement and Hauora 15 credits

An introduction to human movement (Te Ao Kori) and its application to the concept of Hauora (holistic health and well-being).

Health Sciences

234213 Fitness Assessment 15 credits

A practical application of fitness assessment methods for healthy individuals.

Sport and Exercise Science

234214 Exercise Prescription 15 credits

A study of prescribing exercise and physical activity for the general population.

234215 Fitness and Athletic Conditioning 15 credits

This course provides an understanding of various exercise techniques and methods to developing fitness and conditioning programmes for the athletic population.

234216 Sport and Community Development 15 credits

This course explores the different meanings and objectives of sport development and the variety of contexts and settings in which it takes place. Particular focus is placed on the role of sport in the community, including sport/health initiatives, policy implications, the use of sport for social, economic, and urban development, and the key skills required for grant-writing and funding applications.

234222 Sport Biomechanics 15 credits

An introduction to the study of the kinematics and dynamics of the human body and the factors that influence skilful and efficient performance of bodily movements in sport and everyday life. Students will be introduced to the techniques and methods required for qualitative analysis of complex skills.

234223 Exercise Physiology 15 credits

A study of the function of human biological systems as they relate to sport and exercise. Acute responses and the chronic adaptations to sport and exercise, specifically in relation to the core topics of human energetics, muscular, cardiovascular and respiratory systems. A strong laboratory focus will reinforce the theory and develop laboratory skills relevant to exercise physiology.

234236 Applied Sport Coaching 15 credits

This course examines aspects of contemporary sport coaching through concepts of long-term athletic development and youth sport.

234242 Motor Learning and Control 15 credits

Students will study the principles and theories of motor control and their practical applications.

234243 Sport Pedagogy 15 credits

A critical examination that extends students' knowledge of the skills and methodologies relating to the learning and instruction of a range of physical activities and sports within educational contexts.

234312 Advanced Exercise Prescription and Therapy 15 credits

This course gives an in-depth knowledge of the role of exercise in rehabilitation. Students will be able to develop and implement exercise programmes to assist with recovery from musculo-skeletal injury and various disease states, and to influence indicators of psychological health.

234327 Investigating Sports Performance 15 credits

An introduction to research methods in sport and exercise including the research process, formulating a research question, data collection, analysis, and dissemination. Students will develop and undertake a project related to their area of interest within sports performance.

234331 Sport and Physical Activity in the Social Context 15 credits

An examination of the social, cultural, political, economic and educational contexts of sport and physical activity.

234338 Sport and Exercise Practicum 30 credits

The practicum is designed to provide practical experience in sport and exercise areas according to individual interests and experience. Students may choose to undertake a practicum in areas including, but not limited to, sport event management, sport coaching, sport coordination, sport performance, exercise prescription and athlete conditioning.

234343 Sport Pedagogy II 15 credits

This course examines the principles and practices associated with effective sport pedagogy especially as it is applied to the delivery of game instruction in school and sport contexts.

Physical Education and Health**234346 Te Ao Kori and Health Promotion 15 credits**

Explores the development of physical activity and health promotion initiatives in school, workplace and community settings, and the practices of Te Ao Kori (The World of Movement).

Management**234360 Sport Psychology 15 credits**

This course examines theory, research and practice in aspects of sport psychology.

Sport and Exercise Science**234361 Exercise Psychology 15 credits**

An examination of the association between psychological factors and participation in exercise and physical activity, and, in turn, how such participation affects personal functioning, health and well-being.

234728 Research in Sport, Exercise and Health 30 credits

This course will provide students with skills and knowledge for conducting and disseminating research in sport, exercise and health.

234731 Advanced Sport in the Social Context 30 credits

An advanced examination of the meaning and role(s) of sport and leisure in contemporary society with particular reference to selected topical issues and the implications that these have on the organisation and management of sport.

Management**234732 Advanced Sport Management 30 credits**

An examination of contemporary sport and recreation management practice in New Zealand and overseas.

Sport and Exercise Science**234832 Professional Practice in Sport Management 60 credits**

A comprehensive examination of the professional issues that impact on the practice of sport management. Professional leadership and interrelationships may be analysed using a case-study based approach. The focus is on the development of the knowledge and skills required by the sport management professional in practice.

234860 Professional Project 60 credits

Professional practice within the subject area that may be conducted individually or in groups and assessment of the outcome of the investigation may be in a variety of ways including written and oral presentations and case studies.

234870 Research Report 60 credits**234900 PhD Sport & Exercise Science 120 credits****235****Māori Resource and Environmental Management****235211 Māori Agribusiness Systems 15 credits**

An introduction to Māori agribusiness systems including the values, science and business processes aligned to these. Particular emphasis will be placed on the concepts of land and resource utility, kaitiakitanga and the relationship of these kaupapa Māori based systems to the present day. These systems will be discussed in context with Te Tiriti o Waitangi and present day legislation.

235311 Māori Policy and Agribusiness 15 credits

This course examines the key issues and practice of Māori agribusiness policy. The roles and responsibilities of policy agencies in relation to Māori policy, research and development, implementation and monitoring relative to agribusiness are considered. Alternative policy approaches to achieving Māori driven outcomes are examined and presented. These processes will be discussed in context with Te Tiriti o Waitangi and natural resource management.

235312 Case Studies in Māori Agribusiness 15 credits

This course explores Māori agribusiness through a series of case studies in the field with an emphasis on the temporal understanding of Māori agribusiness. Each case study has an emphasis on analysis and decision making and is applied to a range of Māori agribusinesses.

235701 Māori Values and Resource Management 15 credits

In this applied course students will learn about Māori concepts and values associated with the management of natural resources. Students will gain an appreciation of the importance of indigenous values, and in particular Māori values and management approaches to sustainable resource management. Case studies will be undertaken to develop skills in the management of natural resources.

235702 Māori Resource and Environmental Management - Whenua 15 credits

This course offers the opportunity for postgraduate students to learn and apply Māori concepts, values and science processes to the management of whenua or land and whenua sustainability. These values will be discussed in context with Te Tiriti o Waitangi and present day legislation. Case studies will be undertaken to develop skills in the management of Māori whenua or land resources.

235703 Māori Resource and Environmental Management - Fresh Water 15 credits

A course that offers the opportunity for postgraduate students to learn about the Māori concepts, values and science processes associated with the management of fresh water. Particular emphasis is placed on the importance of Māori values as they apply to sustainable fresh water management. These values will be discussed in context with Te Tiriti o Waitangi and present day legislation. Case studies will be undertaken to develop skills in the management of Māori fresh water resources.

235704 Māori Resource and Environmental Management - Flora and Fauna 15 credits

This course offers the opportunity for postgraduate students to learn about the Māori concepts, values and science processes associated with the management of native flora and fauna. Particular emphasis is placed on the importance of Māori values and practices as they apply to sustainable management of native flora and fauna resources. These values will be discussed in context with Te Tiriti o Waitangi and present day legislation. Case studies will be undertaken to develop skills in the Māori component of management of native flora and fauna.

235705 Māori Resource and Environmental Management - Foreshore and Oceans 15 credits

A course that offers the opportunity for postgraduate students to learn about the Māori concepts, values and science processes associated with the management of the foreshore and ocean resources. Particular emphasis is placed on the importance of Māori values and practices as they apply to sustainable management of foreshore and ocean resources. These values will be discussed in context with Te Tiriti o Waitangi and present day legislation. Case studies will be undertaken to develop skills in the Māori component of management of foreshore and ocean resources.

235706 Maara kai - Traditional and Contemporary Māori Food Production 15 credits

A course that offers the opportunity for postgraduate students to learn about traditional and contemporary Māori food production including the values and science processes aligned to this activity. Particular emphasis will be placed on the concepts of land and crop management systems, kaitiakitanga and the relationship of these kaupapa Māori based systems to the present day. These systems will be discussed in context with Te Tiriti o Waitangi and present day legislation.

235707 Māori Natural Resource Policy 30 credits

This course examines the key issues and practice of Māori resources policy. The roles and responsibilities of policy agencies in relation to Māori resources policy research, development, implementation and monitoring are considered. Alternative policy approaches to achieving Māori and natural resource management outcomes are examined through selected case studies. These processes will be discussed in context with Te Tiriti o Waitangi.

236

Nanoscience**236900 PhD Nanoscience 120 credits**

237

Visual and Material Culture**237117 Māori Art and Design Studio I - Toi Atea 15 credits**

An introduction to the development of personal forms of expression through an engagement with the values, concepts, traditions, art/design forms and structures of the whare whakairo.

237131 Art, Culture and Contexts 15 credits

An introduction to critical thinking through key contemporary topics and debates related to the production and reception of art. Students will have the opportunity to investigate a range of contemporary art practices and texts, in order to recognise and gain insights of their own values and processes as creative practitioners. Examples will be drawn from both Aotearoa and international contexts.

237217 Māori Art and Design Studio IIA - Toi Atea 15 credits

The development of individual work that grows out of the investigation of a select range of Māori concepts, art forms, imagery, values and approaches that reflect a Māori world view.

237218 Māori Art and Design Studio IIB - Toi Atea 15 credits

Further development of individual work that grows out of the investigation of a select range of Māori concepts, art forms, imagery, values and approaches that reflect a Māori world view.

237231 Critical Perspectives on Contemporary Art 15 credits

An exploration of diverse perspectives to develop critical responses relevant to contemporary art in Aotearoa. Students will examine cultural, theoretical, political, social, and ethical issues that are contributing to the shaping of contemporary art. The understandings gained will contextualise the student's own practice in relation to local and global shifts in cultural production that have taken place over the past two decades.

237317 Māori Art and Design Studio IIIA - Toi Atea 15 credits

Developing visual responses to the exploration of issues (social, political, environmental, global) significant to Māori people and their communities.

237318 Māori Art and Design Studio IIIB - Toi Atea 15 credits

Further development of a range of visual responses to issues (social, political, environmental, global) of significance to Māori people and their communities.

237331 Critical Understandings of Contemporary Art 15 credits

This course examines and appraises ideas that contribute to a critical understanding of contemporary art. Students will evaluate a range of content in relation to their own creative practice as well as the wider contemporary art world. The relation between artists and their processes and approaches will be

explored through topics such as race, gender, intersectionality, decolonisation, popular culture, politics, social justice, and others.

237417 Māori Art and Design Studio IV - Toi Atea 30 credits

An advanced course to focus and refine visual language and personal tikanga through negotiated projects that explore topics of direct reference to Māori people and their communities.

237465 Creative Exposition 15 credits

In this course students will situate their creative practice through writing. They will extend and hone their critical, analytical and reflective skills through written exposition that focuses on projecting themselves and their practice externally. This advanced programme of study will encourage discussion on diverse approaches to creative research exposition and its relevance for a range of academic and/or professional contexts.

237900 PhD Visual & Material Culture 120 credits

238

Agriscience**238700 Life Cycle Assessment (LCA) and Footprinting Principles 15 credits**

The concept of life cycle thinking and its application to support decision-making for product systems. The course will provide an overview of the principles and methodology for Life Cycle Assessment (LCA) according to the ISO 14040 and 14044 standards, and introduce related environmental footprinting approaches (carbon and water footprinting).

239

Agricommerce**239373 AgriCommerce Capstone 15 credits**

An integrative course designed to capture the breadth of knowledge gained in the degree and utilise the value of teams in addressing international food and agribusiness challenges to New Zealand industries. Emphasis will be placed on the application of knowledge to understand and analyse international environments and identify sustainable, competitive export strategies for an agribusiness firm.

239391 Special Topic 15 credits**239885 Thesis 90 Credit Part 1 45 credits**

A supervised and guided independent study resulting in a published work.

239886 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

239888 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

239889 Thesis 90 Credit Part 1 (30 credits) 30 credits

A supervised and guided independent study resulting in a published work.

239890 Thesis 90 Credit Part 2 (60 credits) 60 credits

A supervised and guided independent study resulting in a published work.

240

Logistics and Supply Chain Management**240260 Logistics and Supply Chain Fundamentals 15 credits**

A study of logistics and supply chain management fundamental concepts. The supply chain management paradigm that underpins modern business is fully explored with a specific focus on customer service, forecasting, process integration, relationship management, and performance measurement.

240262 Transportation Systems 15 credits

This course studies transportation systems with an emphasis on international intermodal transportation. The economic and operating characteristics of differing transportation systems will be examined, along with costs and regulations of transportation services and the role of information technology on transportation systems.

240263 Logistics Operations 15 credits

A study of the role and structure of integrated logistics systems, including performance measurement and the application of information technology. Fundamental operational trade-offs are explored in relation to inventory, warehousing and capacity utilisation.

240362 Supply Chain Trends and Applications 15 credits

A study of the impact of current industry trends on how businesses can engineer and operate their logistics and supply chains to create greater value for the organisation.

240363 Supply Chain Integration 30 credits

A study of the functioning of modern supply chains, their design, coordination, management and the crucial role of collaboration. Focus will be placed on inter-organisational integration and internal process alignment.

240364 Purchasing and Supply Management 15 credits

A study of the scope of purchasing and procurement and the principles, structures and key variables of supply management.

240365 Demand Chain Management 15 credits

A study of distribution management concepts and strategy together with an exploration of demand chains. Methods to align supply chain strategies with market drivers are examined. A range of distribution channel approaches are also discussed in regard to alternative customer demands.

240366 Global Logistics 15 credits

A study of international logistics and its role in modern supply chains. Focus will be placed on international trade routes and global partnerships. Both the strategic effects of international free-trade agreements and operational level import/export processes will be explored in relation to international logistical flows.

240753 Supply Chain Analytics 15 credits

Determining information required for management of the supply chain. Includes a systems dynamics view of production management, process improvement methodologies, supply chain measurements and analysis.

240755 Executive Supply Chain Management 30 credits

The operational disciplines of the successful organisation are responsible for developing and managing its response to market opportunities and supply chain management is the key to a successful response. This course looks at the role supply chain management has in supporting organisations to create value within supply nets, webs and chains through the relationships created downstream with customers and upstream with suppliers.

240756 Value Chain Management 15 credits

Value chains are explored through a supply chain operations management lens. Value chain networks are examined in the context of supply chain collaboration and coordination. The purpose is to provide students with the core principles of value creation and management, and to introduce them to supply chain analytical approaches to facilitate business decision making.

240758 Research Methods and Skills 30 credits

The scientific method will be explored through discussion of alternative research methodologies and the capabilities required to conduct academic research. The course has two interrelated goals; to develop postgraduate study skills and to prepare to undertake a quality or supply chain management research project. Students will develop the skills to synthesise literature, design research processes and structure a research report. During the course students will decide to focus on either a practical application or a more theoretical research project.

240759 Integrated Logistics 15 credits

Logistics is a foundation block within any successful business. Unless an organisation can manage and coordinate in an integrated manner the movement of materials, information and cash through its business, and those of partner organisations, it is unlikely to outperform its competitors.

240887 Research Report 60 credits

An empirical supply chain management research investigation. During this course students will develop intellectual independence by conducting supply chain research. Supervision will be provided to guide students, however, the responsibility for framing and conducting the investigation will be the student's alone. Students will develop the skills to articulate, analyse and evaluate their research findings.

240899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

240900 PhD Logistics and Supply Chain Management 120 credits**241****Chinese****241101 Chinese 1A 15 credits**

The course provides the students with a basic proficiency in Putonghua (Mandarin Chinese). Upon successful completion of this course, students will have acquired the phonetics, knowledge of a set of characters, and the vocabulary and basic sentence constructions.

241102 Chinese 1B 15 credits

The course builds on the proficiency in Putonghua (Mandarin) that is developed in 241.101 Chinese 1A. Upon successful completion of this course, students will have acquired the phonetics, a further set of characters and vocabulary, and more complex sentence constructions.

241103 Ancient Chinese World pre-republic (1912) 15 credits

A course of Chinese history, philosophy, literature and arts before 1912.

241107 China under Transformation: Economy, Society and Diplomacy 15 credits

An introduction to the multifaceted nature of China's recent transformation from economic, societal, political and diplomatic perspectives.

241201 Chinese 2A 15 credits

Provides students with intermediate level of proficiency in Putonghua (Mandarin), building on skills in reading, writing, listening and speaking. Intermediate level structures, vocabulary and characters are reinforced through oral and written exercises. Students acquire the tools appropriate to this level to discuss topics relevant to themselves and to Chinese culture and society.

241202 Chinese 2B 15 credits

Aims to further develop intermediate level proficiency in Putonghua (Mandarin), building on skills in reading, writing, listening and speaking. Entails a further set of intermediate level structures, vocabulary and characters that are reinforced through oral and written exercises. Students discuss topics appropriate to this level and that are relevant to themselves and to Chinese culture and society.

241207 Chinese Diaspora 15 credits

This course will examine the emergence and transformation of Chinese international migration in the global context of China's interactions with the outside world and diaspora's changing patterns of political, social and cultural adaptations in various regions in the world.

241208 Contemporary Chinese Society in Literature and Film 15 credits

An integrated account of social and historical developments of contemporary China (from 1912 to the early 1990s) through a study of selected literary texts and films. No knowledge of Chinese is required.

241301 Chinese 3A 15 credits

Provides students with pre-advanced level proficiency in Putonghua (Mandarin), building on skills in reading, writing, listening and speaking. Pre-advanced level structures, vocabulary and characters extend and refine linguistic capabilities through oral and written exercises, and students will acquire comprehension and communication skills to deal confidently and accurately with various situations.

241302 Chinese 3B 15 credits

Provides students with advanced level proficiency in Putonghua (Mandarin), building on skills in reading, writing, listening and speaking. Advanced level structures, vocabulary and characters extend and refine linguistic capabilities through oral and written exercises, and students will acquire greater comprehension and communication skills to deal confidently and accurately with various situations.

241304 Contrastive Study of Chinese and English 15 credits

A systematic study of Chinese grammar based on contrastive analysis as an approach to develop communicative skills through increased language awareness. Topics include basic concepts, sentence structure, special verbal constructions, tense and aspect, and complements.

241305 Translation from and into Chinese 15 credits

An advanced introduction to the theory and practice of translation from and into Chinese, with an emphasis on the development and application of written translation skills.

241395 Individual Research Project in Chinese Studies 15 credits

An advanced-level research project on an approved topic about Chinese language, literature, history, politics or other cultural aspect.

241900 PhD Chinese Studies 120 credits**242****Japanese****242101 Japanese 1A 15 credits**

This course provides students with introductory level proficiency in Japanese listening, speaking, reading and writing skills. Students learn romanised script, the two phonetic scripts (hiragana and katakana) and approximately 60 Japanese characters (kanji), as well as basic sentence structures and vocabulary useful for everyday life in Japan.

242102 Japanese 1B 15 credits

This course builds on the introductory level proficiency in Japanese established in 242.101 Japanese 1A developing further basic competence in Japanese listening, speaking, reading and writing skills. An additional 87 kanji are learnt. An increased range of sentence structures and vocabulary useful for everyday situations and interactions in Japan are introduced.

242103 Introduction to Japanese Culture 15 credits

An overview of the cultural development of Japan from early times to the present.

242201 Japanese 2A 15 credits

This course provides students with a pre-intermediate level of reading, writing, listening and speaking proficiency in Japanese building on skills established in prior study. Student will use a range of written and oral exercises to practise new grammatical structures, vocabulary and approximately 80 new kanji, and will acquire the tools to discuss topics of relevance to themselves and Japanese culture and society at an appropriate level.

242202 Japanese 2B 15 credits

This course further develops students' reading, writing, listening and speaking proficiency in Japanese at pre-intermediate level, extending skills gained in 242.201 Japanese 2A. Student will continue to use a range of written and oral exercises to practise new grammatical structures, vocabulary and approximately 100 new kanji, and will improve their ability to discuss topics of relevance to themselves and Japanese culture and society at an appropriate level. The use of respect language (keigo) will also be introduced.

242205 Japanese Cinema 15 credits

This course will introduce Japanese cinema in English translation as an art form that strongly reflects its culture. Traditional samurai films, contemporary social problem films and animations are used to explore how films address issues of modernity and national identity. No previous knowledge of Japanese language, history, or culture is required.

242301 Japanese 3A 15 credits

This course provides students with a pre-advanced level of reading, writing, listening and speaking proficiency in Japanese building on skills established

in prior study. Students will continue to extend and refine their ability in Japanese through using a range of exercises practising more advanced vocabulary and idioms, grammatical structures, respect language (keigo) and approximately 244 new kanji. Students will be expected to develop comprehension and communication skills to deal confidently and accurately with various situations.

242302 Japanese 3B 15 credits

This course further extends students' Japanese proficiency in reading, writing, listening and speaking to advanced level, building on skills established in 242.301 Japanese 3A. Students will continue to further extend and refine their ability in Japanese through practising an increased range of vocabulary and idioms, grammatical structures, respect language (keigo) and approximately 208 new kanji. Students will be expected to develop their comprehension and communication skills for confident and accurate use in more varied situations.

242304 Reading and Writing about Current Japan 15 credits

Selected issues of contemporary Japanese society will be studied through the medium of texts in the Japanese language. Further development of Japanese skills in reading and writing.

242305 Readings in Modern Japanese Literature 15 credits

A study of selected extracts in the original Japanese from the work of major modern writers.

243**French****243101 Introductory French Language I 15 credits**

A communicative approach to developing skills in spoken and written French, including vocabulary acquisition, grammatical competency, reading and listening comprehension, and oral practice.

243102 Introductory French Language II 15 credits

For students with beginners level of French. Extending skills in spoken and written French, including vocabulary acquisition, grammatical competency, reading and listening comprehension, and oral practice.

243201 Intermediate French Language I 15 credits

An intermediate-level review of written and spoken French, further developing skills in vocabulary, grammar, composition, comprehension, and oral communication.

243202 Intermediate French Language II 15 credits

For students with intermediate level of French. An Autonomous level review of written and spoken French, further developing skills in vocabulary, grammar, composition, comprehension, and oral communication.

243301 Advanced French Language 15 credits

For students with an autonomous level of oral and written French. An advanced-level course in French to further develop written and oral comprehension, expression and analysis, based on contemporary texts and recordings.

243304 Contemporary French Popular Culture 15 credits

For students with Advanced level of French. Practical study of contemporary examples of French popular language and culture in a range of fields. An Advanced level review of written and spoken French, further developing skills in vocabulary, grammar, composition, comprehension and oral communication.

245**Spanish****245101 Introductory Spanish Language I 15 credits**

An introduction to basic communication skills in spoken and written Spanish. Aspects of contemporary Hispanic culture and society are also studied.

245102 Introductory Spanish Language II 15 credits

An extension of basic communication skills in spoken and written Spanish. Aspects of contemporary Hispanic culture and society are also studied.

245103 Hispanic Culture and Heritage 15 credits

An introduction to significant aspects of modern Hispanic history, literature, art and culture in Spain and the Spanish-speaking world. No prior knowledge of Spanish is required.

245201 Intermediate Spanish Language I 15 credits

Intermediate level written and oral comprehension and communication skills in Spanish, providing a broad linguistic base for the study of Spanish and Latin American culture, literature and civilisation.

245202 Intermediate Spanish Language II 15 credits

An extension of intermediate skills in reading, free composition, listening comprehension and oral communication to illustrate aspects of contemporary Spanish and Latin American culture and society.

245203 The Sound of Spanish: Diction, Dialects and Diversity 15 credits

An introduction to socio-linguistic aspects of the use of Spanish around the world, including dialectal variations and bilingualism, through a study of basic Spanish phonetics and phonology.

245204 Latin American Voices 15 credits

An introduction to 20th century Latin American literature and its historical and political contexts through short literary works in Spanish.

245301 Advanced Spanish Language 15 credits

Advanced level skills in reading, free composition, listening comprehension and oral communication in Spanish, illustrating aspects of contemporary Spanish and Latin American culture and society.

245302 Theory and Practice of Spanish Translation 15 credits

An advanced introduction to the theory and practice of translation from and into Spanish and the role and responsibility of the translator.

245303 Latin American Rhythms and Politics: From Tango to Rock 15 credits

Study of representative twentieth century Latin American music styles and their links to key social and political events that have shaped Latin American history. This course will be taught in Spanish.

245304 Travellers' Tales: the Invention of Latin America 15 credits

An exploration of how Latin American people, landscapes and cultures have been defined through the writings of European, North American, Australasian and Latin American travellers. This course will be taught in Spanish.

245305 Spanish Conversation on Film 15 credits

An advanced study of contemporary Latin American cinema within the context of current socio-political debates.

245799 Research Report Spanish (60) 60 credits**246****Natural Sciences****246100 Climate Science Consciousness 15 credits**

An introduction to the scientific history and evidence for climate change. Evidence of anthropogenic influence on the climate will be explored by examining data gathered across all fields of science and across a range of environments including terrestrial, marine, and atmospheric. Students will develop strategies to understand, interpret and communicate scientific information in the context of climate change.

246700 Advanced Research Themes In Natural Sciences 30 credits

Students will critically examine and evaluate a selection of scientific concepts and theories, within the Natural Sciences, which integrate aspects of Systems, of Scale and of Constancy & Change from across the Natural Sciences.

247**College of Sciences Courses****247004 Foundation Biological Sciences 15 credits**

An introduction to cells as the unit of life, evolution as biology's unifying theme, DNA and molecular genetics; the diversity of life, and organisms and their environment.

247005 Foundation Mathematics A 15 credits

An introductory course designed to increase understanding and application of basic mathematics and statistics concepts and skills.

247006 Foundation Mathematics B 15 credits

An introductory course designed to increase understanding and application of fundamental concepts and skills in mathematics, statistics and geometry. Students are prepared for 100-level courses that require algebraic fluency.

247007 Foundation Chemistry 15 credits

An introduction to the structure of atoms and matter, chemical bonding, simple chemical reactions, calculations involving the mole, acids and bases, reaction rates and equilibrium. Students will learn to name/draw simple organic compounds and conduct basic lab experiments.

247008 Foundation Physics 15 credits

An introduction to physics concepts including motion, forces, energy, electricity, fluids and waves. Students learn to make observations, take measurements and apply problem-solving techniques to answer problems and relate theory to observation.

247009 Foundation Analytical Thinking and Numeracy 15 credits

An introduction to essential skills and knowledge in analytical thinking, numeracy, and algebra to effectively interpret, analyse, and solve problems across various academic disciplines and real-world contexts.

247010 Foundation Applied Sciences 15 credits

An introduction to the core principles and methodologies in mathematics, chemistry, and physics, equipping students with the necessary knowledge, skills, and interdisciplinary perspectives to succeed in their future undergraduate studies.

247011 Foundation Natural Sciences 15 credits

An introduction to areas within natural sciences by providing a foundational understanding of the interactions between biology, chemistry, and the environment, and fostering the development of essential skills for understanding current issues including climate change, invasive species, sustainable practices and protecting native environments.

Business**247020 Biology Fundamentals 15 credits**

Biology Fundamentals is an introductory course which will equip you with the knowledge of basic biology concepts. The course covers the foundational themes of life processes, ecology, and evolution in preparation for entry into further studies.

College of Sciences Courses**247021 Chemistry Fundamentals 15 credits**

Chemistry Fundamentals is an introductory course which will equip you with the knowledge of basic chemistry concepts in preparation for entry into further studies. The course covers the foundational themes of the structure, properties and changes of matter, and how chemistry is used in society.

247022 Mathematics Fundamentals 15 credits

Mathematics Fundamentals is a foundational course which will develop the core mathematical skills necessary for many of the 100-level science courses that require fundamental algebraic fluency and statistical literacy. Your studies will combine fundamental mathematical and statistical methods designed to provide highly sought-after skills in mathematical reasoning, problem solving and numeracy.

247023 Physics Fundamentals 15 credits

Physics Fundamentals is an introductory course which will equip you with the knowledge of basic physics concepts. The course covers the foundational

themes of motion, forces, energy, electricity, fluids and waves in preparation for entry into further studies.

Mathematics

247024 General Mathematics 15 credits

This course equips students with knowledge of mathematical concepts and tools to foster their problem-solving skills. This unit covers the foundational themes of algebra, consumer and financial arithmetic and statistics to give students a preparation for entry into further studies, particularly in business disciplines.

College of Sciences Courses

247111 Science and Sustainability for Agriculture and Horticulture 15 credits

The pursuit of environmental sustainability is a complex societal issue. This is a problem-based course, where students will develop their critical thinking, communication and information literacy and management skills as they evaluate interdisciplinary approaches to the contemporary sustainability challenge of climate action. Students will explore the intersection of science and community through exemplars of partnership between research and Te Ao Māori (the Māori world) in the context of primary production in Aotearoa New Zealand.

247112 Science and Sustainability for ICT 15 credits

The pursuit of environmental sustainability is a complex societal issue. This is a problem-based course, where students will develop their critical thinking, communication and information literacy and management skills as they evaluate interdisciplinary approaches to the contemporary sustainability challenge of climate action. Students will explore the intersection of science and community through exemplars of partnership between research and Te Ao Māori (the Māori world) in the context of land, water and wellbeing in Aotearoa New Zealand.

247113 Science and Sustainability for Science 15 credits

The pursuit of environmental sustainability is a complex societal issue. This is a problem-based course, where students will develop their critical thinking, communication and information literacy and management skills as they evaluate interdisciplinary approaches to the contemporary sustainability challenge of climate action. Students will explore the intersection of science and community through exemplars of partnership between research and Te Ao Māori (the Māori world) in the context of land, water and wellbeing in Aotearoa New Zealand.

247114 Science and Sustainability for Engineering and Technology 15 credits

A project-based, interdisciplinary course introducing students to the applied scientific thinking and theories that underpin the relationship between applied science and sustainability. Students will explore the intersection of science and community through exemplars of partnership between industry and Te Ao Māori (the Māori world) in Aotearoa New Zealand. By examining the interactions between human, cultural, environmental and technological systems, students will develop their critical thinking, communication and information literacy skills as they develop solutions to contemporary challenges in sustainability in a team-based project.

247155 Communication in the Sciences 15 credits

A course designed to introduce science students to the communication skills required for a science-related career. Students will learn how knowledge is made in science, how science documents are developed to communicate to a target audience, and how to work within a team in a science-related context. Students will develop skills in information literacy, rhetorical analysis, report writing, developing a position course, presenting information to an audience through a structured seminar, accurate integration of secondary source material (primary, secondary and tertiary literature), data collection and presentation, team analysis and appropriate scientific style (clarity, concision, correctness, and narrative technique).

247177 Written Communication for Information Sciences 15 credits

Students learn to express their ideas effectively in writing in a manner appropriate to both the university and the information technology industry. Regular and focused writing practice is an essential component of the course.

247192 Special Topic 15 credits

A course of study which will be designed to either meet the individual requirements of a student in a special circumstance or be used to facilitate development of a new course.

000

247220 Pūtaiao: Mātauranga and the Environment 15 credits

This course will explore common Te Ao Māori values associated with Māori environmental management and provide practical experiences with assessing and monitoring our unique environments from a Māori and Iwi perspective. Students will be provided with opportunities to understand the holistic nature of Māori cultural concepts and engage with cutting edge Pūtaiao experiences.

247

College of Sciences Courses

247222 New Zealand Internship Experience 15 credits

Practice and experience working within the New Zealand agrifood or wildlife management sector. Students will follow an agreed work plan and will document and present their internship experience through various communication channels.

247292 Special Topic 15 credits

A 200-level course available for use in special cases to assist in completion of a student undergraduate programme.

Biology

247300 Research in Biosciences 15 credits

The course provides an opportunity for third year undergraduate students in the biological sciences to gain research experience in an academic laboratory. Under supervision of faculty students will develop a short research proposal, carry out the proposed research, write a research report, and present their findings.

College of Sciences Courses

247392 Special Topic 15 credits

A 300-level course available for use in special cases to assist in completion of a student undergraduate programme.

247712 Advanced Studies in Molecular Biosciences 30 credits

A modular course in which students will critically examine current literature on experimental systems used to advance knowledge in their fields of choice ranging from Plant Science, Microbiology, to Molecular and Cell Biology, Genetics and/or Biochemistry.

247782 Special Topic 15 credits

A course of study which will be designed to either meet the individual requirements of a student in a special circumstance or be used to facilitate development of a new course.

247783 Special Topic 15 credits

A course of study which will be designed to either meet the individual requirements of a student in a special circumstance or be used to facilitate development of a new course.

Statistics

247790 Special Topic Applied Statistics 15 credits

247791 Special Topic in Data Analysis 15 credits

College of Sciences Courses

247792 Special Topic 15 credits

A course of study which will be designed to either meet the individual requirements of a student in a special circumstance or be used to facilitate development of a new course.

247793 Special Topic 15 credits

A course of study which will be designed to either meet the individual requirements of a student in a special circumstance or be used to facilitate development of a new course.

249

Inclusive Education**249286 Equity and Diversity in Education 15 credits**

Explores critical issues related to equity and diversity in life-long and life-wide learning. Examines the role of education in the marginalisation and exclusion of learners, how these inequities are reproduced, and the principles and practices that promote equity.

249384 Consultation and Collaboration in Inclusive Education 15 credits

An examination of methods and practices used in a consultative approach to assist learners with special needs in an inclusive educational environment.

249700 Braille Proficiency 0 credits

In order to complete the Postgraduate Diploma in Specialist Teaching (Blind and Low Vision), evidence that the candidate has successfully completed the Trans-Tasman Braille Proficiency Examination (Unified English Braille) must be submitted.

249710 Theory and Practice of Blind and Low Vision (Developmental Orientation & Mobility) 30 credits

An advanced study of the theory and practice of specialist teachers in the area of Blind and Low Vision, with a specific focus on Developmental Orientation & Mobility.

249711 Practicum of Blind & Low Vision (Developmental Orientation & Mobility) 30 credits

A professional and field-based practicum in the area of Blind and Low Vision, with a specific focus on Developmental Orientation & Mobility.

249730 Learning Support: Networked Learning 30 credits

An advanced study of the principles and practices of learning support provision in the school sector.

249731 Learning Support: Professional Practice 30 credits

An in-depth exploration and application of the specialist knowledge base and skills required for school leaders of learning support.

249732 Learning Support: Professional Inquiry 45 credits

A research-based professional inquiry into teaching and learning in the area of school learning support.

249733 Mana Ōrite in Education 30 credits

A critical study of equity through the framework of Te Tiriti o Waitangi.

249734 Equity and Inclusion in Education 30 credits

A critical study of equity and inclusion in education through a human rights lens.

249740 Theory and Practice of Deaf and Hard of Hearing 30 credits

An advanced study of the theory and practice of specialist teachers in the area of Deaf and Hard of Hearing.

249742 Neurodiversity in Education 30 credits

A critical study of neurodiversity and its implications and applications in education.

249743 Practicum in Deaf and Hard of Hearing 30 credits

Professional and field-based practice in the area of Deaf and Hard of Hearing

249745 Theory and Foundations of Autism Spectrum Disorder 30 credits

An advanced study of theoretical and research-based foundations of specialist teaching relating to understanding, recognising, assessing and providing for learners with Autism Spectrum Disorder.

249746 Theory and Practice of Blind and Low Vision Education 30 credits

An advanced study of the theory and practice of specialist teachers in the area of blind and low vision

249747 Theory and Practice of Early Intervention 30 credits

An advanced study of the theory and practice of specialist teachers in the area of Early Intervention.

249748 Practicum in Early Intervention 30 credits

Professional and field-based practice in the area of Early Intervention

249749 Evidence-based Interprofessional Practice in Autism Spectrum Disorder 30 credits

An examination of evidence-based practices in the education of learners with Autism Spectrum Disorder, including common professional practices of specialist teachers and other educational and health professionals involved in special and inclusive education.

249750 Practicum Autism Spectrum Disorder 30 credits

A supervised practicum working with learners with Autism Spectrum Disorder.

249752 Practicum in Blind and Low Vision Education 30 credits

A professional and field-based practicum in the area of blind and low vision

249753 Theory and Practice of Learning and Behaviour Diversity 30 credits

An advanced study of the theory and practice of specialist teachers in the area of learning and behaviour diversity

249755 Practicum in Learning and Behaviour Diversity 30 credits

Professional and field-based practice in the area of learning and behaviour diversity

249756 Theory and Practice of Adviser on Deaf Children 30 credits

An advanced study of the theory and practice of AODC (Adviser on Deaf Children).

249757 Practicum in Adviser on Deaf Children 30 credits

A professional and field-based practicum in the area of AoDC (Adviser on Deaf children).

249758 Theory and Practice of Te Kaupapa o Te Kōhanga Reo 30 credits

An advanced study of the theory and practice of Kaihāpai in the area of Te Kaupapa o Te Kōhanga Reo.

249759 Practicum in Te Kaupapa o Te Kōhanga Reo 30 credits

Professional and field-based practice in the area of Te Kōhanga Reo.

249760 Theory and Practice of Complex Educational Needs 30 credits

An advanced study of the theory and practice of specialist teachers in the area of complex educational needs

249763 Practicum in Complex Educational Needs 30 credits

Professional and field-based practice in the area of complex educational needs

249770 Supervision and Mentoring in Specialist Teaching 15 credits

This course critically examines advanced theory and practice in the area of mentoring and supervision in special and inclusive education. Students will engage in practical applications in their teaching and learning context.

Teacher Education**249771 Additional Areas of Specialist Teaching 15 credits**

An advanced study of theoretical and research-based foundations of specialist teaching relating to understanding, recognising, assessing and providing for learners who have needs in the areas of: Autism Spectrum Disorder; Blind and Low Vision; Complex Educational Needs; Gifted and Talented; and Learning and Behaviour.

Inclusive Education**249772 New Zealand Sign Language 1 0 credits**

The practice of communicating through New Zealand Sign Language 1

249773 New Zealand Sign Language 2 **0 credits**
The practice of communicating through New Zealand Sign Language 2

249774 New Zealand Sign Language 3 **0 credits**
The practice of communicating through New Zealand Sign Language 3

250

Health

250100 Health Communication **15 credits**
This course examines the key principles, ethics and theories of effective health communication for positive health change in individuals and communities. Students will learn to develop and critically analyse health-related messages and research, engage with culturally diverse audiences, and consider social, biological and environmental determinants in health communication.

250205 Principles and Practice of Epidemiology **15 credits**
The course provides an introduction to epidemiology; the study of the distribution and determinants of human health.

250210 Independent Study **15 credits**

250218 Special Topic **15 credits**

250303 Systems Thinking and Design for Health **15 credits**
An analysis of ideas and methods from both systems thinking and design for the purpose of understanding health issues in order to create good health experiences for people.

250310 Independent Study **15 credits**

250318 Special Topic **15 credits**

250320 Work Integrated Learning in Health Sciences **15 credits**
This course will provide an experiential environment to gain practical experience within the Health Sciences.

250331 Health of Communities **15 credits**
Strategies for assessing and promoting the health of populations are examined and local, national and international responses to health issues explored.

250701 Quantitative Methods in Public Health **30 credits**
The course provides advanced training in the selection and application of quantitative methods in public health. Topics will include: the analysis of national, regional and local health data systems, coding of disease and injury, survey design and analysis, sampling and questionnaire development, critical evaluation of statistic literature, bivariate and multivariate methods for analysing continuous and discrete public health data, and privacy and ethical considerations in the storage and analysis of health data. The course will involve using the software packages such as SAS and Stata as well as online statistical analysis software.

Public Health

250703 Health Communication **15 credits**
This course examines the primary factors that influence the effective communication and adoption of positive health behaviours by individuals and communities. Students will review: micro and macro-level theories of health communication; audience engagement and persuasion; the impact of evolving public attitudes to health knowledge; innovative methods for health communication.

Health

250704 Special Topic **15 credits**

250705 Special Topic **30 credits**

250706 Applied Health Analytics **15 credits**
This course provides students with the analytical, writing and communication skills and tools to formulate a project to investigate a client's research question.

250710 Independent Study **15 credits**

250711 Independent Study **30 credits**

250801 Special Topic **30 credits**

250808 Independent Study **15 credits**

250809 Independent Study **30 credits**

250810 Thesis **90 credits**
A supervised and guided independent study resulting in a published work.

250811 Thesis 90 Credits Part I **45 credits**
A supervised and guided independent study resulting in a published work.

250812 Thesis 90 Credits Part II **45 credits**
A supervised and guided independent study resulting in a published work.

250813 Thesis **120 credits**
A supervised and guided independent study resulting in a published work.

250814 Thesis 120 Credits Part I **60 credits**
A supervised and guided independent study resulting in a published work.

250815 Thesis 120 Credits Part II **60 credits**
A supervised and guided independent study resulting in a published work.

250816 Professional Project **60 credits**
Professional practice within the subject area that will be conducted individually and assessment of the outcome of the investigation may be in a variety of ways.

250817 Research Report **60 credits**
Candidates are required to conduct a piece of independent research under supervision and to produce a report of the research for examination.

251

Occupational Health and Safety

251271 Occupational Health and Safety I **15 credits**
An introduction to Occupational Health and Safety and its application to workplaces in New Zealand. The course will explore the complex relationship between health and safety, factors in the working environment affecting health and safety and systems intended to regulate and manage the working environment.

251370 Health and Safety Auditing **15 credits**
This course examines issues relating to measuring safety performance in organisations and in health and safety auditing in particular. Emphasis is placed on the use of the commonly utilised management systems audit promoted by the ACC, the Accredited Employer Programme (AEP) audit system. The course also examines other audit frameworks, and critically examines the role of auditing in safety performance evaluation.

251372 Occupational Hygiene **15 credits**
A study of the principles of occupational hygiene and their application to the workplace in New Zealand. Topics include the recognition, evaluation and control of health hazards in the work environment; noise measurement and control; relevant legislation and standards; dust, vapour and gas measurement techniques; ventilation and case studies.

251374 Project in Occupational Health and Safety **15 credits**
An applied research course in which the student conducts an extended, systematic enquiry into a particular topic in occupational safety and health.

251731 Advanced Occupational Health and Safety **30 credits**
An examination of current issues in Occupational Safety and Health and issues commonly found in the work environment.

251770 Health and Safety Auditing **30 credits**
A comprehensive examination and critical analysis of current theories and practice in relation to auditing and assessing organisational health and safety performance.

251772 Advanced Occupational Hygiene 30 credits

An advanced course studying the current issues in occupational safety and health, which involves the recognition, evaluation and control of health hazards in the work environment, including the study of noise, ventilation systems and air pollution.

252**Sleep and Circadian Science****252301 Sleep, Health and Performance 15 credits**

This course extends fundamental concepts in sleep and circadian science. It examines the causes and consequences of sleep loss, as well as misalignment of the circadian body clock with the day/night cycle. The course has a particular emphasis on the impact of sleep duration, quality and timing, and circadian dysregulation, on health and performance.

Public Health**252701 Sleep and Circadian Science for Health Practitioners 30 credits**

An examination of sleep and circadian science in relation to health and healthcare, including healthy sleep, sleep disorders and sleep in those with medical conditions.

252702 Sleep, Fatigue Risk Management and Occupational Health and Safety 30 credits

The application of sleep and circadian science in fatigue risk management, shift work, and occupational health and safety. An overview of the organisational processes required to implement a fatigue risk management system, as well as regulatory requirements for management of fatigue and shift work in occupational health and safety.

253**Counselling and Guidance****253250 Counselling Principles and Practice 15 credits**

An examination of the fundamental principles of counselling, with particular emphasis on the central assumptions, theoretical constructs and applications of major approaches.

253255 Cultural Issues in Counselling 15 credits

An examination of selected cultural issues relevant to counselling theory and process.

253353 Guidance Principles and Practice 15 credits

An examination of the fundamental principles of guidance. Guidance practice is studied, focusing on roles, organisation and intervention procedures.

253740 Professional Development in Counselling I 30 credits

The development of attitudes and skills for effective counselling practice, informed by current research and undertaken in the context of campus-based workshops and field-based supervised practice.

253750 Counselling Theory 30 credits

A study of the theoretical bases of counselling. The course examines the place of counselling in society, its philosophical foundations, empirical status and major principles. Particular emphasis is given to selected approaches.

253753 Guidance in Education 30 credits

A study of guidance in educational settings. Attention is given to the philosophical foundations of guidance, its social implications, organisation and roles. Intervention procedures for individuals and groups are examined.

253754 Family and Couples Counselling 30 credits

A study of the theoretical bases of family and couples counselling. Attention is given to the concepts of 'family' and 'couple' and to systems theory. The processes of counselling families and couples are examined with regard to various approaches.

253755 Culture and Counselling 30 credits

An examination of the significance of culture in counselling. A multicultural perspective is adopted but with particular attention to the context in Aotearoa/New Zealand.

253761 Professional Development in Counselling I 45 credits

The development of attitudes and skills for effective counselling practice, informed by current research and undertaken in the context of campus-based workshops and field-based supervised practice.

253762 Professional Development in Counselling II 30 credits

A continuation and integration of personal and professional development undertaken in Professional Development I whilst pursuing field-based practice and campus-based workshops.

253800 Research Project in Counselling 45 credits

A negotiated research project related to relevant aspects of counselling or counselling-related activity.

254**Education Studies****254101 An Introduction to Social and Cultural Studies in Education 15 credits**

A critical examination of social, cultural, political, historical and philosophical influences on the development of education in Aotearoa/New Zealand and internationally.

254102 Introduction to Professional and Ethical Practice in Education and Health Contexts 15 credits

An introduction to the practice of professionals working with individuals and families who have multicultural backgrounds and diverse needs within education and health settings.

254200 Learning in the Digital World 15 credits

This course is an exploration of what it means to be a learner in digital social worlds.

254201 Philosophy of Education 15 credits

This course explores the philosophical complexities of education in its personal, institutional and social dimensions. Students will be introduced to some of the major debates in philosophy of education and engage in the critical and continual practice of applying philosophy across the many contexts of education.

254203 Sociologically Imagining Education 15 credits

This course explores the sociology of education by critically inquiring into the relationship between personal experience, education and society. Students will be introduced to primary sociological concepts like race, class and gender to critically reflect on education.

254210 Historical Perspectives on Education 15 credits

An exploration of the ways New Zealand's current education institutions have been influenced by evolving philosophies of education, alongside key historical, sociological, ideological, political, and economic forces.

254300 Historical Perspectives on Education 15 credits

An exploration of the ways New Zealand's current education institutions have been influenced by evolving philosophies of education, alongside key historical, sociological, ideological, political, and economic forces.

254304 Critical Theories of Education 15 credits

Education as an everyday practice is the focus for critical theories of education. This course explores ways education has been theorized as a practice of liberation as well as a practice of oppression. Students will use these concepts to examine the role of education in shaping the social structure of Aotearoa New Zealand.

254337 Teaching and Learning with Pasifika Peoples in NZ 15 credits

An examination of the educational experiences of Pasifika peoples in New Zealand in formal and informal settings both in the past and present with a focus on effective teaching and learning practices.

254340 Politics of Education 15 credits

This course considers the politics of education in Aotearoa New Zealand, using current social issues and education policy reforms to examine role of education in a democracy.

254377 Teaching and Learning Languages up to Year 10 15 credits

This course provides students with an overview of the theory and practice of teaching languages in New Zealand schools up to Year 10 level.

254710 Ruia taitea: Transforming Education 15 credits

This course introduces students to critical issues of education within a neo-colonial, settler society. Students examine key concepts such as social justice, cultural location, and the collective wellbeing in the context of education in Aotearoa New Zealand.

254744 Pacific Peoples and Education in New Zealand 30 credits

A critical examination of current issues in education which affect Pacific Islands peoples in New Zealand. Students will consider the place of Pacific Islands peoples in New Zealand society and design strategies for meeting their educational needs within specified professional fields of interest.

254766 Professional Learning Pathways 30 credits

Bespoke learning modules for professional educational practice

254767 Community-based Practice 30 credits

Theory and practice of culturally responsive and relational engagement in local learning communities

254770 Valuing Relationships and Practices in Educational Contexts, Settings and Communities 30 credits

A critical study of Western, Māori and indigenous approaches to the leadership of relationships and professional practice in the context of global demands for increased accountability, standardisation, and control in education.

256**Educational and Developmental Psychology****256201 Educational Psychology 15 credits**

An examination of the contribution of psychology to an understanding of educational processes with a focus on the learner, learning processes and instruction. Issues of theory, research and application will be studied in a variety of educational situations.

256304 Positive Learning Environments 15 credits

This course provides in depth exploration of the strategies and interventions for maintaining positive learning environments that support effective school engagement and achievement.

Psychology**256701 Ako: Psychology of Learning and Teaching 15 credits**

A study of learning and teaching processes within an ecological and developmental framework emphasising what learners bring to their learning and factors that support and hinder engagement. A focus on the use of psychological tools for learning/teaching (use of language, literacy and numeracy) allows in depth consideration of complex higher order processes and how they can be developed.

256702 Ahurei: The Psychology of Unique Differences 15 credits

A study of how learners and teachers bring their diversity (defined by sociocultural, medical, developmental, and psychological frameworks) to their learning and teaching. A critical analysis of the way society and government systems defines and responds to diversity is central to this course, as is consideration of how contemporary inclusive education and positive psychology can better support learning for all.

256703 He Taiao Ako: Psychology of Educational Settings 15 credits

A study of formal and informal educational settings, beginning with the teaching-learning relationship that is parenting, and moving through formal child and adolescent educational contexts into adult education. The psychological frameworks that help us understand the complexity of these settings and the interactions that occur within them are examined, along with how best to approach professional work in these settings.

256704 Waiora: Psychology of Wellbeing and Ako 15 credits

A study of traditional and contemporary positive approaches to understanding and responding to mental health and wellbeing needs. A focus on the roles of schools in promotion and prevention is provided with reference to systemic, whole school, small group, and individual interventions. Evidence-based approaches to intervention are introduced, along with processes for risk-assessment in relation to mental health.

256705 Whanaungatanga: Psychology of Relationships in Ako 15 credits

A study into space for relationships and relationship trust that underpin development and learning. The role of tikanga and psychological approaches that rely on relationships, such as interviewing, counselling, mediation, conflict resolution are explored, along with the multi-disciplinary situations that are inherent in educational and developmental psychology.

256706 Whakapiki: Psychology of Change and Development 15 credits

A study of models and approaches that support the instigation and facilitation of change at the system, classroom, home, or individual levels. Contemporary practice in talking therapies, motivational interviewing, and brief therapy are explored and consideration is also given to specific issues such as disaster response, the impacts of trauma, principles of psychological recovery and the development of resilience.

Educational and Developmental Psychology**256707 Mānuka Takoto - Behaviour Challenges 15 credits**

A study of the challenges experienced by teachers, specialists, children and whānau when individual or group behaviours challenge the ability to learn, socialise, retain relationships and impact on culture and identity, and to provide the tools to pick up the challenge for all involved to address these.

256841 Applied contemporary practice in educational psychology 30 credits

Casework involving early childhood, children and adolescents and their caregivers/teachers/whanau is undertaken during the year under supervision of registered psychologists. Analysis of the casework is presented to be assessed throughout the course. The folio of casework includes projects that centre on working with individuals, groups and systems. The casework undertaken will be decided according to the individual and professional development needs of the student.

256843 Evidence-based practice in educational psychology 30 credits

Evidence-based practice and application to formal and informal learning contexts. Developing a professional practice portfolio with reference to the Core Competencies of the New Zealand Psychologists' Board.

256844 Competencies for Educational Psychologists 30 credits

Advanced study and supervised professional practice in educational and developmental psychology with a focus on competencies and critical professional reflection.

Psychology**256846 Professional Leadership in Educational Psychology 30 credits**

Professional Leadership and application of discipline knowledge, scholarship and research in supervised professional practice in educational and developmental psychology

256847 Applied Research in Educational Psychology 60 credits

A supervised and guided research study presented in a research report.

256854 Educational and Developmental Psychology Assessment 30 credits

Advanced study in contemporary assessment in educational and developmental psychology.

256855 Educational and Developmental Psychology Practice 30 credits

Advanced study of professional practice in educational and developmental psychology. Principles, frameworks, competencies, attitudes and dispositions that underpin professional practice are critiqued and developed. Particular attention is given to bicultural issues, professional ethics, professional leadership, accountability and reflective practice.

257

English Language Teaching

257370 Teaching Learners of English as Another Language 15 credits

A reflective approach to developing effective skills in the teaching of English as another language (TESOL), including assessment, planning, and the design of resource materials. Students will explore strategies for facilitating language learning in a range of specific contexts.

257375 Learning English as Another Language 15 credits

A specialised study of the skills and processes involved in learning English as another language (ESOL) and the factors affecting success. Consideration will be given to the variety of learners in New Zealand; the interrelationship between language, culture and world-view; current theories on second language learning; and the analysis of the spoken and written language of new learners of English.

258

Literacy Education

258720 Foundations of Literacy Education 30 credits

An advanced study of the critical language skills and cognitive processes underpinning literacy and language acquisition. Consideration is given to distal factors that influence literacy and language acquisition, along with relevant policy and foundational documents. Implications for effective literacy practices are critically examined through current literature.

258722 Understanding and Addressing Literacy Needs 30 credits

A critical study of evidence-based practices for identifying and working with learners with literacy learning needs. This includes understanding the learner within a context to respond appropriately. Opportunity is provided for exploration of teaching practices that are effective in enhancing progress and equity.

258725 Critical and Current Topics in Literacy 30 credits

An advanced study of research into current and critical topics of literacy that support children to actively engage in society as critical, creative, and engaged citizens. A focus is placed on how critical and current types of literacy can be used to enhance communication within the classroom environment.

259

Educational Administration and Leadership

259771 Educational Leadership in Action 30 credits

A study of leadership in action including reflective practice, and professional and curriculum leadership, based on selected organisational and policy contexts.

259772 Theory and Process in Educational Leadership 30 credits

A critical examination of discourses, policies and practices of educational governance, leadership and reform.

260

Secondary Teaching

260410 Professional Practice 1 (Secondary) 30 credits

This course provides an introduction to professional practice in secondary school settings in Aotearoa New Zealand, through observation, teaching, critical self-reflection and evaluation of practice.

260411 Professional Practice 2 (Secondary) 30 credits

This course provides further development of professional practice in secondary school settings in Aotearoa New Zealand, through observation, teaching, critical self-reflection and evaluation of practice.

260412 Curriculum and Pedagogy A (Secondary Maths, Science, Technology) 30 credits

This course engages students with the theory and practice of curriculum, pedagogy and assessment in maths or science or technology within the context of secondary schools in Aotearoa New Zealand guided by commitment to Te Tiriti o Waitangi and tangata whenuatanga.

260413 Curriculum and Pedagogy A (Secondary English, Languages, Social Sciences) 30 credits

This course engages students with the theory and practice of curriculum, pedagogy and assessment in English, or languages or the social sciences within the context of secondary schools in Aotearoa New Zealand guided by commitment to Te Tiriti o Waitangi and tangata whenuatanga.

260414 Curriculum and Pedagogy A (Secondary Arts, Physical Education & Health) 30 credits

This course engages students with the theory and practice of curriculum, pedagogy and assessment in the arts, or physical education and health within the context of secondary schools in Aotearoa New Zealand guided by commitment to Te Tiriti o Waitangi and tangata whenuatanga.

260415 Curriculum and Pedagogy B (Secondary) 30 credits

This course provides pathways for students to engage with the theory and practice of curriculum, pedagogy and assessment in a second learning area within the context of secondary schools in Aotearoa New Zealand. It also examines connections between curriculum areas and explores wider issues pertaining to secondary education guided by commitment to Te Tiriti o Waitangi and tangata whenuatanga.

260420 Teaching Mathematics 15 credits

This course provides students with an overview of the theory and practice of teaching Mathematics in the context of the New Zealand Curriculum Framework at secondary school level.

260421 Teaching Senior Mathematics 15 credits

An introduction to the teaching of Mathematics in Years 11, 12 and 13.

260422 Teaching Science 15 credits

This course provides students with an overview of the theory and practice of teaching Science in the context of the New Zealand Curriculum Framework at secondary school level.

260423 Teaching Senior Agriculture/Biology/Horticulture 15 credits

An introduction to the teaching of Agriculture/Biology/Horticulture in Years 11, 12 and 13.

260424 Teaching Senior Chemistry 15 credits

An introduction to the teaching of Chemistry in Years 11, 12 and 13.

260425 Teaching Senior Physics 15 credits

An introduction to the teaching of Physics in Years 11, 12 and 13.

260426 Teaching Technology 15 credits

This course provides students with an overview of the theory and practice of teaching technology in the context of the New Zealand curriculum at secondary school level.

260427 Teaching Senior Technology 15 credits

An introduction to the teaching of Technology in Years 11, 12 and 13.

260428 Teaching Design and Visual Communication 15 credits

An introduction to the teaching of Design and Visual Communication in Years 9 to 13.

260429 Teaching Languages 15 credits

An introduction to the teaching of languages in the New Zealand secondary school setting.

260430 Teaching Senior Languages 15 credits

An introduction to the teaching of languages in Years 11, 12 and 13

260431 Teaching English 15 credits

This is a generic course which will provide an overview of the theory and practice of teaching English in the context of the New Zealand Curriculum Framework at secondary school level.

260432 Teaching Senior English 15 credits

An introduction to the teaching of English in Years 11, 12 and 13.

260433 Teaching Drama 15 credits

An introduction to the teaching of Drama in Years 9 to 13.

260434 Teaching Social Sciences 15 credits

This course provides students with an overview of the theory and practice of teaching Social Sciences in the context of the New Zealand Curriculum Framework at secondary school level.

260435 Teaching Senior History 15 credits

An introduction to the teaching of History in Years 11, 12 and 13.

260436 Teaching Senior Geography 15 credits

An introduction to the teaching of Geography in Years 11, 12 and 13.

260437 Teaching Senior Commerce 15 credits

An introduction to the teaching of Economics in Years 11, 12 and 13.

260438 Teaching Music 15 credits

This course provides students with an overview of the theory and practice of teaching music in the context of the New Zealand curriculum at secondary school level.

260439 Teaching Senior Music 15 credits

This course provides students with an overview of the teaching of secondary school music in years 11, 12 and 13.

260440 Musicianship for School Instrumental Music Teachers 15 credits

The development of skills and knowledge in musical performance and leadership as appropriate to instrumental Music teaching in the school setting.

260441 Teaching Health and Physical Education 15 credits

This course provides students with an overview of the theory and practice of teaching Health and Physical Education in the context of the New Zealand Curriculum Framework at secondary school level.

260442 Teaching Senior Physical Education 15 credits

An introduction to the teaching of Health and Physical Education in Years 11, 12 and 13.

260443 Teaching Health 15 credits

An introduction to the teaching of Health Education in years 9 and 10.

260444 Teaching Visual Arts 15 credits

This course provides students with an overview of the theory and practice of teaching the visual arts in the context of the New Zealand curriculum at secondary school level.

260445 Teaching Senior Visual Arts 15 credits

This course provides students with an overview of the theory and practice of teaching the visual arts in years 11, 12 and 13.

260446 Teaching Senior Art History 15 credits

An introduction to the teaching of Art History in years 12 and 13.

260447 Teaching Performing Arts 15 credits

An overview of the theory and practice of teaching performing arts in Years 9 – 13 in the context of the New Zealand Curriculum.

260448 Teaching Senior Social Sciences 15 credits

An overview of the theory and practice of teaching senior social sciences in Years 11 – 13 in the context of the New Zealand Curriculum.

260483 Secondary Teaching Experience I 15 credits

This course introduces students to pedagogical knowledge in educational contexts and prepares for personal and professional growth through ongoing reflection.

260484 Secondary Teaching Experience II 15 credits

This course provides students with the opportunity to extend and diversify their pedagogical knowledge through the synthesis and application of teaching skills and reflective practice.

260490 Teaching in Context I 15 credits

An examination of the roles and responsibilities of teachers in promoting learning for all learners. Drawing on international research, students will reflect on themselves as learners and teachers together with factors that influence learning and teaching.

260491 Teaching in Context II 15 credits

An examination of the roles and responsibilities of teachers in promoting learning. Drawing on international research, students will reflect on and analyse the relationship between social, cultural, historical, and contemporary educational contexts and their influence on learning and teaching.

260492 Teaching and Learning in a Secondary Context 15 credits

An examination of the roles and responsibilities of teachers in promoting learning for adolescent learners within a secondary context. Drawing on international research, students will reflect on and analyse a range of contextual factors and their influence on learning and teaching in secondary school educational settings.

261**E-Learning****261760 Digital Education and Design for Learning 30 credits**

This course critically explores ways of framing the design of digitally-enhanced learning situations through three components: the crafting of learning tasks, the digital and material tools and spaces for learning, and the social arrangements that organise learners and encourage cooperative activity. Students discuss selected approaches, techniques, and tools of relevance to those designing for other people's learning in diverse contexts.

261765 Innovations and Critical Issues in Digital Education 30 credits

This course critically explores how learning and pedagogical practices co-evolve with technological innovations, drawing on contemporary learning theories and empirical research in diverse learning contexts. Central themes in this course include critical issues in digital education, teaching & learning in a networked society, and how new/emerging technologies influence processes of learning and transformation.

261766 Teaching and Digital Education 30 credits

This course explores the use of digital technologies in teaching and learning in diverse professional contexts. It critically examines how digital technologies can be used to support and enhance teaching, learning, and assessment. The course will scope a range of topics related to digital education, including theories, perspectives, principles and pedagogical approaches for diverse learners and learning situations.

262**Gifted and Talented****262753 Practicum in Gifted and Talented Education 30 credits**

Professional and field-based practice in the area of gifted and talented

262760 Theory and Practice of Gifted Education 30 credits

An advanced study of the theory and practice of specialist teachers in the area of gifted education.

263**Learning and Teaching****263200 Teaching as an Act of Influencing Others 15 credits**

An exploration of the ethics, principles, and key processes of everyday teaching and learning as a basic form of social interaction, giving students the opportunity to explore teaching and learning across the lifespan.

263301 Learning and Motivation 15 credits

A study of contemporary theory and research on motivation in educational contexts with emphasis on implications for learning and for educational practice.

263315 Teaching and Learning in Everyday Settings 15 credits

A study of informal teaching and learning practices in a workplace, volunteer, leisure, cultural or community organisation setting. Focus is on the application of everyday teaching and learning theory in a real community context where access is self-negotiated by the student.

263331 Assessment and Learning 15 credits

Assessment concepts and procedures for learning and teaching, the construction and use of educational assessments, and contemporary issues in evaluation.

263400 Learning and Teaching 1 15 credits

This course uses a research informed, evidence-based approach to introduce how learning happens in its social, cultural and historical context and what this means for effective teaching for all learners. The multiple factors shaping identity will be introduced, and students will develop awareness of and reflect on diverse perspectives regarding identity.

263401 Learning and Teaching 2 15 credits

This course uses a research informed, evidence-based approach to examine how learning happens in its social, cultural and historical context and what this means for effective teaching for all learners. The multiple factors shaping identity will be explored, and students will develop awareness of, and critically reflect on, diverse perspectives regarding identity.

263704 Advanced Studies in Motivation and Learning 30 credits

A study of learning and the applications of national and international theory and research within learning contexts with an emphasis on contemporary learning themes.

263705 Assessment for Learning and Teaching 30 credits

Contemporary New Zealand and international assessment theory, practice and policy are examined and critiqued with application for educators in their learning context.

264**Education Support****264200 How People Learn 15 credits**

An examination of how people learn in formal and informal settings

265**Early Childhood Education****265410 Professional Practice 1 (ECE) 30 credits**

This course provides an introduction to professional practice in early childhood education settings in Aotearoa New Zealand, through observation, teaching, critical self-reflection and evaluation of practice.

265411 Professional Practice 2 (ECE) 30 credits

This course provides further development of professional practice in early childhood education settings in Aotearoa New Zealand, through observation, teaching, critical self-reflection and evaluation of practice.

265412 Curriculum and Pedagogy A (ECE) 30 credits

This course introduces students to the theory and practice of curriculum, pedagogy and assessment in the context of early childhood education settings in Aotearoa New Zealand guided by commitment to Te Tiriti o Waitangi and tangata whenuatanga.

265413 Curriculum and Pedagogy B (ECE) 30 credits

This course provides further development with the theory and practice of curriculum, pedagogy and assessment in the context of early childhood education settings in Aotearoa New Zealand guided by commitment to Te Tiriti o Waitangi and tangata whenuatanga.

265736 Informed Practice in Early Years Education 30 credits

This course offers a critical study of the notions of quality in learning settings from infancy through to early school years. Content focuses on how to engage with and interpret different forms of evidence, including research, to

inform practice. Opportunity is provided for exploration of key issues and implications for pedagogical leadership.

265737 Young Children, Families, Whānau and Communities 30 credits

This course offers a critical study of theory, research and policy relating to young children, families, whānau and communities. Content includes exploration of key theoretical perspectives, longitudinal research, and national and international policy that influences the lives of children, families, and whānau. Implications for young children, their families and whānau in the context of education and community will be explored.

265738 Fostering Children's Learning Through Play-based Pedagogy 30 credits

This course introduces students to teaching practices in education settings from infancy through to early school years. Content includes the significance of intentional teaching and play in early childhood education and school settings as well as play-based, social-emotional, place-based and inquiry-based pedagogies. Opportunity is provided to critically examine pedagogy focused on te tiriti based partnerships, localised curriculum and culturally responsive practice in Aotearoa New Zealand.

267**Education Research****267721 Research Methodologies in Education 15 credits**

An advanced study of quantitative, qualitative and mixed methods research design in education. Theoretical and practical issues of research are studied under three course themes: context for research, research designs, data collection and analysis.

267741 Indigenous Research Methodologies 15 credits

A study of Māori research frameworks, philosophies and processes and an examination of their contribution to the growing body of indigenous scholarship as relevant to educational settings.

267860 Professional Inquiry 60 credits

A critical evaluation and inquiry into a significant issue of professional interest, based on a critique of relevant theory and literature.

267861 Professional Inquiry 45 credits

A critical evaluation and inquiry into a significant issue of professional interest, based on a critique of relevant theory and literature.

267871 Thesis 120 Credit Part 1 60 credits

An advanced preparation for research, including a critical review of research literature, methodological design, ethics application and a refined research proposal.

267872 Thesis 120 Credit Part 2 60 credits

An advanced realisation of proposed research, subsequent analysis and scholarly report.

267875 Specialist Teaching Professional Inquiry 45 credits

An advanced analysis of a professional practice in an area of specialist teaching to inquire into the impact of that practice. Addresses the inquiry skills fundamental to quality culturally responsive professional thinking and action in an area of specialist teaching.

267880 Thesis 90 credits

Course enables students to conduct and report research using academic research conventions.

267881 Thesis 90 Credit Part 1 45 credits

Course enables students to conduct and report research using academic research conventions.

267882 Thesis 90 Credit Part 2 45 credits

Course enables students to conduct and report research using academic research conventions.

267899 Thesis 120 credits

An advanced scholarly application of theory and practice using academic research conventions.

Māori Medium Primary Teaching**268106 Te Taiao Mō Te Aho Matua o Ngā Kura Kaupapa Māori I****30 credits**

He timatanga ki te titiro ki te tū ngaiotanga o te kaiako, ki ngā akoranga taiao Māori, whakahaere ā-akomanga, te ako takitahi, ā-rōpū, ā-akomanga, ā-marautanga hangai pū ki Te Aho Matua. An introduction to the professional role of the teacher with reference to Te Aho Matua and Māori medium professional practices, classroom organisation, learning of individuals and groups, learning environments and key curriculum areas.

268108 Te Tūāpapa o te Reo**15 credits**

He tātari me te arohaehae i ngā hanga wetereo a te Māori me te reo o te marau i ngā kura kaupapa Māori (A critical analysis and critique of Māori grammatical structures and the language of the curriculum in kura kaupapa settings)

268110 Te Ha**15 credits**

He titiro ki te āhua o te tū i runga i te marae, me te ako i ngā tikanga me ōna reo. An introduction to the knowledge, language and customary practices pertaining to the elements of marae as a context for education.

268120 Tikanga Pāngarau I**15 credits**

Ka tīmata te ako i ngā whakamārama me ngā tukanga o te akoako pāngarau ki tā te Māori titiro, ki tā te Pākehā titiro, me tōna whakamahinga ki te reo Māori. An introduction to the processes of numeracy learning in te ao Māori and western contexts and its application to numeracy learning in te reo Māori.

268121 Te Kupu Tā I - Pānui Tuhituhi i Te Kura Kaupapa**15 credits**

He tīmatanga kia mārāma ki ngā tukanga o te ako i te pānui ki tā te Māori, ki tā tauīwi, me tōna whakamahinga ki Te Reo Māori. An introduction to the processes of literacy learning in Te Ao Māori and western contexts and their application to literacy learning in Te Reo Māori.

268130 Te Irawa**15 credits**

He whakamātau i te orokohanga mai o te tipuranga mai o te tangata ki tōna ake ao ki tā te whānau, hapū, iwi titiro, ā, he aronga ā-wairua, ā-hinengaro, ā-tinana. An introduction to the self in relation to cosmological narratives, the life-span of human development and learning from Māori whānau, hapū, and iwi perspectives.

268132 Te Marautanga o Te Aho Matua I**15 credits**

He tīmatanga tēnei ki te wherawhera i ngā ariā me ngā āhuatanga ako, me te whakaako ki ngā akoranga ā tini e hangai pū ki ngā marautanga e whakaakohia ana i roto i ngā kura tuatahi tae atu hoki ki ngā kura taiao Māori. Mā te ako i ngā āhuatanga e pā ana ki ngā Pou Toi e whai kiko, e whai tikanga, e whakatinana ai ēnei āhuatanga katoa.

268207 Te Taiao mō Te Aho Matua o ngā Kura Kaupapa Māori II**30 credits**

Ka ako te tauria ki te whakariterite i te taiao ako mā te whakamahi i ngā akoaranga katoa o te tau tuatahi. Me whakawhanake te ākongi i ngā pukenga whakahaere, i ngā rautaki whakaako, i ngā mahinga aromatawai ki tā Te Aho Matua tauria. Students will learn to prepare the learning environment by drawing on their learnings from the first year. Using Te Aho Matua as a framework, students develop management and pedagogical strategies and assessment practices.

268208 Te Reo Whakarākei**15 credits**

He tātari i ngā āhuatanga moroiti o te reo ka whakarite rautaki ai hei whakawhanake i te reo i ngā kura kaupapa Māori (An analysis of complex language features in te reo Māori and apply strategies to enhance them in kura kaupapa Māori settings).

268211 Te Tiringa**15 credits**

He whakawhānui i te mātauranga i te reo me ngā tikanga o te marae hei ako, hei whakaako i ēnei mātauranga. He āta titiro kia mārāma te ahurei o te tamaiti me tōna whānau i ngā taiao ako. Further development of the knowledge, language and customary practices pertaining to the marae as a particular context for educational exchange and knowledge transfer. There is

an emphasis on the uniqueness of the individual child and their whānau within diverse learning settings.

268220 Tikanga Pāngarau II**15 credits**

Ka whakawhanakehia ētahi mātauranga pāngarau Motuhake me ngā ariā pāngarau hei kawē i te pāngarau i roto i te ako reo Māori. Development of specific mathematical concepts and pedagogical knowledge for teaching of mathematics in the Māori medium.

268222 Te Kupu Tā II - Te Pānui Tuhituhi i Te Kura Kaupapa Māori**15 credits**

He whakawhanake i ōna māramatanga ki ngā kawenga mō te reorua, te reo-ā-tini ki tā te ao Māori rangahau mō te whakaako i te kupu tā, arā ko te reo ā-pānui, ā-tuhituhi i roto i te Reo Rangatira. Kia hāngai ki te taiao o Te Aho Matua. Development of an understanding of the processes for bi-lingual, multi-lingual literacy learning in Te Ao Māori and its research-based application to literacy teaching in Te Reo Māori.

268240 Te Ira Tangata o Te Aho Matua Ko Te Tupu o Te Tangata**15 credits**

Ka hohonu ake te ruku ki ngā māramatanga o Te Aho Matua ake me te tupu o te tangata i te ao nei. Kia whānui atu tōna mōhio ki tōna tipuranga, ki tō ētahi atu, me te aro haehae i ngā hononga ki tā te Māori titiro. A deeper exploration of Te Aho Matua itself and human development. The study of the self and others, with a focus on an analysis of human relationships, interactions, knowledge development and learning within evolving Māori historical and social, cultural and spiritual contexts.

268241 Te Marautanga o Te Aho Matua o ngā Kura Kaupapa Māori II: ko te tuitui i ngā kaupapa hei marautanga**15 credits**

Whai muri mai i Te Aro ā-Kapa i te tau tuatahi ka huri ke He tūhonohono tonu i ngā marau kei raro i te kaupapa matua e ai ki ngā Kura Kaupapa Māori. Ka aro nui ki ngā tikanga tawhito me ngā tikanga hou e hāngai pū ana ki ngā hangarau me ōna whakamahinga, ki tā te tirohanga Māori. Ko te wai, ko te waka ama te tauria. After the introduction to the integrated curriculum approach, students will continue to develop their ability to integrate subjects under a principal theme in ways Kura Kaupapa Māori do. An emphasis on customary and contemporary Māori practices and their associated technologies. Water and waka ama provide the example.

268307 Te Taiao mō Te Aho Matua - te whakarite i te taiao ki te poipoi i te ako i roto i ngā Kura Kaupapa Māori III**30 credits**

Ka tūhonotia te kawa, ngā ritenga, ngā whakahaere, ngā whakamaheretanga kia tupu te taiao e tika ana mō Te Aho Matua, hei painga mō ngā tamariki. He āta arohaehae, he toro i ngā mahinga rangahau, i ngā whakaakoranga huritao, i ngā mahinga whakahaere mō tētahi wā roa ki tā Te Aho Matua. The combination of the protocol, the preparations, administration and planning appropriate for the Te Aho Matua environment maximising benefits for the children. An in-depth analysis and engagement in research-informed, reflective teaching and management practices for a sustained period using a Te Aho Matua framework.

268308 Te Reo Auaha**15 credits**

An analysis and application of language discourse in creative contexts such as compositions, as well as an analysis of how language gives effect to tikanga Māori in kura kaupapa Māori. An analysis of the process of language learning is also explored and how that affects different people at different stages of their development.

268310 Te Puanga**15 credits**

He āta mātakitaki, he tauriterite i ngā kawa me ngā tikanga o tauīwi, ki ērā o ngā iwi taketake hei aromatawai i ngā pātanga o tā tauīwi aro ki te mātauranga me ngā pūnaha mātauranga. An examination and comparison of western perspectives of knowledge with Māori and indigenous world views in order to assess the implications of contemporary western perspectives on education and educational systems.

268320 Tikanga Pāngarau III**15 credits**

Ka āta rangahau i te mātauranga pāngarau me ngā ariā pāngarau me te āta aro ki te tika o te whakaako i te pāngarau i ngā ako Māori. Advanced study of mathematical concepts and pedagogical content knowledge for primary teachers with a focus on effective pedagogical practices in Māori medium settings.

268322 Te Kupu Tā - Te Pānui Tuhituhi i Te Kura Kaupapa Māori III **15 credits**

He āta rangahau i ngā whakaakoranga, i ngā aromatawai, i ngā whakahaere rerekē noa e hāngai ana ki te pai o te ako i te reo pānui, reo tuhituhi ki ngā ākonga rerenga kē i tētahi taiao Māori. An in-depth study of differentiated instruction, assessment and management as it applies to effective practice of teaching literacy skills for diverse learners, within a Māori context.

268340 Te Tino Uaratanga o Te Aho Matua - Ngā Hua o te Ako **15 credits**

Ko te tuituitanga o te katoa o ngā whāinga o Te Aho Matua e tohua ana ki Te Tino Uaratanga. Ka whakatupuhia ngā pūkenga o ngā taura ki te āta aromatawai, arotake, anromātirua, arohaehae, aro ā-mihi i te taiao ako, i ngā tamariki anō hoki. The culmination of all the objectives of Te Aho Matua are outlined in Te Tino Uaratanga. Students' skills will be developed to critically assess, evaluate, moderate, critique and appraise the learning environment and learners. An in-depth study of the self within an array of Māori medium and mainstream educational contexts, with a focus on a kaupapa Māori theoretical analysis of whānau, hapū, iwi relationships, interactions, and learning within contemporary social, cultural and spiritual contexts.

268341 Te Marautanga o Te Aho Matua o ngā Kura Kaupapa Māori III: ko te tuitui i ngā kaupapa hei marautanga **15 credits**

Kia tū motuhake te taura e waihanga ana i te marautanga o te akomanga kei reira a ia e whakangungu ana. He āta aro i ētahi akoranga tawhito, akoranga hou a te Māori hei tūāpapa i ngā tūtioka ā-marau. Ka āta whakawhanakehia ki ngā marau me ōna mātauranga, ka whātoro hoki i ngā ariā o tā te taiao mō Te Aho Matua. Independently create and implement the curriculum within the classroom the student is based for practicum. An in-depth study of customary and contemporary Māori practices using an interdisciplinary approach. Further development of subject and curriculum knowledge and the relevant pedagogy as applied to the Te Aho Matua environment.

269

Māori Education

269332 Māori Issues in Education **15 credits**

A study of relationships between cultural values and education and of the extent of Māori educational needs and aspirations.

269372 Understanding Migrant Cultures in Aotearoa/New Zealand **15 credits**

A study of immigrants and immigration in Aotearoa/New Zealand with a focus on developing effective cross-cultural teaching skills.

269711 Policy and Development in Māori Education **30 credits**

The course provides a critical analysis of policies for Māori education and of selected education policies which impact on Māori education. The role of the state and of school, urban and iwi communities of influence in relation to particular perceptions of Māori, and therefore of appropriate educational policy and development and practice will be explored.

269733 Mana Motuhake: Contemporary Issues in Māori & Indigenous Education **30 credits**

An analysis of power, politics and resistance that underpin a range of contemporary and topical social issues which impact on Māori and/or indigenous education. A critical examination of the role of advocacy, activism and protest in advancing Māori and indigenous rights and aspirations in the context of education.

269734 Mana Whānau: Whānau Engagement in Education **30 credits**

A critical examination of the role of whānau participation in education and the ways in which educators, educational institutions and organisations are able to engage with their Māori community to ensure successful social, cultural and educational outcomes for their Māori students within the paradigm of whānau ora.

269735 Mana Kura: Leadership in Māori Education **30 credits**

A critical examination of traditional and contemporary forms of Māori professional, personal and cultural leadership and the role of iwi, community and tribal organisations in educational governance.

269736 Mana Matauranga: Indigeneity, Innovation & Information **30 credits**

A critical examination of the role of information in indigenous societies and the impact of new technologies, social media, and the use of e-learning in indigenous education contexts.

271

Speech and Language Therapy

271150 Holistic Approaches to Communication Disorders **15 credits**

This course uses holistic and biopsychosocial frameworks to describe and understand the nature and impact of communication disorders across the lifespan. Environmental and conversational partner strategies are highlighted to promote communication access for children and adults with speech, language and communication support needs.

271151 Anatomy and Physiology of Speech and Hearing **15 credits**

An introduction to the anatomy and physiology of the speech and hearing systems in humans.

271154 Communication Development in Children **15 credits**

Explores communication development in children including communication milestones and the influence of sociocultural factors related to cultural and linguistic diversity and conversational partners' support.

271253 Early Years Language and Communication Support **15 credits**

An exploration of language and communication support needs in infants and young children and the application of evidenced-based early intervention that considers neurodevelopmental, ecological, and sociocultural factors.

271254 Speech Sound Disorders in Children **15 credits**

An examination of speech sound acquisition and the impact of speech sound disorders in children. Assessment and intervention approaches will be evaluated and applied to partnership-oriented and culturally safe practice with children and their families/whānau.

271255 Assessment Frameworks and Procedures for Speech-language Therapy Practice **15 credits**

This course introduces students to frameworks for planning and analysing assessments and provides supported opportunities to practice assessment procedures.

271256 Introduction to Speech-language Therapy Practice **15 credits**

This course supports students to begin to apply their speech-language therapy knowledge and skills to practice in well-supported contexts. The workplace learning is primarily with adults and/or children and their families/whānau.

271257 Language and Communication Support in Educational Contexts **15 credits**

An exploration of language and communication support needs experienced by school-aged children and young people in educational and community contexts. Support for their participation and learning in these contexts is based on evidence, neurodevelopmental, ecological, and sociocultural factors.

271258 Neurogenic Communication Disorders I **15 credits**

A theoretical and applied overview of neurological communication disorders, including acquired aphasia and related disorders.

271259 Deaf and Hard of Hearing **15 credits**

An exploration of the auditory system and functions, how these may be disrupted, and the lived experience of individuals who are deaf or hard of hearing. The course has a focus on assessment and support services, and strategies for facilitating communication across the lifespan.

271390 Fieldwork and Clinical Skills **30 credits**

This course extends students' clinical skills with an emphasis on holistic data gathering to inform intervention with particular attention to developing and consolidating intermediate-level clinical competencies, case management and responsiveness to Te Tiriti o Waitangi.

271392 Augmentative and Alternative Communication **15 credits**

A study of augmentative and alternative communication for individuals with complex communication needs.

271393 Neurogenic Communication Disorders II 15 credits

An examination of neurological cognitive communication disorders as a result of acquired brain injury including right hemisphere disorders (RHD), traumatic brain injury (TBI) and dementia.

271394 Motor Speech Disorders 15 credits

An examination of motor speech disorders/disabilities (mainly dysarthria and apraxia) that result from brain injury. Motor speech disorders, as a communication disability in adults, will be addressed by applying assessment and management principles and practices.

271397 Adult Dysphagia 15 credits

An examination of the assessment, analysis and interpretation, planning and management of swallowing disabilities (dysphagia) in adults.

271398 Research Methods for Speech and Language Therapy 15 credits

The study and application of research designs, relevant to current theory, research and practice, in speech and language therapy.

271480 Speech and Language Therapy Practice in Diverse Contexts 30 credits

Learning and inquiry on specific communication support needs within diverse contexts. Investigations will include analyses of the evidence base and practice implications related to principles, human rights, cultural diversity, and interprofessional services.

271481 Fluency 15 credits

An examination of fluency disorders that occur during childhood and into adulthood focusing on characteristics of fluency disorders and developmental and etiological factors. Evidence based assessment and intervention procedures will be identified and applied to cases.

271487 Paediatric Feeding & Swallowing 15 credits

A focus on typical feeding and swallowing development in infants and children and specific developmental disorders and conditions that contribute to or cause paediatric feeding disorders from birth to adolescence.

271489 Voice Disorders, Assessment and Treatment 15 credits

The study of the management of people with clinical (organic, medical) voice and communication challenges, professional voice users, trans and gender-diverse populations.

271490 Advanced Topics in Speech and Language Therapy 15 credits

This course involves in-depth evaluation of the evidence related to a topic relevant to current speech and language therapy practice.

271496 Advanced Clinical Course I 15 credits

This course facilitates reflection and clinical practice related to more advanced aspects of professional and clinical competency.

271498 Advanced Clinical Course II 15 credits

This course advances students' entry-level clinical skills related to current evidence-based practice. Students will be responsible for assessment and intervention for children and adults with a variety of communication and swallowing disorders.

271710 Evidenced-Based Practice in Speech and Language Therapy 30 credits

Advanced study of contemporary evidence-based practice in speech and language therapy. The implications of evidence-based practice in speech language therapy clinical settings are explored.

271711 Critical and Current Issues in Speech and Language Therapy 30 credits

An in-depth evaluation and analysis of critical and current trends arising in, and impacting on the work of speech language therapy clinicians and researchers.

271712 Theoretical Issues in Speech and Language Therapy 30 credits

Critical examination of theories and models and their impact on research and clinical practice in speech and language therapy.

271720 Research Report 30 credits

A research project based on systematic and analytical inquiry in an area related to speech and language therapy.

271781 Advanced Fluency 15 credits

An advanced investigation of fluency disorders that occur during childhood and into adulthood with a focus on characteristics of fluency disorders and developmental and etiological factors. Evidence for assessment and intervention procedures will be critiqued, analysed, and applied to cases.

271786 Advanced Speech and Language Therapy Practice in Diverse Contexts 15 credits

Advanced learning and inquiry related to specific communication needs in diverse contexts. Critical analysis of the evidence for support strategies and reflection on the practice implications related to principles, human rights, cultural diversity, interprofessional and collaborative models of practice.

271787 Advanced Paediatric Feeding and Swallowing 15 credits

The advanced study of neuro-anatomical and physiological principles of feeding and swallowing skills from a developmental perspective. Investigate specific developmental disorders and conditions that contribute or cause paediatric dysphagia and/or feeding disorders.

271789 Advanced Voice Disorders, Assessment and Treatment 15 credits

The advanced study of the management of people with clinical (organic, medical) voice and communication challenges, professional voice users, trans- and gender-diverse populations.

271796 Advanced Clinical Practicum I 15 credits

This course promotes critical reflection and practice related to advanced aspects of professional and clinical competency.

271798 Advanced Clinical Practicum II 15 credits

This course advances students' entry-level clinical skills and critical thinking related to current evidence-based practice. Students will be responsible for assessment and intervention for children and adults with a variety of communication and swallowing disorders.

271808 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

271809 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

271810 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

272**Applied Linguistics****272702 Second Language Learning Theories and Processes 30 credits**

A critical examination of theoretical perspectives accounting for second language learning processes.

272703 Contemporary Approaches to Language Teaching Methodology 30 credits

A critical survey of different approaches and methods used to develop language skills.

272704 Contextualising Curriculum and Materials Design 30 credits

A study of the principles, practice and contextualised nature of curriculum and materials design.

272705 Advanced TESOL for diverse learners and contexts 30 credits

An advanced and critical survey of current trends, policy, theory, and practice for diverse learners and contexts.

272706 Discourse Analysis 30 credits

An advanced exploration of key theoretical and analytical frameworks in discourse analysis and how to apply these to empirical data in a range of discourse genres.

272707 Language Documentation 30 credits

A practical introduction to language documentation to support language community goals, foregrounding the ethical responsibilities of researchers, while critically reflecting on how language documentation outcomes are communicated to community, academic and general audiences.

272715 Current Issues in Applied Linguistics 30 credits

A critical examination of current issues in applied linguistics research from both theoretical and practical perspectives.

Linguistics**272816 Thesis 120 Credit Part 1 60 credits**

A supervised and guided independent study resulting in a published work.

272817 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

Applied Linguistics**272873 Research Report 60 credits**

A supervised and guided independent study.

Linguistics**272899 Thesis 120 credits**

A supervised and guided independent study resulting in a published work.

Applied Linguistics**272900 PhD Applied Linguistics 120 credits****273****Adult Education****273784 Learning and Teaching in Tertiary Education 30 credits**

This course introduces participants to and extends their understanding on theories and practices of tertiary teaching, including theories of learning and motivation relevant to learners in tertiary and professional contexts. Participants will apply their learning in their own practice.

273785 Assessment and Evaluation in Tertiary Education 30 credits

This course offers an in-depth examination of principles, theories and practices underpinning diverse assessment tools, models and approaches in tertiary contexts to facilitate student learning. The course will enable participants to examine assessment policy in context, and create assessment approaches within their practice.

274**Physical Education and Health****275****Human Development****275102 Human Development 15 credits**

An introduction to the study of lifespan human development and learning within changing social and physical contexts.

275202 Development through Relationships 15 credits

Investigates lifespan development within the context of relationships from an attachment perspective.

275203 Development in Childhood 15 credits

An examination of physical, cognitive and psychosocial development during infancy and childhood in diverse contexts.

275204 Adult Development 15 credits

A consideration of the developmental characteristics of adults in various contexts.

275208 Development in Adolescence 15 credits

An examination of the physical, cognitive and psychosocial development during adolescence and emerging adulthood in diverse contexts.

275304 Development of Gender 15 credits

An in-depth study of gender development across the lifespan, including consideration of biological, sociological, and developmental perspectives of gender.

275320 Risk and Resilience across the Lifespan 15 credits

An applied study of human development, examining risk, protective, and promotive factors which contribute to resilience and positive developmental outcomes across the lifespan.

276**Mathematics Education****276330 Mathematics and Literacy in Society 15 credits**

An exploration of the importance of being literate and numerate through an in-depth study of our engagement with mathematics and literacy in everyday life.

276700 Developing Mathematical Inquiry Communities 30 credits

An in-depth study of the research, theory and evidence-based practices associated with mathematical inquiry aimed at raising student achievement. Participants will analytically investigate how mathematical inquiry learning communities are constructed and how they support all learners to engage in mathematics at a high level of achievement.

276731 STEM in Education and Society 30 credits

Students will develop scholarship, engagement, and teaching in the areas of science, technology, engineering, and mathematics (STEM).

276782 Mathematics in Schooling and Society 30 credits

An exploration of the role of mathematics in education and society. Participants will critically examine the nature of mathematics, and develop understanding of a range of theories of learning drawn from different worldviews related to mathematics education. This will include a focus on learning trajectories for key mathematical concepts.

276785 Making Mathematics Accessible 30 credits

An in-depth study of the research, theory and evidence-based practices associated with equitable classroom practices that make mathematics accessible for all learners.

278**Primary Teaching****278410 Professional Practice 1 (Primary) 30 credits**

This course provides an introduction to professional practice in primary school settings in Aotearoa New Zealand, through observation, teaching, critical self-reflection and evaluation of practice.

278411 Professional Practice 2 (Primary) 30 credits

This course provides further development of professional practice in primary school settings in Aotearoa New Zealand, through observation, teaching, critical self-reflection and evaluation of practice.

278412 Curriculum and Pedagogy A (Primary) 30 credits

This course introduces students to the theory and practice of curriculum, pedagogy and assessment in the context of primary school settings in Aotearoa New Zealand guided by commitment to Te Tiriti o Waitangi and tangata whenuatanga.

278413 Curriculum and Pedagogy B (Primary) 30 credits

This course provides further development of the theory and practice of curriculum, pedagogy and assessment in the context of primary school settings in Aotearoa New Zealand guided by commitment to Te Tiriti o Waitangi and tangata whenuatanga.

279

Social Policy

279101 Social Policy: An Introduction 15 credits

A foundational knowledge of social policy, providing a broad introduction introducing students to the history of social policy in Aotearoa New Zealand and key theories and concepts informing the development of social policy.

279201 Social Policy: Concepts and Theories 15 credits

An exploration of the influence of different political theories and key concepts on the development of social policy in Aotearoa New Zealand. Applications to contemporary social policy case studies are included.

279203 Social Policy and Government 15 credits

An exploration of government systems, policy and legislative making processes with relevance to social policy.

279301 Social Policy: Political Theories and Approaches 15 credits

Exploring political theories and conceptual tools for analysing policy-making and the processes for engaging with the policy process in Aotearoa.

279302 Policy Research and Evaluation 15 credits

An examination of the relationship between policy and research and the concepts, techniques and issues involved in policy and programme evaluation. The course includes practical experience in evaluation research.

279401 Social Policy Evaluation 15 credits

An examination of social policy programmes and/or legislation which provides students with an opportunity to explore areas of particular interest.

279701 Social Policy: Beyond the Welfare State 30 credits

An advanced analysis of the trends, theories and impacts of social policy in relation to the state, individual and the distribution of welfare. An examination of the historical development of social policy including theories and models of welfare, approaches to political economy, Te Tiriti and welfare state typologies.

279703 Theorising Today's Social Policy for the Future 30 credits

A critical examination of social policy and its current developments. Utilising conceptual tools and new theories of social policy including sustainability, decolonisation and crisis theory to analyse social policy.

279796 Research Report (30) 30 credits

A systematic enquiry into an area of public policy which is to be presented in the form of a research report. The policy analysis will be expected to use appropriate research techniques, and most typically will be in the form of a piece of applied policy or programme evaluation.

279798 Research Report (60) 60 credits

279800 MPhil Thesis 120 credits

A supervised and guided independent study resulting in a published work.

279801 MPhil Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

279802 MPhil Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

279816 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

279817 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

279873 Research Report Social Policy (60) 60 credits

279881 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

279882 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

279898 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

279899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

279900 PhD Social Policy 120 credits

280

Process and Environmental Technology

280016 Elementary Meat Science 30 credits

Elementary chemistry, biology and physics as they apply to meat science. Atomic and molecular structure, bonding, chemical equilibria, acids and bases as well as an introduction to organic chemistry. Biological systems including single and multicellular organisms. The study of force, work, energy, heat, light and electricity.

280017 Elementary Meat Mathematics 15 credits

Elementary mathematics applicable to the operation of a meat processing plant including mathematical principles as linear equations and statistics.

280101 Animal Production Through to Carcass Classification 15 credits

Current and future practices for meat production from farm to carcasses leaving the slaughter floor. Topics include animal growth and development, genetics and breeding, on-farm opportunities to influence carcass and meat quality, pre-slaughter handling of meat-producing animals, slaughter and carcass dressing procedures, carcass classification, animal welfare, occupational safety and health, and factory farming.

280102 Preparation and Preservation of Fresh Meat 15 credits

The microbiology, biochemistry and technology involved in the production of fresh and frozen meat and meat products as well as ways of increasing their chilled and frozen shelf life. Includes a review of hazardous microbes carried by fresh meat and meat products and their control in a modern processing facility.

280103 Meat Plant Services and Utilities 15 credits

Theory and application of services into the meat plant, including refrigeration, steam, hot water, air and the supply of potable water and the handling of wastewater as well as other waste streams. Issues such as waste minimisation, legislation environmental management, and resource optimisation will also be considered.

280104 Co-products Derived from Meat Animals 15 credits

Technology including the applied microbiology and chemistry involved in the processing of hides and pelts to the finished leather stage, inedible and edible processing of blood, foetal blood and co-products, casings, specialised chemicals, collagen and yields for the various co-product options.

Process Engineering

280105 Quality Assurance for the Meat Industry 15 credits

Food safety from farm to the consumer's plate will be examined using methods for product and process control and improvement including, HACCP, risk management, ante- and post-mortem inspection, auditing principles, general food safety principles and occupational safety and health. Consideration will also be given to current legislation and OMAR requirements that impact on the meat processing industry.

Process and Environmental Technology

280106 Added-Value Processing of Meat and Meat Products 15 credits

The chemistry, microbiology and processing of the production of a wide range of added value meat products will be covered in the course. Topics include restructured meat technologies, hamburger manufacture, ready-to-eat meals, packaging, canned products, surimi processing, bone and mechanically recovered meat processing, tallow refining, fine chemical processing, additive properties and uses, yields and product costing.

280107 Automation & New Technology in the Meat Industry 15 credits

Introduction to automation, new technology and product development methods in the international meat industry including consideration of drivers and constraints and case studies. Technologies covered will include but are not limited to: sensors and machine vision, data capture, traceability, factory farming, biotechnology, cultured meats, and advances in packaging, preservation, decontamination.

Process Engineering**280201 Industrial Microbiology 15 credits**

An industry focused course in microbiology with particular reference to the importance of microorganisms and their application in selected industries. This programme of study examines the growth and control of industrially important microorganisms, the role of microbes in the production of food products, their application in both waste treatment and in industrial fermentation, and the role of microbes in the health sector. A laboratory course.

280271 Heat and Mass – Conservation and Transfer 15 credits

This course extends the concepts of the conservation and transport of heat and mass and thermodynamics in processing systems, the material and system properties that affect these processes and the sourcing or prediction of appropriate material and system data. Unit operations in food or chemical processing industries will be used to demonstrate the application of these principles. A practical course.

280272 Fluid Flow and Particle Technology 15 credits

This course extends the concepts of fluid flow and particulate systems. The principles of fluid mechanics and characterisation of rheological properties are applied for Newtonian and non-Newtonian fluids. The characterization and dynamics of particulate systems are introduced and applied to unit operations used in the food and chemical industries, such as cyclones, settlers, centrifuges, fluid beds and filtration. A practical course.

280273 Engineering Properties of Food and Food Systems 15 credits

This course introduces methods to measure, predict and calculate the thermo-physical engineering properties of complex food systems including heat transfer, mass transfer, thermodynamic and Newtonian and non-Newtonian fluid properties. Refrigeration, fluid flow, and mass transfer based unit operations from the food industries are examined and used to demonstrate the application of these principles and properties. A practical course.

280304 Bioseparation and Purification Processes 15 credits

The principles and practice of bioseparations and purification processes. The following unit operations will be included: distillation, leaching, liquid/liquid extraction, protein fractionation, flocculation and chromatographic separations. A laboratory course.

280341 Environmental Technology 15 credits

This course will review physical, chemical, and biological principles and processes to treat pollutants with emphasis on the design and operation of biological treatment processes based on bioenergetics and biokinetics principles. Students are introduced to the processes for waste management, nutrient removal, hazardous pollutant detoxification, energy generation from waste, and the use of algae and macrophytes in environmental technology.

280371 Food Process Engineering Operations 15 credits

The application of engineering principles to operations used in the food or chemical processing industries. Operations such as evaporation, drying, membrane technologies, refrigeration and process cooling systems will be used as examples of how the underlying principles of thermodynamics, conservation and transport of heat, mass and momentum can be used to select, design and optimise industrial processes.

280372 Reaction Technologies and Process Modelling 15 credits

A systematic approach to modelling processing operations in terms of heat, mass and momentum transfer. Modelling reactions and reactor systems to predict the progress of reactions in food preservation and processing operations, chemical and enzymatic catalysis, and biochemical reaction systems. A laboratory course.

280702 Process Control 15 credits

Practical process control techniques including tuning single proportional integral derivative controllers, choosing appropriate control loops for a processing plant and measurement instrumentation. An overview of advanced control techniques. Programmable logical controllers. A practical course.

280721 Process Improvement 15 credits

This course critically appraises key industrial processes by establishing their core reaction engineering and thermodynamics, identifying theoretical limits in terms of material and heat balances across product life cycles and by defining their current effectiveness. 'Potential for further improvement' is evaluated, such as new emerging competitor processes, alternative reaction pathways, process intensification concepts, hazard mitigation, or emerging life cycle custodianship practises.

280760 Industrial Refrigeration 15 credits

The customer/contractor interface and preparation of specifications; ozone depletion, global warming and refrigerant choice; estimation of heat loads; prediction of chilling and freezing and design of chillers and freezers; product weight loss; refrigeration plant layout and design; operational efficiency of refrigeration systems; absorption refrigeration; water vapour and refrigeration.

280771 Advanced Food Engineering 15 credits

Integrated design of processes based on the application of thermodynamic and transport phenomena principles. Systematic methods for the development of dynamic modelling, simulation and visualisation of heat and mass transport applied to chemical and bioprocessing industries.

281**Electronics and Information Engineering****281272 Signals and Systems 15 credits**

A study of signals and linear systems and their applications in modern engineering. Representation of continuous and discrete time signals and systems in the time and frequency domains. Stability, feedback, sampling and aliasing. Introduction to design of analogue and digital filters. Provides a foundation for later studies in control engineering, advanced signal processing and communications.

281281 Analogue Electronic Systems 15 credits

This course builds on the fundamentals of DC and AC electrical circuit analysis. It provides an introduction to the design and building of analogue electronic systems. The course will cover a blend of circuit theories, operational amplifier circuits and applications, filters, oscillators, diodes and transistors circuits.

281282 Digital Electronic Systems 15 credits

This course builds on the fundamentals of digital logic and the principles of computing. It provides the methodology for designing and building complex digital electronic systems. The topics are a blend of combinatorial circuits, sequential circuits, finite state machines, and Field-Programmable Gate Arrays (FPGAs). It establishes a foundation for further advanced design in embedded systems.

281353 Control Engineering 15 credits

This course provides the foundation for the analysis and implementation of feedback control systems. Design and tuning of PID and other linear controllers to meet time and frequency specifications are studied in detail. Both analogue and digital control are considered. Non-linear control is introduced through fuzzy logic control. Practical engineering applications are used to illustrate theory and concepts.

281384 Embedded Systems Design 15 credits

This course lays the foundation for designing and building embedded electronic systems. The topics are a blend of advanced features of a modern mixed-signal microcontroller, real-time operating systems (RTOS) and Field-Programmable Gate Arrays (FPGAs)

281385 Advanced Electronic Circuits 15 credits

This course covers the foundation for designing and building advanced electronic circuits and systems. It also lays the foundation for more advanced studies in electronic circuits. The topics are a blend of electronic circuits, sensor interfacing and instrumentation amplifiers, low-noise amplifiers, oscillators and filters, radio frequency and communication circuits, power amplifiers, power supply design fundamentals, and phase locked loops.

281755 Digital Signal Processing 15 credits

This course studies the processing of discrete-time signals in the time and frequency domains. Students are introduced to the design and realisations of digital filters; the theory and application of transform techniques including

discrete Fourier transform and discrete wavelet transform; the application of multi-rate signal processing concepts to efficient sample rate conversion and filter banks; and adaptive filtering algorithms.

281776 Advanced Communication Engineering 15 credits

This course covers the foundation of modern communication systems, satellite communication systems and wireless networks. It provides an in-depth study of the wireless medium, wireless network planning and operation, communication systems and standards. There is thorough examination of advanced topics including equalization, rake receivers, MIMO & smart antenna systems, wireless network security.

281780 Advanced Electronic Circuits 15 credits

This course covers the designing and building of advanced electronic circuits and systems. The approach to design is through advanced application of sensor interfacing, instrumentation and low-noise amplifiers, oscillators and filters, MOSFET circuits, power amplifiers, and power supply design.

282

Mechatronics and Automation Engineering

282260 Manufacturing Engineering and Computer Aided Design 15 credits

This course provides students with knowledge in the working principles of, and the concepts needed to design for, traditional and modern manufacturing processes. Processes covered include a range of manufacturing methods dealing with plastics and metals. It also teaches Computer Aided Design (CAD) as an engineering communication and design tool. A practical course with projects that link manufacturing and CAD.

282371 Mechanics and Materials 15 credits

Properties of materials including stress and strain, yield, strengthening methods and failure. Selection of materials by property profiles, and manipulation of material properties. Mechanics of materials including axial loading, shear, beams, torsion, stress concentrations and structures.

282372 Mechanism and Component Design 15 credits

This course is a study of advanced static and dynamic analysis of loaded structures and mechanisms and it will introduce the finite element method of stress analysis.

282373 Fluid Mechanics & Thermodynamics 15 credits

This course applies fluid mechanics to systems which might be encountered in engineering practice. Topics include fluid properties, hydrostatics, laminar and turbulent flow, energy and continuity equations in one dimension. The course also covers basic concepts of thermodynamics, including perfect gas properties and zero'th, first and second laws.

282758 Simulation, Modelling and Optimisation 15 credits

A practical course in modelling, simulation and optimisation of systems in industry.

282762 Robotics and Automation 15 credits

A study of automation and industrial robotics, its elements and systems. This course uses projects that allow students to integrate multiple mechatronic and robotic systems capable of automating specific, repetitive tasks such as those commonly found in industry. Students will study the control of industrial robots and design vision systems for component identification. Subsystems will be integrated to follow a systems approach to the design of Industrial robotic applications with consideration of programming, control and process design. A practical, project based course.

282772 Industrial Systems Design and Integration 15 credits

Design of mechatronic elements and components to form a working system. Review of sensors for integration into a microcontroller- and/or PC-controlled, mechatronics system. Robotics, the use of simulation packages to effectively analyse mechatronics systems, future manufacturing technologies and how they may impact on the field of mechatronics. A practical, project based course.

282778 Mechatronics 15 credits

An advanced study of mechatronics design philosophy, its elements, and systems. The course focuses on motion control and interfacing, sensors and interfacing, microcontroller and programming applications, behaviour control

and implementation, dynamics simulation of working machines, mechatronics in PC-based control system, integration of mechanical, pneumatic and electric and electronics systems. A practical, project based course.

283

Agronomy

283006 Pasture and Crop Production 15 credits

An introduction to the importance of pastoral farming to New Zealand agriculture and the role of legumes in pastures. The identification, selection, and establishment of pasture species and crops, including weed control. The seasonality of pasture growth and matching pasture growth with animal requirements, through monitoring of grazing systems, supplementary feeding, and crop management.

Agriculture/Horticulture Plants

283201 Pasture and Crop Agronomy 15 credits

The husbandry of agricultural plants and the management of plant communities at the farm level. Topics include balancing pasture growth and animal demand, pasture assessment, pasture establishment, cash crops, growth and utilisation of forage crops and control of weeds and pests.

283301 Pasture Production and Practice 15 credits

The practical application of pasture production and grazing management principles to grazing systems. An introduction to sward dynamics and the herbage factors influencing both the productivity and utilisation of grazed pastures.

Agronomy

283310 Topics in Agronomy 15 credits

This course offers students modules covering different aspects of agronomy from which they need to select two. Modules: Weed control, farm forestry, seed technology and crop production. Each module runs for 6 weeks and includes laboratory or field work.

283311 Controlling Weeds 15 credits

Aspects of weed biology will be studied to help understand how to obtain efficient and effective weed control. The full range of control techniques, both chemical and non-chemical, will be discussed. Students will learn how to develop integrated weed control programmes for their specific area of interest in agriculture, horticulture, forestry or conservation.

283321 Trees on Farms 15 credits

A study of aspects of the biology and ecology of trees which influence their use on farms and in farming systems. Woodlots and wood products; biomass production and effluent disposal; agroforestry systems and forage production. The value of trees for soil stabilisation, shelter, amenity and landscape management.

283702 Advanced Agronomy 30 credits

Advanced studies in agronomy based on a selection of two modules from within the following: seed technology, seed science, arable crop, pasture management, pasture science, weed science and forestry.

283707 Molecular Plant Breeding 30 credits

An overview of methods used in plant breeding. Special emphasis is given to molecular breeding and breeding for tolerance to abiotic stress with topics including mapping, markers and QTL, transgenics, metabolomics, polyploidy, cytogenetics, tissue culture, IP and ethics. A block course allows students to see application of these techniques to plant breeding programmes in industry, and encourages discussion and networking.

283708 Quantitative Plant Breeding 30 credits

A career development course on the application of quantitative genetics and plant breeding. Topics include objective setting, plant genetic resources, base population development, quantitative genetic variation, selection efficiency, selection of multiple traits, GXE interactions, line development, backcross breeding, recurrent selection and variety development. Two block courses allow students to visit plant breeders, and encourage discussion and networking.

284

Horticulture (Production & Landscape)**284201 Horticultural Production Systems 15 credits**

An interdisciplinary study of the major vegetable and fruit production systems in NZ, and overseas. Different systems and subsystems will be analysed, using indicators including productivity, quality, profitability and sustainability.

284301 Horticultural Crop Development & Yield 15 credits

Physiological and applied aspects of monitoring, predicting and manipulating crop growth and development in production horticulture in order to optimise yield, quality and timeliness. Prediction of crop growth and development in response to changes in the environment and the associated decisions made by growers.

Agriculture/Horticulture Plants**284342 Horticultural Productivity and Quality 15 credits**

The role of crop architecture and the modification of the aerial environment for optimising yield and pre-harvest product quality, as well as the factors affecting quality and shelf life of horticultural commodities through the handling chain.

Horticulture (Production & Landscape)**284703 Vegetable Production Science 15 credits**

The science and production of quality vegetable products from establishment to harvest. Topics will align to student interests in vegetable crop science including: factors affecting productivity and quality, specialist production systems including root, tuber and leafy crops, crop nutrition, irrigation and harvest.

284704 Fruit Production Science 15 credits

Production of quality products of subtropical, warm and cool temperate fruits. Topics meet student interest and could include factors affecting productivity and quality; manipulation of tree, flower and fruit development; biological production systems; pre-harvest factors influencing product quality; quality management.

284741 Post-harvest Physiology 30 credits

Reviews the role of physiological principles in post-harvest systems. Topics covered depend upon class interests, and may include control of water loss, functions of cell walls and membranes; calcium; ethylene; chilling injury; genetic manipulation; modified atmospheres and non-chemical disease control.

285

Plant Health**285201 Understanding Plant Protection 15 credits**

The importance of diseases, pests and weeds to horticultural, agricultural and forestry production, trade, gardening and conservation is outlined. The course introduces the biology of these organisms and gives an understanding of their management and control. An introduction to strategies available for chemical, non-chemical and integrated control methods is included together with examples. A course of practical work.

285742 Topics in Advanced Plant Protection 30 credits

Selected topics in Advanced Plant Protection, including host defence and disease resistance mechanisms, weed control and herbicide activity, as well as principles and methods of integrated arthropod pest (insect and mite) management.

286

Equine**286201 Equine Production 15 credits**

An exploration of horse production systems within New Zealand with comparison to the methods used in other major equestrian countries. Using different equine production systems as examples, the processes from birth to intended use are compared including how the industry is controlled and regulated and the impact this has on owners, trainers and administrators.

286251 Equine Behaviour, Training and Welfare 15 credits

The course will describe the ethology of the horse. Particular emphasis will be placed on understanding the theory of learning and how it underpins basic training and training for the different disciplines. It will describe the welfare of horses associated with different equine management systems both in New Zealand and overseas. The legislation which protects horses will be described.

286301 The Equine Lower Limb 15 credits

Exploration of the unique aspects of the tissues of the foot and lower limb of the horse. The emphasis is placed on the structure and functions of the moving parts of the lower limb, how alterations in the functioning of the limb can lead to changes in the horse's gait and how corrective measures can be rationally proposed.

286321 Responses to Training in the Equine Athlete 15 credits

As the equine athlete is trained changes occur in the cardiovascular, respiratory and musculoskeletal systems. The basic and applied aspects, and the detection of changes, will be discussed, in the context of training regimens for different equine activities.

287

Industrial Innovation**287455 Advanced Industrial Management Practices 15 credits**

This course covers the development of professional skills essential for management roles in industrial businesses, e.g. in manufacturing, food and beverage, etc. It involves developing skills such as: managing conflict and change, building teams and setting goals; through the study of World Class manufacturing practices. This is achieved through case studies and relates to real-life scenarios through self-reflection. It also develops a defined career plan to attain management level positions in industry.

287706 New Product Development Practices 15 credits

An advanced study of new product development principles and best practices that combined, provide structure and discipline for bringing successful new products and services to market. An analysis of new product development processes, market and customer research for product development decision making, and the tools, techniques and metrics that underpin new product development.

287735 Quality Improvement 15 credits

Concepts of and the major approaches to quality improvement. The full range of quality improvement methodologies, tools and techniques as well as team-based problem-solving methods.

287740 Innovation Management 15 credits

An advanced course of study of innovation management practices applied to product innovation, including new product strategy, portfolio management, organisational management and performance measurement and knowledge management. Investigation of current literature and industry practice, applied to companies of different sizes and types.

287741 Quality System Development and Management 15 credits

All organisations are required to effectively manage the quality of their goods and services, and that of the processes and systems that produce or deliver them. This course introduces the key principles of quality systems and their control and management. This includes core definitions, key theories, relevant standards, documentation requirements, and associated tools, methods and principles for managing and controlling quality.

287745 Lean Six Sigma 30 credits

This course examines continuous organisational systems improvement using the philosophies, tools and techniques of lean six sigma. It covers core essential concepts such as value and waste; process variation; and performance measurement. The block courses utilise a range of practical games and activities that simulate: measurement studies and analysis; process and problem definition; and production or service delivery system improvement.

287886 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a thesis.

287887 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a thesis.

287888 Thesis 90 credits

A supervised and guided independent study resulting in a thesis.

289**Creative Media Production****289100 Screen Arts, Creativity and Critical Thinking 15 credits**

In this course, taura are introduced to a range of concepts and theories that provide insight into why artists make screen media, the value of media to those who engage with it, and the impact of media on societies and cultures. Taura will critically investigate screen practices and texts, gaining a greater understanding of their own values, motivations and processes as creative practitioners.

289101 Introduction to Web Production 15 credits

An introduction to industry standard web platforms and authoring tools. Students will gain a creative and technical knowledge and understanding of media concepts and production processes essential for the production of interactive media on multiple platforms.

289102 Visualisation for Media Production 15 credits

Students develop visualisation and rendering techniques to enable them to give visual form to abstract ideas and concepts. These visualisations will be applied to a range of formats including storyboarding, concept visualisation and character development.

289103 Introduction to Animation 15 credits

An introduction to the principles and concepts of animation. Students will gain a creative and basic technical knowledge of the tools and techniques essential to the development and production of animation.

289104 Introduction to Visual Effects 15 credits

An introduction to the principles and concepts of visual effects. Students will gain a creative and basic technical knowledge of the tools and techniques essential to the production of visual effects.

289106 Introduction to Game Development 15 credits

An introduction to the principles and concepts of game development. Students will gain a creative and basic technical knowledge of the tools and techniques essential to the development and production of games.

289112 Introduction to Film Production 15 credits

An introduction to the principles and concepts of film production. Students will gain a creative and basic technical knowledge of the tools and techniques essential to the development and production of film.

289113 Introduction to Media Technology 15 credits

An introduction to the principles and concepts of media technologies. Students will gain a creative and basic technical knowledge of the tools and techniques essential to the development and production of media technology.

289116 Introduction to Immersive Media 15 credits

An introduction to the principles and concepts of immersive media. Students will gain a creative and basic technical knowledge of the tools and techniques essential to the development and production of immersive media.

289117 Introduction to Factual Production 15 credits

An introduction to the principles and concepts of factual production. Students will also gain a creative and basic technical knowledge of the tools and techniques essential to the development and production of factual content.

289120 Working with Scripted Material 15 credits

An introduction to the processes of reading, interpreting, and working with scripted content with the intent of realising the material through various production practices. Students will work with scripts for multiple platforms, engaging through the lenses of production, interpretation, self-reflection and indigenous making.

289150 Professional Cultures in Screen Arts 1 15 credits

An introduction to professional literacies and industry best practices for building a sustainable and healthy career in the field of Screen Arts. Taura will also be supported in gaining communication and interpersonal skills and develop their personal growth and engagement in learning.

Creative Arts**289190 Creative Arts Special Topic 1C 15 credits**

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

Creative Media Production**289200 Screen Arts, Societies and Cultures 15 credits**

In this course, taura will engage with a range of critical and philosophical concepts and perspectives that provide insight into their developing creative practices and offer a wider understanding of the social and cultural significance of their work. Taura develop tools for critically assessing and evaluating collaboration and communication within group environments and employ reflective and analytical approaches to their work informed by their growing critical understanding.

289205 Intermedia 15 credits

Students will work collaboratively with a range of production technologies to create examples of intermedia arts practices. Students work across disciplines integrating extant technologies and developing new technologically-focused practices in order to better understand how experimental electronic arts practices can integrate new and emerging media technologies.

289208 Animation Production 15 credits

Further the application of industry standard tools for animation production. Students will gain extended creative and technical understanding of animation processes and develop their knowledge and application of aesthetics and form.

289209 Visual Effects Production 15 credits

Further the application of industry standard tools for VFX production. Students will gain extended creative and technical understanding of VFX production processes and develop their knowledge and application of aesthetics and form.

289210 Game Production 15 credits

Further the application of industry standard tools for game development. Students will gain extended creative and technical understanding of game development processes and develop their knowledge and application of aesthetics and form.

289211 Film Production 15 credits

Further the application of industry standard tools for film production. Students will gain extended creative and technical understanding of film production processes and develop their knowledge and application of aesthetics and form.

289213 Media Technology Production 15 credits

Further the application of industry standard tools used for media technology development. Students will also gain extended creative and technical understanding of media technology processes and develop their knowledge and application of aesthetics and form.

289216 Immersive Media Production 15 credits

Further the application of industry standard tools for immersive media production. Students will gain extended creative and technical understanding of immersive media production processes and develop their knowledge and application of aesthetics and form.

289217 Factual Production 15 credits

Further the application of industry standard tools for factual production. Students will also gain extended, creative and technical understanding of factual processes and develop their knowledge and application of aesthetics and form.

289218 Animation Project 15 credits

Further extend knowledge of industry standard tools for animation production. Students will apply techniques, creative approaches and methodologies to the production of a short animation project.

289219 Visual Effects Project 15 credits

Further extend knowledge of industry standard tools for visual effects production. Students will apply techniques, creative approaches, and methodologies to the production of a short visual effects project.

289220 Working with Scripted Material 15 credits

In this course students will be reading, interpreting, and working with scripted content with the intent of realising the material through various creative media production practices. Students will work with scripts and student-created material for film, television, animation, game, augmented reality, and other emerging media.

289222 Film Project 15 credits

Further extend knowledge of industry standard tools for film production. Students will apply techniques, creative approaches, and methodologies to the production of a short film project.

289223 Media Technology Project 15 credits

Further the application of industry standard tools used for media technology development. Students will also gain extended creative and technical understanding of media technology processes and develop their knowledge and application of aesthetics and form.

289226 Immersive Media Project 15 credits

Further extend knowledge of industry standard tools for immersive media production. Students will apply techniques, creative approaches, and methodologies to the production of a small immersive media project.

289227 Factual Project 15 credits

Further extend knowledge of industry standard tools for factual production. Students will apply techniques, creative approaches, and methodologies to the production of a short factual project.

289230 Game Project 15 credits

Further extend knowledge of industry standard tools for game development. Students will apply techniques, creative approaches, and methodologies to the production of a small game project.

289240 Audio Production 15 credits

Gain a knowledge and understanding of industry standard tools for audio production. Students will also gain a creative and technical understanding of audio production processes and develop their knowledge and application of aesthetics and form.

289250 Professional Cultures in Screen Arts 2 15 credits

This course further develops concepts related to industry best practice for building a sustainable and healthy career in the field of Screen Arts. Taura will continue to be supported in developing their communication and interpersonal skills and strengthen personal and growth and engagement in learning at this level.

Creative Arts**289291 Creative Arts Special Topic 2E 15 credits**

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

289292 Creative Arts Special Topic 2F 15 credits

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

Creative Media Production**289300 Locating a Critical Screen Practice 15 credits**

Taura will engage with concepts and theories that allow them to critically understand their own works, practices, and positionalities as makers in Aotearoa New Zealand. By employing their growing understandings of media ethics, alongside theories of representation, power and ideology, taura will embed their creative process with critical thinking and consider their roles and responsibilities as media makers and as the producers of screen media.

289302 Major Project Innovation Lab 15 credits

Students will engage in ideation, analysis, and research of creative work within the stated parameters of an advanced project brief. Students will develop and prepare pitch presentations individually and in small groups, demonstrating the viability of the proposed ideas. Students will then apply problem-solving skills to organise these ideas into a pre-production package appropriate to their role and area of expertise.

289303 Major Project Development 15 credits

Students engage in technical prototyping, technical ideation, and practical experimentation associated with preparing for Major Project production and post-production studio courses. Techniques are project and discipline-specific and may include developing new technologies and learning pipeline-specific methods and tools.

289323 Screen Production Development 15 credits

Students work in trans-disciplinary teams assisting in the production of advanced projects. Students take on assistant production roles that support various scheduled production tasks, and reflect on the development of their own practice.

289333 Screen Arts Major Project 30 credits

Work to an advanced technical, creative and professional standard in a collaborative production environment to complete a Major Project. Students will put into production the projects developed in the Major Project Development course managing deadlines and schedules to ensure project completion.

289340 Studio and Location Audio 15 credits

Gain knowledge and understanding of audio production tools in the studio and on location. Students will also be introduced to working with interactive audio platforms and environments.

289341 Advanced Audio 15 credits

Gain an advanced knowledge and understanding of creative and technical processes, including sound and music recording, editing, and mixing. Students will also advance their knowledge of audio production for interactive platforms.

289350 Professional Cultures in Screen Arts 3 15 credits

Develop professional skills in preparation for a career in the creative industries. Taura will be supported in developing professional communication and presentation skills and to continue to strengthen personal growth and engagement in learning at this level.

Creative Arts**289390 Creative Arts Special Topic 3C 15 credits**

Centering on a particular aspect of creative arts at an advanced level, this course focuses on projects which result in professional standard outputs that demonstrate creativity and/or innovation. Offerings change from year to year and the course may not be offered in a particular year.

289391 Creative Arts Special Topic 3D 15 credits

This course focuses on a particular aspect or aspects of creative arts. Offerings change from year to year and the course may not be offered in a particular year.

Creative Media Production**289701 Production Planning and Development 30 credits**

Students gain a professional knowledge and develop expertise in a range of creative research practices, tools and techniques for organising large scale productions. Students will apply these skills toward planning and communicating an Advanced Production Project.

289702 Screen Arts Critical Frameworks 15 credits

Students become competent in situating their work within research methodologies and principles to support their development as critically-informed creative practitioners. Students learn to frame and present their creative practice as research via the development of critical reflexive and analytical skills, and to engage in the development of a research proposal for their advanced production project.

289703 Contemporary Creative Media Production Project 15 credits

Engagement with new thinking in creative media production research through a specific lecturer-led project.

289750 Professional Cultures 4 15 credits

Develop professional skills for working on large scale productions and showing leadership. Students will be further supported in portfolio development and preparing for employment or self-employment in the creative industries. Students will also be supported in developing professional communication and presentation skills and to continue to strengthen personal growth and engagement in learning at this level.

289803 Advanced Production 60 credits

Students will produce and finalise an advanced work demonstrating highly executed production standards informed by their research. Students will be required to demonstrate and sustain an professional creative and technical level of proficiency together with professional production management of workloads and deadlines.

289811 Screen Arts 120 credit Thesis Part 1 60 credits

Preparation of a thesis consisting of an advanced Screen Arts-led research project and an exegetical component to satisfy the requirements of the Master of Screen Arts qualification.

289812 Screen Arts 120 credit Thesis Part 2 60 credits

Continuing preparation of a thesis consisting of an advanced Screen Arts-led research project and an exegetical component to satisfy the requirements of the Master of Screen Arts qualification.

290**Retail****290201 Retail Knowledge Internship 15 credits**

The internship provides the participant with a practical understanding of the components of a retail operation from buying (supply end) to delivery (customer end).

290202 Design Thinking for Business Operations 15 credits

This course applies the principles of design thinking to examine the operations of a business (physical and virtual), and how they are integrated to deliver the business proposition to satisfy customer needs and wants.

290203 Buying and Category Management 15 credits

A study of the theory and practice of effective product buying from suppliers, and the planning of product range construction and execution of merchandising the range to the customer in the retail environment.

290204 Managing the Customer Experience 15 credits

This course examines the customer experience when navigating physical and virtual service environments. It explores the theory and practice regarding customer experience.

290301 Retail Experience Internship 30 credits

This capstone internship involves extensive work within a retail business to analyse and critique current practices against retail and business theories and international best practice.

290302 Strategic Transformation in Retailing 15 credits

A study of the strategic models and frameworks used by retail businesses to construct strategies to ensure business transformation and viability. This course evaluates historical practices of strategy formation as well as how changes in the modern marketplace are affecting retail strategy.

292**Portuguese****292101 Introductory Portuguese Language I 15 credits**

An introduction to basic communication skills in spoken and written Portuguese. Aspects of contemporary Brazilian culture and society are also studied.

292102 Introductory Portuguese Language 2 15 credits

An extension of basic communication skills in spoken and written Portuguese. Aspects of contemporary Brazilian culture and society are also studied.

292201 Intermediate Portuguese Language I 15 credits

Intermediate level written and oral comprehension and communication skills in Portuguese, providing a broad linguistic base for the study of Brazilian culture, literature and civilisation.

292202 Intermediate Portuguese Language 2 15 credits

An extension of intermediate skills in reading, free composition, listening comprehension and oral communication to illustrate aspects of contemporary Brazilian culture and society.

292301 Advanced Portuguese Language 15 credits

Advanced level skills in reading, free composition, listening comprehension and oral communication in Portuguese, illustrating aspects of contemporary Brazilian culture and society.

292305 Brazilian Culture and Heritage 15 credits

Significant aspects of modern Brazilian history, literature, art and culture. This course is taught in Portuguese.

293**Creative Arts****293001 Foundation Drawing 15 credits**

In this course students are introduced to working in a creative arts studio to develop skills in a variety of hand drawing and computer aided methods and materials. The drawing techniques taught will enable students to use drawing as a mode to generate, record and develop creative ideas.

293002 Foundation Sound and Image 15 credits

In this course students will be introduced to working in a creative studio environment, learning techniques and processes which will enable them to create their own video project. Students will be guided to set their own brief, developing initially from their own soundtrack and storyboard plan.

293003 Foundation Fabricate 15 credits

In this course students will be guided in the process of creating a character profile. Students will engage with ideation and analysis in developing their creative work. Students will work in a creative studio environment and be introduced to model-making, industrial sewing and 3D printing to develop a costume element, prop or character bust model.

293125 Explorations in Narrative 15 credits

Explorations in Narrative introduces students to the processes of analysing, interpreting, and creating stories with the intent of realising the material through various creative practices. With the option of producing written or visual narratives, students will gain a foundation in storytelling that can be applicable to diverse creative practices.

293126 Explorations in Image and Meaning 15 credits

Explorations in Image and Meaning explores how creative practitioners capture, construct and manipulate two-dimensional imagery. The course provides students with foundational skills and techniques to construct and analyse two dimensional images.

293127 Explorations in Colour and Context 15 credits

This course provides students with the foundational knowledge and skills to understand and apply colour in their creative practice. Students will experiment with mixing pigments in analogue and digital environments and consider colour's cultural, communicative, and evocative potential.

293453 Integrated Design Research and Development 30 credits

Using integrated design strategies, explore and apply methods, processes and practices through a research investigation that incorporates diverse design approaches. Students will undertake advanced research on a project of their choice.

293454 Integrated Design Research Project 45 credits

Realise and manifest a research-led independent project that communicates integrated design strategies and methods.

293455 Integrated Design Studio Project 45 credits

Realise and manifest a research-led independent project that communicates integrated design strategies and methods.

293701 Prototype and Synopsis 30 credits

Students prepare an early prototype and synopsis or equivalent concept that is relevant to their creative endeavour. This culminates in the preparation of a proposal for the Major Project.

293702 Commercial Viability 15 credits

An exploration of approaches to commercialisation that are intrinsic to professional practice in creative disciplines, in this course, students learn how to create an effective value proposition as part of their creative strategy. Students learn research methodologies, including market and competition analysis, to test market viability via theoretical tools relating to new ideas and innovation.

293703 Contextualising Creative Enterprise Practice Part 2 15 credits

A further development of strategies and skills specific to creative enterprise, resulting in actionable insights that contribute to taking creative projects as close as possible to market. Students will be expected to demonstrate a plan, and execute appropriate stages, for the commercialisation of their Major Project.

293730 Critical Frameworks for Creative Practice 15 credits

An exploration of a broad range of cross-disciplinary approaches and critical frameworks that students can apply to critique and analyse their own creative practice. Students will learn to frame their creative practice as part of an ideological/artistic movement and develop reflexive and analytical skills through engagement with texts and case studies.

293731 Contextualising Creative Enterprise Practice Part 1 15 credits

An exploration of advanced critical and enterprise frameworks, and ways they may be applied to creative practice. Students work towards a proposal of a plan to take their Major Project to market, along with a text through which their Major Project is critically framed.

293732 Creative Practice Research Methods 15 credits

Students will advance their understanding of approaches to creative practice research, methods and theory in relation to their specific practice orientation.

293810 MCE Thesis Project 90 credits

In this course students produce a creative work through practical, critical and technical enquiry.

293811 MCE Thesis Project Part 1 45 credits

In this course students produce a creative work through practical, critical and technical enquiry.

293812 MCE Thesis Project Part 2 45 credits

In this course students produce a creative work through practical, critical and technical enquiry.

294**Defence and Security Studies****294101 Introduction to Biosecurity 15 credits**

This course exposes students to a range of contemporary biosecurity issues and practices and incorporates a preliminary understanding of conceptual approaches to the management of pest and diseases.

294115 War and Society 15 credits

An examination of the nature of war and its impact on society. The course explains how contemporary armed conflict and the use of force affects the

world order, people and their communities, human behaviour, culture, and the environment.

294140 Military Power 15 credits

An introduction to military operations in a joint (interservice) environment. It examines the application of military power in conventional warfare across the air, land, maritime, joint, interagency and multinational domains.

294151 History of Warfare 15 credits

An introduction to the history of warfare on land, at sea, and in the air. The course examines how armed forces and the conduct of war have evolved in response to broad military, societal, political, and technological change.

294170 Introduction to Border Security 15 credits

An introduction to the concept of border security. It will explore security challenges and the implications of these to border security both internationally and for New Zealand. It will also look at the various border security agencies and their responses to managing border security risks with a focus on interagency collaboration, risk management and the impact of policy.

294180 Introduction to Security Studies 15 credits

An introduction to contemporary security studies focusing on traditional and non-traditional security challenges and the ways in which security is understood and conceptualized in security studies discourse.

294201 States, Borders and Resource Security 15 credits

This course examines the dynamics of states seeking to secure resources for their own requirements, alongside the need to sustain and protect global resources such as oceans and the poles.

294202 Human Security 15 credits

This course explores the theory and practice of security from multiple perspectives including individual, community, social, economic and environmental.

294215 Global Defence Challenges 15 credits

An examination of emerging and re-emerging defence challenges within the global environment, in particular their impact on the character of contemporary warfare and the employment of military forces.

294245 Irregular Warfare 15 credits

The theory and conduct of irregular warfare including in joint (interservice), combined (multinational) and interagency environments, and incorporating both historical and contemporary case studies.

294255 Conventional Warfare 15 credits

An examination of the theory and conduct of contemporary conventional warfare by studying the combat and non-combat use of military forces within joint (inter-service), combined (multinational) and interagency environments.

294272 Intelligence in the Security Environment 15 credits

This course provides a critical examination of intelligence focusing on the security environment. It looks at contemporary global and New Zealand-specific security risks, the intelligence cycle, and intelligence models that collect and analyse information to produce intelligence products that inform decision making.

294280 Security and Diplomacy 15 credits

This course examines the nexus of security and diplomacy and the related theoretical and explanatory approaches with a particular emphasis on the Asia-Pacific region.

294301 Legacies of War 15 credits

This course explores the legacies of war remaining after war and violent conflict ends, using case studies to examine the social, cultural and political responses to those legacies.

294304 Cyber and Information Security 15 credits

This course examines the threats posed by Cyber Crime, Cyber Terrorism, Cyber Intelligence, Cyber Infrastructure and Cyber Warfare to individuals, organisations and government agencies. Studies include the origins of threats, the evolution of technologies, the role of the state in offensive and defensive applications, and ethical considerations.

294325 Contemporary Peace Operations 15 credits

A critical examination of the theories, concepts, evolution, and contemporary practice of peacekeeping (including peace-making, peace support, and

humanitarian interventions) with application to the regional and global environments.

294350 The History of Defence and Security Intelligence 15 credits

A study of defence and security intelligence from ancient times through to today, with emphasis on the evolution of intelligence organisations and activities, the impact of technological advances, and the wider political, social and ethical issues surrounding its practice.

294381 Terrorism and Political Violence 15 credits

This course critically explores the concept of 'Terrorism' and related forms of political conflict and violence. New Zealand's understanding and responses to the phenomena labelled as 'terrorism' will be a key aspect of the course. The course will also address such substantive issues as the how non-state actors engaged in political conflict and violence fund their activities.

294382 Advanced Biosecurity 15 credits

This course provides an advanced exploration of biosecurity from a social science perspective and exposes students to a range of contemporary biosecurity issues and their management.

294701 New Zealand National Security 30 credits

A study of security theory and the domestic and international factors affecting New Zealand's strategic environment.

294704 Command, Leadership and Management 30 credits

An advanced study of the interrelated components of command, leadership and management with an emphasis on how these are applied in the contemporary security environment.

294709 Terrorism 30 credits

This course is an advanced study of terrorism, violent extremism and radicalisation. It critically examines the various theories, concepts and typologies of these phenomena, as well as response options and the challenges they pose in the contemporary international security environment.

294711 Theories in Defence and Security 30 credits

Advanced theoretical thinking in Defence & Security Studies drawing from International Relations, Conceptualisations of Power, Ancient and Modern Conceptualisations of War, and Human Security, Ethics and Identity. Students will select and apply one of the theory sets to a case study in order to develop the analytical skills for advanced research in the field of defence and security.

294712 Economic and Environmental Security 30 credits

This course offers an in-depth exploration and critical examination of contemporary environmental and economic security issues using theoretical analyses of case studies to propose alternative options for negotiating and/or governing wide ranging complex security issues.

294713 Counter-Terrorism 30 credits

The course provides an overview of international Counter-Terrorism policy, strategy and operations as context for considering the challenges around implementing Counter-Terrorism operations and policy analysis in the New Zealand.

294714 Applied Security Planning Exercise 30 credits

An applied professional practice course that seeks to apply the NZ whole of government problem solving framework to develop potential solutions to evolving security challenges.

294715 Asia-Pacific Security Environment 30 credits

An advanced study of security theory and domestic and international factors affecting the Asia-Pacific security environment with emphasis given to strategic, national security and defence policy in the region

294716 Securing Mobility in an Uncertain World 30 credits

This course is an advanced study of the dynamics of mobility and security in a globalised world. Mobility is central to the movement of goods, people, bio-organisms and ideas around the globe. The course will equip students with methodological tools to deconstruct the dynamics of mobility and construct solutions.

294717 Human Security in Application 30 credits

This course examines critical analysis and application of human security in national and international contexts. This would allow the participants to understand and engage in a wide range of theoretical studies and practical projects on human security.

294720 Security Concepts and Structures 30 credits

This course develops core conceptual and structural understandings of the study of security. It outlines the philosophical frameworks underpinning the international security environment with particular attention given to foundational challenges in defence, terrorism, intelligence, regional security and border and biosecurity. Exploring these challenges provides a basis for examining a diverse range of international security factors, and evaluating the major ethical implications of security issues and responses.

294741 Intelligence in the International Security Environment 30 credits

An analysis of intelligence in the international security environment, focusing on key concepts and methodologies of intelligence gathering and analysis, the intelligence cycle, and analysis of applied intelligence in investigations and detection.

294744 Intelligence Operations 30 credits

This course provides a critical analysis of security intelligence operations, utilising research and observations from selected case studies to understand the changing nature of intelligence and critically appraise the role of intelligence in national and international security operations.

Defence and Strategic Studies

294798 Research Report (30) 30 credits

294799 Research Report (60) 60 credits

Defence and Security Studies

294820 Applied Security Research Project 60 credits

Students undertake a research project that is relevant to and builds on their professional experience in international security.

294873 Research Report Defence and Security Studies (60) 60 credits

294881 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

294882 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

294883 Thesis 90 credits

A supervised and guided independent study resulting in a published work.

294891 Thesis 90 Credit Part 1 45 credits

A supervised and guided independent study resulting in a published work.

294892 Thesis 90 Credit Part 2 45 credits

A supervised and guided independent study resulting in a published work.

294894 Thesis 120 Credit Part 1 60 credits

A supervised and guided independent study resulting in a published work.

294895 Thesis 120 Credit Part 2 60 credits

A supervised and guided independent study resulting in a published work.

294899 Thesis 120 credits

A supervised and guided independent study resulting in a published work.

294900 PhD Defence and Security Studies 120 credits

295

Business

295700 Examining Business Dilemmas 30 credits

This course delivers a comprehensive examination of business dilemmas. It connects theory around globalisation, governance, strategy, and performance to practice, in order to conduct rigorous applied investigations and solve problems.

Business

295701 Managing Financial Decisions 15 credits

Critical examination of the context, process, and implications of integrated management of financial decisions at an executive level.

295702 Applied Global Governance and Responsibility 30 credits

A reconciliation of global best practices in governance and ethical decision-making with corporate reality, and including a practical assessment of boards in varied organisational structures and settings.

295703 Portfolio I - Global Management 15 credits

A collection of reflective evidence-based learnings in contemporary work environment/s.

295704 Portfolio II - Global Leadership 15 credits

A collection of reflective evidence-based learnings in relation to leadership practice in contemporary work environment/s.

Business

295705 Engage, Motivate, Persuade: Global Leadership Communication in Action 15 credits

Students will develop practical and critical skills in key facets of effective executive communication, including persuasion, motivation, and responding to disparate views. Students will develop their understanding of their own communication style and develop skills in planning and delivering impactful presentations in diverse contexts. Practical insights into gaining and retaining attention and responding to resistance will be developed.

296

Concept Design

296157 Concept Design 1.1: Imagine 15 credits

In this studio course students will be introduced to creative and analytical thinking skills, idea generation and visualisation central to concept design as a practice. They will begin to acquire specific techniques, skills and processes for investigating and responding to imagined characters and stories through iterative drawing, referencing and digital painting.

296158 Concept Design 1.2: Worldbuilding 15 credits

In this studio course, students will experiment with creative and analytical thinking skills, idea generation and visualisation central to concept design as a practice. They will develop specific techniques, skills and processes for investigating and defining worldbuilding techniques through storytelling and the creative practice of iterative digital modelling, prototyping and digital matte painting.

296263 Concept Design 2.1: Character and Environment 15 credits

In this studio course, students will explore and articulate creative responses to design challenges through critical awareness of character and environment design, and production. Students will develop and apply core 2D and 3D concept design skills, processes and techniques to create original character and environment designs for an entertainment license.

296264 Concept Design 2.2: Prop and Creature 15 credits

In this studio course, students will explore and articulate creative responses to design challenges through critical awareness of prop and creature design and production. Students will develop and apply core 2D and 3D concept design skills, processes and techniques to create original prop and creature designs for an entertainment license.

296265 Concept Design 2.3: Visualisation 15 credits

In this studio, students will collaborate to explore and articulate the relationship between narrative and design for an animation or game design context. Students will engage critically through tone, genre and aesthetic studies, applying these through their creative responses using core concept design techniques. The final output will be a curated presentation of these finished ideas with consideration of both audience, client and medium.

296266 Concept Design 2.4 Design for Fabrication 15 credits

In this studio, students will explore the design process from concept through to fabrication. Students will critically engage with the role of designer and fabricator using core concept design techniques, methods of manufacture,

digital and physical fabrication techniques, and production drawings to communicate concept intention and realisation. The design will be resolved in the form of a tangible output.

296358 Concept Design 3.3: Developing Imaginary Worlds 30 credits

Students will use worldbuilding and storytelling techniques to generate an original entertainment property that examines a contemporary wicked problem through a Science Fiction or Fantasy lens. Through the development and realisation of an advanced concept design project students will develop an understanding of the culture, ecosystem, technology and inhabitants of their world.

296367 Concept Design 3.1 Concepting Film and Animation 15 credits

In this studio course, students will develop a proof of concept design proposal for a given text through the comparative lens of Concept for Film and Animation. Students will establish a critical position through individual and collaborative creative exploration and articulation to expand on concept design concepts, techniques, skills and processes in the production of their creative work.

296368 Concept Design 3.2: Concepting Game and Location-Based Experience 15 credits

In this studio course, students will develop a proof of concept design proposal for a given text through the comparative lens of Concept for Game and Location-Based Experience design. Students will establish a critical position through individual and collaborative creative exploration and articulation to expand on concept design concepts, techniques, skills and processes in the production of their creative work.

296453 Concept Design Research and Development 30 credits

Application of research methods and processes to investigate social, cultural, aesthetic and technical issues and strategies in an approved concept design project.

296454 Concept Design Research Project 45 credits

Application of research to the development and production of an independent concept design project.

296455 Concept Design Studio Project 45 credits

Development and realisation of an advanced concept design project.

297

Data Science

297101 Statistical Data Science 15 credits

An introduction to computer programming and statistics for transforming, visualising and modelling data to discover information and support decision making. A practical approach to analysing New Zealand data includes data cleaning, statistical summaries, data wrangling, visualisation and predictive modelling. Includes an exploration of the statistical ideas of sampling, probability and inference as well as modern programming tools emphasising reproducibility.

297201 Data Wrangling and Machine Learning 15 credits

An introduction to the data science workflow involving the acquisition, processing, transformation and integration of data from disparate sources having inherently different data structures, from which actionable insights can be extracted. Entry-level machine learning and statistical techniques for analysing and extracting knowledge from data will be covered. Particular emphasis will be placed on attaining competency in using a high-level programming language for conducting data-driven problem solving and appreciating the necessary agility such tools afford.

297301 Applied Machine Learning and Big Data Processing 15 credits

An in-depth exploration of methods for developing intuition and insights about data that enables effective problem formulation and its solution through data-driven methods. A broad range of advanced machine learning and data mining algorithms will be used to build predictive models from real-world contexts. A particular emphasis will be on developing data-products, rapid prototyping and effectively communicating their value through visual storytelling and interpretable summaries. Practical skills for processing large datasets will be taught.

298

Māori Creative Arts

298157 Toi Ātea 1 15 credits

An introduction to the development of personal forms of expression through an engagement with the values, concepts, traditions, art/design forms and structures of the whare whakairo.

298160 Mātauranga Toi Māori 1: Māori Practices as a Māori Creative Practitioner 15 credits

This introductory course provides students with a foundational understanding of customary practices and values within Te Ao Māori and their relevance in contemporary Māori creative practice. Through a combination of theoretical exploration and practical engagement, students will gain insights into the cultural context shaping Māori creative expression and its significance in fostering personal and communal growth.

298260 Mātauranga Toi Māori 2: Māori Creative Practices and Cultural Continuity 15 credits

Building upon the foundational concepts introduced in Māori Practices as a Māori Creative Practitioner, this course delves deeper into the intricate relationship between Māori creative practices and cultural continuity within Te Ao Māori. Through an advanced exploration of theoretical frameworks, hands-on creative projects, and community engagement, students will further refine their understanding of the nuanced role of Tikanga Māori in shaping contemporary Māori creative practice.

298263 Toi Atea 2 15 credits

The development of individual work that grows out of the investigation of a select range of Māori concepts, art forms, imagery, values and approaches that reflect a Māori world view.

298330 Cosmological Narratives within Māori Creative Expression 15 credits

This advanced-level course delves into the intricate relationship between Māori cosmological narratives and their dynamic manifestation within contemporary Māori creative expression. Through an interdisciplinary exploration that encompasses art, design, music, theatre, and dance, students will analyse the evolving role of cosmological narratives, connecting traditional wisdom to modern artistic innovation.

298360 Mātauranga Toi Māori 3: Creative Innovation and Community Leadership 15 credits

This course propels students into the realm of Māori Arts Innovation and Community Leadership. By synthesizing foundational knowledge with advanced theoretical frameworks, innovative artistic projects, and community leadership principles, students will refine their skills as Māori Arts Practitioners and actively contribute to the evolution of Māori arts practices within a contemporary context.

298367 Toi Atea 3 15 credits

Developing visual responses to the exploration of issues (social, political, environmental, global) significant to Māori people and their communities.

298730 Māori Research Methodologies for Creative Practice 15 credits

Students will consider tikanga and methodologies relevant to their own creative practice, which may incorporate the use of customary and/or new technologies, innovations, and knowledge. This will include developing an understanding of tikanga, ethics and accountabilities around the use of mātauranga toi Māori, mātauranga-ā-iwi, mātauranga-ā-hapū and mātauranga-a-whānau in the development of their own creative outputs. Students will be supported to locate and articulate their own creative practice in a continuum of mātauranga toi Māori.

298753 Toi Atea 4 15 credits

An advanced course to focus and refine visual language and personal tikanga through negotiated projects that explore topics of direct reference to Māori people and their communities.

300

Te Reo Māori

300110 Te Reo Whakahoahoa: Socialising in Te Reo 15 credits

An introduction to elementary Māori language structures, Māori terminology and the correct pronunciation of the Māori language.

300111 Te Reo Kōnakinaki: Developing Te Reo 15 credits

Ko tēnei whakaakoranga reo Māori hei mahinga mā te tauria kua tīmata kē ki te ako i te reo Māori. Ko tōna tino kaupapa, ka whakamahia te reo hei reo whakawhitiwhiti whakaaro, hei reo kōrerorero i waenganui i te tangata. This course extends listening, speaking and writing competency to enable students to express themselves in Te Reo on a wide range of topics at an introductory level. Emphasis is on spoken and written Māori as a language of communication and interaction.

300209 Te Reo Torangapu: Political Te Reo 15 credits

An examination of the language of struggle this course develops the use and understanding of political discourse in Māori both spoken and written through the use of text types associated with activism, essential customary and contemporary concepts, intermediate language patterns, and the use of oral genre such as proverbs and song to support political communication. He āta tūhura i ngā āhuatanga o te reo tohe te kaupapa o te pepa nei. Ka nui ake tō mōhiotanga ki te reo tōrangapū ā-waha, ā-tuhi mā te whakamahi i ngā momo kōrero e hāngai ana ki te mahi mātātoa, ngā ariā tūturu me ngā whakaaro hou, ngā takotoranga reo tau tuarua, tae atu ki ngā momo ā-waha pērā i te whakatauki, i te waiata hei tautoko i te whakawhitinga tōrangapū.

300210 Te Reo Kōrerorero: Discussing in Te Reo 15 credits

Nei rā te reo kōrero, te reo tuhituhi hei reo whakawhitiwhiti i roto i roto i te nohotahitanga a te tangata. Ka tirohia te takotoranga o te reo, ngā kupu kei te hāngai ki ngā kaupapa maha, otirā, ka tirohia ngā kīpeha pēnei i te kīwaha. Taught in te reo, this course emphasises the use and understanding of spoken and written Māori, focusing on the structure of the language, expanding vocabulary and using figures of speech such as colloquialisms.

300211 Te Reo Whakanakonako: Embellishing Te Reo 15 credits

Ka ākona te momo reo e ahu mai ana i te kawa o ō tātou marae e hāngai ana ki te tangihanga, ki te whakatauki, ki te pepeha, ki te kōrero pūrākau, ki te waiata tawhito. I roto i ēnei kaupapa kōrero katoa ka wānangahia te momo reo hei whakapakari i tō reo kōrero, i tō reo tuhituhi, i tō reo whakamārama. Ko ngā whakahaere katoa mō tēnei pepa kei roto i te reo Māori. Taught in te reo, this course examines te reo as a formal language associated with tangihanga, whakatauki, pepeha, korero purakau and waiata tawhito.

300310 Te Reo Whakanikoniko 15 credits

Taught in te reo, this course applies critical analysis to literature in te reo by authors and composers across a range of genres and disciplines. Students engage in creative composition and explore a range of literary techniques and processes, including editing, peer review and critical revision.

300311 Te Reo Papa: Strengthening Te Reo 15 credits

Tuatahi he ako i te momo reo e ahu mai ana i te moteatea-a-korero, korero purakau, me nga korero mo tetahi o ou na tipuna. I roto i enei kaupapa katoa ka wanangatia tenei momo reo hei whakapakari i to reo korero, to reo tuhituhi, to reo whakamarama. Ko nga whakahaere katoa mo tenei pepa kei roto i te reo Māori. Taught in te reo this course explores Māori poetry, tribal legends and writings about ancestors, linking Māori philosophies, idioms and metaphors with Māori as a modern oral and written language.

300312 Te Reo o te Marae: Karanga and Whaikōrerorero 15 credits

Taught in te reo, this course develops the language and skill of the formal mediums of karanga, whaikōrero and other genres, including karakia, waerea, tauparapara and poroporoaki. Students appraise and develop aspects of tikanga, style, form and structure.
